San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

As told in yesterday's paper the figures for building construction for the year 1913 amounted to \$32,845,561. This is more than 2½ million per month on the average. These figures compare favorably with 1912 for the total for that year amounted to \$26,179,116. It must be born in mind, however, that the 1913 figures embrace all construction within the city limits, including government work and state construction, while those of 1912 did not. Panama-Pacific construction also for the year amounted to \$6,018,373 so that everything considered private construction alone amounted to less than in 1912. However, the total amount represented by building construction compares favorably with former years and if conditions have not been so prosperous it has been as much the result of an overcrowded condition of the building business as of anything else.

Figures for December amounted to \$2,534,068. This divided as follows: Private construction \$1,050,636 P. P. E. contracts..... 1,244,684 City and County..... 108,952 U. S. Government work..... 129,796 Compared with other years the totals for December during the last ten years is as follows.

December, 1904\$1,282,419
December, 1905 914,231
December, 1906 414,934
December, 1907 2,116,940
December, 1908 3,223,201
December, 1909 2,359,575
December, 1910 1,169,131
December, 1911 1,218,622
December, 1912 2,106,235
December, 1913 2,534,068

While comparative figures show a good deal of variation during the past ten years the general average outside of the rebuilding period ranges under two million dollars. While the figures for 1913 include all work even the amount for private construction comes up with an average year.

The general impression is that 1914 will be a better time. The tariff and currency measures are out of the way. Definite legislation has been passed and as soon as the country can adjust itself to the new order of things better conditions will prevail. It may be three months or it may be six, but San Francisco is sure to be made the financial center for the west under the new currency measure. So that there will be a more independent source of financing enterprises in the future and we will not have to go to Wall street to get money in the future.

Altogether the year has not been a bad one. From month to month the figures are as follows:

January\$2,655,990
February 2,736,813
March 3,576,376
April 3,327,584
May 2,816,935
June 2,830,306
July 3,826,998
August 2,844,945
September 2,450,589
October 2,152,909
November 1,092,048
December 2,534,068

Not so bad a showing considering the business and financial conditions and that the year ended in the number that has been considered unlucky since the memorable Thirteen sat down at the Last Supper.

"Now the New Year reviving old Desires,
The thoughtful soul to Solitude retires.
* * * * *

Come, fill the Cup, and in the Fire of Spring

The Winter Garment of Repentance fling:

The Bird of Time has but a little way To fly—and Lo! the Bird is on the Wing."

So sang old Omar in his Epicurean philosophy. While the New Year may revive in us the old desires for better times and prosperous conditions the fact remains that contemplation of past disasters or other days do not get us anything only insofar as they furnish precepts and examples and inspiration for things to come.

So with the New Year the "Builder" wishes its readers a prosperous time. May you not lose your nerve! May past misfortunes not disarm you; May past successes not make you overconfident or uncharitable; And may the New Year bring renewed hope and more fair and equitable conditions.

The city of Houston, Tex., is sending out this advertisement:

"A perpetual bonus to manufacturers and merchants is offered by the city of Houston, Tex., by its system of exemption from taxation. Personal property, such as cash, household furniture and evidences of debt are totally exempt from taxation. The Houston plan of taxation contemplates that merchandise, machinery of manufacturers and all other improvements upon land shall be assessed at only 25 per cent of the value. Land is being assessed at a fair value. Take your money and brains to Houston and get the full benefit of all you create by your industry and enterprise."

Vancouver tried this same plan and liked it so well that it finally exempted all improvements from taxation of any sort on the ground that to the best of its ability the community should re-

move any obstacle to the construction of improvements. This is in line with the idea of the single taxers and is the plan proposed by the League for Home Rule in Taxation. It is effective advertising for a city.

The Chronicle is working overtime criticising the Harbor Commission for building wooden piers and docks instead of concrete ones. To read the editorials that are daily being handed out to the public one would think that the present Harbor Board had never constructed a concrete or permanent pier.

Among the first acts of the present board was to rebuild some of the piers that were presumed to be concrete that had been constructed by the former board. Since that time there have been constructed more concrete docks and there are more in process of construction than were ever constructed by any of the predecessors of the present board. And the wooden wharves are being constructed as emergency cases to take care of the crowded shipping that is increasing faster than dockage facilities increase.

The places where wooden wharves are being constructed are places where it is almost impossible to construct permanent ones, except at a great expenditure of money and a long delay. The ones now under construction will pay for themselves before the others could be constructed. While the Chronicle is criticising the Harbor Board for constructing wooden wharves it would have a double criticism were the board to delay the construction until such time as permanent piers could be constructed in the places where the wooden docks are being built. Some places on the water front present great difficulties of construction on account of muddy bottom and the sweep of the tides. The present piers being constructed of creosoted piles were started only after a consultation of the engineer for the Harbor Board and the Board of Engineers of the Chamber of Commerce. They are supplemental to the dockage facilities already provided for shipping. And for this action the Chronicle finds an opportunity to distort a set of facts and criticise really effective work by suppressing the truth of the situation.

Mr. August Belmont received 4½ millions for "financing" the New York subway. In the matter of a public improvement of that sort why should the public pay anybody for his financial influence? And why should the city not build it itself? Somebody has to pay the promoters' fees and has to pay the holders of watered stock their dividends. It goes in increased rents and inflated on only one person and that is the patron of the road. The people pay the tax in the end always. Only in the case of the private corporation they don't see it and they don't see the enormous over charge they pay for.

It is said that John M. Eshelman has been tendered the appointment as commissioner on the Interstate Commerce Commission made vacant by the death of John H. Marble. This is a compliment to Eshelman and a credit to President Wilson. For no doubt the President could find many men in his

own party that would fill the office well but the work of the California Railroad Commission has stood out so conspicuously that the President could not but take notice of its effective results. In this the President and Secretary Lane have shown themselves to be in line with Progressive principles. They are seeking to get results by placing efficient men in office in the places where they are needed—men who can be depended upon to take the initiative in constructive measures rather than being placed in a position to explain as was the case of Ballinger and others under President Taft.

The Forest Service has a fire lookout in the Sitgreaves National Forest in Arizona. The tower is built entirely of logs and projects 115 feet in the air. It was built by the rangers from the logs at hand and without the aid of any of the modern hoisting devices. The only means they had for hoisting were the cow ropes they had at their saddle horns and such block and tackle as was available. Under these conditions they have constructed a tower that represents a great deal of labor and ingenuity.

Aviator Beachy is to fly in the Machinery Bldg. the great building of the Exposition Grounds. While this is an enormous building it limits the aviators for maneuvering on every side. Beachy is a wizard with his machine. But the law of gravity is always working and it is only a question of time till he tempts fate once too often.

Whatever conflict there may have been in the predictions of the weather man the fact remains that we have received plenty of rain. Unprecedented precipitations have occurred in various parts of the State. A report states that at Calistoga nine inches of rain fell during a period of twenty-four hours. And in other places throughout the State there has been a generous, if not destructive, downpour during the past week.

Such a plenitude of rain does not immediately hasten building operations. But it means good for the country in the end and that means good for all. It emphasizes the need of conservation, in retaining the timber lands of the mountains and in impounding the flood waters not only that they do not do damage by being liberated too quickly, but that they be stored for future use.

A CHRISTMAS FABLE OF TWO BROTHERS.

Once upon a time there were two brothers. The first was a dyspeptic person who at Christmas time presented his little nephews and nieces with helpful books and requested them to be very, v-e-r-y careful of the precious volumes. Wherefore they hated Uncle Addison with a great hatred. The other brother was an old bachelor who bestowed upon his small kinsmen stuff and objects with which they could make hoarse noises and told 'em to wade in. You angry little whelps, and pig till you burst, and beat and batter till you split your eardrums, and break and shatter till you reduce the junk to powder, and otherwise enjoy yourselves. And all his little relatives rose up and in one voice called Uncle Bill blessed. As the feller said when he

received a snake in a bottle of alcohol, "It is not so much the gift as the spirit in which it is tendered."

THE GREAT RAILWAY TUNNELS OF THE WORLD.

The world's greatest tunnels are to be found in Europe, and a brief summary of these in the Engineer shows that the greatest is the Simplon which is 12½ miles in length. Two, the St. Gothard and Lotschberg, are over 9½ miles in length. The Mont Cenis is a little over 7 miles in length. The Arlberg, in Austria, is 6½ miles long. There are four tunnels between five and six miles in length, five between four and five miles in length, seven between three and four miles, and sixteen tunnels that are over two miles long. The longest tunnel in this country, the Hoosac, is four and one-third miles long.—Scientific American.

GIANT COFFER-DAM FOR THE EQUITABLE BUILDING.

A vast reinforced concrete monolithic foundation is being built entirely around the area upon which will be erected the new Equitable Building in New York city, a structure which will contain one million square feet of rentable floor space, and will tower aloft to a height of thirty-six stories. The coffer-dam will be a solid concrete wall, six feet broad and eighty feet deep, extending eighty feet to solid rock. This will be the largest once building yet constructed. It will weigh over 200,000 tons as against the weight of 102,000 tons of the Woolworth Building, 188,500 tons of the Municipal Building, and \$2,580 tons of the Singer Building. The steel frame work alone will weigh 45,000 tons, as against 25,000 tons required for the Woolworth Building.—Scientific American.

WASHINGTON'S OLD SURVEY FOUND CORRECT.

In protecting the headwaters of navigable streams under the forest-reserve law, the government is surveying lines in the Appalachian Mountains where George Washington ran his famous boundaries for Lord Fairfax in pre-Revolutionary days. In 1751, Washington, then 19 years of age, surveyed the line which was to divide Augusta and Frederick Counties, Virginia. According to the organic act for the formation of these counties, it was required that the line should run straight from the head spring of the Hedgman River, one of the sources of the Rappahannock, to the head spring of the Potomac. It was first necessary to get the approximate course by building bonfires on the intervening high points. Then, starting from the top of the Massanutten Mountains, the line was run straightaway to the northwest. In what is known today as West Virginia a large rock marks the southwest corner of Garrett County, Md., and the southeast corner of Preston County, W. Va. This is known as the Fairfax Stone, and is one of the land marks mentioned in Washington's notes. Washington, of course, used a simple compass, yet the new government survey, made with high-power transits and all the refined and accurate methods of modern surveying, has found but little variation, so carefully was the line run originally

Some Troubles Of The Estimator.

C. M. Watkins In the Wood-Worker,

So much might be said on this subject that it is a difficult matter to select the proper starting point. Almost any planning mill man can look back and recall many occasions when it seemed to him that there could not possibly be another business which offered so many and various opportunities for trouble, or which furnished so few reasons for continuing. Personally, I think that fully three-fourths of all the men I know have at some time or other told me that their own business was absolutely the worst ever invented, so it does not seem altogether strange that we should so regard our own business.

I think that perhaps one of the most fruitful sources of trouble for the planning mill estimator lies in the almost complete lack of knowledge of mill work and what the term implies, on the part of the building public. Architects seldom take the trouble to inform themselves of the customs and methods in use in the particular locality in which a proposed building is to be erected. Indeed, more often than not, mill work, glass and glazing, stair work and carpenter work, are all jumbled together and specified under one heading, leaving each subcontractor to pick out his own branch of the work, and make his estimate thereon as best he may.

Then the owners, particularly in residence work, are absolutely ignorant of materials and processes required in woodworking, and are unable to give the architect any clear idea of their wishes in regard to the interior finish of the building. The architect, to save trouble and expense for himself, simply puts the whole matter up to the mill, leaving the estimator to guess, from imperfect description, what is required. Seldom indeed are details furnished with plans, and the only guide of the estimator is his knowledge, gained from past experience, of how each individual architect is apt to detail his work. And then the details are quite apt to be something entirely different from what was anticipated.

I have now in mind a certain architect who always specified box frames for brick walls about as follows: "Box frames shall have no jamb linings, but a wide stop, which shall be rabbeted to fit over jamb, and shall be wide enough to extend from sash to finished plaster, and the interior trim shall be nailed direct to this stop." Of course, any practical mill man will see at once that if these specifications were followed strictly it would be impossible to replace a broken sash cord without first removing the finish and jamb lining, and quite likely tearing off a great deal of plaster in the process. Yet the estimator is expected to figure on work of this character, and to know whether or not this architect will listen to reason and allow the work to be done as it should.

Another frequent cause of trouble is a clause in the specifications which

reads something like this: "Anything shown on the plans and not specified, or specified and not shown, shall be furnished in the same manner as if both shown and specified. Should anything be required to make a complete and finished job, which is neither shown nor specified, the same shall be included." Almost invariably, where this clause occurs, the plans are poorly drawn, or some elevation or plan which is necessary is not furnished, so that the estimator has nothing to do but guess. If he guesses too much he loses a job, and if he does not guess enough he is apt to lose money for his firm. This is more apt to be the case, where a blanket proposal to furnish mill work according to plans and specifications is made, than where proposals are made by list only, with the distinct understanding that nothing which is not shown on the list is to be furnished. But in either case it means trouble for the estimator.

Then there is something else, which is perhaps less a trouble than a fault. This is the almost universal lack among estimators of the quality known as "salesmanship." The expert knowledge required of an estimator renders it absolutely necessary that he should be, first of all, a good mechanic, and a good mechanic is seldom a good salesman. There have been some notable exceptions to this rule, and they but serve to prove my statement. If we should all be perfectly honest with ourselves I think we would admit that our prime thought, when figuring a job, is that we must, by fair means or foul, beat the other fellow. We must make our bid the lowest or we will not get the order. And so obsessed by this idea do we become that we are quite apt to overlook the question of profit.

It can be safely stated as a truism that if we make our prices low enough we can secure all the business we can handle, but true salesmanship consists in not only getting business, but getting a profit. I have known estimators sending out letters with their bids, telling the customer that if the bid was not low he could deduct 10 per cent, hoping thereby to get the business and make a great showing at the end of the year. This point is so important that I want to emphasize it, and I honestly believe it is the largest single factor which has to do with the great variations in mill bills. I have known—not one, but many—instances where the high bid was more than twice the low one, and I believe this to be due, in great measure, to the cause mentioned above.

Another trouble, which lies with the estimators themselves, is the one which was mentioned in The Wood-Worker some months ago, namely, that we are apt to overlook some thing in taking off our items. There is a variety of reasons which help to account for this, chief among which, perhaps, is the great number of things the average estimator is compelled to carry in his

mind. With perhaps six or seven contractors saying they must have bids at once, or within twenty-four hours, and an equal number of contracts hanging fire, with all of which he must keep in close touch to avoid being "sold out," he hurries through the specifications, hurries over the plans, and does not take time to go back and check, trusting to luck and his past experience to prevent his making mistakes, because he has to get items from all the other plans and get back to his office and figure all of them. Then, again, he may forget to figure a floor, or the openings on one elevation (as I did once), because he wants to get home to supper. Needless to say, I got that job, and wished I had not.

I once heard a mill owner make the assertion that all such errors were due solely to carelessness, but I believe him to have been decidedly in the wrong. I have been "called down" on several occasions for failure to estimate on certain plans, and upon putting up the plea that some had to be passed up on account of lack of time to take care of all of them, have been told that I should not allow myself ever to lack time to do anything. With the bosses driving and the customer kicking because his bid comes in late (in the same breath with his kick he will tell you that it was too high, anyway), is it any wonder that we make mistakes? The real wonder to my mind, is that we do not make more.

SHORT COURSES IN ENGINEERING AT IOWA STATE COLLEGE.

The Iowa State College this winter will launch a new field of activity unique in the field of instruction by state institutions. This year for the first time in its history short courses along engineering lines will be given. There exists in the state a large body of citizens engaged in the state's industries who are unable to conform to or to derive the direct benefit which they need from the formal educational plan. These short courses make manifest on the part of the state institution an effort to reach these citizens in an effective way with practical, condensed up-to-date instruction in engineering and industrial subjects. The short course in engineering is designed to do for Iowa's industries what the short course in agriculture has long done for agriculture. The session is December 29, 1913, to January 10, 1914. By running short courses in winter the state's educational plant is utilized to maximum efficiency. The short course falls at the annual holiday recess and the instructional force is free to give its undivided attention to the short courses. In addition to this at no other time could rooming accommodations be had for the large number of short course students.

There are two general classes of instruction which this work is designed to provide: (1) to present the prob-

lems of engineering and industrial lines which the rapid advance of the industrial era keeps pushing into the foreground for solution, and (2) to provide a definite, systematic plan for the imparting of technical information of a fundamental nature to men who have no such means now available other than what they can "pick up" from trade and engineering journals and association conventions. In developing both fields the instruction is condensed for the busy man. The courses given are intense and specialized, their sole purpose being to crowd the maximum amount of concrete and definite plan of conducting the work is by lectures and demonstrations, allowing opportunity for discussion and recitation.

The winter courses announced for this year are offered in response to an insistent demand expressed for instruction for clayworkers, cement users and road builders. In clay work, in addition to elementary instruction, there will be taken up problems with which the clayworking industry is confronted, such as lamination, scumming and black coring. The work in cement will take up in detail the questions of materials, aggregates and testing, while considerable emphasis will be placed on the making of concrete. The road builders' course is given for the benefit of the practical roadmaker and is of value to those actively in charge of road gangs and others interested in the subject of good roads. It will take up the matter of drainage, foundation and road construction, material for road construction and organization of road-building forces.

In addition to the courses in clayworking, cement use and roadmaking, there are offered other attractive courses dealing with subjects of related engineering interests in which in these days of the application of power to every branch of activity nearly every layman has some direct vocational interest or else is interested in them as a "hobby." They include courses in gas engines, with opportunity for practical operation of the gas engine and automobiles, steam engines and tractors, power plants, drainage and the applications of electricity.

While the short course is an established institution at Iowa State College, the form of the engineering short course in the future will be largely determined by the demand of Iowa's industries and the response met with in the courses offered. The college is working in co-operation with all forces for the upbuilding of Iowa in adding to the growth of industry by the supplying, through its Department of Engineering Extension and by the winter short courses, practical instruction for the industries of the State. The short course constitutes one more component part in the plan for the provision of practical instruction in the trades and industries of the state and supplements the industrial classes and the correspondence study courses already offered. By stimulating the growth and development of such educational forces as these there will be opened to every boy or man in the state an opportunity to get the education he needs in his business or his trade and make him a more valuable man to himself and to his community.

Clayworking.

Ten Periods—Daily, 9 to 10 A. M.

The following outline of the work in clayworking is a very full schedule, involving as it does the fundamental principles of a die design manufacture, drying and burning of clay wares. It may easily be possible for the schedule to be shifted to give more time to one or two of the subjects to the exclusion of consideration of the others. Should the demand arise the decision will rest with the majority of the class.

Scumming.

Various kinds of causes. Effect of various drying and burning methods. Methods of elimination. Chemical precipitants.

Black Coring.

Definition of this phenomena observed in many Iowa clays. Its causes and methods of elimination.

Lamination.

Two kinds, "auger" and "die." The cause and effect on the burned product. Methods of elimination.

Scumming—Discussion.

Review of the subject in the light of the laboratory data obtained.

Black Coring—Discussion.

Review of this subject in the light of the laboratory data obtained.

Lamination—Discussion.

Review of this subject in the light of the laboratory data obtained.

Discussion Meeting.

Available for discussion of any phase of the above subjects at the option of the class.

Clayworking Laboratory.

Ten Two-Hour Periods—Daily, 10 to 12

Opportunity for extra laboratory or research work in addition to the exercises in the schedule will be cheerfully granted within the limits of the equipment on hand to all who desire it upon consultation with the instructor in charge.

Investigation of Scumming.

Determination of soluble salts in clay. Determination of proper precipitants to use. Making of brickettes to determine the most advantageous drying and burning conditions.

Laboratory Exercises on Black Coring.

Burning of brickettes of clay, showing this phenomena under various burning conditions, to arrive at the proper treatment for elimination of this difficulty.

Lamination.

The effect of different die construction on the flow of various clays through dies—using a plunger machine—and the effect on various clays of changing the distance between the auger and die, using an auger machine.—From the Clay-Worker.

THE PYRAMID OF CHEOPS.

A number of people, who have command of a volume of leisure hours, have repeatedly aired sagacious views regarding the possibilities of reconstructing the old pyramid of Cheops located in the desert of Egypt, with the application of concrete. This pyramid, erected on a square base, each side of which measures 748 feet, the total height is 454 feet; the pyramid covers an area close to thirteen acres. When this structure was erected it necessitated the employ of not less than 10,000 artisans for a term of thirty years.

This means a total of 900,000,000 working days.

The following approximate estimate of cost and material was made, which of course cannot be accepted as absolutely correct, for the necessary figures, such as transportation rates, exact labor cost at present and in the future, etc., are not available. The figures used in the estimate were taken from engineers and contractors notes who have been actively engaged in construction work in Egypt.

In the reconstruction of the pyramid are necessary 3,350,000 cubic yards of limestone, 150,000,000 cubic yards of sand, 2,500 cubic yards of granite and 2,500 cubic yards of polished granite. The cost of this material alone would be about \$50,000,000; then the labor must be added, for which it would take 40,000 men for 24,000,000 working days, meaning an expenditure of about \$30,000,000. For the excavation of about 2,600,000 cubic yards for foundations, transportations, such "small" items as the quarters for the laborers, sanitary facilities, etc., another large sum must be spent, so that the total sum will easily reach \$150,000,000. These are astonishing figures and have a tendency to bring to the reader's mind the question of "How did these Egyptians, centuries ago, build these enormous structures?" We sincerely hope that this structure will soon be reconstructed, using concrete blocks exclusively.—Concrete Era.

THE BEAUTIFICATION OF VIENNA.

The Vienna municipal boundary extends up the forest-covered mountain slopes to a height 1200 feet above the Danube quays. In this district a scenic highway is being formed, which, as it winds round the mountain slopes, with every turn reveals a new view of the great city, lying many hundred feet below. In the less hilly districts a garden road over 300 feet in width is planned, intersecting meadows and playing fields. The estimated cost is \$2,000,000, and the corporation passed the estimates without a single dissenting voice.

Concomitantly a building plan for the whole city has been sanctioned. The building area is divided into four zones. The first is central, where the maximum height permissible is four—or exceptionally five—stories. Certain streets are to be widened. Over 1200 houses which seriously hinder traffic have been scheduled. If owners agree to rebuild within the next ten years to the new frontage lines, they are exempted from municipal taxation for the next eighteen years.

In the second zone, houses may not exceed three stories; the third is reserved for factories and industrial purposes. In the last zone, houses are limited to two stories. Where the area is not yet built upon, they must be surrounded with gardens, not built on terraces. What these proposals mean from the point of view of public health for future generations may easily be imagined. In the boldness of its projects Vienna stands supreme.—London Daily News.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

BRIDGES AND DAMS.

TACOMA, WASH.—Bridge, Steel construction, \$375,000. Engineer, Holman, care of the Oregon-Washington Railroad and Navigation Co., Tacoma. Owners, Oregon-Washington Railroad and Navigation Co. Chief Engineer Holman states that soil borings for the foundations of the new steel bridge which is to span the waterway in Tacoma have been completed and found satisfactory. Construction will be started as soon as bids can be received. Figures will be opened for the work early this month. Plans and specifications can be secured from Chief Engineer Holman, Tacoma.

ROBERTS, IDAHO.—Bridge, steel and concrete construction. Cost not stated. Engineer, County Engineer, Roberts. Owners, Fremont County. All figures received for the construction of a steel and concrete highway bridge in Road District No. 1 have been rejected by the Board of Supervisors. Plans will be revised and new figures will be called for at once.

PORTLAND, ORE.—Bridge, steel and reinforced concrete, \$150,000. Engineers, Wadell & Harrington, Kansas City, Mo. The Interstate Bridge Commission has selected the above named engineers to design the new Pacific Highway bridge which is to be erected across the Columbia River. The exact site of the big structure and the type of design have not been settled upon. As soon as preliminary plans have been prepared the matter will be taken up with the War Department, after which will follow the preparation of working drawings. The engineer states that construction will require about sixteen months. Further mention will be made of the work.

Contracts Awarded.

SEATTLE, WASH.—Bridge reinforced concrete, \$80,000. Engineer, A. R. Cook, Tacoma. Owners, Northern Pacific Railroad. Contractors, Sound Construction and Engineering Co., Lowman Bldg., Seattle. Contract price, \$80,000.

TACOMA, WASH.—Bridges, 2, steel and reinforced concrete, \$100,000 and \$150,000 respectively. Engineer, A. R. Cooke, Tacoma. Owners, Northern Pacific Railroad. Contractors, Widdell Co., Mankato, Minn. Contract price, \$100,000 and \$150,000.

TACOMA, WASH.—Bridges, reinforced concrete. Cost not stated. Engineer Cook, Tacoma. Owners, Northern Pacific Railroad Co. Contractors, Sound Construction and Engineering Co., Lowman Bldg., Seattle. Contract price not stated.

CHURCHES.

SEATTLE, WASH.—Church, 1 story and base, frame, \$10,000. Architects, Wilcox & Sayward, Central Bldg., Seattle. Owners, Keystone Congregational Church of Seattle. Plans have been completed for a one-story church building, which is to be erected at the corner of 51st avenue and Keystone Place. The interior of the building will be finished in pine. The main auditorium will seat 300 people. Plans also provide for a pastor's study, Sunday school rooms and social room. Exterior will be covered with cement plaster on metal lath. Figures will be called for at once.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 5 or 6 story and base. Class C construction, \$75,000 to \$100,000. Architect, Frederick H. Meyer, Bankers Investment Bldg., S. F. Owners, Trowbridge and Livingston. This building will be erected at the corner of Post and Williams Place. The lot to be improved has a frontage of 75 feet by a depth of over 100 feet. The first floor will be arranged for a large lobby, office, amusement rooms and living apartments. Upper floors are to be divided into a large number of two and three room suites. Interior finish will be of pine, redwood, white enamel and hardwood. Oak floors will be used in the dining rooms and halls. Plans provide for steam heat, elevator service, a vacuum cleaning system and wall beds. All bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$20,000. Architect, John J. Foley, 46 Kearny St., S. F. Owner's name withheld. The building will be erected on 4th avenue near street and has been designed to contain twelve suites of three and four rooms and bath. Interior finish will be of pine with elm panels and oak floors. There will be a complete oil burning system and steam heat. Vacuum cleaning and a hot water system will also be installed. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. All apartments will be equipped with wall beds. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base will be used. Plans are complete and the work will be carried on by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, brick and steel, \$50,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on the north side of Bush street between Jones and Taylor and will have a frontage of 55 feet by a depth of 137½ feet. Plans show a total of 32 suites of two and three rooms besides a spacious lobby, office and amusement room. Interiors will be finished in pine, elm and white enamel. Lobby and office will be finished in white enamel and gold after the Austrian style. All suites will have wall beds and private baths. Bath rooms will be finished in tile with composition floors. Plans provide for steam heat, a hot water system and vacuum cleaning. Exterior of the building will be faced with red pressed brick trimmed with cast stone. Plans are being prepared.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$29,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected on the east side of Lake street, and

has been designed to contain a number of two, three and four room suites. Interiors will be finished in pine and elm panels with hardwood floors. There will be steam heat, vacuum cleaning system and hot water system. All apartments will have wall beds and private baths. Bath rooms will be wainscoted with tile and will have composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for shortly.

OAKLAND, CAL.—Apartment house, 3 story and base, brick and steel, \$60,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Dr. Ayres. This building will be erected at the corner of 14th and Oak streets, covering a considerable ground area. Interior has been arranged for suites of two, three and four rooms. All apartments will have private bath rooms and wall beds. Plans provide for steam heat, vacuum cleaning system and hot water supply. Interior finish will be of pine, elm panels and hardwood. Oak floors will be used in the halls and dining and living rooms. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are in the hands of the owner and he is now taking subfigures for the various parts of the work.

SALT LAKE CITY, UTAH—Apartment house, 4 story and base. Class A construction, \$180,000. Architects, Palister & Hills, Salt Lake City. Owner's name withheld. The building will be erected at the corner of East South and Temple streets, and will be fireproof throughout. The building will contain in the neighborhood of 120 suites of two, three and four rooms. There will be a complete steel frame, reinforced concrete and brick exterior walls, faced with pressed brick and terra cotta. Interior will be handsomely finished in pine and hardwoods. Oak floors will be used in the principal rooms. Plans provide for steam heat, elevator service, a hot water system and vacuum cleaning. Preliminary plans have been approved and working drawings are now being completed.

OAKLAND, CAL.—Apartment house, 4 story and base, brick and steel, \$75,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Dr. F. A. Baird. The building will be erected at the corner of Oak and 14th streets, covering a large ground area. Interior has been arranged for a number of two, three and four room suites. Interior finish will be of pine and hardwood with oak floors in the living rooms. Plans provide for steam heat, elevator service, a hot water supply and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance lobby and vestibule. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FACTORIES & WAREHOUSES.

NEWARK, ALAMEDA CO., CAL.—Warehouse, 1 story and base, brick. Cost not stated. Architect, A. L. Griffin. Niles. Owners, James Graham Mfg. Co., 331 Mission street, S. F. Plans for a large one-story warehouse, which is to be erected at the company's plant at Newark, have been completed and are now out for figures. The building will have metal window sash and frames and fireproof doors. No interior finish is specified. A cement floor will be used. Exterior of the structure will be faced with stock brick. Plans are complete and may be secured from either the architect at Niles or from the company's offices at 331 Mission street.

SAN FRANCISCO—Cold storage plant, 6 story and base, brick and steel. Cost not stated. Engineer, Charles Wallace, S. F. Owners, National Ice and Cold Storage Co., Postal Telegraph Bldg., S. F. This is the second large addition to the company's plant at Battery and Union streets. A new four-story building is now under construction and this will connect with the larger structure. When complete the building will furnish over one million cubic feet of refrigeration. Construction will be practically fireproof. Interior will be finished in pine. Plans provide for a large amount of special machinery, elevators, plumbing and electric work. Exterior will be faced with pressed brick. Plans are complete and segregated figures will be called for at once.

SILVERTON, ORE.—Factory, 1 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owner, L. C. Eastman. Plans have been completed for a one-story and basement reinforced concrete structure which is to be erected as an addition to the Silvertown Blow Pipe Co. The building will be 50x100 feet and practically fireproof throughout. Interior finish will be of pine. A cement floor, metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are in the hands of the owner, who is now receiving bids for construction. Figures will be opened on January 15th.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame. Cost not stated. Architects, Henry Geiffuss & Son, 46 Kearny street, S. F. Owner's name withheld. This work has been mentioned here before. The building, which has been designed for a store on the first floor and flats above, will be erected at the corner of Bryant and 16th streets. Interior finish will be of pine and redwood. There will be an open fire place in each of the living rooms. Bath rooms will have tile wainscot and composition floors. Store will be equipped with patent fronts. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,000. Architect, Charles Fantoni, 916 Kearny street, S. F. Owner, Angelina Cesana. The building will be erected on the west side of Mason street north of Pacific

and will have a street frontage of 22½ feet by 75 feet. There will be three modern flats of five and six rooms. Interiors will be finished in pine and elm panels. Some hardwood floors will be used. Each of the living rooms will have an open fire place with a tile mantel. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and shiplap. A pressed brick base will also be used. Plans are complete and figures are being taken.

Contracts Awarded.

SACRAMENTO, CAL.—Flats, 2 story and base, frame, \$4,750. Architect, none. Owners, R. Lauppe and A. Van Marino. Contractor, W. R. Saunders, 2810 I street, Sacramento. Contract price, \$4,750.

GARAGES.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete. Cost not stated. Architect, G. A. Applegarth, Cal Bldg., S. F. Owner, A. B. Spreckels. This building will be designed for a private garage and will be erected in the rear of the owner's handsome dwelling at the corner of Octavia and Washington streets. Included in the work will be the construction of large reinforced concrete retaining walls. Interior finish will be of a high class and similar to that of the owner's residence. Plans provide for steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for at once.

PORTLAND, ORE.—Garage addition, 1 story and base, reinforced concrete. Cost not stated. Architects, MacNaughton and Raymond, Title and Trust Bldg., Portland. Owners, Burpee and O'Reilly. The present building located at the corner of East Water and Madison streets will be enlarged by the construction of an 80x80 foot annex. Interior finish will be of pine. Plans provide for a cement floor, metal window sash and frames and special gasoline storage tanks. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

GOVERNMENT WORK AND SUPPLIES.

Shelter of Troops in the Philippines.

It is proposed by the War Department to spend \$885,000 for shelter for troops in the Philippine Islands. Permanent concrete barracks and quarters for a regiment of cavalry of the colonial army will cost about \$600,000, for a field artillery regiment \$300,000, for an infantry regiment \$300,000, for a regimental cavalry stable \$200,000, and a regimental field artillery stable \$300,000. Consequently, barracks, quarters, and stables for the colonial army, consisting of four regiments of infantry, two of cavalry, one of field artillery, and the auxiliary troops, will cost about \$5,900,000, exclusive of administration, sewerage, power plants, etc. It is estimated that the cost of storehouses and other buildings for the military establishment on the Luneta fill in Manila to replace present offices and storehouses, sewers, etc., will be \$2,000,000, making a total that will be

required to permanently house and provide for the colonial army in the Philippines of from \$8,000,000 to \$10,000,000. Work to the extent of \$1,000,000 only can be handled in the course of a year, owing to the labor and other conditions in the Philippines. The conditions surrounding the building operations in the islands are very trying. The supply of skilled labor and of suitable foremen is far short of the demand, consequently, it is usually necessary to pay a high price for inferior men. If every other condition were favorable, this alone would constitute a serious handicap. New men cannot be imported, as continuous employment cannot be guaranteed, and new men are of little value, because if they even understand their business they cannot communicate their ideas to the native labor, skilled or otherwise. The price of day labor is cheap, but the quality is poor and not up to the demand. Due to the undeveloped state of the country and the great distance from manufacturers, materials are not cheap. Steel and cement must be brought from afar. Stone, even for cement work, is inaccessible and above the average cost in the United States. Sand is about normal. Hardware, plumbing, etc., must add the cost of transportation to the original prices, and even the native woods, which are the only ones suitable to use, cost from \$10 to \$150 per thousand in the market. None of the items can be obtained within a reasonably short time, so that it requires constant watchfulness and foresightfulness to avoid running out of materials, entailing annoyance and money loss, due to cessation of work.

San Francisco, Cal., Subtreasury.

As previously reported, the contract for the construction of two interior money vaults for the U. S. subtreasury, San Francisco, Cal., was awarded to Grant Fee, San Francisco, Cal., at \$52,648. In the prosecution of the work fixtures and material manufactured by the following named firms will be used: Globe and angle valves, Roe-Stephens Mfg. Co.; automatic air valves, American Radiator Co.; propeller fan and volume blower, American Blower Co.; nonconducting coverings, Philip Carey Mfg. Co.; volume blower motor, propeller blower motor, and starting boxes, General Electric Co.; lighting fixtures, Dyes & Seymour, Ind.; cabinet and tablet, Frank Adam Electric Co.; conduit, American Conduit Co.; rubber covered wire, John A. Roehling's Sons Co.; snap switches, General Electric Co.; reflectors, Holophane; combination time clock for vault protection cabinets, Sargent & Greenleaf; millimeter, Weston Electrical Instrument Co.; alarm bell, Schwanitz; lead-covered cable, Hazard Mfg. Co.

Los Angeles, Cal., Steel Piles.

The following bids were received at the office of the U. S. Reclamation Service, Los Angeles, Cal., for furnishing 8 tempered steel race plates:

Advance Machine Co., Los Angeles, Cal., \$54; time 15 days.

Los Angeles Iron Works, Los Angeles, Cal., \$72; 2 per cent in 10 days; delivery 6 days.

Llewellyn Iron Works, Los Angeles, Cal., \$104; 10 days.

Kuahua, H. T., Building.

All bids received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for the construction of a building for the marine guard at the naval magazine, Kuahua, H. T., have been rejected. New bids will be opened at Honolulu for the above work.

Albany, Ore., Post Office.

The contract for the construction, including plumbing, heating, wiring, and lighting fixtures, of the U. S. post office at Albany, Ore., has been awarded to Fred A. Erlson, Salem, Ore., using sandstone for all stonework, except where granite is required, for the sum of \$57,656; plus alternate A, substituting brick driveway for macadam, \$31; plus alternate B, finishing unassigned offices, \$311; total, \$58,282.

Centrifugal Pump Impellers.

The following bids were opened at the office of the U. S. Reclamation Service, Los Angeles, Cal., under advertisement No. 255-F, for furnishing centrifugal pump impellers for the Mindoko project, Idaho:

United Iron Works, Oakland, Cal., item 1, \$992, one each in 15, 25, 35 and 45 days; 1-A, \$360 or \$260, from the pattern after production of first four specified, 20 days; delivery Oakland, Cal.; weight, 4,300 pounds.

Pelton Water Wheel Co., San Francisco, Cal., item 1, \$982, one each in 45, 55, 63, and 70 days; 1-A, \$392, 17 days; delivery San Francisco; weight, 2,500 pounds.

Union Machine Co., San Francisco, Cal., item 1, \$1,327; price does not include filling rings. These rings will be furnished for \$228 for item 1 and \$57 for item 1-A and will weight 700 pounds each. One each in 40, 50, 55, and 60 days; item 1-A, \$300, 30 days; delivery San Francisco; weight, 2,590 pounds.

Llewellyn Iron Works, Los Angeles, Cal., item 1, \$1,500, one each in 30, 40, 50, and 60 days; 1-A, \$350, 30 days; delivery Los Angeles; weight, 4,000 pounds.

Fulton Engine Works, Los Angeles, Cal., item 1, \$1,720, one each in 40, 50, 60, and 70 days; 1-A, \$430, 50 days; delivery Los Angeles; weight, 3,500 lbs.

Silver Bros. Iron Works Co., Salt Lake City, Utah, item 1, \$1,993, one each in 40, 50, 60, and 70 days, or \$2,306 with impellers of cast steel, one each in 44, 55, 64, and 74 days; item 1-A, \$470, 30 days, or \$188, 40 days, with impeller of cast steel, weight 4,230 pounds and 4,600 pounds, respectively; delivery at Salt Lake City.

Krogh Mfg. Co., San Francisco, Cal., item 1, \$2,070, one each in 46, 50, 55, and 60 days; 1-A, \$475, 30 days; delivery San Francisco; weight, 3,500 lbs.

Byron Jackson Iron Works, Los Angeles, Cal., item 1, \$2,197, one each in 42, 49, 56, and 62 days; 1-A, \$483, 30 days; weight, 3,550 pounds; deliveries at West Berkeley

Riverside, Cal., Vault Shelving.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the U. S. post office at Riverside, Cal.:

Watson Mfg. Co., Jamestown, N. Y., \$271.

Crown Metal Construction Co.,

Jamestown, N. Y., \$274.55.

Art Metal Construction Co., Jamestown, N. Y., \$289.30.

The Berger Mfg. Co., Canton, Ohio, \$269.

The H. H. Shults Co., Gowanda, N. Y., \$316.

The Van Dorn Iron Works, Cleveland, Ohio, \$417.

La Junta, Colo., Post Office.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction, including plumbing, heating apparatus, gas piping, electric conduits and wiring, interior lighting fixtures, and approaches, of the U. S. post office at La Junta, Colo.:

Bid 1. J. H. Wiese, City National Bank Building, Omaha, Neb.

2. Frank Kirchhof Lumber Co., 7th and Lawrence streets, Denver, Colo.

3. F. H. Cowell, Central Savings Bank Building, Denver, Colo.

Bid 1. \$78,995; 2, \$83,779; 3, no bid. For using sandstone for all stonework, except where granite is specified—Bid 1, no bid; 2, \$83,479; 3, \$88,416.

For alternate No. 1 (substituting terrazzo for the cement panels in the loggia floor, as specified), add—Bid 1, \$70; 2, \$120; 3, \$178.

For alternate No. 2 substituting wood stairs for the stairway in stair hall and to the swing room, wood flooring thresholds, base, etc., for terrazzo floor, marble base thresholds, etc., in the second story corridor, as specified), deduct—Bid 1, \$1,200; 2, \$1,158; 3, \$1,264.

For alternate No. 3 (omitting composition ornament from the soffit of the main cornice and substituting plain panels for the ornamental stucco panels in the cornice frieze, as specified), deduct—Bid 1, \$250; 2, \$640; 3, \$285.

For alternate No. 4 (painting and sheeting of certain additional plaster surfaces, as specified), add—Bid 1, \$1,500; 2, \$3,200; 3, no bid.

For alternate No. 5 (substituting Keene's cement plastering for certain hard plaster, as specified), add—Bid 1, \$800; 2, \$960; 3, \$835.

Amount included in the proposal for furnishing and installing all interior lighting fixtures—Bid 1, \$2,000; 2, \$2,300; 3, no bid.

—HALLS & SOCIETY BLDGS—

SAN FRANCISCO—City Hall, 4 story and base. Class A construction, \$1,500,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans for the installation of the plumbing in the new City Hall building have been completed and approved. Bids are now being called for on this work by the Board of Public Works. Bids will be opened on January 14th. An official proposal appears under another heading of this issue. Bonds in the sum of \$12,000 on proposition A and \$3,000 for proposition B are required.

OAKLAND, CAL.—Club house, 2 story and base, frame and concrete, \$40,000 to \$50,000. Architect, Edward G. Garden, Phelan Bldg., S. F. Owners, Sequoia Country Club. A large tract of land on the Foothill Boulevard has been secured and plans have been ordered prepared. The intention of the owners is to have one of the finest and most modern Country Clubs on the

east side of the bay. The design will probably be in the Mission style. Only preliminary studies have been made and details cannot be given at this time. Further mention will be made of the work as plans progress.

DAILY CITY, SAN MATEO CO., CAL.—City hall and jail, 2 story and base, frame. Cost not stated. Architects, Smith & Stewart, 244 Kearny street, S. F. Owners, Daily City. A building has been designed which provides offices for the city heads on the first floor. Basement will be fitted up for a modern jail with special jail equipment, steel cells, etc. The second floor will contain a city council room 50 by 60 feet, which will also be used as a public auditorium. Interior finish will be of pine and redwood. A fireproof vault will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for shortly.

SAN FRANCISCO—Labor Temple, 3 story and base, brick and steel, \$75,000. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, San Francisco Labor Council Hall Association. This work has been mentioned here a number of times before. Working drawings have been completed and figures are now being taken. The structure will be erected at the north-east corner of 16th and Capp streets, having a frontage of 84 feet on 16th street and 100 feet on Capp. There will be stores on the first floor and council chambers, auditorium and offices on the second and third floors. Interior will be finished in pine and hardwood. Plans provide for steam heat, elevator service and vacuum cleaning system. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick and stone.

HOTELS.

SAN FRANCISCO—Hotel, 6 or 7 story and base. Class B construction. Cost not stated. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Helman Estate. The property at the southwest corner of Edwy and Taylor streets is to be improved with a large hotel structure, containing stores on the first story. The building will cover a large ground area and construction will be fireproof. Upper floors will contain a total of over 150 rooms, nearly all of which will have private baths. Interior finish will be of pine and hardwoods. Plans will provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Marble and tile will be used extensively. Bath rooms will have the wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Hotel, 7 story and base. Class B construction, \$100,000. Architect, G. B. Asaroft, Ballion Bldg., S. F. Owner, C. A. Hooper. The property on the north line of O'Farrell just east of the Alcazar theatre, having a frontage of 50 feet and a depth of 137½ feet, is to be improved at once by the construction of a modern hotel. The first floor will be arranged for two stores, a large hotel lobby and office and two dining rooms. Upper floors will contain a total of 126 rooms, all

of which will have private baths. Interior finish will be of pine and hardwoods. Main office and lobby will be finished in hardwood and marble with a tile floor. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are nearly complete and work will be started within a few weeks.

SAN FRANCISCO—Hotel completion, 6 story and base, brick and steel. Cost not stated. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owners, Downtown Realty Co. Plans for the completion of the upper stories of the big hotel structure at the southwest corner of Eddy and Mason streets have been completed and work will start as soon as figures can be taken. Included in this work will be interior partitions, plastering, interior finish work and mill work, tile, marble, plumbing, electric work and painting. Figures are now being taken.

SAN FRANCISCO—Hotel, 4 story and base, reinforced concrete, \$20,000. Architect, L. Mastropasqua, 580 Washington street, S. F. Owner, N. Capurano. The building will be erected at the southeast corner of Broadway and Parker Place. There will be one store besides the hotel entrance and lobby on the first floor. Upper floors will contain fifty rooms and a number of public and private baths. Interior will be finished in pine throughout. Bath rooms will have composition floors and tile wainscot. There will be steam heat and elevator service, a hot water supply and vacuum cleaning. Patent store fronts will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

PANAMA -- PACIFIC EXPOSITION WORK.

SAN FRANCISCO—State Exposition building, frame and concrete construction. Cost not stated. Architect, A. F. Helde, 46 Kearny street, S. F. Owners, State of Washington. Architect A. F. Helde has working drawings for the Washington State building to be erected at the Panama-Pacific Exposition complete and will leave for Seattle on January 10th to have plans approved by the Washington Commission and the Governor. The building will be one of the largest structures erected by any of the states. About \$250,000 will be available. Plans show a three-story structure of classic design. The first floor will contain exhibits, a large auditorium and scenic studies. A ballroom, reception hall and a second smaller auditorium will occupy the second floor. The third floor will be arranged for sleeping rooms, a large private suite for the Governor with sleeping apartments, reception rooms and banquet hall. Bids will be called for shortly after February 1st.

SAN FRANCISCO—Automatic sprinklers, electric work and sewers. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were opened Friday, January 2nd, by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Co.

for furnishing and installing automatic sprinkler systems in the Food Products Building, Liberal Arts Building and Educational Building. The lowest figures were received from the Turner Co. at \$147,000; the next lowest bid was submitted by the Pacific Fire Extinguisher Co. at \$227,293. The McFell Electric Co. were the lowest bidders at \$12,000 for the electric work on the Liberal Arts, Food Products and Educational Buildings. Bids for constructing a sewer in the Court of Palms and the Court of the Four Seasons showed the Contra Costa Construction Co. at \$4,500. No contracts were awarded at the meeting Friday, but the low men will probably be awarded the work at the next meeting of the committee.

RAILROAD CONST., STATIONS AND EQUIPMENT.

MARSHFIELD, ORE.—Passenger depot, 1 and 2 story reinforced concrete, \$50,000. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific R. R. Co. Plans are being prepared for a modern passenger station to be erected at Marshfield. There will be two waiting rooms, baggage room and agent's office. Interior finish will be of pine throughout. A cement floor will be used. Plans provide for steam heat and metal window sash and frames. Exterior of the building will be faced with cement plaster.

PORTLAND, ORE.—Railroad administration building, 3 story and base, concrete and hollow tile construction. Cost not stated. Architect, W. Boshke, care of owners. Owners, Oregon-Washington Railroad and Navigation Co. Bids have been opened for the construction of a three-story administration building which is to be erected in the Albina District. The building will cover an area of 50 by 80 feet. Bids were taken from selected contractors only. No award has yet been made.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame \$2,500. Architect, none. Owner, A. T. Morris, 616 9th avenue, S. F. The dwelling has been designed for a six-room house with bath, and will be erected on the west side of 11th avenue south of Anza. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of tile. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$2,000 each. Architect, none. Owner J. C. Kirby, 2152-A Market street, S. F. These two dwellings will each contain six rooms and bath and will be erected on the east side of 17th street north of Anza. Interiors will be finished in pine with some elm panels and oak floors. There will be open fire places and brick mantels. Composition floors will be used in the bath rooms. Kitchens will have

tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath and rustic. Plans are in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,750. Architect, none. Owner, William H. Kerrigan, 5153 Shafter street, Oakland. The dwelling has been designed to contain seven rooms, bath and sleeping porch and will be erected on Kenmore avenue near Wala Vista. Interior finish will be of pine and hardwood with oak floors in the living and dining rooms and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Work will be done by Day Labor. Materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, H. E. Eveleth. The dwelling will be erected on Russell street near Piedmont, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

COTATI, SONOMA CO., CAL.—Residence, 2 story and base, frame, \$6,000. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Father Cunha. This dwelling has been designed to contain seven rooms, two baths and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. Exterior will be covered with rustic and shiplap. Plans are being prepared and figures will be called for shortly.

SAN FRANCISCO—Residence alterations, 3 story and base, frame, \$10,000. Architect, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The large old family residence, located at the corner of Buchanan and Post streets, is to be altered. Plans provide for four stories on the first floor and residential flats on the upper two floors. Included in this work will be new plastering, plumbing, painting, interior finish and electric work. There will be oak floors and open fire places. The work will also be used. Exterior of the building, with the exception of the first floor, will not be changed. Plans are now being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,500. Architect, Edward T. Poukes, Crocker Bldg., S. F. Owner, Paul McCarthy. The dwelling will be erected in Buena Vista Terrace, and has been designed to contain six rooms, bath and sleep-

ing porch. Interior finish will be of pine with some hardwood veneer and oak floors. A Rector system of heating will be installed. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, William J. Wythe, Central Bank Bldg., Oakland. Owner, James R. Tallman. The house will be erected at the corner of Pacific and Hager avenues, and has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine, white enamel and hardwood veneer. Oak floors will be used in the living room, dining room and recreation hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans have been revised and new figures are being taken.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, William J. Wythe, Central Bank Bldg., Oakland. Owner, Arthur M. Moore. The house will be erected on Pacific avenue near Hager, and has been designed to contain seven rooms and bath. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SACRAMENTO, CAL.—Residences, 3, 2 story and base, frame, \$3,200 each. Architect, none. Owner, E. A. Pierce, 2207 1st avenue, Sacramento. These houses will be erected in the Curtis Oaks Tract, and each has been designed for a seven-room house with bath and sleeping porch. Interiors will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms and kitchens will have tile wainscot. Exterior will be covered with cement plaster on metal lath and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SACRAMENTO, CAL.—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Arthur Mellor, 4121 G street, Sacramento. The house will contain six rooms and bath, and will be erected in the Clair Tract. All interior finish will be of pine or redwood. Oak floors will be used in the living room and dining room. There will be a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and

the work will be done by Day Labor. **SAN FRANCISCO**—Bungalow, 1½ story and base, frame, \$2,200. Architect, none. Owner, M. F. Nolan, 228 Noe street, S. F. The dwelling will be erected on the east side of 22nd avenue north of Clement, and will contain six rooms and bath. Interior finish will be of pine with some hardwood veneer in the living and dining rooms. Oak floors and open fire places will be used in the principal rooms. Mantels will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN JOSE, SANTA CLARA CO., CAL.—Residences, 1 and 2 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: F. K. May, 420 Hull street, 1 story, four-room cottage, \$1,800; E. D. Wells, 445 North 17th street, 2 story frame, six room house, \$2,000; H. W. Dangerfield, North 11th street, 1 story, five-room frame cottage, \$2,000, and Mrs. Baxter, 468 North 7th street, 1 story, four-room frame cottage, \$1,000.

SEATTLE, WASH.—Residence, 2 story and base, brick, \$20,000. Architect, Albert Held, Seattle. Owner, C. L. Mathews. The owner has recently purchased a large site in Cliff Park, and will erect a dwelling of twelve rooms, three baths and sleeping porches. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. Plans provide for a central heating system, probably steam or hot water, a vacuum cleaning plant and automatic water heaters. There will be open fire places and tile and brick mantels. Bath rooms will have tile floors and wainscot. Exterior of the house will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

◆
SCHOOLS.

PITTSBURGH, CONTRA COSTA CO., CAL.—School, 2 story and base, brick, \$50,000. Architect, A. W. Cornelius, Merchants National Bank Bldg., S. F. Owners, Pittsburgh School District. Architect Cornelius has recently been awarded the first place in the competition held to secure plans for a new school building to be erected at Pittsburgh. The building will contain eight class rooms, assembly hall seating 250 people and laboratories. Interior finish will be of pine with maple floors. Plans provide for steam heat, an oil burning system vacuum cleaning and program clocks. Exterior of the building will be faced with pressed brick. Working drawings are now being prepared and figures will shortly be called.

SACRAMENTO, CAL.—School work alterations, etc., frame construction. Cost not stated. Architect, none. Owners, City of Sacramento. Additions and alterations will be made to eight Sacramento schools. The work will range in cost from \$700 to \$5,500. Included in the work will be painting, plumbing and electric work as well as an amount of school furniture and equipment. Full particulars can be

secured from the Sacramento Board of Education. The work will be done by Day Labor.

OAKLAND, CAL.—School grading, curbs and walks. Cost not stated. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids are now being called for on the work of grading, laying cement walks and curbs at the following schools. Bids will be opened on January 13th:

(A) For the grading, bituminous paving, cement walks, curbing and other work for the improvement of the grounds of the Claremont School, located on the easterly side of College avenue, between Shafter avenue and Birch Court.

(B) For the grading, concrete gutter, oiled surfacing and other work for the improvement of the grounds of the Clawson School, located on the westerly side of Magnolia street, between 32nd and 33rd streets.

(C) For the grading, cement walks, steps, curbing and other work for the improvement of the grounds of the Cleveland School, located on the southerly side of Cleveland avenue, between Alma and Athol avenues.

(D) For the water piping, concrete steps, screened rock surfacing and other work for the improvement of the grounds of the Laurel School, located on the northerly side of Kansas street, between Edison and Shafter avenues.

(E) For the grading, cement walks and other work for the improvement of the grounds of the McChesney School, located on the easterly side of 13th avenue, between East 37th and East 35th streets.

(F) For the grading, surfacing and other work for the improvement of the grounds of the Melrose School, located on the easterly side of 52nd avenue, between East 12th and East 14th streets.

(G) For the rough and finished plumbing and other work for a new toilet system on the grounds of the Tompkins School, located on the southerly side of 5th street, between Linden and Chestnut streets.

Bidders may submit proposals on one or more of the above enumerated classes of work, for each one of the groups named, but no bid which combines two (2) or more of the several groups in one figure will be considered.

SAN FRANCISCO—Day Nursery, 3 story and base, frame, \$20,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Kip Memorial Mission. The building will be erected at the corner of Folsom and Second streets, covering an area of 50x137½ feet. Interior will be arranged for a chapel, girls' room, nursery and dining room. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Exterior of the building will be covered with rustic and shiplap. Plans are being prepared. Further mention will be made of the work when bids are called.

Contracts Awarded.

SEATTLE, WASH.—School, 2 story and base, brick, \$21,525. Architect, V. W. Voorhees, Eitel Bldg. Seattle. Owners, City of Seattle. Contractor, Hans Rathe, 6726 26th avenue, Seattle. Contract price, \$21,525.

SEWERS, STREET WORK AND WATER SYSTEMS.

UMATILLA, ORE.—Water system, \$20,000. Engineer, Louis C. Kelsey, Selling Bldg., Portland. Owners, City of Umatilla. Preliminary plans have been prepared for a water system to supply the entire city. A fire protection system will also be included in the work. Bonds will be voted at an early date. Further mention will be made of the work as the plans progress.

PORTLAND, ORE.—Water pipe, \$100,000. Engineer, City Department of Engineering, Portland. Owners, City of Portland. Commissioner Daly of the Public Utilities Committee has asked that money be set aside and bids be called for furnishing the city with a large amount of water main to be installed this spring. Included in the list are: 1,193 gate valves ranging in size from 6 to 30 inches, 5,200 tons of cast iron pipe of various sizes, 300 tons of special castings, 900 cast iron gate boxes, 150 cast iron frame covers and 600 fire hydrants. Bids on this material will be received during January.

STADIUM.

OAKLAND, CAL.—Stadium and track, concrete construction, \$260,000. Architect, Supervising Architect J. J. Donovan, Security Bank Bldg., Oakland. The Oakland Stadium Association, organized to make a campaign for a concrete stadium and athletic field in connection with a municipal center in Peralta Park, one which was referred to the playground commission by the City Council, will need \$260,000 to complete the project, according to the figures of Geo. E. Dickie, and the tentative plans of Supervising Architect J. J. Donovan. Donovan believes it will cost \$200,000 to construct the proper stadium, which includes a one-half mile track for trotting and pacing races, a quarter-mile athletic track, concrete grandstand and athletic field. According to Dickie's estimate it will cost \$25,000 to fill in the ground, \$25,000 for the tracks, \$10,000 for the athletic field and \$1,000 for fencing, making a total of \$260,000.

STORES.

SAN FRANCISCO.—Stores, 1 story and base, brick. Cost not stated. Architects, O'Brien Bros., Clinic Bldg., S. F. Owner, Mr. Jacobs. This building, which has been designed for a wholesale commission building, will be erected on Washington street east of Front. The structure will be carried on a scow foundation. There will be patent store fronts and plate glass windows. Interior finish will be of pine throughout. A cement floor will be used. Exterior will be faced with pressed brick. Bids have been taken for the grading and foundation work, and figures for the balance of the work are now being called.

SEATTLE, WASH.—Stores and offices, 4 story and base, reinforced concrete, \$500,000. Architect, William Kingsley, Empire Bldg., Seattle. Owner's name withheld. The building will cover a large area and will be erected on the block bounded by Westlake, 4th, Stewart and Olive streets. Con-

struction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Interior finish will be of pine, hardwoods and metal trim. Metal window sash and frames will be used. Plans provide for freight and passenger elevators, steam heat, mail chutes and a vacuum cleaning system. Patent store fronts and sidewalk doors and lights are specified. Exterior will be faced with cut stone and terra cotta. Excavation has already been started. Bids for the balance of the work will be called for at once.

CON AWARD e, off on.

SAN FRANCISCO.—Stores, 1 story and base, brick, \$5,700. Architects, O'Brien Bros., Clinic Bldg. S. F. Owner, Mr. Jacobs. Contractors, Davis & Son, S. F. Contract price, \$5,700.

TACOMA, WASH.—Stores and offices, 2 story and base, brick and concrete, \$50,000. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owner, David Goss. Contractors, Moller & Dawson, Tacoma. Contract price, \$50,000.

SAN FRANCISCO.—Store alterations, 1 story and base, frame, \$1,500. Architect, Charles Fantoni, 916 Kearny street, S. F. Owner, Angelo Belli. The one-story frame market building at the southeast corner of Fillmore and Jackson streets will be raised and moved to the rear of the lot and an additional story erected, which will be arranged for flats. The site of the old building will be improved with another one-story structure designed for store purposes. Interior finish will be of pine. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the architect is now taking figures on the work.

THEATRES.

SEATTLE, WASH.—Theatre and stores, 2 story and base, reinforced concrete, \$70,000. Architect, H. Ryan, Northern Bank Bldg., Seattle. Owners, Liberty Theatre. The building will be of fireproof construction, covering an area of 141x120 feet. There will be a number of stores on the first floor besides the theatre entrance and main auditorium. Front portion of the second floor will contain offices. Floors will be of reinforced concrete. Interior finish will be of pine and metal. Metal window sash and frames and fireproof doors will be used. Steam heat, a modern system of vacuum cleaning and ventilating will be installed. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for at once.

SAN FRANCISCO.—Theatre and hotel, 6 story and base. Class B construction. Cost not stated. Architects, Woollett & Woollett, Newhall Bldg., S. F. Owner's name withheld. This building will be erected partly in the rear of the Downtown Realty Co.'s hotel at the southwest corner of Eddy and Mason streets and partly on the McDougall Estate lot on the west side of Mason street adjoining the Downtown Realty Co.'s building on the south. Construction will be of Class B style, with a steel frame and interior partitions of metal lath and plaster. The street frontage will be arranged

for stores while the upper stories will contain hotel rooms. Interior will be finished in pine and hardwood. Plans provide for steam heat, elevator service and a hot water supply. The stage, dressing rooms and a large portion of the main auditorium will occupy the first floor. Exterior of the building will be faced with red pressed brick. Plans are complete and figures for the structural steel work are now being taken. Mr. Johnson, Humboldt Bank Bldg., is in charge of the work.

SEALED PROPOSALS.

PROPOSALS FOR PLUMBING.
OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, January 8, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefore:

To re-plumb the City Hall. Progressive payments will be made. SAN FRANCISCO.

APARTMENT HOUSE—5 or 6 story and base. Class C construction, \$75,000 to \$100,000. San Francisco. Architect, Frederick H. Meyer, Bankers Investment Bldg., S. F. Owners, Trowbridge and Livingston. This building will be erected at the corner of Post and Williams Place. The lot to be improved has a frontage of 75 feet by a depth of over 100 feet. The first floor will be arranged for a large lobby, office, amusement room and living apartments. Upper floors are to be divided into a large number of two and three room suites. Interior finish will be of pine, redwood, white enamel and hardwood. Oak floors will be used in the dining rooms and halls. Plans provide for steam heat, elevator service, a vacuum cleaning system and wall beds. All bath rooms will have composition floors and the wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$20,000. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on 4th avenue near I street, and has been designed to contain twelve suites of three and four rooms and bath. Interior finish will be of pine with elm panels and oak floors. There will be a complete oil burning system and steam heat. Vacuum cleaning and a hot water system will also be installed. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. All apartments will be equipped with wall beds. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base will be used. Plans are complete and the work will be carried on by Day Labor.

APARTMENT HOUSE—3 story and base, brick and steel, \$50,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on the north side of Bush street between Jones and Taylor, and will have a frontage of 55 feet by a depth of 137½ feet. Plans show a total of 32 suites of two and three rooms besides a spacious lobby, office and amusement room. Interiors will be finished in pine, elm and white enamel. Lobby and office will be finished in white enamel and gold after the Austrian style. All suites will have wall beds and private baths. Bath rooms will be finished in tile with composition floors. Plans provide for steam heat, a hot water system and vacuum cleaning. Exterior of the building will be faced with red pressed brick trimmed with Caen stone. Plans are being prepared.

CITY HALL—4 story and base. Class A construction, \$150,000. San Francisco. Architects, Bakewell & Brown, 231 Kearny street, S. F. Owners, City and County of San Francisco. Plans

for the installation of the plumbing in the new City Hall building have been completed and approved. Bids are now being called for on this work by the Board of Public Works. Bids will be opened on January 14th. An official proposal appears under another heading of this issue. Bonds in the sum of \$12,000 on proposition A and \$3,000 for proposition B are required.

HOTEL—6 or 7 story and base. Class B construction. Cost not stated. San Francisco. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Helman Estate. The property at the southwest corner of Eddy and Taylor streets is to be improved with a large hotel structure, containing stores in the first story. The building will cover a large ground area and construction will be fireproof. Upper floors will contain a total of over 150 rooms, nearly all of which will have private baths. Interior finish will be of pine and hardwoods. Plans will provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Marble and tile will be used extensively. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—7 story and base. Class B construction, \$100,000. San Francisco. Architect, G. B. Ashcroft, Balboa Bldg., S. F. Owner, C. A. Hooper. The property on the north line of O'Farrell just east of the Alcazar Theatre, having a frontage of 50 feet and a depth of 137½ feet, is to be improved at once by the construction of a modern hotel. The first floor will be arranged for two stores, a large hotel lobby and office and two dining rooms. Upper floors will contain a total of 120 rooms, all of which will have private baths. Interior finish will be of pine and hardwoods. Main office and lobby will be finished in hardwood and marble with a tile floor. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are nearly complete and work will be started within a few weeks.

HOTEL COMPLETION—6 story and base, brick and steel. Cost not stated. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owners, Downtown Realty Co. Plans for the completion of the upper stories of the big hotel structure at the southwest corner of Eddy and Mason streets have been completed and work will start as soon as figures can be taken. Included in this work will be interior partitions, plastering, interior finish work and mill work, tile, marble, plumbing, electric work and painting. Figures are now being taken.

HOTEL—4 story and base, reinforced concrete, \$20,000. San Francisco. Architect, L. Mastropasqua, 580 Washington street, S. F. Owner, N.

Capuaro. The building will be erected at the southeast corner of Broadway and Parker Place. There will be one store besides the hotel entrance and lobby on the first floor. Upper floors will contain fifty rooms and a number of public and private baths. Interior will be finished in pine throughout. Bath rooms will have composition floors and tile wainscot. There will be steam heat and elevator service, a hot water supply and vacuum cleaning. Patent store fronts will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

RESIDENCES—2, a story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, J. C. Kirby, 2152-A Market street, S. F. These two dwellings will each contain six rooms and bath, and will be erected on the east side of 17th street north of Anza. Interiors will be finished in pine with some elm panels and oak floors. There will be open fire places and brick mantels. Composition floors will be used in the both rooms. Kitchens will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath and rustic. Plans are in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, A. T. Morris, 616 9th avenue, S. F. The dwelling has been designed for a six-room house with bath, and will be erected on the west side of 11th avenue south of Anza. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

STATE EXPOSITION BUILDING—Frame and concrete construction. Cost not stated. San Francisco. Architect, A. F. Heide, 46 Kearny street, S. F. Owners, State of Washington. Architect A. F. Heide has working drawings for the Washington State building to be erected at the Panama-Pacific Exposition complete and will leave for Seattle on January 10th to have plans approved by the Washington Commission and the Governor. The building will be one of the largest structures erected by any of the states. About \$250,000 will be available. Plans show a three-story structure of classic design. The first floor will contain exhibits, a large auditorium and scenic studies. A ballroom, reception hall and a second smaller auditorium will occupy the second floor. The third floor will be arranged for sleeping rooms, a large private suite for the Governor with sleeping apartments, reception rooms and banquet hall. Bids will be called for shortly after February 1st.

AUTOMATIC SPRINKLERS, ELECTRIC WORK AND SEWERS—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F.

Owners, Panama-Pacific International Exposition Co. Bids were opened Friday, January 2nd, by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company for furnishing and installing automatic sprinkler systems in the Food Products Building, Liberal Arts Building and Educational Building. The lowest figures were received from the Turner Co. at \$147,000; the next lowest bid was submitted by the Pacific Fire Extinguisher Co. at \$227,293. The McCell Electric Co. were the lowest bidders at \$13,086 for the electric work on the Liberal Arts, Food Products and Educational Buildings. Bids for constructing a sewer in the Court of Palms and the Court of the Four Seasons showed the Contra Costa Construction Co. low at \$4,500. No contracts were awarded at the meeting Friday, but the low men will probably be awarded the work at the next meeting of the committee.

RESIDENCE ALTERATIONS—2 story and base, frame, \$10,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The large old family residence located at the corner of Buchanan and Post streets is to be altered. Plans provide for four stores on the first floor and residential flats on the upper two floors. Included in this work will be new plastering, plumbing, painting, interior finish and electric work. There will be oak floors and open fire places. The work will also be used. Exterior of the building, with the exception of the first floor, will not be changed. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$5,500. San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Paul McCarthy. The dwelling will be erected in Buena Vista Terrace, and has been designed to contain six rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood veneer and oak floors. A Rector system of heating will be installed. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

FLATS—2 story and base, frame. Cost not stated. San Francisco. Architects, Henry Geiffuss & Son, 46 Kearny street, S. F. Owner's name withheld. This work has been mentioned here before. The building, which has been designed for a store on the first floor and flats above, will be erected at the corner of Bryant and 16th streets. Interior finish will be of pine and redwood. There will be an open fire place in each of the living rooms. Bath rooms will have tile wainscot and composition floors. Store will be equipped with patent fronts. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

STORES—, story and base, brick. Cost not stated. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, Mr. Jacobs. This building, which has been designed for a water-leak commission building, will be erected on Washington street east of Front. The structure will be carried on a scow foundation. There will be

patent store fronts and plate glass windows. Interior finish will be of pine throughout. A cement floor will be used. Exterior will be faced with pressed brick. Bids have been taken for the grading and foundation work and figures for the balance of the work are now being called.

THEATRE AND HOTEL—6 story and base. Class B construction. Cost not stated. San Francisco. Architects, Woollett & Woollett, Newhall Bldg., S. F. Owner's name withheld. This building will be erected partly in the rear of the Downtown Realty Co.'s hotel at the southwest corner of Eddy and Mason streets and partly on the McDougall Estate lot on the west side of Mason street adjoining the Downtown Realty Co.'s holding on the south. Construction will be of the Class B style with a steel frame and interior partitions of metal lath and plaster. The street frontage will be arranged for stores while the upper stories will contain hotel rooms. Interior will be finished in pine and hardwood. Plans provide for steam heat, elevator service and a hot water supply. The stage, dressing rooms and a large portion of the main auditorium will occupy the first floor. Exterior of the building will be faced with red pressed brick. Plans are complete and figures for the structural steel work are now being taken. Mr. Johnston, Humboldt Bank Bldg., is in charge of the work.

APARTMENT HOUSE—4 story and base. Class A construction, \$180,000. 210 Lake City, Utah. Architects, Palster & Hiss, Salt Lake City. Owners' names withheld. The building will be erected at the corner of East South and Temple streets, and will be fire-proof throughout. The building will contain in the neighborhood of 120 suites of two, three and four rooms. There will be a complete steel frame, reinforced concrete and brick exterior walls, faced with pressed brick and terra cotta. Interior will be handsomely finished in pine and hardwoods. Oak floors will be used in the principal rooms. Plans provide for steam heat elevator service, a hot water system and vacuum cleaning. Preliminary plans have been approved and working drawings are now being completed.

DAY NURSERY—3 story and base, frame, \$20,000. San Francisco. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Kip Memorial Mission. The building will be erected at the corner of Folsom and Second streets, covering an area of 50x137½ feet. Interior will be arranged for a chapel, girls' room, nursery and dining room. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Exterior of the building will be covered with rustic and shiplap. Plans are being prepared. Further mention will be made of the work when bids are called.

COLD STORAGE PLANT—6 story and base, brick and steel. Cost not stated. San Francisco. Engineer, Charles Wallace, S. F. Owners, National Ice and Cold Storage Co., Postal Telegraph Bldg., S. F. This is the second large addition to the company's plant at Battery and Union streets. A new four-story building is now under construction and this will connect with

the larger structure. When complete the building will furnish over one million cubic feet of refrigeration. Construction will be practically fire-proof. Interior will be finished in pine. Plans provide for a large amount of special machinery, elevators, plumbing and electric work. Exterior will be faced with pressed brick. Plans are complete and segregated figures will be called for at once.

FLATS—3 story and base, frame, \$7,000. San Francisco. Architect, Charles Fantoni, 916 Kearny street, S. F. Owner, Angelina Cesana. The building will be erected on the west side of Mason street north of Pacific, and will have a street frontage of 22½ feet by 75 feet. There will be three modern flats of five and six rooms. Interiors will be finished in pine and elm panels. Some hardwood floors will be used. Each of the living rooms will have an open fire place with a tile mantel. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and shiplap. A pressed brick base will also be used. Plans are complete and figures are taken.

GARAGE—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, G. A. Applegarth, Call Bldg., S. F. Owner, A. B. Spreckels. This building will be designed for a private garage and will be erected in the rear of the owner's handsome dwelling at the corner of Octavia and Washington streets. Included in the work will be the construction of large reinforced concrete retaining walls. Interior finish will be of high class and similar to that of the owner's residence. Plans provide for steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for at once.

LABOR TEMPLE—3 story and base, brick and steel, \$75,000. San Francisco. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, San Francisco Labor Council Hgh Association. This work has been mentioned here a number of times before. Working drawings have been completed and segregated figures are now being taken. The structure will be erected at the northeast corner of 16th and Capp streets, having a frontage of 34 feet on 16th street and 100 feet on Capp. There will be stores on the first floor and council chambers, auditorium and offices on the second and third floors. Interior will be finished in pine and hardwood. Plans provide for steam heat, elevator service and vacuum cleaning system. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick and stone.

BUNGALOW—1½ story and base, frame, \$2,200. San Francisco. Architect, none. Owner, M. P. Nolan, 228 Noe street, S. F. The dwelling will be erected on the east side of 22nd avenue north of Clement, and will contain six rooms and bath. Interior finish will be of pine with some hardwood veneer in the living and dining rooms. Oak floors and open fire places will be used in the principal rooms. Mantels will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be

covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

STORE ALTERATION—1 story and base, frame, \$1,500. San Francisco. Architect, Charles Fantoni, 916 Kearny street, S. F. Owner, Angelo Belli. The one-story frame market building at the southeast corner of Fillmore and Jackson streets will be raised and moved to the rear of the lot and an additional story erected which will be arranged for flats. The site of the old building will be improved with another one-story structure designed for store purposes. Interior finish will be of pine. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the architect is now taking figures on the work.

Contracts Awarded.

STORES—1 story and base, brick, \$5,700. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, Mr. Jacobs. Contractors, Davis & Sen, S. F. Contract price, \$5,700.

Exposition Company Opened Figures.

Automatic Sprinklers and Electric Work in Various Buildings Con- sidered and Contract Will Be Awarded.

Bids were opened Friday by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Co. for furnishing and installing automatic sprinkler systems in the Food Products Building, Liberal Arts Building and Educational Building. The lowest figures were received from the Turner Co. at \$147,000, the next lowest bid was submitted by the Pacific Fire Extinguisher Co. at \$227,293. The McCall Electric Co. were the lowest bidders at \$13,080 for the electric work on the Liberal Arts, Food Products and Educational Buildings. Bids for constructing a sewer in the Court of Palms and the Court of the Four Seasons showed the Contra Costa Construction Co. low at \$1,500.

No contracts were awarded at the meeting Friday, but the low men will probably be awarded the work at the next meeting of the committee.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—3 story and base, frame, \$25,000. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected on the east side of Lake street, and has been designed to contain a number of two, three and four room suites. Interiors will be finished in pine and elm panels with hardwood floors. There will be steam heat, vacuum cleaning system and hot water system. All apartments will have wall beds and private baths. Bath rooms will be wainscoted with tile and will have composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for shortly.

APARTMENT HOUSE—3 story and base, brick and steel, \$60,000. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Dr. Ayres. This building will be erected at the corner of 14th and Oak streets, covering a considerable ground area. Interior has been arranged for suites of two, three and four rooms. All apartments will have private bath rooms and wall beds. Plans provide for steam heat, vacuum cleaning and hot water supply. Interior finish will be of pine, elm panels and hardwood. Oak floors will be used in the halls and dining and living rooms. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are in the hands of the owner and he is now taking subfigures for the various parts of the work.

WAREHOUSE—2 story and base, brick. Cost not stated. Newark, Alameda Co., Cal. Architect, A. L. Griffin, Niles. Owners, James Graham Mfg Co., 531 Mission street, S. F. Plans for a large one-story warehouse,

which is to be erected at the company's plant at Newark, have been completed and are now out for figures. The building will have metal window sash and frames and breproof doors. No interior finish is specified. A cement floor will be used. Exterior of the structure will be faced with stock brick. Plans are complete and may be secured from either the architect at Niles or from the company's city offices at 531 Mission street.

CLUB HOUSE—2 story and base, frame and concrete, \$40,000 to \$50,000. Oakland, Cal. Architect, Edward G. Gordon, Phelan Bldg., S. F. Owners, Sequoia Country Club. A large tract of land on the Foot Hill Boulevard has been secured and plans have been ordered prepared. The intention of the owners is to have one of the finest and most modern Country Clubs on the east side of the bay. The design will probably be in the Mission style. Only preliminary studies have been made and details cannot be given at this time. Further mention will be made of the work as plans progress.

RESIDENCE—2 story and base, frame, \$4,750. Oakland, Cal. Architect, none. Owner, William H. Kerrigan, 5153 Shafter street, Oakland. The dwelling has been designed to contain seven rooms, bath and sleeping porch, and will be erected on Kemmore avenue near Wain Vista. Interior finish will be of pine and hardwood with oak floors in the living and dining rooms and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Work will be done by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove 2911 Telegraph avenue, Berkeley. Owner, H. E. Eveleth. The dwelling will be erected on Russell street near Piedmont, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Piedmont, Alameda Co., Cal. Architect, William J. Wythe, Central Bank Bldg., Oakland. Owner, James R. Tallman. The house will be erected at the corner of Pacific and Hager avenues, and has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine, white enamel and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath.

Plans have been revised and new figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Piedmont, Alameda Co., Cal. Architect, William J. Wythe, Central Bank Bldg., Oakland. Owner, Arthur M. Moore. The house will be erected on Pacific avenue near Hager, and has been designed to contain seven rooms and bath. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SCHOOL GRADING, CURBS AND WALKS—Cost not stated. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids are now being called for on the work of grading, laying cement walks and curbs at the following schools. Bids will be opened on January 13th.

(A) For the grading, bituminous paving, cement walks, curbing and other work for the improvement of the grounds of the Claremont School, located on the easterly side of College avenue, between Shafter avenue and Birch Court.

(B) For the grading, concrete gutter, filled surfacing and other work for the improvement of the grounds of the Clawson School, located on the westerly side of Magnolia street, between 32nd and 33rd streets.

(C) For the grading, cement walks, steps, curbing and other work for the improvement of the grounds of the Cleveland School, located on the southerly side of Cleveland avenue, between Alma and Athol avenues.

(D) For the water piping, concrete steps, screened rock surfacing and other work for the improvement of the grounds of the Laurel School, located on the northerly side of Kansas street, between Edlson and Shafter avenues.

(E) For the grading, cement walks and other work for the improvement of the grounds of the McChesney School, located on the easterly side of 13th avenue, between East 27th and East 35th streets.

(F) For the grading, surfacing and other work for the improvement of the grounds of the Melrose School, located on the easterly side of 52nd avenue, between East 12th and East 14th streets.

(G) For the rough and finished plumbing and other work for a new toilet system on the grounds of the Tompkins School, located on the southerly side of 5th street, between Linden and Chestnut streets.

Bidders may submit proposals on one or more of the above enumerated classes of work, for each one of the groups named, but no bid which combines two (2) or more of the several groups in one figure will be considered.

STADIUM AND TRACK—Concrete construction, \$260,000. Oakland, Cal. Architect, Supervising Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The

Oakland Stadium Association, organized to make a campaign for a concrete stadium and athletic field in connection with a municipal center in Peralta Park, and which was referred to the playground commission by the City Council, will need \$260,000 to complete the project, according to the figures of Geo. E. Dickie, and the tentative plans of Supervising Architect J. J. Donovan. Donovan believes that it will cost \$200,000 to construct the proper stadium, which includes a one-half mile track for trotting and pacing races, a quarter-mile athletic track, concrete grandstand and athletic field. According to Dickie's estimate it will cost \$25,000 to fill in the ground, \$23,000 for the tracks, \$10,000 for the athletic field and \$4,000 for fencing, making a total of \$260,000.

APARTMENT HOUSE—4 story and 1 1/2, brick and steel, \$75,000, Oakland, Cal. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Dr. P. A. Baird. The building will be erected at the corner of Oak and 14th streets, covering a large ground area. Interior has been arranged for a number of two, three and four room suites. Interior finish will be of pine and hardwood with oak floors in the living rooms. Plans provided for steam heat, elevator service, a hot water supply and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance lobby and vestibule. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN JOSE AND THE SANTA CLARA VALLEY,

CITY HALL AND JAIL—1 story and base, frame. Cost not stated. Daly City, San Mateo Co., Cal. Architects, Smith & Stewart, 244 Kearny street, S. F. Owners, Daly City. A building has been designed which provides offices for the city heads on the first floor. Basement will be fitted up for a modern jail with special jail equipment, steel cells etc. The second floor will contain a city council room, 50 by 60 feet, which will also be used as a public auditorium. Interior finish will be of pine and redwood. A fireproof vault will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for shortly.

RESIDENCES—1 and 2 story and base, frame. Cost not stated. San Jose, Santa Clara Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: F. K. May, 429 Hull street, 1 story four-room cottage, \$1,800; E. D. Wells, 445 North 17th street, 2 story frame six-room house, \$2,000; H. W. Dangerfield, North 11th street, 1 story five-room frame cottage, \$2,000, and Mrs. Baxter, 468 North 7th street, 1 story four room cottage, \$1,000.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

SCHOOL—2 story and base, brick, \$50,000. Pittsburg, Contra Costa Co., Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Pittsburg School District. Architect Cornelius has recently been awarded the first place in the competition held to secure plans for a new school building to be erected in Pittsburg. The building will contain eight class rooms, assembly hall seating 250 people and laboratories. Interior finish will be of pine with maple floors. Plans provide for steam heat, an oil burning system, vacuum cleaning and program clocks. Exterior of the building will be faced with pressed brick. Working drawings are now being prepared and figures will shortly be called.

RESIDENCE—2 story and base, frame, \$6,000. Cotati, Sonoma Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Father Cunha. This dwelling has been designed to contain seven rooms, two baths and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. Exterior will be covered with rustic and shiplap. Plans are being prepared and figures will be called for shortly.

SEATTLE AND WASHINGTON.

STORES AND OFFICES—4 story
and base, reinforced concrete, \$500,000.
Seattle, Wash. Architect, William
Kingsley, Empire Bldg., Seattle. Own-
er's name withheld. The building will
cover a large area and will be erected
on the block bounded by Westlake, 4th,
Stewart and Olive streets. Construction
will be fireproof throughout with
reinforced concrete walls, floors and
roof slabs. Interior partitions will be
of hollow tile and metal lath and plas-
ter. Interior finish will be of pine,
hardwoods and metal trim. Metal
window sash and frames will be used.
Plans provide for freight and pas-
senger elevators, steam heat mail
chutes and a vacuum cleaning system.

Patent store fronts and sidewalk doors
and lights are specified. Exterior will
be faced with cut stone and terra-
zotta. Excavation has already been
started. Bids for the balance of the
work will be called for at once.

THEATRE AND STORES—2 story
and base, reinforced concrete, \$70,000.
Seattle, Wash. Architect, H. Ryan,
Northern Bank Bldg., Seattle. Own-
er's, Liberty Theatre. The building
will be of fireproof construction, cov-
ering an area of 141x121 feet. There
will be a number of stores on the first
floor besides the theatre entrance and
main auditorium. Front portion of
the second floor will contain offices.
Floors will be of reinforced concrete.
Interior finish will be of pine and
metal. Metal window sash and frames
and fireproof doors will be used. Steam
heat, a modern system of vacuum
cleaning and ventilating will be in-
stalled. Exterior of the building will
be faced with cement plaster. Plans
are nearly complete and figures will
be called for at once.

BRIDGE—Steel construction, \$375,-
000. Tacoma, Wash. Engineer, Hol-
man care of the Oregon-Washington
Railroad and Navigation Co., Tacoma.
Owners, Oregon-Washington Railroad
and Navigation Co. Chief Engineer
Holman states that soil borings for
the foundations for the new steel
bridge which is to span the waterway
in Tacoma have been completed and
found satisfactory. Construction will
be started as soon as bids can be re-
ceived. Figures will be opened for
the work early this month. Plans and
specifications can be secured from
Chief Engineer Holman, Tacoma.

CHURCH—1 story and base, frame,
\$10,000. Seattle, Wash. Architects,
Wilcox & Sayward, Central Bldg., Se-
attle. Owners, Keystone Congrega-
tional Church of Seattle. Plans have
been completed for a one-story church
building which is to be erected at the
corner of 51st avenue and Keystone
Place. The interior of the building
will be finished in pine. The main
auditorium will seat 300 people. Plans
also provide for a pastor's study, Sun-
day school rooms and social room.
Exterior will be covered with cement
plaster on metal lath. Figures will
be called for at once.

RESIDENCE — 2 story and base,
brick, \$20,000. Seattle, Wash. Archi-
tect, Albert Held, Seattle. Owner, C.
L. Mathews. The owner has recently
purchased a large site in Cliff Park
and will erect a dwelling of twelve
rooms, three baths and sleeping
porches. Interior finish will be of pine
and hardwood. Oak floors will be used
in the principal rooms. Plans provide
for a central heating system, probably
steam or hot water, a vacuum cleaning
plant and automatic water heaters.
There will be open fire places and tile
and brick mantels. Bath rooms will
have tile floors and wainscot. Exte-
rior of the house will be faced with
pressed brick. Plans are being pre-
pared and figures will be called for
shortly.

Contracts Awarded.

BRIDGE—Reinforced concrete, \$80,-
000. Seattle, Wash. Engineer, A. R.
Cook, Tacoma. Owners, Northern Pa-
cific Railroad. Contractors, Sound
Construction and Engineering Co.,
Lowman Bldg., Seattle. Contract price,
\$80,000.

BRIDGES—2, steel and reinforced
concrete, \$100,000 and \$150,000 respec-
tively. Engineer, A. R. Cooke, Tacoma.
Owners, Northern Pacific Railroad.
Contractors, Widell Co., Mankato,
Minn. Contract price, \$100,000 and
\$150,000.

STORES AND OFFICES—2 story
and base, brick and concrete, \$50,000.
Tacoma, Wash. Architects, Heath &
Gove, National Realty Bldg., Tacoma.
Owner, David Goss. Contractors, Moller
& Dawson, Tacoma. Contract price,
\$50,000.

BRIDGES — Reinforced concrete.
Cost not stated. Tacoma, Wash. En-
gineer, Cook, Tacoma. Owners, Nor-
thern Pacific Railroad Co. Contractors,
Sound Construction and Engineering Co.,
Lowman Bldg., Seattle. Contract
price not stated.

SCHOOL—2 story and base, brick,
\$21,525. Seattle, Wash. Architect, V.
W. Voorhees, Ellet Bldg., Seattle. Own-
ers, City of Seattle. Contractor, Hans
Iatthe, 6726 24th avenue Seattle. Con-
tract price, \$21,525.

PORTLAND AND OREGON.

PASSENGER DEPOT—1 and 2 story
reinforced concrete, \$50,000. Marsh-
field, Ore. Architect, Engineering De-
partment Southern Pacific Co., Flood
Bldg., S. F. Owners, Southern Pacific
R. R. Co. Plans are being prepared
for a modern passenger station to be
erected at Marshfield. There will be
two waiting rooms, baggage room
and agent's office. Interior finish will
be of pine throughout. A cement floor
will be used. Plans provide for steam
heat and metal window sash and
frames. Exterior of the building will
be faced with cement plaster.

WATER SYSTEM — \$20,000. Uma-
tilla, Ore. Engineer, Louis C. Kelsey,
Selling Bldg., Portland. Owners, City
of Umatilla. Preliminary plans have
been prepared for a water system to
supply the entire city. A fire protec-
tion system will also be included in
the work. Bonds will be voted at an
early date. Further mention will be
made of the work as the plans pro-
gress.

BRIDGE—Steel and concrete con-
struction. Cost not stated. Roberts,
Idaho. Engineer, County Engineer,
Roberts. Owners, Fremont County.
All figures received for the construc-
tion of a steel and concrete highway
bridge in Road District No. 1 have
been rejected by the Board of Super-
visors. Plans will be revised and new
figures will be called for at once.

BRIDGE—Steel and reinforced con-
crete, \$1,500,000. Portland, Ore. En-
gineers, Wadell & Harrington, Kansas
City, Mo. The Interstate Bridge Com-
mission has selected the above named
engineers to design the new Pacific
Highway bridge which is to be erect-
ed across the Columbia River. The
exact site of the big structure and the
type of design have not been settled
upon. As soon as preliminary plans
have been prepared the matter will be
taken up with the War Department,
after which will follow the prepara-
tion of working drawings. The en-
gineer states that construction will re-
quire about sixteen months. Further
mention will be made of the work.

FACTORY—1 story and base, rein-
forced concrete. Cost not stated. Sil-
verton, Ore. Architects name not

given. Owner, L. C. Eastman. Plans have been completed for a one-story and basement reinforced concrete structure which is to be erected as an addition to the Silverton Blow Pipe Co. The building will be 50x100 feet and practically fireproof throughout. Interior finish will be of pine. A cement floor, metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are in the hands of the owner who is now receiving bids for construction. Figures will be opened on January 15th.

GARAGE ADDITION—1 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, MacNaughton & Raymond, Tittle and Trust Bldg., Portland. Owners, Burpee and O'Reilly. The present building, located at the corner of East Water and Madison streets, will be enlarged by the construction of an 80 by 80 foot annex. Interior finish will be of pine. Plans provide for a cement floor, metal window sash and frames and special gasoline storage tanks. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

RAILROAD ADMINISTRATION BUILDING—3 story and base, concrete and hollow tile construction. Cost not stated. Portland, Ore. Architect, G. W. Boshke, care of owners. Owners, Oregon-Washington Railroad and Navigation Co. Bids have been opened for the construction of a three-story administration building which is to be erected in the Albina district. The building will cover an area of 50 by 80 feet. Bids were taken from selected contractors only. No award has yet been made.

WATER PIPE—\$160,000. Portland, Ore. Engineer, City Department of Engineering, Portland. Owners, City of Portland. Commissioner Daly of the Public Utilities Committee has asked that money be set aside and bids be called for furnishing the city with a large amount of water main to be installed this spring. Included in the list are: 1,192 gate valves ranging in size from 6 to 30 inches, 5,200 tons of cast iron pipe of various sizes, 300 tons of special castings, 900 cast iron gate boxes, 150 cast iron frame covers and 600 fire hydrants. Bids on this material will be received during January.

USEFUL INFORMATION FOR CONTRACTORS.

One thousand shingles, laid four inches in the weather, will cover one hundred square feet of surface, and five pounds of shingle nails will fasten them on.

One-fifth more siding and flooring is needed than the number of square feet of surface to be covered because of the lap in siding and flooring.

One thousand laths will cover seventy yards of surface and eleven pounds of lath nails will nail them on.

Eight bushels of good lime, sixteen bushels of sand and one bushel of hair will make enough good mortar to plaster 100 square yards.

One cord of stone, three bushels of lime and a cubic yard of sand will lay one hundred cubic feet of wall.

Cement one bushel, and sand two

bushels, will cover $3\frac{1}{2}$ square yards, one inch thick; $4\frac{1}{2}$ square yards $\frac{3}{4}$ inch thick, and $6\frac{1}{2}$ square yards $\frac{1}{2}$ inch thick.

On bushel of cement and one bushel of sand will cover $3\frac{1}{4}$ square yards, one inch thick; 2 square yards $\frac{3}{4}$ inch thick, and $4\frac{1}{2}$ square yards $\frac{1}{2}$ inch thick.

AMOUNT OF PAINT REQUIRED FOR A GIVEN SURFACE.

It is impossible to give a rule that will apply in all cases, as the amount varies with the kind and thickness of the paint, the kind of wood or other material to which it is applied, the age of the surface, etc. The following is an approximate rule: Divide the number of square feet of surface by 200. The result will be the number of gallons of liquid paint required to give two coats; or, divide by 18 and the result will be the number of pounds of pure ground white lead required to give three coats.

UNITED STATES CIVIL-SERVICE EXAMINATION.

JUNIOR TOPOGRAPHER (MALE).

February 5 and 6, 1914.

The United States Civil Service Commission announces an open competitive for junior topographer, for men only, in February 5 and 6, 1914. From the register resulting from this examination certification will be made to fill vacancies as they may occur in the position in the Geological Survey, at salaries ranging from \$720 to \$1,260 a year, and in positions requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion. The salaries paid will be governed by the rating of the eligibles in the subject of training and experience.

Appointment to permanent positions in the Geological Survey will be made from the register of junior topographer eligibles. An examination will be held on February 4, 1914, to secure eligibles qualified as topographic aid, for temporary employment only, during the field season. An applicant who desires to be examined for both positions must file a separate application for each.

Competitors will be examined in the following subjects, which will have the relative weights indicated:

- | | |
|--|----------|
| Subjects. | Weights. |
| 1. Mathematics (comprising arithmetic, algebra and including problems involving quadratics, plane and solid geometry, plane trigonometry, logarithms, mensuration, and projection)..... | 15 |
| 2. Surveying, use and care of instruments, and elements of astronomy as applied to surveying (the field questions are all elementary in character and do not involve any mathematical knowledge beyond that under Subject 1) | 15 |
| 3. Contour construction (consisting of drawing contour lines from given perspective view).... | 25 |
| 4. Topographic drawing and let- | |

tering	15
5. Training and experience.....	30

Total

100
Statements as to training and experience are accepted subject to verification.

Time allowed, two days of six and seven hours, respectively. The first and second subjects will be given on the first day, the third and fourth on the second day.

No sample questions of this examination will be furnished.

Applicants must have reached their twentieth but not their thirtieth birthday on the date of the examination, except that in the case of men who have had five field seasons' experience in any Government bureau as technical field assistant doing topographic work similar to that executed by the Geological Survey, the maximum age limit is 35 years.

Competitors must supply themselves with drawing board not less than 15 inches square, drawing pen, pencil, scale, ink, and square or triangles.

This examination is open to all men who are citizens of the United States and who meet the requirements.

Persons who meet the requirements and desire this examination should at once apply for application Form #312 to the United States Civil Service Commission, Washington, D. C., or the Secretary of the United States Civil Service Board at San Francisco. No application will be accepted unless properly executed including the medical certificate, and filed with the Commission at Washington in time to arrange for the examination at the place selected by the applicant. In applying for this examination the exact title as given at the head of this announcement should be used.

Issued December 19, 1913.

UNITED STATES CIVIL-SERVICE EXAMINATION.

AID (MALE.)

January 21-22, 1914.

The United States Civil Service Commission announces an open competitive examination for aid, for men only, on January 21 and 22, 1914. From the register of eligibles resulting from this examination certification will be made to fill vacancies as they may occur in this position in the Bureau of Standards, Department of Commerce, at salaries of \$600 and \$720 a year and vacancies as they may occur in positions requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

The work of the Bureau of Standards is scientific and technical in character, consisting principally of physics, chemistry, and mechanical and electrical engineering. The Bureau employs a large number of experts in each of these branches. Young men filling successfully the position of aid are eligible for promotions in the lines of work in which they have become efficient. The opportunity for study and advancement along the lines indicated is equal to that of the leading commercial or educational institutions.

Competitors will be examined in the

following subjects which will have the relative weights indicated:

Subjects.	Weights.
1. Elementary algebra, geometry, and trigonometry.....	20
2. General physics	30
3. Elementary mechanical drawing	20
4. Education, training, and experience	20
Total	100

Graduation from a mechanical training, technical, or scientific school or equivalent training in a scientific or technical laboratory is a prerequisite for consideration for this position.

Statements as to education, training, and experience are accepted subject to verification.

Two days will be required for this examination.

No sample questions of this examination will be furnished.

Applicants must have reached their nineteenth but not their twenty-fourth birthday on the date of the examination.

Each competitor should bring for use in the examination a small drawing board, T square, triangle, ink, pens, pencils, drawing instruments, and a scale, divided into sixteenths.

Under an act of Congress applicants for this examination must be examined in the State or Territory in which they reside and have been actually domiciled in such State or Territory for at least one year previous to the date of the examination.

This examination is open to all men who are citizens of the United States and who meet the requirements.

Persons who meet the requirements and desire this examination should at once apply to the United States Civil Service Commission, Washington, D. C., or to the secretary of the board of examiners at San Francisco, for application Form 1312. No application will be accepted unless properly executed, excluding the medical certificate, and filed with the Commission at Washington in time to arrange for the examination at the place selected by the applicant. In applying for this examination the exact title as given at the head of this announcement should be used.

Issued December 19, 1913.

TAKING THE HEAT OUT OF LIGHT.

The chemist by synthetic processes can enable you to taste strawberry jam. He can analyze the material that gives the scent of hyacinths and reproduce it, without ever having seen such a flower. But he cannot make light which will compete with the best that

nature has devised. And the lighting engineer has been helpless until quite recently, when the first steps have been taken in what is proving to be the right direction.

The firefly's most important secret is out. Its light is intermittent. And like almost all discoveries, it is so simple that the scientists are wondering that they have not noticed or placed any particular importance on that fact before. The heart beat is intermittent, for if it were not that organ could not stand the strain of action for even part of a lifetime. How long can you sustain a vigorous muscular effort? Only a short time, and then you must halt lest you invite exhaustion. However, you can make momentarily extremely violent efforts, and you can repeat these frequently if you give them time between to recover.

The shining thread of the electric bulb can glow much brighter for a short while than it ordinarily does during continuous service. M. Dussaud merely applied the principle of occasional, regular rests to his incandescent lamps, required them to give their best when at the white heat, and then, after that brief tax, gave them a longer period of repose ere calling them again to duty.

It is a fact that the actual heat of his filaments is unusually high, but because of the way his system works the light produced is cold—the lamp being in service for so brief a while that it does not project heat waves. Besides this, the filament is equal to an unusual length of service. Remember, you have a similar example in nature, the firefly glows spasmodically and not steadily.

EXPOSITION ITEMS.

"Dazzle Patch," the fastest colt in the world, has been entered by M. W. Savage, owner of the famous Dan Patch, in the race meets to be held on the track of the Panama-Pacific International Exposition in June and October '15.

He has also entered horses for the 2:06 class and for the 2:10 trot in both meets. Among other entries are "Electric Patch."

In a circular just published by Savage, who is also the owner of the International 1:55 Horse Farm of Minneapolis, Minnesota, he gives out an interesting account of Dan Patch, the sire of Dazzle Patch, who holds the world's record of 1:55 and who has paced 132 miles in an average time of 2:04 1/2, and who has lowered the world's record for the mile fourteen times.

615 Phelan Building, San Francisco

Describing Dazzle Patch, Savage declares that at the age of 28 months the colt paced a half mile in 59 seconds, and at 49 months did the half in 56 1/2 seconds and the mile in 2:02 1/2.

Savage declares that the Directors of the Exposition should be praised for their nerve and good judgment in offering equal opportunity to pacers and trotters, as shown by the two purses of \$30,000 each hung up for the 2:06 pacers, an innovation in harness racing.

The Festival Hall at the Panama-Pacific International Exposition is the result of the study of the Theatre des Beaux Arts type of French architecture and has the usual theatre arrangement of a foyer in front, and the stage with its accessories behind a circular auditorium. The details are from the French Renaissance ornament, particularly from Le Petit Trianon and Le Grand Trianon.

The building is three hundred and eighty-six feet long and three hundred and seventy-six feet wide at the central part. The dome which forms the dominant feature of the design is two hundred and twenty-one feet high and one hundred and seventy feet in diameter on the outside.

There will be an expenditure of \$800,000 by China at the Panama-Pacific International Exposition and of this amount not less than \$300,000 will be used for the Chinese Pavilion, according to an estimate made by Dr. T. C. Chu, Commissioner of China, who recently arrived in San Francisco.

"The preparation now going on in China for this Exposition is universal, but is particularly noticeable in central China where there is great enlightenment and industrial civic development," said Dr. Chu.

"The pavilion which will be built by China may be a permanent gift to the United States. Its type of architecture will be typically Chinese and an architect from my country will arrive in San Francisco soon to design the structure.

"In no country is greater enthusiasm over a national exhibit at the Exposition being displayed than in China, and commissions are organized in every province for the purpose of co-operating with the Chinese Government in making ours the greatest exhibit ever displayed by China at any Exposition."

"The Commissioners constitute a bureau and will maintain headquarters in every part of the Republic and there arrange for the exhibits and create additional interest in the Exposition."

"When I left for Europe I was confident that the Fine Arts Department would have an exhibition as strong as

any ever seen in this country," declared John E. D. Trask, Chief of the Department of Fine Arts of the Panama-Pacific International Exposition.

"On my return I am not only confident, but positively assured that there will be in San Francisco in 1915, the very best exhibition of paintings and sculpture that has ever been seen on the Western Hemisphere, and in many respects the most interesting Fine Arts exhibit that has ever been held in the world."

Trask brought back to President Charles C. Moore and Director in Chief Frederick J. V. Skiff, silver plaques, replicas of the golden plaque presented by the Exposition to Baron Pierre de Coubertin, as a trophy to be contested for in the modern pentathlon, one of the leading athletic events at the Swedish Olympian games.

Trask visited ten foreign countries and while abroad conferred with the leaders in art of the world. He was highly successful in his mission and is enthusiastic over the art exhibit which is to be presented on the Exposition grounds in 1915.

OIL DISPLACES COAL IN PACIFIC COAST STATES.

On the Pacific coast coal is now used practically for household purposes only, and the consumption of coal in 1913 was about the same as in 1912. In the San Francisco market the use of fuel oil for generating steam has displaced that of coal. The only coal used for steam is that taken by the Pacific Mail Steamship Co. and the Japanese Steamship Co. for their vessels to the Orient, while fuel oil is used almost to the entire exclusion of coal on Puget Sound and on the railroads of Oregon and Washington. The coal trade of San Francisco has been largely supplied by British Columbia, but on May 1, 1913, a strike was begun at the British Columbia mines and all shipments to the San Francisco market ceased. On account of this strike rail shipments of coal from Utah, Wyoming and New Mexico were considerably increased, and some shipments were made by water from Puget Sound, Australia, and Japan.

The production of petroleum in California in 1913 is estimated at 96,000,000 to 97,000,000 barrels. Part of the output finds its way to household where gas manufactured from oil is used for cooking. At the close of 1913 the price of oil to consumers and steam plants at San Francisco was from 60 to 70 cents a barrel, which is equal to the price per ton (\$2.55 to \$2.50) for Pocatontos or Cardiff coal.—U. S. Geological Survey.

NEW RAILWAY ROUTE IN ALASKA DISCOVERED.

Some excitement was caused by the discovery of a feasible railway route from Portage or Passage Bay, on the west side of Prince William Sound, to Turnagain Arm, Alaska. Here a route was founded which, by use of a tunnel about 2 miles in length, will avoid the glaciers and yield low grades for both to and out bound traffic. The distance from tidewater on Prince William Sound to tidewater on Turnagain Arm is about 12 miles, and the proposed line will join the Alaska Northern

Railroad at about mile 63. Official information regarding the availability of Portage Bay as a terminal is still lacking but private advices are favorable. By use of this route the distance from tidewater to the Matanuska coal field is reduced to about 136 miles, with only one adverse grade and that a low one. The information at hand indicates that this route is certainly worthy of careful consideration.

Railway Construction of First Importance.

Communication with Fairbanks has been improved. During the summer several automobile trips were made over the military wagon road. Moreover, a new direct steamboat service has been established between upper Yukon points and Fairbanks. Wagon road and trail construction has been continued by the Alaska Road Commission in different parts of the Territory, thereby reducing costs of transportation to various mining camps. The results attained in building railways and wagon roads and establishing steamboat service have been of incalculable advantage to the mining industry of Alaska and have led to developments indicating something of the vast mineral resources of the Territory. At best, the transportation is woefully inadequate, and unless it be extended no great advancement in mining, except along the coast, can be expected. Therefore railway construction is of first importance to Alaska, and second only to this is the building of a system of tributary wagon roads.—U. S. Geological Survey.

RIVERSIDE ELECTRIC PLANT—A MUNICIPAL PLANT BUILT FROM PROFIT.

By Edward P. T. Troy.

Municipal ownership of electricity has existed in Riverside for seventeen years. In 1895 the town issued bonds to the amount of \$10,000 to pay for the construction of a substation, and the erection of poles and wires for the distribution system. The current was purchased from a company generating hydro-electric power in the mountains, and wholesaling it in the towns.

In order to protect the people from the unsatisfactory service of the company, the town, in 1900, made a further issue of bonds, for the sum of \$10,000, to pay for the building of a steam generating plant. With this small beginning, as the town increased in population, the service of the municipal electric plant was extended.

The report of City Auditor Prior shows a total value of the plant and its various funds amounting to \$513,986. These assets have grown from the profit of the plant. All of the extensions, improvements and betterments have been paid for out of the surplus earnings. In addition, the original bonded debt has been reduced to \$50,000. A depreciation fund of \$58,295 has also been accumulated, out of which are provided all replacements.

Beginning with this small plant, the people of Riverside now have a property worth over half a million of dollars, every dollar of which they have paid for out of the receipts. At the same time, the rates charged have been lower than those of the giant com-

panies that furnish current to all the cities and towns in Southern California. The highest rate is eight cents per kilowatt, the same as the Pacific Gas and Electric Company is forcing the people of San Francisco to pay, "because of the injunction." Yet, that company collects in the latter city over \$3,000,000 for electricity. The minimum monthly bill charged in Riverside is fifty cents. In San Francisco, the minimum is one dollar.

The total income from the furnishing of electricity for lighting of homes and the streets, and for power used in business places and for pumping was \$143,939. The operating expenses were \$96,552, leaving a revenue from operation of \$46,956, or a profit of 32½ per cent. Other receipts brought this revenue up to \$55,695. Deductions were made for depreciation, \$16,500, interest and repayments of bonds, \$1,270, leaving a net surplus or profit for the year of \$34,925.

For street lighting, lamps of medium candle power are favored. About 3,000 of them are used, being placed on low posts and at moderate distances along the street, giving an excellent illumination. High power arc lights are but little used, there being but thirty-eight on the streets, and only eight in the stores. The business of the plant is still growing. About 237 consumers were added during the year, and the consumption of current increased five per cent.

Riverside is a splendid example of successful operation of a municipal electric plant. Every other city in California may well follow her, with profit to the people. In Riverside there is no corruption of the courts or city council, nor interference with its political affairs, by a lighting corporation. Its chief of police and other officials are not appointed at the behest of any similar corporation, as in San Francisco.

THE IRON AGE OF ARCHITECTURE.

"Nothing is up to the standards that prevailed when I was young," bemoans the average person after he has passed the stage when his creative activities begin to decline and he sees the younger generation pushing to the fore with new ideas, and different methods of working them out. So likewise it is quite common with the general public to bemoan "this commercial age of architecture," and to see a bright halo surrounding the achievements of middle age architects, which they believe have not and could not be equaled, certainly not surpassed, by present-day architects. Things which appealed to the appetite of youth, its physical, mental and spiritual pleasures and ecstasies always appear to old age as far superior to similar modern things, yet if one could go back fifty years to again enjoy them, how different than the memory would the reality be! It is with pleasure we read the following comment of Engineering Record on the fallacies, too commonly met with today, in the modern conception of the relative value of the work of the medieval and the modern architect.

"It is the joy of many to abuse the present and laud the past, but it has been given to few so to rouse an architectural hornet's nest as did a writ-

er in a London paper recently in bemoaning the passing of the craftsman from his one-time leadership. Lamenting that the master builder of medieval times had given place to the mere architect of today, he brought about his ears the whole protesting swarm. Now granting that there were giants in those days who left behind them monuments of such eternal beauty that they have been the chief inspiration of all that has come after, it is by no means true that the merit belongs to the builder or the craftsman alone. The great work of antiquity was wrought by the combination of artist and mason in proportions now unknown, with time as their silent partner. However when the creative mind began its career its host was usually sleeping in the crypt it had planned a century or so before the building, as we know it, was finished. As to the most medieval work, it has gone to well-deserved decay long since. We let our imaginations run riot in dreams of the faithful workman's loving artistry, forgetting the nameless and pestilent bunglers whose clumsy fingers wrought abominations in wood and stone. And few even of the masterpieces have escaped the stupid and ruthless meddling of the renovator, whether architect or builder by training.

"No, the old days were as full of bad design and worse execution as our own. The ruins of St. Mary's Abbey in New York, for instance, show as vile a grade of rubble as any cheap contractor of the twentieth century could imagine and the building tumbled easily into the decay it deserved. Some of the good and stable work of the past has happily remained to us and has served as a model from century to century. The ordinary architect of today makes fewer mistakes by copying it than by trusting to his own magnation. Whether his predecessor began as artist or as mason makes precious little difference.

"But before passing hasty judgment upon the architect of our own times, think a moment of the evil days upon which he has fallen. In the medieval times he must perform know only the technique of masonry—the rest was his art. If he were building a church the fine stimulus of the Gothic was his inspiration and his medium was craftsmanship in stone. Today he must know masonry and concrete, structural steel and sanitary plumbing, lighting and heating, electric wiring and acoustics. The old congregation did not need to read and mostly couldn't, expected to be cold and generally was, could not understand the Latin of the service even if it chanced to hear it. Little need for wonder or blame then if the architect, having to be a Jack-of-all-trades, bungles a goodly number of structures if he tries to cover the whole range single handed. His training is of necessity spread out rather thin and the wonder is not that he sometimes does badly, but that he ever succeeds in rising out of the turmoil into greatness.

"Besides all this he has to struggle against or make surrender to a complex commercialism that makes the machinery of construction terribly intricate. His predecessor did not have to plan for buying his stone from one source, his steel from another and his

wood work from a third; he was not hounded by agents of patented devices nor pestered by circulars of supplies offering him the usual architect's commission of — per cent.' If he were a grafter it was by malice prepense, and not by daily temptation. All these things the architect of today has to endure, besides being called a slavish copyist if he turns to the best in antiquity and a commonplace innovator if he does not.

"His chief hope is in suiting himself as best he may to new conditions, calling in technical advisers on the details which he cannot in the nature of things have time to master, even if he has the ability, standing the more firmly by the interests of his client as he confronts a regiment of sub-contractors, and remembering that he must be artist before being engineer or contractor. Originality and resourcefulness is much more difficult to find than technical or constructional skill, and if the architect is to be more than a master mason or boss concrete mixer it must be by the possession of these attributes. And looking about one cannot but realize that art did not die with the Gothic nor perish with the Romanesque. New necessities must bring new forms now just as certainly as they did a thousand years ago. And if the sketches of the Cathedral of St. John the Divine reincarnate the inspirations of the past, just so surely does the fine mass of the West Street Building, rising like a huge ancient keep against the western sky as one passes out onto the North river, bespeak the promise and the dignity of the age of steel. The times have changed and the architect must change with them."

UNITED STATES CIVIL-SERVICE EXAMINATION.

TOPOGRAPHIC AID, TEMPORARY (MALE).

February 4, 1914.

The United States Civil Service Commission announces an open competitive examination for topographic aid, for men only, on February 4, 1914. From the register of eligibles resulting from this examination certification will be made for temporary employment as topographic aid under the Geological Survey during the field season, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion. The entrance salaries range from \$40 to \$75 a month. The salaries paid will be governed by the rating of the eligibles in the subject of training and experience, and in no case will topographic aids be advanced in salary beyond the maximum stated above until they qualify in and are certified from the junior topographer examination.

Appointment to permanent positions will be made only of persons who qualify in and are certified from the junior topographer examination. An examination for junior topographer will be held February 5 and 6, 1914. An applicant who desires to be examined for both positions must file a separate application for each. Failure to qualify in the junior topographer examination within a reasonable time will be considered by the department sufficient

cause for removal under the statute. The junior topographer examination is usually held about the same time of the year as that for topographic aid, and topographic aids who wish to qualify as junior topographer will be expected to do so within a reasonable time from the date of their appointment as aid.

Competitors for the position of topographic (temporary) will be examined in the following subjects, which will have the relative weights indicated:

Subjects.	Weights.
1. Mathematics (elementary, practical questions)	15
2. Surveying (elementary, practical questions)	15
3. Topographic drawing	20
4. Letter writing	10
5. Training and experience	40

Total 100
In making certifications for employment from the register preference will be given to residents of the States where the persons are to be employed. Statements as to training and experience are accepted subject to verification.

No sample questions of this examination will be furnished.

Applicants must have reached their twentieth but not their fortieth birthday on the date of the examination.

Competitors must supply themselves with drawing board not less than 15 inches square, drawing pen, pencil, scale, ink, and square or triangles.

This examination is open to all men who are citizens of the United States and who meet the requirements.

Persons who meet the requirements and desire this examination should at once apply for application Form 1312 to the United States Civil Service Commission, Washington, D. C., or to the Secretary of the U. S. Civil Service Board at San Francisco. No application will be accepted unless properly executed, including the medical certificate, and filed with the Commission at Washington in time to arrange for the examination at the place selected by the applicant. In applying for this examination the exact title as given at the head of this announcement should be used.

Issued December 19, 1913.

CALIFORNIA'S MINERAL PRODUCTION FOR 1913 VALUED AT OVER \$95,000,000.

Increase of \$4,000,000 During the Year.

At the close of the year 1913 the Mineral industry in California continues to display a healthy condition and shows every evidence of continuing the remarkable rate of growth which it has maintained during the past several years. While the exact production figures for the year just ending, which are obtained by totaling the returns from individual producers, will not be available for another six months, it is possible to arrive at a close approximation of the value of the State's mineral output at this time.

Petroleum, which has strengthened its hold on first place, will show a production of about 83,000,000 barrels, an increase of 3,500,000 barrels over the 1912 output. The most gratifying feature of the situation being the in-

crease in consumption at a rate sufficient to not only maintain the prices of the previous year but to show a slight increase over the average price of 46.7c which held during 1912. Thus petroleum alone, the crude product at the wells, will show a value of about \$13,500,000 or an increase of \$1,500,000 as compared to 1912.

Gold, which was the most important mineral product of the State for so many years, comes second with a value differing but little from the 1912 figure, in round numbers, \$20,000,000. Increased efficiency in dredge manufacture and operation continues to keep the output of this method of gold mining up to the mark, in spite of the fact that the class of material being worked is constantly becoming poorer. Deep mining is in a more prosperous condition than it was a year ago and there has been no important change in any branch of precious metal mining.

The copper outlook as far as actual results go, has remained practically unchanged during the present year. The future question has not yet been settled but an attitude of hopefulness prevails, and much further experimenting and scientific investigation has taken place, all of which augurs well for an early return to the greater exploitation of the unmeasured copper resources of the State. Production for 1913 will be valued at approximately \$3,500,000.

Cement output will show an increase of about \$2,000,000 in value, or a total of close to \$8,000,000. Crushed rock and granite will exceed \$6,000,000; brick \$3,000,000; natural gas \$1,250,000; borax a normal production worth over \$1,000,000; silver \$800,000, and quick-silver \$750,000, a decrease due largely to the low price of \$38.50 per flask which prevailed during the year.

The minor mineral products exhibited normal activity and growth and a conservative estimate of the total output for 1913 shows the gratifying increase of approximately \$4,000,000 over the 1912 figures of \$9,472,355.

CONTRACTORS' LIABILITY RATES.

By E. T. Thurston.

The Daily Pacific Builder is in receipt of the following letter from E. T. Thurston of Thurston & Co., General Contractors, wherein comparisons are made of rates charged by the State and by private companies. Mr. Thurston has gone into the matter very carefully.

The Daily Pacific Builder,
560 Mission Street,
San Francisco, Cal.

Gentlemen:
In connection with the Workmen's Compensation Act passed by the last legislature, and which goes into effect January 1st, 1914, a State Insurance Department is provided for, empowered to adopt premium rates which shall govern those who insure with the State, or with mutual or Inter-insurance organizations, but not necessarily those who insure with private companies. For use during 1914 the Industrial Accident Commission has adopted without change a schedule of rates as submitted by the Board of Underwriters representing the private insurance companies doing business within the State, and has informed the

public through a published statement given general circulation that these rates are from twenty to forty per cent less than the compensation rates effective during the past year under the Roseberry Act. We would understand this to mean that the new rates are at least twenty per cent below the corresponding 1913 rates and in some cases are as much as forty per cent below such rates. In view of the fact that this is very far from the truth as respects building operations, the writer believes the statement should not go unchallenged, and that the facts should be placed before the public for what they are worth.

The comparison of the rates adopted for 1914 with the maximum Board rates for 1913 discloses the fact that the 1914 rates are higher than the 1913 rates in the case of outside painting and composition roofing work respectively by a little more than one per cent; that the two rates are identical in the cases of reinforced concrete for buildings, installation of sky-lights and similar outside ornamental work; thence the reductions rise as high as eighteen per cent for plumbing and interior painting, and in one case only greater than that; namely, glazing, which shows a thirty-and-a-half-per cent reduction. Thus it will be seen that in only one case is the reduction as great even as twenty per cent.

The foregoing comparison is between the adopted rates for 1914, from which so far as the State Insurance Department and the mutual and inter-insurance organizations are concerned we can obtain no reduction, and the maximum Board rates for 1913, which so far as the writer knows were in no case of a general contractor enforced, but were cut as much as sixty-six per cent. Many contractors were protected under a flat rate, and it will, therefore, be interesting to note that an application of the respective rates to a typical case of a reinforced concrete building, including excavation, concrete, carpentry, and general incidental and supervisory expenses showed that the average rate for 1914 would be 6.72% as against a maximum of 6.80% for 1913 under the Board rates. The average rate for 1914 is thus seen to be 2.65% less than the maximum of 1913. The Board flat rate for 1913 was 4.75% and individual companies in competition offered rates ranging from 3.08% to 2.25%, under which latter rate scores of general contractors are at present insured. Since the State Insurance Department offers no flat rate for 1914, but requires premium payments at the segregated rates as adopted, the general contractors in comparing present with prospective conditions, should compare the average State rate with the flat rate he has been paying. In the typical case cited the average State rate is seen to be about three times the lowest flat rate at present in effect. It is not in a spirit of criticism of the Compensation Act, nor the Industrial Accident Board, which is undoubtedly undertaking the solution of the manifold problems presenting themselves day by day, to the best of its ability, but merely to correct a mis-statement of facts and set an important matter right as it affects the building industry and particularly general contractors for building operations. It behooves every contractor to make

prompt arrangements to protect himself under the new law, and he will have to pay the rates charged for the services demanded; and if through the columns of your paper, you shall warn him to undertake no contracts without making adequate provision for the insurance expenses, you will have done a good service to a large number of your readers.

Very truly yours,
E. T. THURSTON.

CITY WANTS A BLOCK.

A suit in condemnation was brought by the City Attorney in the Superior Court Wednesday against the owners of the block of land bounded by York, Hampshire, Mariposa and Seventeenth streets. The property is desired by the city for the shops and car barns to be erected for the municipal railway. The owners of the realty to be condemned are the O'Neil Estate Company, the Ocean Shore Railroad Company, August Egbert, Meyer Ruef, Ida M. Cruikshank and Mary Faunsgarten.

BUILDING OPERATIONS FOR THE MONTH OF DECEMBER.

Building activities throughout the city for the month of December, as reported by the Bureau of Building Inspection of the Board of Public Works, shows a renewed activity in the building line.

The total value of the estimate cost of these improvements aggregates the sum of \$1,956,339. This is for private construction only and does not include the vast expenditures being made in the Exposition Grounds, much of which will prove of a permanent character, nor does it include the permanent improvements being made by the United States Government in the fortifications and Administration Buildings within the city limits neither does it include the State's quota in harbor improvements, docking facilities, Armory and State Normal School extensions.

Figures compiled by the Bureau of Building Inspection are as follows:

Class	No of Bldgs.	Amount
Class "A"	3	\$ 857,250
Class "B"	1	29,000
Class "C"	18	538,352
Frames	132	414,450
Alterations	255	126,287
Total	409	\$1,956,339

SACRAMENTO BUILDING RECORD BROKEN.

It appears that Sacramento will close the year with the record for building at \$3,500,000 or very near that figure. The amount of building up to December 27th amounts to \$3,402,682, or approximately \$600,000 more than

In the matter of building progress Sacramento was sixteenth among the for the entire year of 1912.

cities of the nation last month.

ANNOUNCEMENT.

The very rapid increase in our business the past year, has shown us the necessity of making such a change as would give our customers the very best service and permit us to handle the large volume of business to the best advantage.

Previously, our main office has been in San Francisco while our branch office and warehouse has always been established in Oakland where we have excellent shipping facilities by water and rail.

Beginning with the New Year, we will conduct our business from the Oakland office and will maintain the San Francisco office for the service of our San Francisco and other friends who find it more convenient to call at that office.

At the Oakland office and warehouse, we will welcome all our old friends and customers whose association and patronage we prize so highly. There we can show the full line of machinery which we carry.

All communications by letter, telegram or long distance telephone should be addressed to the Oakland office, GRAVES-SPEARS ROAD MACHINERY CO.

First and Jackson Sts., Oakland Tel. Lakeside 3060.
1041 Monadnock Bldg., San Francisco. Tel. Sutter 755.

At Kansas City, Missouri, there is a dispute between the people and the Gas Company. The company says it can keep its case in the courts for a thousand years.

There is the greatest need for the judicial functions of the Public Utilities Commission. Heretofore these corporations have always resorted to the courts and once they has possession of a franchise or of the people's money it was about a thousand years before anything was done.

In our own case the Pacific Gas & Electric Company have arbitrarily advanced the rate to be paid. The Board of Supervisors had already fixed that rate. But the company goes into the Federal Court and obtains an injunction to prevent the enforcement of the ordinance and in the meantime makes the consumers pay the increased rate. And so the matter rests. Whether or not the Board of Supervisors complied with the law in the matter of fixing doubt that they have the right so to do. But in the meantime the matter is rates is to be decided. There is little lying in the same state in the courts and nothing is being done. There is no reason why this matter should not be thrashed out at once. The judge of the court has expressly said and it is up to the City Attorney to attend to it.

It is said that the Eugenic marriage law in Wisconsin is not working as well as could be expected. That in attempting to prevent the unfit from marrying the law in a measure fails of its object in that people who are prevented from marrying live together anyway.

Mr. Alexander Bell has another theory of the question. And that is to place a premium upon the fit marrying. His idea is that the principal obstacles to high minded and physically capable people marrying has been and is the industrial conditions and the difficulty in making a living. These he would remedy by having the government extend opportunity to young men who are physically and morally and mentally fit, provided they marry and raise families. This would perpetuate the best elements of the race he thinks. This seems to be a reasonable solu-

tion. What the country needs is the perpetuation of the best elements of the race. As it has been the majority of people who married were the favored few who had good jobs from pull or favor, who had inherited wealth, who were unprincipled enough to profit by crooked business methods and the ignorant. To shut off the unfit does advance the race. It simply decreases the birthrate. So that the end sought is not obtained. Mr. Bell's theory is a positive method of dealing with the question and looks to the betterment of the race.

The action of the Canadian parliament in excluding all laborers from the Dominion until March 31st next is directed primarily against the Hindus. A recent court decision has opened the doors to such immigration and this drastic action has been taken because of the labor conditions on the Pacific Coast.

The recent case of California passing an alien law caused wide criticism from certain individuals in the Eastern States. When it comes to Canada taking action against the Oriental races the comparison with the action of our own State is mild in the extreme. They already have a law directed at the Japanese and the present order of the Canadian parliament is intended to exclude the Hindus until some definite action can be taken.

President Wilson has dodged the suffrage question propounded by Dr. Anna Shaw. And he has done a wise thing for Dr. Anna Shaw seems to be possessed of more enthusiasm than common sense. For instance, the newspapers report her as saying:

There are three women in the United States today who might occupy the Presidential chair with a greater degree of success than any of the Republicans, Democrats or Whigs that have so far appeared. They are Jane Addams, Mrs. Carrie Chapman Catt and Mrs. Joseph Bowen of Chicago.

Susan B. Anthony would have made

Proposals.

STATE OF CALIFORNIA
DEPARTMENT OF ENGINEERING
CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until 2 o'clock P. M. on February 2nd, 1914, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State Highway as follows:

El Dorado County from El Dorado to Placerville (III-E-D-11-C), about 6 1/2 miles in length, to be built of waterbound macadam.

Tuolumne County from the Western Boundary of Keystone (III-Tuo-13-A), about 10.8 miles in length, to be graded.

Tulare County from Traver to the Northern Boundary (VI-Tul-4-E), about 5.3 miles in length, to be built of Portland cement concrete.

Kern County from Leido to Famosa (VI-Ker-4-E), about 8.9 miles in length, to be built of Portland cement concrete.

Kern County from Bakersfield to Leido (VI-Ker-4-D), about 10.1 miles in length, to be built of Portland cement concrete.

San Bernardino County from the Western Boundary to Upland (VII-S-Bd-5-D), about 8 1/2 miles in length, to be built of Portland cement concrete.

Ventura County from Ventura to Sea Cliff (VI-Ven-2-D & E), about 7.7 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Santa Margarita to Atascadero Creek (V-S-L-O-2-C), about 8.4 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Paso Robles to the North Eastern Boundary (V-S-L-O-2-A), about 10.8 miles in length, to be built of Portland cement concrete.

Santa Cruz County from the Eastern Boundary to Glenwood (IV-S-Cr-5-A), about 5.7 miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Whittier, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any and all bids or to accept the bid deemed for the best interests of the State.

ERBERT C. TUOME,

CHAS. D. BLANE,

NEWELL D. DARLINGTON,

California Highway Commission.

AUSTIN E. BACHER,

Highway Engineer.

WILSON R. ELLIS,

Secretary.

Dated, December 31, 1913.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Francisco and Chestnut Streets, San Francisco, California, at 10:00 A. M. Thursday, January 8th, 1914, for the construction of The Courts of Palms and Flowers in accordance with the specifications on file in the office of the Director of Works.

Separate proposals will be allowed on Wiring and on Water and Drain Piping.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of (10) per cent of the amount bid or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder's filing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to award the contract if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00 and by paying the refunded fee to contractors submitting bona fide bids. All persons taking out plans and failing to submit a bona fide bid will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee:

WILLIAM H. CROCKER,
Chairman. (*)

Peerless Ironing Board.
Disappears in the Wall

PEERLESS IRONING BOARD
SHOWING CABINET
SET IN PARTITION
CASED UP

The Peerless Ironing Board is perfect in compactness and convenience. Inexpensive but very valuable for apartments, flats and residences. Helps to rent or sell more quickly at better prices.

The Peerless Combination Ironing Board and Kitchenette Table combines the ironing board with a disappearing table in the most compact, inexpensive and convenient form. Invaluable for the small kitchen.

Price \$10.00

Write for circular. Agents wanted.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

Registration for the ensuing year is now in order. The new Progressive party has declared itself. It is the banner under which all Progressives can unite. For political prejudices are usually handed down from father to son and from generation to generation and have their basis in ignorance and lack of breadth of view.

Governor Johnson, well said that the Progressive party is the dominant one in this country. For there is no candidate but that declares himself to be progressive, be he Democrat or Republican or what not. So that in reality it is the Progressive element that is dominant in both of the old parties and there is no reason why people, outside of office seekers, should not get together and unite in a common cause.

In the main most people are right minded and seek the common good. But some are blinded by self interest and want to put something over on the public and thereby advance themselves. There will always be different ways of looking at public questions. But those who look at things the same way make a mistake by hanging on the fetich of a party name when the name no longer stands for anything.

Registration is proceeding as rapidly as the Registration office can take care of the electors. Many are standing in line at all hours of the day and in the course of a few weeks there will be a substantial showing for the coming year.

Governor Hiram W. Johnson has announced that he will again be a candidate for Governor. He has frankly, clearly, and unmistakably stated his position. Inasmuch as the newspapers of San Francisco are such a set of subsidized personal organs that it is hard to get a printed opinion of any body that is worth reading, the following editorial from the Sacramento Bee, without doubt the most ably edited newspaper in the State, may be of interest:

"Abraham Lincoln strongly advised the Nation against the folly of swapping horses while crossing a stream.

And, although the crisis of which he spoke was one in which he was personally the dominant figure, all mankind today recognize the sagacity and wisdom of his advice.

California is still in midstream.

She has progressed well into the waters, but there is considerable distance yet to go before she can land her burden safely on solid ground, confident the advance and Progressive policies she is carrying will be placed high and dry above the menacing

waters of corrupt politics and Big Interest schemes.

Against his own personal, financial, mental and physical interests, Governor Hiram W. Johnson has decided to yield to the importunities of those most anxious for the preservation and advancement of true Progressive policies, and for the continued welfare of the State through modern humanitarian and business methods.

At a great sacrifice, he has given up comfort, and peace, and financial betterment, in order that for four years more the reforms which already have benefited California so greatly shall be placed above any reactionary political flood.

There is nothing of vanity in the composition of the Governor. In fact, he is his own severest critic. He minimizes the necessity for his own personal leadership in the present crisis, but wisely has given in to the judgment of others.

That judgment has been right along that, no matter how severe the burden nor how great the imposition—it has become the absolute and imperative duty of Governor Johnson to head the Progressive Party, and head it in the Gubernatorial fight—that, without him in the front of the battle as the Gubernatorial candidate, there would be danger not only that the Progressive movement would be checked where it is, but that even the fruits of the last three years would be lost.

Only those most intimate with the details preliminary to the announcement today can appreciate this act by Governor Hiram W. Johnson—an act which is the acme of personal sacrifice.

For another campaign is distasteful to Hiram W. Johnson. The past three years have crowded him with work and with worry.

The Governor's personal choice was to retire from political life and devote himself to his profession—in which he could make his official salary over, and over, and over, and over again with not one-tenth the vexation, and trouble, and annoyance, and intense and sleep-destroying labors that have been and that will be his in the Governor's chair.

Next to that his personal preference was for a seat in the United States Senate.

And certainly none could blame him therefor. He could be elected thereto without any trouble. There he would have a congenial and comparatively easy task.

And he could—at the Congressional recesses—extend his income into very large figures by accepting any one of the very flattering offers he has received from lenders of money.

So that, in plain English, in announcing today that he will run again for the office of Governor, Hiram W. Johnson has thrown money, personal inclina-

tion, personal comfort, and peace of mind to the winds.

He has weighed all these things in the balance with PUBLIC DUTY and he has uncomplicatedly taken his stand and stripped for the battle.

Surely, The People of California will not allow this sacrifice to have been made in vain."

The Chronicle states that the Currency Measure is in the main a good law. It, however, finds various faults in the measure chief of which it states That the currency for whose redemption the banks are made amply responsible is made to appear to be Government money. It further states that there can be but one motive for that deception, and that is to prepare the public mind for actual government money as the sole currency.

So far as the people generally are concerned what would be the difference? What the Chronicle fears is the fact that the National banks will not any longer be able to issue their own notes and have them circulate as money from the fact that they are guaranteed by government bonds. These banks will therefore lose a considerable part of their control over the money situation and will be deprived of the profit that results from the loss or destruction of the same. What in the end is any kind of money but a guarantee to pay and certainly the government's guarantee is as good as any bank's.

The parcels post has successfully refuted all the doleful forebodings that were prophesied about it and has positively proven that the government can conduct such a business just as well or better than the express companies, with all their much talked of efficiency of a private corporation. A newly organized service, without precedent to guide it, it has met the problems put up to it by the extraordinary business of the holidays with efficiency. It was not swamped with the rush of business, but delivered them to their destination with certainty and dispatch.

There is a reason for this. The postal service itself is organized with a high degree of efficiency. It employs men under the merit system. While the salaries it pays are not large, it provides a test for entrance and the guarantee of a living enables it to get hold of and keep competent men. This system it has extended to the parcels post and it can at once handle it with the same degree of efficiency. The extension of the system that begins with the new year will look to the accommodation of the public who have so long paid an exorbitant tribute to the express companies.

The Post Office and the Panama Canal are a complete answer to the critics who insist that the government is incapable of undertaking enterprises required by the public welfare.

The San Francisco Chronicle published its annual edition last Monday. It is a compendium of the progress of the state and presents an array of facts and figures and illustrations of the wonderful wealth of the State. California is a great state. Great in its geographical area, great in its coast line and sea privileges, great in

its scenic wonders, great in the variety of its climate and great in the wonderful diversity of its products. It possesses the highest mountains and the lowest valleys in the United States. Its climate ranges from the land of perpetual snow in the high Sierras to the subtropical seasons of its adjoining valleys. It borders for 1200 miles on the boundless Pacific ocean, the path of the world's commerce. Its scenic places are the wonders of the world. Its product embraces everything in agriculture from the rice of the swamps to the hardy cereals of the north and from the pineapple and citrus fruits to the winter apple. Its minerals range from the petroleum in which it leads the world in production, to gold which first made the name of California famous throughout the world.

A review of the progress of the State brings all these facts into view. Californians have every reason to be proud of their State. For here the great Creator has certainly bestowed his favors with a lavish hand. In no other place is there such infinite variety and in no other place are there so many comforts and enjoyable places for the abode of man.

Theodore Bell is out as the champion of the irrigationists of Modesto and the Turlock districts and has filed suit to prevent San Francisco from getting a water supply from the Hotel-Hotel under the Act of Congress providing the grant. Here is another zealous patriot of the great State of California that should be damned to everlasting fame.

The welfare of the State and the whole Pacific Coast for that matter depends upon the prosperity and the future greatness of the port of San Francisco. The first and most important need of the urban population that surrounds the bay is an abundant and pure water supply. This has been fought out and the City has been put to untold expense to educate even the Easterners on the subject. It has been fought out on the floor of the House and in the United States Senate and before the President of the United States. Now comes Theodore Bell, a citizen of San Francisco, and in the capacity of attorney for the Irrigationists tries to tip the matter in the courts. It was shown before that the conservation of the flood waters of the Tuolumne by the City would give the irrigationists more water than they ever had before.

Bell was ever the leader of the popular element in the Democratic party. He represented his district in the United States Congress. He has proved to be a political weather cock and is now seeking to prevent the consummation of the cherished scheme of all of our public spirited citizens to obtain a pure and abundant water supply for ourselves and those who come after. Surely the people of California will have cause to remember Theodore Bell and Senator Works. In the days of the Grecian republic they would have been forever banished from their city and had they been citizens of early Rome they would have been thrown from the Tarpeian rock.

The State Board of Control has ordered the State Departments to use the Parcels Post instead of the express company. Having had the divine right

to charge the people whatever it liked the express company is slow to realize that the time has come when it must come out in the open and take an even chance with everybody else. It is no longer the engineer on the steam roller. To show how slow it is to realize the situation the following account of its attitude in regard to carrying the license tags for automobile and chauffeur badges given in the Sacramento Bee is illustrative:

"The State Board of Control is to be congratulated for ordering the Motor Vehicle Department of California to change its system of sending out automobile license plates and chauffeurs' badges, taking the carrying of them away from the Wells-Fargo Express Company, and handing it over to the Parcel Post.

Wells, Fargo & Company would have made about \$50,000 this year out of this work, and the same every subsequent year, if the former plan has been continued.

Finding itself liable to lose the job because it was charging 50 cents for the delivery of these automobile license plates while the Parcel Post would deliver them for 29 cents, it first made the flat rate of 35 cents, and then, in order to save itself, came down to 29 cents.

Under the circumstances, no man or woman will object to paying to Uncle Sam 6 cents more for the delivery of a license than he would now have to pay to Wells, Fargo & Company.

In fact, the average citizen, knowing the facts of the case, would prefer to pay the 29 cents to the Parcel Post rather than have Wells-Fargo deliver them free."

Orville Wright, one of the brothers who were the first to fly successfully, announces that he has perfected a stabilizer for the aeroplane that makes it practically fool proof and increases the factor of safety in aerial navigation many fold. One of the main features of the mechanism of flying is to propel the plane so that the air acting as a flying wedge under the plane produces a lifting force equal to the downward pull of the force of gravity. The automatic stabilizer is supposed to take up any change in the momentum of the plane so that should the machine be slowed down below the danger point the plane will adjust itself and regain its equilibrium.

This invention may mark a decided step in the progress of aerial navigation. When a machine will automatically right itself and land squarely if anything goes wrong with the power it leaves the aviator free to give his attention to other things and removes the principal danger to the learner.

A contemporary has estimated that since the average length of a railroad journey in this country is 34 miles, and a passenger may take 2,275,122 such journeys with only one chance of being killed, it would take him, at two trips per day, 2,792 years to run the full gamut of risk. That is to say, if the one fatal accident happened to him in the present year, it would have been necessary for him to start his railroad traveling at two trips per day, in the year 1879 B. C. It must be borne in mind, however, that he might be killed on his very first trip.

Address By Knowland

Pacific Coast Terminals and a Review of Recent Legislation by Congress for the Development and Encouragement of Water Transportation.

Address delivered by Hon. Joseph R. Knowland before the Tenth Annual Convention of the National Rivers and Harbors Congress, Washington, Dec. 4, 1913.

Mr. President and ladies and gentlemen: To the gentleman from Pennsylvania, Congressman Kelly, who a few moments ago spoke so eloquently of that State, and to the chief executive of New York, Gov. Glynn, who has just taken his seat after fairly staggering us with an enumeration of the big things being accomplished by the Empire State—to these gentlemen I would say that I hail from the great State of California, whose beauties and wonders are indescribable. Had the ancestors of these gentlemen first landed upon the shores of that Pacific wonderland the great Eastern States mentioned would today I fear be deprived of the valuable services of their two most able champions. Should I attempt to describe the resources of my native State, or endeavor to enumerate the great things we are accomplishing, my time would be exhausted before I touched the subject to which I am supposed to address myself. We hope, however, to welcome the delegates of this convention to California in 1915 so that you may see for yourselves what words are inadequate to describe.

Referring but briefly to the criticisms by Gov. Glynn of the expenditure of \$6,000,000 and more at the Mare Island Navy Yard, located in California, I will say that modesty prevents me from directing attention to the fact that I have, until very recently, represented the district in which that yard is located, and that during my term a great part of the large sum was appropriated. Should I reply I might be compelled—although of course it would greatly embarrass me—to direct attention to the fact that the large and generous appropriations demonstrated the advisability of sending live men to Congress. Just a word, however, touching the utility of the Mare Island Navy Yard and the efficiency of its working force. Several ships have been built there, and during recent years three naval colliers or fuel ships. Sister ships in two instances were under construction at the same time at the New York Navy Yard, and when the Navy Department figured up the cost, the plans being identical, it was found that the Mare Island Navy Yard, way out in California, had built both ships for less money. But I must get to my subject.

Pacific Coast Ports Preparing for Opening of Panama Canal.

The people of the Pacific coast are fully alive to the tremendous importance of immediately enlarging and otherwise improving the terminal facilities at the various ports to meet the increased demands of commerce expected with the opening in the almost immediate future, of the Panama Canal.

Experience extending over a period

of many years has demonstrated the advantages and necessity of State or municipal control as contrasted with that of corporations and individuals. This awakening has, in many localities, resulted in the institution of actions in the courts and in insistent demands for legislation aimed to place the ownership and administration of terminals in the hands of the people, where they belong, so as to accord to the smallest shipper the same advantages and facilities which heretofore and in too many instances were enjoyed exclusively by favored corporations and large shippers.

Congress Legislates to Prevent Throttling of Water Competition.

In so far as it exercises jurisdiction, the Congress of the United States has endeavored to assist in the movement to provide for the fullest utilization by all the people of the great rivers and harbors of the country, upon which there has been expended by the Government nearly \$700,000,000. Not only has Congress provided the funds for improvement, but it has gone a step further and enacted legislation to prevent the throttling of these watercourses, the great highways of the people, where exclusive franchises and rights of way cannot be granted. Much of this recent legislation aimed to maintain the competitive value of these waterways has emanated from the Committee on Interstate and Foreign Commerce of the House of Representatives. As a member of this committee and an enthusiastic advocate of the fullest development of our waterways, I am proud to say that in the framing of some of this legislation I have taken at least a small part. Before discussing the terminal facilities of Pacific coast ports, I will refer very briefly to a few of the recent legislative enactments aimed to aid in the Nation-wide movement, led by the National Rivers and Harbors Congress, for a maximum utilization of the facilities for water transportation.

Legislation to Protect Water Traffic Proposed in Bill of 1910 Amendment of Interstate Commerce Act.

In 1910, when the bill creating an interstate commerce court and amendment of the then existing interstate commerce act was pending before the Committee on Interstate and Foreign Commerce, it contained a proposed section, known as section 12, which provided that no railroad corporation which was a common carrier subject to the act to regulate commerce should hereafter acquire, directly or indirectly, any interest of whatsoever kind in the capital stock of any railroad, or purchase or lease any railroad with which it was directly and substantially competitive. I proposed an amendment in committee adding water carriers to the inhibition, which the committee adopted. The bill as then amended provided that railroads could not acquire competing water carriers or water carriers purchase competing

railroads. On the floor this section was stricken out, and I need not here mention the influences that were responsible for its elimination.

While this same bill was pending in the House I proposed the following amendment, which was adopted by a vote—of ayes 106, noes 77:

Whenever a carrier by railroad in competition with a water route or routes shall reduce the rates on the transportation of any kind of traffic it shall not be permitted to increase such rates unless after hearing by the Interstate Commerce Commission it shall be found that such proposed increase rests upon changed conditions other than the elimination of water competition.

Panama Canal Act Protects Shippers.

With but a slight change in phraseology this amendment remained in the bill and is now a part of the interstate commerce law. Its effect has been generally beneficial, but it did not go far enough to meet conditions that it was believed would exist with the opening of the Panama Canal. This is why there was written into the Panama Canal act, at the insistence of Pacific coast shippers, the section that prevents railroad-owned ships from passing through the Panama Canal where they "compete" with their rail lines for business. Such "competition" is fake competition aimed to minimize the competitive value of this great waterway. This provision does not deny, as some charge, railroad owned or controlled ships access to the canal when engaged in foreign trade. In line with what I regard as sound public policy, it prevents railroads from practically paralleling their own rail lines by boats, which should not be permitted if the canal is to be of any real value to shippers throughout the United States.

While we were not successful in 1910 in writing into the law an amendment preventing railroads from owning competing water lines, the Panama Canal act of 1912 squarely meets the situation. The act provides, in section 11, that after the 1st day of July, 1914, it shall be unlawful for any railroad carrier, subject to the act to regulate commerce, to own, lease, operate, control or have an interest whatsoever in any common carrier by water, operated, not only through the canal but elsewhere, with which such railroad does or may compete for traffic. It also confers upon the Interstate Commerce Commission power to extend the time during which railroads may operate such water lines if, after investigation, they are convinced that such water service is being operated in the interest of the public and is of advantage to the convenience and commerce of the people. This extension, however, cannot be granted to railroads, which would operate ships through the Panama Canal in violation of the act, applying only to other localities.

The framers of this law, anticipatinging conditions likely to prevail with

the opening of the canal, conferred upon the Interstate Commerce Commission additional powers, enabling that body to establish physical connections between railroads and the docks of water carriers. The commission was also empowered to establish through routes and maximum joint rates between rail and water lines; to establish maximum proportional rates by rail to and from the ports to which traffic is brought or from which it is taken by the water carrier.

If interstate railroads enter into arrangements with water carriers operating from a port in the United States to a foreign country, through the Panama Canal or otherwise, for the handling of through business between the interior points of the United States and such foreign country, the Interstate Commerce Commission may require such railroad to enter into similar arrangements with any other steamship.

Vessels permitted to engage in the coastwise or foreign trade of the United States are prohibited, under this act, from passing through the canal if such ships are owned or controlled by persons or companies violating the Sherman antitrust law. The provision granting free tolls through the Panama Canal to American coastwise ships is in the interest of the water shipper.

Thus it can be seen that Congress has taken advanced steps that should give an impetus to the movement for the public control of water terminals. The Pacific coast is moving rapidly in this direction, as I shall attempt to show.

Port of San Francisco.

Practically the entire harbor front of San Francisco, approximately 4 miles in length, is under State control and administered by a board of three State harbor commissioners appointed by the Governor. The port of San Francisco receives no appropriations from the State or city. The State law requires that the harbor must be self-supporting, the cost of improvements, including the building of wharves, dredging, and the construction of sea walls, together with the expenses of administration, to be provided for out of the receipts. There is also a provision stipulating that harbor charges shall not exceed such rates as necessary to meet the cost of construction, operation and maintenance. In private lands returns would be demanded upon the total value of the property and improvements, with the result that much higher rates would be charged. The belt railroad is controlled by the board. Practically no long leases have been granted, and every shipper can obtain accommodation at reasonable rates.

Prior to 1911 the State had control of the water front and tide lands of the chief harbors of California, namely, San Francisco, Oakland, Los Angeles, San Diego and Eureka. At the session of the legislature which convened that year the State of California transferred these water fronts and tide lands, with the exception of San Francisco and Eureka, to the respective cities upon which they border.

Among the commercial bodies of San Francisco there has been considerable agitation in favor of turning over to that city the control of the water

front, the claim being made that San Francisco has no voice in its management. Now, when it is desired to issue bonds for improvements on the San Francisco water front, it is first necessary to appeal to the legislature to submit to the people a bond issue, which the voters of the entire State must approve at the next general election. Even when this is done the State does not pay the interest on the bonds or retire them at maturity, although the credit of the State is pledged, which possibly makes the rate of interest less. Under the State law these bonds must be taken care of out of the funds accumulated from harbor receipts. It is charged that it might be possible for localities interested in rival harbors to retard the development of San Francisco's water front; that it is sometimes difficult to explain to the voters of the State that the large bond issues for San Francisco Harbor improvements are not a burden upon the State. It may be stated, however, that so far there has been a disposition on the part of the people of the State to grant the necessary authority for the issuance of bonds to develop California's chief port. For instance, a \$9,000,000 bond issue is now available for improvements which are rapidly being made, and another issue of \$10,000,000 is contemplated.

At present the piers and bulkhead wharves on the San Francisco water front offer about 5 miles of berthing space. In a recent report of the board of State harbor commissioners the statement is made that dock facilities may be so enlarged as to give 44 miles of berthing space.

Oakland Harbor.

Directly across the bay from San Francisco, and on the continental side, lies Oakland Harbor, with 20 miles of available shore line. The city of Oakland has fought for years to retain control of its water front. In the early fifties the then town of Oakland made some unfortunate grants of valuable rights on the harbor to an individual. These were later transferred to a railroad corporation. It has only been within recent years that the city has obtained substantial control of its entire water front. This has been due to court decisions, legislative acts, and favorable compromises. The city has already voted \$2,500,000 for improvements and has under way the building of reinforced concrete wharves and a quay wall 3,500 feet in length equipped with railroad tracks, steel warehouses, and machinery for the handling of freight. There is also being built a retaining wall across the Key Route basin, on the western water front, where most of the extensive improvements are contemplated. The city plans to eventually expend \$30,000,000. The municipal belt railway system as planned will extend around the entire city front, connecting with every railroad that enters the city—three transcontinental railroads now entering Oakland—and with every wharf, with spurs leading to manufacturing plants. Under the proposed development of the water front there will be 46,000 feet of municipally owned docks and 46,000 feet of privately owned.

Col. Thomas H. Rees, the Government engineer in charge of the Oakland district, has just reported a most comprehensive plan for the fullest de-

velopment of this western water front, a project that will allow of such expansion as to meet fully the growing demands of the future.

Harbor of Richmond.

The Rees plans for the east San Francisco Bay district include the harbor of Richmond lying north of Oakland. The enterprising people of this growing community have set an example of liberality in co-operating with the Government that many localities might well follow. The city has already voted \$1,170,000 to be used for harbor improvements and in addition has authorized the submission of another bond issue, which provides for the payment of \$75,000 per annum for a period of five years to be applied toward defraying the expense of Government dredging. Part of the receipts from the harbor will be set aside for a like purpose. The entire inner harbor will be municipally controlled.

Richmond, fast becoming a manufacturing center, will offer, when the present plans are completed, fully 13 miles of berthing space. At least 7 miles of the water front will be municipally controlled.

Los Angeles Harbor.

If by chance there is in this assemblage an individual hailing from a locality which nature has provided with harbor possibilities, but where there is an apparent disinclination to develop these facilities which lie at its doors, I would direct this individual's attention to the city of Los Angeles, that wonderfully enterprising community in southern California. The city of Los Angeles was originally 20 miles from the ocean. Appreciating the impossibility of bringing the great Pacific to its doors, but realizing the necessity for a water terminal, this city, with the nerve to tackle big projects, did the next best thing by extending its boundaries 20 miles to the ocean by annexing cities bordering on the water and strips of connecting territory, and did all this in order that it might vote bonds to improve the harbor now known, if you please, as the harbor of Los Angeles. Already the city has voted five and a half million dollars and has agreed to expend an additional five millions in the near future, with larger sums to follow.

The port of Los Angeles is controlled entirely by the municipality, which, through a board of harbor commissioners, makes all rules and regulations for the government of the harbor, fixes all pilotage, dockage, wharfage and handling charges, and operates the port as a municipal enterprise.

The city owns 394 acres in the outer harbor of what was originally submerged land. Of this, 154 acres was leased by the former city of San Pedro to private parties, who have reclaimed it and improved it with wharves and warehouses. Of the balance, the city has just completed reclaiming 66 acres, which are being improved with reinforced concrete wharves and steel transit sheds, and plans are under way for reclaiming 138 acres more.

Approximately 1,300 acres of tide and submerged lands in the inner harbor were originally covered by tide land patents, the validity of which was disputed by the city and are in litigation, the city winning its suits in the superior courts of Los Angeles

County, and the case is now pending in the California Supreme Court.

There are now 24,905 feet of privately owned wharves along the water front held under franchises or permits, and the city has 1,985 feet of municipal wharves, most of which have been recently built. It also has under construction 3,590 feet of additional wharf, of which 2,520 feet will be of reinforced concrete, costing approximately \$176 a linear foot.

The city also is constructing 1,800 feet of steel transit sheds and 1,530 feet of wood frame transit sheds, besides doing a large amount of dredging.

Because of the involved condition of titles to some of the property covered by railway terminals at the harbor and the desire of the city to open the harbor to access by all railroads, as well as by paved streets, a terminal agreement has been agreed upon which virtually makes the railroad companies and the municipality copartners in the terminal, with the city in control.

There are on present Government harbor lines approximately 20½ miles of water front, most of it unimproved. This can be greatly increased by dredging slips, but only a few such slips have yet been definitely determined upon. The possibilities of the harbor, as shown by E. P. Goodrich, the consulting engineer for that city, will afford more than 100 miles of water front when fully developed.

San Diego Harbor.

The legislature of 1911 granted to the city of San Diego control of its entire water front. The city has already voted a million dollars for a municipal pier, which is now nearing completion. This pier will be equipped with railroad tracks and every facility for expeditiously handling freight. The total length of bulkhead at San Diego is 50,500 feet, giving a total deep-sea dockage of 13 miles and a total coaster dockage of 6 miles. Very extensive plans have been prepared by the municipality for the future development of the harbor to meet the needs of increasing commerce. The importance of San Diego Harbor will be greatly increased with the opening of the Panama Canal, as it will be the first Pacific port in the United States for ships bound north after passing through the great waterway. The municipal wharves now under construction will be of concrete and steel. Private wharves are leased from the city, the administration of its entire harbor front being under a board of municipal harbor commissioners.

Harbor of City of Portland.

Portland is now paying dearly for its past mistakes in permitting railroads and private interests to gain control of practically its entire water front. The result is that the city is now struggling to regain control of this valuable property by condemnation proceedings. Already \$2,500,000 has been voted to purchase and improve water front property acquired by this method. It is estimated that \$25,000,000 will eventually be expended. The water front terminal property within the limits of the city of Portland extends 16 miles. Of this, 29 per cent is owned by railroads and the city owns 2½ per cent; the balance is private ownership. Fifteen

miles of additional water frontage extends from the city's lower limit to the mouth of the Willamette River. About 3 per cent of this is owned by railroads and the balance in private ownership.

Seattle Harbor.

Seattle claims to have one of the freest ports in the world. The present shore line of the harbor is 12 miles. This is soon to be greatly increased by improvements in Duwamish River at an expense of \$1,390,000. A ship canal from Puget Sound to Lake Washington, via Lake Union, is nearing completion, this canal to cost \$3,625,000. It will greatly enlarge Seattle dock frontage and afford freshwater anchorage.

Of the 43 piers in Seattle, 20 are owned by the railroads. Of the remaining 21, 3 are owned by the Port of Seattle Commission, 1 by the city, and 17 by individuals. The Lake Washington development will afford a large additional frontage to be controlled by the municipality.

Tacoma.

Water terminals in Tacoma are owned practically by railroad companies, although the city operates a system of municipal docks for handling both freight and passenger steamers. The city owns 2,500 feet of water front in the inner waterway, on 1,000 of which municipal docks are now being constructed. In addition to the frontage on the inner waterways, the city controls, under a long lease from the State, 14 acres of deep water frontage for ocean terminal purposes, which is being made ready for quick development if necessary.

Conclusion.

From this brief review of conditions on the Pacific coast it can be seen that, with characteristic western energy and enterprise, we are preparing for that long-looked for day when the Panama Canal will be opened. With a determination that is worthy of emulation the people of those cities on the western border of the continent, which enjoy such splendid harbor advantages are fighting to regain control of terminal facilities of incalculable value which corporations and private individuals in too many instances have acquired, and while it is realized that all the mistakes of the past cannot be rectified in a day, it is both gratifying and encouraging that I have been able to record that most substantial progress is being made along the right lines. It is a great fight, and I am certain that I voice the unanimous sentiment of the assembled delegates when I declare that all our sympathies are with these localities which are engaged in this mighty struggle—a struggle waged not alone on behalf of the people of today, but of equal concern to the generations of the future.

RECORDER REPORTS BIG PROFIT FOR YEAR 1913.

Recorder Edmond Godchaux enjoyed a brisk business during the last year, according to the annual report filed with Mayor Rolph. A total of 50,286 documents were filed during 1913. More deeds were recorded than any other document, the total being 12,921. There were 5,911 marriage certificates and licenses placed on rec-

ord. The fees for the year amounted to \$81,016.50, to which \$625 is added for desk rentals, making the total receipts \$81,641.50, against an expense for the department of \$68,305.84, leaving a surplus to the credit of the office of \$13,335.36.

BUILDINGS ON EXPOSITION GROUNDS.

The following list of buildings let and to be let, gives a comprehensive idea of what has been accomplished in the building of the Exposition, and what still remains to be done. The figures as given here were compiled by Harris D. Connick, Director of Works, Panama-Pacific International Exposition.

Contracts For Which Have Been Let.

Service Building	\$ 60,000
Municipal Auditorium	1,275,000
Machinery Building	564,000
Food Products Building	349,000
Education Building	303,000
Liberal Arts Building	346,000
Manufactures Building	336,000
Varied Industries Bldg.	313,000
Mines & Metallurgy Bldg	358,000
Transportation Building	489,000
Agriculture Building	418,000
Horticulture Building	376,000
Main Tower	441,000
Court of Four Seasons	216,000
Court of the Universe	443,000
Three Fire Stations	40,000
Fine Arts Building	600,000

Total

Contracts to be Let.

Festival Court	\$205,000
Court of Palms	100,000
Court of Flowers	117,000
Festival Hall	250,000
Livestock Structures	150,000

BULGER'S REPORT SHOWS INCREASE IN TONNAGE.

San Francisco Leads Group of Six Districts Treated.

Supervising Inspector of Steam Vessels John K. Bulger has compiled some interesting figures showing the increase in tonnages of steam vessels inspected by his department in years passed.

These figures are gross tons and for comparison are for one year in ten-year periods—for fiscal years ended June 30, 1893, 1903 and 1913. They do not include foreign freight steamers nor sailing vessels.

The districts of Juneau, Honolulu and St. Michael have been created during the past fifteen years:

District.	1893	1903	1913.
San Francisco	143,999	468,138	564,364
Portland	34,552	49,668	31,114
Seattle	31,813	199,782	383,816
Juneau		41,497	3,813
Honolulu			87,288
St. Michael			18,875

Totals

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 7 story and base, reinforced concrete, \$82,000. Architect, J. C. Hladik, Monadnock Bldg. S. F. Owner's name withheld. The building will be erected at the corner of Pine and Powell streets, and has been designed to contain 100 rooms, which will be arranged in 42 apartments. Interior finish will be of pine and hardwood with oak floors in the principal rooms. Plans provide for steam heat, elevator service, a vacuum cleaning plant and hot water supply. Bath rooms will have tile wainscot and composition floors. All suites will be equipped with wall beds. Entrance will be finished in marble and tile. Exterior of the building has been designed in the English Gothic style, and will be faced with cement plaster. Plans are complete and figures will be called for shortly.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$12,000. Architect, C. H. Miller, Dalziel Bldg., Oakland. Owners, The Midgley Company, Dalziel Bldg., Oakland. The building will be erected on the east side of Staten avenue, north of Grand, and has been designed to contain a number of two and three room suites with private baths and wall beds. Interior finish will be of pine, redwood and hardwood panels. Oak floors will be used in the principal rooms. Plans provide for steam heat, a vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 5 story and base, brick and steel, \$80,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Elston and Clark. The building will be erected at the corner of Telegraph avenue and Durant, covering a large ground area. Interior will be arranged for suites of two and three rooms with bath and wall beds. Interior finish will be of pine and hardwood veneer with oak floors in the halls and living rooms. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and the architect is taking segregated figures on all parts of the work.

FRESNO FRESNO CO., CAL.—Apartment house and offices, 2 story and base. Class A construction, \$85,000. Architect, R. F. Feichlin, Fresno. Owner, Mrs. C. B. Shaver. The building will be erected at the southwest corner of J and Merced streets, covering

an area of 100x150 feet. Construction will be of steel and reinforced concrete with concrete floors and walls. Interior partitions will be of hollow tile and metal lath and plaster. The first floor will be arranged for stores and offices, and the second floor for modern apartment suites. Interior finish will be of pine with hardwood floors. Plans provide for steam heat, a modern oil burning plant and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with cement plaster. Patent store fronts are specified. Plans are complete and the work will be done by Day Labor.

VENICE, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Arthur G. Lindley, Hollingsworth Bldg., L. A. Owner, C. L. Smart. The structure will be erected on Billows avenue, and has been designed to contain about 60 rooms, which will be arranged in two and three room suites, all with private bath and wall beds. Interior finish will be of pine and redwood with some oak floors. Plans provide for steam heat, vacuum cleaning system, and metal lath and plaster partitions. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$30,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Pine and Stockton streets and will be arranged for six suites of six and seven rooms. Interiors will be finished in pine and hardwood with oak floors in the principal rooms. There will be steam heat, automatic elevator, a vacuum cleaning system and hot water supply. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for shortly.

SAN FRANCISCO—Apartment house, 7 story and base, steel and reinforced concrete, \$120,000. Architect, T. Patterson Ross, 310 California street, S. F. Owners, Greenwich Street Apartment Co. The building will have a complete steel frame, reinforced concrete walls and floors. Interior partitions will be of hollow tile and metal lath and plaster. The building has been designed to contain large suites of six and seven rooms, and will cover a ground area of 70 by 100 feet. Interiors will be handsomely finished in pine and hardwood. Oak floors will be used in the halls and principal rooms. Plans provide for steam heat, elevator equipment and an oil burning plant. There will be a vacuum cleaning system and hot water plant. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble.

Exterior of the building will be faced with white cement plaster. Plans for the steel work are now out for figures. Bids will shortly be called for on other parts of the work.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$13,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on the east side of 9th street, between Harrison and Bryant streets, covering an area of 25 by 100 feet. There will be one store on the first floor besides the entrance. Upper floors will contain ten suites of two and three rooms with private baths. Interior finish will be of pine and redwood with some elm panels. Bath rooms will have composition floors and tile wainscot. Plans provide for steam heat and a hot water system. Exterior of the building will be covered with cement plaster on metal lath and brick veneer. Plans are complete and figures are now being taken.

SAN FRANCISCO—Apartment house, 2 story and base, frame, \$10,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mr. McGowan. The building will be erected on Market street near 19th, and will contain a store on the first floor and four suites of three rooms each on the upper floor. Interior finish will be of pine throughout. All apartments will have wall beds and private baths. Bath rooms will be finished in tile and will have composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and contracts will be signed at once.

PASADENA, LOS ANGELES CO., CAL.—Apartment, 1 story and base, frame, \$4,000. Architects, Buchanan & Brockway, Pasadena. Owner, Mrs. S. A. Menning. The building has been designed for a bungalow apartment, the exterior being covered with shakes and timber. Interior finish will be of pine and redwood with some oak floors. An asbestos roof will be used. Plans include modern plumbing, heating and electric work. Plans are complete and figures were opened on January 10th.

SAN FRANCISCO—Apartment house, 3 story and base, Class C construction. Cost not stated. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, Solomon and Gosselin. The building will be erected on a 20-foot lot on Powell street near Washington, and will have a depth of 70 feet. Interior has been arranged for five apartments of two and three rooms. Interior finish will be of pine and elm. Oak floors will be used in the living rooms and halls. There will be steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. All apartments will be equipped with wall beds. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for shortly.

LOS ANGELES, CAL.—Apartment house, 2 story and base. Class C construction. Cost not stated. Architect, Thomas Preston, Higgins Bldg., L. A. Owner, Mrs. Ellis. The building will be erected on West 20th street near Magnolia avenue, covering an area of 49 by 64 feet. There will be a total of fifteen suites of two and three rooms.

All apartments will have private baths and wall beds. Interior finish will be of pine with oak floors. Plans provide for steam heat, a hot water system and metal window sash and frames. Bath rooms will be finished in tile. Exterior of the building will be faced with blue pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 2 story and base, brick. Cost not stated. Architect, Louis de P. Millar, St. Louis Bldg., L. A. Owner's name withheld. The building will be erected on Fair Oaks avenue, covering an area of 30 by 178 feet. There will be seven stores and a garage on the ground floor. The second floor will contain two three-room apartments and twenty single rooms. Eight baths will be installed. Interior finish will be of pine and oak. Cement and pine floors will be used. There will be four disappearing beds. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BANKS.

REDONDO BEACH, LOS ANGELES CO., CAL.—Bank, 2 story and base. Class A construction, \$25,000. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Farmers and Merchants National Bank of Redondo Beach. Construction will be of the reinforced concrete type with reinforced concrete floors and walls. Interior partitions will be of metal lath and plaster. The entire first floor will be occupied by the bank and will be finished in hardwood, marble, tile and ornamental plaster. Upper floor will be subdivided into ten modern offices finished in hirsch. Plans provide for steam heat, a vacuum cleaning system and metal window sash and frames. There will be safe deposit vaults and coin vaults. Exterior of the building will be faced with terra cotta brick. Plans have been revised and new figures are now being taken.

BASE BALL PARK.

SAN FRANCISCO—Grand stands, bleachers, etc., \$50,000. Architect, Walter J. Mathews, 927 Broadway, Oakland. Owners, Recreation Park Association. Plans for one of the finest baseball parks in the west are complete and work has been started on the grading and concrete work. The park will be located on Masonic avenue and St. Rose street. Bids are now being taken on the carpentry work, which includes over 1,000,000 feet of lumber. The grading and concrete work is being done by the Sunset Construction Co., Lick Bldg., S. F.

BRIDGES AND DAMS.

SAN DIEGO, CAL.—Bridge, reinforced concrete construction. Cost not stated. Engineer, City Engineer W. M. Ramsey, San Diego. Owners, City of San Diego. Plans for a bridge over University avenue are now complete and have received the approval of the City Council. Bids will be called for at once. The structure is to have a span of 66 feet with a 20-foot driveway and a 4-foot walk. There will be two retaining walls, also of reinforced concrete, each 30 feet high. Some ornamental iron will be used. Full particu-

lars can be secured from the City Engineer.

SAN BENITO RIVER, SAN BENITO CO., CAL.—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor A. M. McCrory, Hollister. Owners, San Benito County. Plans are being prepared for a new bridge to be erected over the San Benito River north of San Juan, and figures will shortly be called for on its construction. The County Surveyors of San Benito and Santa Clara Counties are working over detail drawings for a new steel and concrete bridge to be erected over the Pajaro River. Expense of this construction will be assessed against the two counties equally. Construction will probably be started within a few months. Further mention will be made of the work.

MODESTO, STANISLAUS CO., CAL.—Dam, earth and concrete, \$2,000,000. Engineer, Turlock Irrigation District. Modesto. Owners, Turlock Irrigation District. Preliminary plans for Dam No. 2, which is to be erected by the Turlock Irrigation District on the Tuolumne River several miles above La Grange have been filed at Sacramento. The proposed dam will be 283 feet high, its upper width of 300 feet. Modesto may join with Turlock in the construction. Further mention will be made of the work.

GOLD BEACH, ORE.—Bridge, reinforced concrete, \$355,000. Engineer, none. Owners, Curry County. Bids will be received by the County Clerk of Curry County for the construction and designing of a reinforced concrete arched span bridge, which is to be erected over the Chetco River about one mile from its mouth. The design and manner of its construction is left to the bidder. More than one plan for the design may be submitted if desired. Further particulars can be secured by addressing J. M. Coughell, County Surveyor, Gold Beach.

Contracts Awarded.

RICHMOND, CONTRA COSTA CO., CAL.—Tunnel and road work, \$232,684.16. Engineers, Haviland & Tibbetts, Alaska Commercial Bldg., S. F. Owners, City of Richmond. Contractors, Shattuck-Edinger Co., 268 Market street, S. F. Contract price, \$232,684.16. A complete list of the bids received for this work will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

LOS ANGELES HARBOR, LOS ANGELES CO., CAL.—Dock shed, structural steel, \$82,967. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. Contractors, The Llewellyn Iron Works, L. A. Contract price, \$82,967. Other figures received were as follows: Union Iron Works, \$88,745; Willis B. Kyle, \$88,900; Security Construction Co., \$91,845; Peter Conley Manufacturing Co., \$110,000.

TILLAMOOK, ORE.—Jetty work, stone and concrete, \$629,000. Engineer, United States Engineer Major Jay J. Morrow. Owners, United States Government. Contractors Gieslich & Joplin, Portland. Contract price not stated.

Factories & Warehouses.

SAN FRANCISCO—Warehouse addition, 6 story and base, reinforced concrete. Cost not stated. Architect, G.

A. Applegarth, Call Bldg., S. F. Owner, Martin Bekins. A contract has been let to the Daniel O'Day Co. for the grading and bulkheading for a six-story addition to the Bekins Van and Storage Co.'s building on Otis street north of Duboce. The structure will cover an area of 70 by 100 feet and will be fireproof throughout. Interior has been arranged for a number of small compartments besides larger storage lofts. There will be reinforced concrete floors, walls and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Plans provide for freight elevators and metal window sash and frames and fireproof doors. Exterior of the building will be faced with cement plaster. Plans are now out for figures.

SAN FRANCISCO—Laundry, 2 story and base, reinforced concrete, \$10,000. Architects, Fabre & Bearwald, Merchants National Bank Bldg., S. F. Owner, Mr. Betts. The building will be erected on the south side of Ellis street west of Hyde. The first floor will contain the laundry and upper floor will be subdivided into a number of rooms which will be occupied by the employees. Interior finish will be of pine throughout. There will be a cement floor on the ground floor. Patent store fronts will be used. Exterior of the building will be faced with marble and cement plaster. Plans are complete and figures are now being taken.

Contracts Awarded.

NEWHALL, LOS ANGELES CO., CAL.—Factory, 3, 2 story and base, brick and concrete buildings, \$130,000. Architect, none. Owners, Dryden Mfg. Co., Newhall. Contractors, Frank Graves & Son, Stimson Bldg., L. A. Contract price, \$130,000.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, Mary Gillen, 1600 Newcombe avenue. The building will be erected on the west side of Mendell and will have a frontage of 24 feet and a depth of 50 feet. Interior has been arranged for two modern flats of five rooms and bath each. Pine and redwood will be used for finish, while some oak floors are specified. Bath rooms will have composition floors and tile wainscot. There will be an open fire place and tile mantel in each of the living rooms. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 3 story and base, frame, \$2,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, D. Hader. The building has been designed to contain three small flats and will be erected on a 20-foot lot on the south side of Fell street west of Divisadero. Interiors will be finished in pine and redwood. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor. Materials are being purchased.

GOVERNMENT WORK AND SUPPLIES.

The Transisthmian Duct Line.

The study of the engineering features covering the transisthmian duct, Canal Zone, has now been completed, and it has been decided to lay a 4-way vitrified clay duct line from Colon to Balboa to contain the signal cable and the telephone-telegraph cable. One duct is available for lease or rental and the other spare duct is left for future requirements.

The duct will follow the line of the Panama Railroad. It will be laid on a base of concrete approximately five inches thick and encased with three inches of concrete on the top and sides.

Manholes will be located according to the theoretical spacing of loading points, which places the manholes every 774 feet. They are to be of the concealed type, and each composed of only three different pieces. The pieces will all be cast at one central point and distributed along the right of way. The light weight of the parts and the flat shape of the individual pieces will allow a knock-down shipment to be handled easily and with a minimum of breakage.

The signal cable will consist of approximately 215,000 feet of 13 solid conductor and 50,000 feet of 9 solid conductor No. 12, Brown and Sharpe gage.

The telephone-telegraph cable will consist of 257,730 feet, 38 pairs of 19-gage solid conductors, quaded, and 12 pairs of 16-gage solid conductors in pairs. This will offer an increase over the present telephone trunk lines of approximately 30 circuits.

Armored cable will be installed at bridges Nos. 140 and 309, crossing the Gatun and Chagres Rivers.

Specifications and requisitions covering the 4-way multiple duct, the cables, loading coils, and other adjuncts were completed by the telephone and signal department of the Panama Railroad on November 17. Work will be started as soon as the duct arrives on the Isthmus. Duct will be laid at the rate of 1,500 feet per day.

New Reclamation Work.

In order to increase the water supply for the Okanogan irrigation project, Wash., the Secretary of the Interior has approved the recommendation of the board of reclamation commissioners that plans be made immediately for the development of power to pump water to about 1,050 acres.

Power will be developed at two drops in the main canal. The sum of \$82,000 has been allotted from the reclamation fund for the work. This plan will reduce the acreage to be served from the Salmon River about 11 per cent. In ordinary years it will permit the holding of 2,000 to 3,000 acre feet in the reservoirs as a reserve for years of drouth in addition to the reserve afforded by the original project and by increase in Salmon Lake capacity.

Induction Motors.

The following bids were opened at the office of the Reclamation Service, Los Angeles, Cal., for furnishing under advertisement No. 261, 2 2-H. P. induction motors:

General Electric Co., Los Angeles, Cal., \$180, at San Francisco or Portland; 3 days.

Wagner Electric Mfg. Co., Los Angeles, Cal., \$183, at St. Louis; 5 days.

Crocker-Wheeler Co., Los Angeles, Cal., \$190.50, at San Francisco; 4 days.

Allis-Chalmers Co., Los Angeles, Cal., \$188.40, at San Francisco or Portland; 2 days.

Westinghouse Electric and Mfg. Co., Los Angeles, Cal., \$189, at East Pittsburgh, or \$199.35, at San Francisco.

Repairs to Army Buildings.

The military authorities have completed the plans for the expenditure of \$812,000 during the next fiscal year for repairs to public buildings at military posts. Of this amount \$725,000 will be required to repair approximately 9,650 buildings, the value of which is placed at \$5,000,000. It is estimated that at least fifty per cent of these buildings are old frame structures twenty years old or more and the expenditures necessary to keep them in repair will necessarily be much greater than for the recently constructed buildings. It is estimated that an expenditure of about 1 per cent on the modern buildings of about \$265,000 will be sufficient to keep them in good state of repair, leaving \$460,000 available for repairing the older buildings which represents approximately 1.7 per cent of their estimated value. It is believed that \$87,000 would be required for additions and alterations. Most of that sum will be required at Fort Sill for remodeling officers' quarters and barracks and for improving the conditions and stables to provide for the increased size of the garrison.

HALLS & SOCIETY BLDGS—

OAKLAND, CAL.—Lodge hall, 2 story and base, frame, \$8,000. Architect, Ivan C. Satterlee, 470 13th street, Oakland. Owners, Danish Hall Association. The building will be erected on the north side of 11th street east of Jackson. Interior of the building will be arranged for lodge halls and offices, and will be finished in pine. A maple floor will be used. There will be a hot air system of heating. Marble, tile and terrazzo will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who are now taking figures on the general construction.

MERCED, MERCED CO., CAL.—Hall of Records, 2 story and base, \$40,000. Architect, C. H. Russell, Union League Bldg., L. A. Owners, Merced County. Revised plans for this building have been completed and figures will be called for at once. The building will be 42 by 85 feet, classic in design and fireproof throughout. Interior has been arranged for the offices of the County Recorder, Tax Collector and Assessor. Interior finish will be of hardwoods, marble, tile and ornamental plaster. There will be fireproof vaults and metal window sash and frames. A steam heating system and oil burning plant will be installed. Exterior of the building will be faced with matt glazed terra cotta.

SEASIDE, ORE.—City hall, 2 story

and base, reinforced concrete, \$20,000. Architect, P. Manson White, Seaside. Owners, City of Seaside. The building has been designed in the classic style, and will house the city officials and fire department. Interior finish will be of pine and hardwood. Cement floors and metal window sash and frames are specified. There will be a central heating system, probably steam. Fireproof vaults will be called for. Special fire equipment will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be opened about February 1st. Further mention will be made of the work.

HOSPITALS

SAN FRANCISCO — Hospital work, walks, etc. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans and specifications for grading walks, yards and roads and for constructing sidewalks at the San Francisco Hospital have been completed. Bids are now being called for and will be opened by the Board of Public Works on January 21st. Plans can be had from the Department of Architecture.

Contracts Awarded.

LOS ANGELES, CAL. — Infirmary dormitory, 2 story and base, brick, \$15,000. Architect, Elmore R. Jeffery, Citizens National Bank Bldg., L. A. Owners, Los Angeles County. Contractor, John L. Conner, 429 West 33rd street, L. A., all work except steam heat. Contract price, \$15,000.

HOTELS.

SAN FRANCISCO—Hotel, 6 story and base, reinforced concrete, \$30,000. Architect, O. R. Thayer, Merchants National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Bush street near Kearny, and will contain a number of guest rooms, about 70 per cent of which will have private baths. Interior finish will be of pine and hardwood veneer. There will be steam heat, elevator service and a hot water supply. Bath rooms will have composition floors and tile wainscot. A tile floor will be used in the lobby. Exterior of the building will be faced with cement plaster. Plans are being prepared and figures will shortly be taken.

SAN FRANCISCO—Hotel, 7 story and base, brick and steel, \$120,000. Architect, G. B. Ashcroft, Balboa Bldg., S. F. Owner, C. A. Hooper. This work has been mentioned here before. Plans are complete and figures are being taken. The building will be erected on the north side of O'Farrell street adjoining the Alcazar Theatre on the east. The building will have a frontage of 50 feet and a depth of 137½ feet. Plans provide for two stores, office, lobby and two dining rooms on the first floor. Upper floors will be arranged for a total of 120 guest rooms, all of which will have private baths. Interior finish will be of pine and hardwood. Bath rooms will have composition floors and tile wainscot. There will be steam heat, elevator service, vacuum cleaning and hot

water supply. Exterior of the building will be faced with pressed brick. Segregated figures are being taken.

SAN FRANCISCO—Hotel, 3 story and base, brick and steel. Cost not stated. Architects, Rigotti & Headman, Phelan Bldg., S. F. Owner, J. Allee. This building will be erected on Mission street between 17th and 18th streets. There will be stores besides the hotel lobby on the first floor. Upper two floors will be arranged for a number of single rooms and baths. Interior finish will be of pine and redwood. There will be steam heat and a hot water system. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 3 story and base, Class C construction, \$45,000. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Mrs. Squires. The building will be erected on Wilde street near Central avenue, and will cover an area of 110 by 125 feet. Plans show a total of 132 guest rooms, a number of private and public baths. Many of the baths will be equipped with showers. There will be steam heat and a hot water system. Interior finish will be of pine and hardwoods. Bath rooms will have composition floors and tile wainscot. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

PENDLETON, ORE.—Hotel addition and alterations, brick and concrete construction, \$35,000. Architects, Tourtellotte & Hummel, Rothschild Bldg., Portland, Owners, Hotel Pendleton Co. The present three-story building will be entirely rearranged and two additional stories will be constructed. Complete the hotel will contain over 100 rooms, 50 per cent of which will have private baths. First floor will contain the general lobby, office, dining room and kitchen. Interior finish will be of pine and hardwood. There will be steam heat, elevator service and a vacuum cleaning system. Exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for within a week or ten days.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Hotel, 4 story and base, brick and steel, \$76,000. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owner, Verne H. Carter. Contractors, The Dutro-Wren Construction Co., 1st and Locust streets, Long Beach. Contract price, \$76,000.

SAN FRANCISCO—Hotel, 3 story and base, frame, \$25,000. Architect, Charles J. Rousseau, 48 Kearny street, S. F. Owner, Mr. Mitchell. Contractor, L. Rose, general construction; The Turner Co., plumbing; Atlas Heating and Ventilating Co., heating and oil burners; Pacific Gas and Electric Co., electric work, and the General Building Works Co., the foundation work.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Court of Palms and Flowers, frame and concrete. Cost not stated. Architect, Director of

Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed and approved for the general construction of the Court of Palms and Flowers. All work except piling will be included in the contract. Separate bids may be submitted for the electric work, water and drain pipes. Bids will be opened on January 22 at 10 o'clock by the Buildings and Grounds Committee. Plans and specifications can be secured from the Director of Works, Service Bldg. Official proposal appears under another heading in this issue.

SAN FRANCISCO—State building, 2 story, log construction. Cost not stated. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, State of Oregon. Bids received for this work, excluding interior partitions and finish, electric work and plumbing, show Foster-Vogt Co. low at approximately \$34,000. An award of contract has not yet been made. Bids will be called for shortly on the balance of the work.

SAN FRANCISCO—Construction of sewers, etc. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete for the construction and installation of sewers in the Exposition Grounds. Bids will be opened by the Buildings and Grounds Committee on January 22nd. Plans and specifications can be secured from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

CITY MORGUE.

SAN FRANCISCO—Morgue completion, 2 story and base, Class A construction. Cost not stated. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. Plans have been completed and approved for the finishing construction on the City Morgue. Bids are now being called for and will be opened on January 21st by the Board of Public Works. Plans and specifications can be secured from the office of the Department of Architecture. An official proposal appears in this issue under the heading of Official Advertising.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SACRAMENTO, CAL.—Passenger station, 2 story and base, reinforced concrete, \$50,000. Architect's name not given. Owners, Oakland-Antioch Railroad Co., California-Pacific Bldg., S. F. The building will be erected at the corner of 3rd and I streets, covering an area of 75 by 150 feet. The first floor will contain two waiting rooms, agent's office, express and baggage rooms. The second floor will contain division headquarters of the railroad, superintendent's office and offices for the clerks. Interior finish will be of pine and redwood with a tile and cement floor in the waiting rooms and baggage office. There will be steam heat and a vacuum cleaning system. Exterior of the building will probably be faced with cement plaster. Roof will be of clay tile. Bids will be called for shortly.

CONCORD, CONTRA COSTA CO., CAL.—Railroad station, 1 story and

base, reinforced concrete, \$10,000. Architect's name not given. Owners, Oakland-Antioch Railroad Co., California-Pacific Bldg., S. F. A new station is to be erected at once in Concord. The building will be designed in the Mission style, and will be faced with cement plaster. A red clay tile roof will be used. There will be two waiting rooms, agent's office and baggage rooms. Interior finish will be of pine throughout. Cement and tile floor will be used. Further mention will be made of this work.

Contracts Awarded.

TACOMA, WASH.—Roadbed construction, \$250,000. Engineer, Engineering Department Pacific and Eastern R. R., Tacoma. Owners, Pacific and Eastern Railroad Contractor, Hans Peterson, Madison Block, Seattle. Contract price, \$250,000. Note: This contract includes the construction of 13 miles of road bed.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$6,500. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, Earl Martin, Emporium. The dwelling has been designed for an eight-room house and will be erected in West Lake Park. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will let all contracts.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,100. Architect, none. Owner, A. T. Morris, 616 9th avenue, S. F. The dwelling will be erected on the west side of 11th avenue south of Anza street, and will be similar in design to a number of other houses recently erected in the same district by Mr. Morris. The dwelling will contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the living and dining rooms. There will be a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architect, Maury I. Diggs, 2544 Bowditch avenue, Berkeley. Owner, J. A. Marshall. The dwelling has been designed for a nine-room house, and will be erected on the north side of Keith avenue. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner

who will do the work by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, brick and frame, \$25,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, John H. Spohn. The dwelling has been designed to contain ten rooms, several baths and sleeping porches. A garage of similar construction will also be erected on the property. Interior finish will be of pine and hardwood with oak floors and white enamel. There will be a central heating system, either hot water or steam. Open fire places will be used in several of the rooms. Mantels will be of tile and brick. Bath rooms will be equipped with showers and will have tile floors and wainscot. Automatic water heaters will be installed. Exterior of the dwelling will be covered with pressed brick and cement plaster on metal lath. Plans are now being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The house has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

SACRAMENTO, CAL.—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, W. W. Smith, 416 28th street, Sacramento. The dwelling will be erected on 28th street, and has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place and the mantel in the living room. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 1½ story and base, frame, \$2,000. Architect, F. W. Dakin, 10 California street, S. F. Owner, A. G. Kleimert. The house will be erected on Curtis street north of Morse, and will contain six rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room with a brick mantel. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with rustic. Plans are complete and the work will be done by Day Labor under the personal direction of the architect. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$15,000. Architect, C. A. Clausen, Puelan Bldg., S. F. Owner, James Smith. The house will be erected at the corner of 22nd and Lake

streets, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood in the living and dining rooms. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscoting will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A garage has been provided for in the basement. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$2,000. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, A. P. Anderson. The house will be erected on Desmond street, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine throughout. Oak floors will be used in the dining room, living room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

PLEASANTON, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$10,000. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, Mr. McKenzie. Contractor, James L. McLaughlin, 244 Kearny street, S. F. Note: The contractor is now in the market for subfigures on the plumbing, electric work, mill work and heating.

LOS ANGELES, CAL.—Gaugens, and Casino, 1 story, reinforced concrete, \$10,000. Architect, Howard W. Wood, 1745 McCadden Place, L. A. Owner, W. F. Markham. Plans are now being prepared for formal gardens and an Italian casino at the home place of Mr. Markham on Vine street. The work will include reinforced concrete and granite, a beautiful marble fountain and other marble and tile work. A tile roof will be used. One of the features of the plan is a large stone pergola. Plans include plumbing and electric work. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

LOS ANGELES, CAL.—Residence alterations, 2 story and base, frame. Cost not stated. Architect, Howard W. Wood, 1745 McCadden Place, L. A. Owner, H. W. Wood. The twelve-room dwelling at 1745 McCadden Place will be altered. Included in this work will be new interior partitions, plumbing, plastering, painting and electric work and heating. Interior finish will be of oak. There will be steam heat with an oil burning furnace. Exterior of the building will also undergo alterations, which have been worked out in the Mission style. Plans are complete and bids will be opened for the work on January 10th.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$10,000. Architect, Howard W. Wood, 1745 McCadden Place, L. A. Owner, W. S. Humkins. The house has been designed for a ten-room dwelling with baths and sleeping porches. Interior finish will be

largely of oak and mahogany with hardwood floors throughout. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot and floors will be used in the bath rooms. An automatic water heater will be installed. Roof will be covered with cement shingles. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work is being done by Day Labor under the personal supervision of the architect.

SCHOOLS.

OAKLAND, CAL.—School, 1 and 2 story and base, reinforced concrete. Cost not stated. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The announcement has been made that the Sound Construction Co., Hearst Bldg., S. F., would complete the work on the Lockwood School. The original contract was awarded to F. J. Anweg, 241 Kearny street. Mr. Anweg was forced to abandon this contract and some work in Bakersfield.

SANGER, FRESNO CO., CAL.—School, 2 story and base, brick, \$15,000. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, Sanger Union High School District. The building will contain a number of class rooms, assembly hall, laboratories, manual training and domestic science departments. Interior finish will be of pine with some maple floors. Plans provide for a hot air heating system with complete oil burning equipment. Toilets will have cement floors and tile wainscot. There will be vacuum cleaning and program clocks. Exterior of the building will be faced with pressed brick. Plans will be complete and ready for figures by January 25th. Further mention will be made of the work.

DAVIS, YOLO CO., CAL.—School, 2 story and base, brick, \$50,000. Architects, Cunningham & Polette, First National Bank Bldg., S. F. Owners, Regents of the University of California. The building will contain eight class rooms, an auditorium seating 500 people and teachers' rooms. Interior finish will be of pine and hardwood with maple floors. There will be steam heat and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be advertised for in the columns of this paper within a week or ten days.

CHENEY, WASH.—Normal School group 1 and 2 story, concrete and brick buildings. Cost not stated. Architect's name not given. Owners, State of Washington. The Bartlett-Roth Construction Co. of Portland, who secured the contract for the construction of the new Normal School group at Cheney on their bid of \$266,000, have rescinded their contract and have had their certified check returned. The work will be readvertised for figures under slightly revised plans and specifications. This work is now being done, and bids will be called for shortly. No opening date has yet been set. Further announcement will be made in these columns.

LOS ANGELES, CAL.—Orphanage, 2 and 3 story reinforced concrete buildings. Cost not stated. Architect, L. H. Seehorn, 328 Clay street, L. A.

Owners, Sisters of the Sacred Heart. These two buildings will be erected on the property of the order at the corner of Hill and Sunset Boulevard. The two-story structure will be 50 by 98 feet and will be arranged for class rooms on the first floor and dormitories on the second floor. The three-story building will cover an area of 60 by 100 feet, and will contain dining rooms, kitchen, store rooms, boiler room and toilets on the first floor, chapel, play rooms, sewing room and class rooms on the second floor, while the third floor will be arranged for dormitories. Interior finish of both buildings will be of pine and hardwood. Partitions will be of hollow tile. Plans provide for steam heat and an oil burning plant. Marble and tile will be used in the bath rooms. Exterior walls will be faced with pressed brick. Plans are being prepared. Further mention will be made of this work when plans are ready for figures.

EL CENTRO, IMPERIAL CO., CAL.—School, 1 story and base, brick, \$30,000. Architect, Fred T. Harris, Holt Bldg., El Centro. Owners, El Centro School District. The building has been designed to contain eight standard sized class rooms, principal's office and a library. Interior finish will be of pine with maple floors in the class rooms. Plans provide for a modern system of ventilation and metal ceilings. Slate blackboards will be used. Modern plumbing and electric work will be installed. There will be vacuum cleaning and program clocks. Exterior of the building will be faced with pressed brick. Plans are complete and have received the approval of the school trustees and figures will be called for shortly.

Contracts Awarded.

ORLAND, GLENN CO., CAL.—School, 1 and 2 story, brick and concrete. Cost not stated. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Orland School District. Contractors, Graham & Jensen, 185 Stevenson street, S. F. Contract price not stated.

SANGER, FRESNO CO., CAL.—School 1 story and base, brick. Cost not stated. Architect, J. Carl Thayer, Forsythe Bldg., Fresno. Owners, Sanger School District. Contractors, Trewhitt & Shields, Rowell Bldg., Fresno. Contract price not stated.

TULARE, TULARE CO., CAL.—School, 1 story and base, brick, \$16,380. Architect, none. Owners, Tulare School District. Contractors, A. Noble Sons, Visalia. Contract price, \$16,380.

SEWERS, STREET WORK AND WATER SYSTEMS.

BERKELEY, ALAMEDA CO., CAL.—Sewer pipe, reinforced concrete. Cost not stated. Engineer, City Engineer Jessup. Berkeley Owners, City of Berkeley. Bids will be opened on January 14th by the Berkeley Council for furnishing a large amount of reinforced concrete sewer pipe to the city. Further particulars can be secured from the City Engineer.

PORTERVILLE, TULARE CO., CAL.—Pumping plant, 1 story and base, reinforced concrete. Cost not stated. Engineer's name not given. Owners, City of Porterville. Plans are now being prepared for a one-story reinforced concrete pumping plant, which

is to complete the municipal water system in Porterville. Bids will be called for at once. Separate figures will be taken for the construction of the building and for the mechanical equipment. Further mention will be made of the work.

TURLOCK, STANISLAUS CO., CAL.—Irrigation canals, etc. Cost not stated. Engineer, District Engineer, Turlock. Owners, Turlock Irrigation District. Plans are complete and have been approved for the extension of the Turlock Irrigation District known as Cut B. Bids will be received by the directors of the district on January 26th. Further information can be secured from the Irrigation Co. at Turlock.

HANFORD, KINGS CO., CAL.—Dams and ditches. Cost not stated. Engineer, A. J. Nielsen, Hanford. Owner, S. Richardson, San Francisco. Plans are now being prepared for a number of small earth dams and several large ditches in connection with the reclamation project on the 1,000-acre tract near Hanford. Bids will be called for shortly. Full particulars can be secured from either the owner or engineer.

Contracts Awarded.

RICHMOND, CONTRA COSTA CO., CAL.—Sewer construction, \$7,641.92. Engineer's name not given. Owners, City of Richmond. Contractor, William Hen'ey. Contract price, \$7,641.92.

STORES.

SAN FRANCISCO.—Stores, 1 story and base, brick, \$12,000. Architect Earl B. Scott, Humboldt Bank Bldg., S. F. Owners, Davis Street Realty Co. The building will be erected at the northeast corner of Davis and Washington streets, covering an area of 70 by 117 feet. There will be four large stores with cement floors and patent store fronts. Interiors will be finished in pine. A contract for the excavating and grading has already been awarded. Exterior of the building will be faced with pressed brick. Plans are now out for figures.

LOS ANGELES, CAL.—Lofts, 4 story and base. Class C construction. Cost not stated. Architect, Fred R. Dorn. Marsh-Strong Bldg., L. A. Owners, Frank R. Strong and H. H. Cottin. The building will be erected on Spring street between 6th and 7th streets, and will have a frontage of 80 feet by a depth of 120 feet. The first floor will be arranged for stores. Upper floors will contain light lofts. Interior finish will be of pine. There will be steam heat, elevator service, vacuum cleaning plant and automatic sprinkler. Metal window sash and frames and metal lath and plaster interior partitions are specified. Stores will have patent fronts and marble base. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Offices, 12 story and base. Class A construction. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Abram Haas. The building will be erected at the northeast corner of 7th and Broadway, covering an area of 53½ feet by 150 feet. Construction will be of the Class A type throughout, with a complete steel frame, concrete floors and walls, faced

with terra cotta. Interior finish will be of mahogany and metal. Plans provide for a total of 225 offices on the upper floors and a number of stores on the ground floor. Interior partitions will be of hollow tile and metal lath and plaster. There will be one freight elevator and three passenger elevators. Marble and tile will be used extensively. There will be steam heat, vacuum cleaning plant and mail chutes. Metal window sash and frames and patent store fronts are specified. Working drawings are nearly complete and figures will be called for shortly.

LOS ANGELES, CAL.—Offices, 12 story and base. Class A construction. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, William G. Kerckhoff. The building will be erected at the northwest corner of Sixth and Los Angeles streets, covering an area of 121 by 150 feet. The building will have a complete steel frame, reinforced concrete floors and walls. There will be a number of stores on the first floor and in the neighborhood of 500 offices on the upper floors. Interior finish will be of hardwood and metal. Hollow tile and metal lath and plaster partitions will be used. Plans provide for steam heat elevators, mail chutes, vacuum cleaning system and metal window sash and frames. Marble and tile will be used in the corridors. There will be sidewalk doors, lifts and lights and patent store fronts. Exterior of the building will be faced with glazed brick and terra cotta. Plans are now being prepared.

ST. HELEN, WASH.—Stores and offices 2 story and base, reinforced concrete, \$20,000. Architect, C. A. Houghtall, Henry Bldg., Portland. Owner, E. R. Anderson. The building will cover an area of 86 by 140 feet. The first floor will contain stores and a commercial garage. Upper floor will be arranged for modern offices. SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 118—Proposals for Signal Cable and Cable End Bells and Filling Compound for Same and Vitriol Salt-Glazed Conduit.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. January 21, 1914, at which time they will be opened in public, for furnishing the above mentioned articles. Bids and general information relative to this circular (No. 118) may be obtained from this office or the general purchasing agent, 1086 North Point street, San Francisco Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR MECHANICAL EQUIPMENT.

MECHANICAL EQUIPMENT—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. February 16, 1914, for the mechanical equipment (except roof drainage and elevators) of the United States post office at Denver, Colo. Drawings and specifications may be obtained on or after January 5, 1914, at the discretion of the supervising architect. O. WENDERTH, supervising architect.

PROPOSALS FOR PLUMBING.

OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 10th day of January,

1914, for doing the following work, including the furnishing of the necessary labor and materials thereof, to wit:

The plumbing work of the City Hall. Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works and completed within the time limit as set forth in the specifications.

The amount of bond for faithful performance of contract has been fixed as follows:

Proposition No. 1, \$12,000.00.

Proposition No. 2, \$3,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 21st day of January, 1914, for furnishing and delivering the following material:

A quantity of copper rail bonds for the Municipal Railway system.

Said material must be in accordance with the specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and delivery within the time limit set forth in said specifications. The amount of the bond for faithful performance of the contract has been fixed at \$2,000.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal, and no proposal will be considered unless accompanied by such check.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR STATE HIGHWAY WORK.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on February 2nd, 1914, at which time they will be publicly opened and read for the construction in accordance with the specifications, to which special reference is made, portions of State highway as follows:

El Dorado County from El Dorado to Placerville (III-E-D-14-C), about 6 1/2 miles in length, to be built of water-bound macadam.

The same County from the Western Boundary to Keystone (III-Two-13-A), about 10.8 miles in length, to be graded.

Tulare County from Traver to the Northern Boundary (VI-Tul-4-E), about 5.3 miles in length, to be built of Portland cement concrete.

Kern County from Lerdo to Famosa (VI-KER-4-E), about 8.9 miles in length, to be built of Portland cement concrete.

Kern County from Bakersfield to Lerdo (VI-Ker-1-D), about 10.1 miles in length, to be built of Portland cement concrete.

San Bernardino County from the Western Boundary to Upland (VII-S, Rd-9-D), about 1.7 miles in length to be graded.

be built of Portland cement concrete. Ventura County from Ventura to Sea Cliff (VII-Ven-2-D & E), about 7.7 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Santa Margarita to Atascadero Creek (V-S, L, O-2-C), about 8.1 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Paso Robles to the Northern Boundary (V-S, L, O-2-A), about 10.6 miles in length, to be built of Portland cement concrete.

Santa Cruz County from the Eastern Boundary to Glenwood (IV-S, Cr-5-A), about 5.7 miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Hills, Redlands, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on the blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any all bids or to accept the bid deemed for the best interests of the State.

TERESA M. DARLINGTON, California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until 2 o'clock p. m. on February 2nd, 1914, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

El Dorado County from El Dorado to Placerville (III-E-D-11-C), about 6 1/2 miles in length, to be built of water-bound macadam.

Tulare County from the Western Boundary of Keystone (III-Two-13-A), about 10.8 miles in length, to be graded.

Tulare County from Traver to the Northern Boundary (VI-Tul-4-E), about 5.3 miles in length, to be built of Portland cement concrete.

Kern County from Lerdo to Famosa (VI-Ker-4-E), about 8.9 miles in length, to be built of Portland cement concrete.

Kern County from Bakersfield to Lerdo (VI-Ker-1-D), about 10.1 miles in length, to be built of Portland cement concrete.

San Bernardino County from the Western Boundary to Upland (VII-S, Rd-9-D), about 1.7 miles in length, to be built of Portland cement concrete.

Ventura County from Ventura to Sea Cliff (VII-Ven-2-D & E), about 7.7 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Santa Margarita to Atascadero Creek (V-S, L, O-2-C), about 8.1 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Paso Robles to the Northern Boundary (V-S, L, O-2-A), about 10.6 miles in length, to be built of Portland cement concrete.

Santa Cruz County from the Eastern Boundary to Glenwood (IV-S, Cr-5-A), about 5.7 miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office and they may be seen at the of-

Proposals.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 10:00 A. M. Thursday, January 22nd, 1914, for the construction of **The Court of Palms and Flowers** in accordance with the specifications on file in the office of the Director of Works.

Separate proposals will be allowed on Wiring and on Water and Drain Piping.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids or to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00 which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee,
WILLIAM H. CROCKER,
Chairman. (S)

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 816—Proposals for the Purchase of Miscellaneous Iron and Steel Scrap Offered for Sale by the Isthmian Canal Commission and which is No Longer Needed.—Sealed proposals will be received at the office of the general purchasing officer of the Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. January 22, 1914, at which time they will be opened in public, for purchasing the above mentioned articles. Plans and general information relating to this circular (No. 816) may be obtained from this office or the office of the assistant purchasing officer, 1084 North Point Street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

COURT OF PALMS AND FLOWERS

—Frame and concrete. Cost not stated. San Francisco, Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed and approved for the general construction of the Court of Palms and Flowers. All work except piling will be included in the contract. Separate bids may be submitted for the electric work, water and drain pipes. Bids will be opened on January 22 at 10 o'clock by the Buildings and Grounds Committee. Plans and specifications can be secured from the Director of Works, Service Bldg. Official proposal appears under another heading in this issue.

ESTATE BUILDING—2 story, log construction. Cost not stated. San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, State of Oregon. Bids received for this work, excluding interior partitions and finish, electric work and plumbing, show Foster-Vogt Co. low at approximately \$34,000. An award of contract has not yet been made. Bids will be called for shortly on the balance of the work.

MORGUE COMPLETION—2 story and base. Class A construction. Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. Plans have been completed and approved for the finishing construction on the City Morgue. Bids are now being called for and will be opened on January 21st by the Board of Public Works. Plans and specifications can be secured from the office of the Department of Architecture. An official proposal appears in this issue under the heading of Official Advertising.

APARTMENT HOUSE—7 story and base, reinforced concrete. \$2,000. San Francisco. Architect, J. C. Hladik, Menadnock Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Pine and Powell streets, and has been designed to contain 100 rooms, which will be arranged in 42 apartments. Interior finish will be of pine and hardwood with oak

floors in the principal rooms. Plans provide for steam heat, elevator service, a vacuum cleaning plant and hot water supply. Bath rooms will have tile wainscot and composition floors. All suites will be equipped with wall beds. Entrance will be finished in marble and tile. Exterior of the building has been designed in the English Gothic style, and will be faced with cement plaster. Plans are complete and figures will be called for shortly.

APARTMENT HOUSE—3 story and base, frame. \$20,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Pine and Stockton streets, and will be arranged for six suites of six and seven rooms. Interiors will be finished in pine and hardwood with oak floors in the principal rooms. There will be steam heat, automatic elevator, a vacuum cleaning system and hot water supply. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for shortly.

APARTMENT HOUSE—7 story and base, steel and reinforced concrete. \$120,000. San Francisco. Architect, T. Patterson Ross, 316 California street. S. F. Owners, Greenwich Street Apartment Co. The building will have a complete steel frame, reinforced concrete walls and floors. Interior partitions will be of hollow tile and metal lath and plaster. The building has been designed to contain large suites of six and seven rooms, and will cover a ground area of 70 by 100 feet. Interiors will be handsomely finished in pine and hardwood. Oak floors will be used in the halls and principal rooms. Plans provide for steam heat, elevator equipment and an oil burning plant. There will be a vacuum cleaning system and hot water plant. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble. Exterior of the building will be faced with white cement plaster. Plans for the steel work are now out for fig-

ures. Bids will shortly be called for on other parts of the work.

WAREHOUSE ADDITION—6 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, G. A. Applegarth, Call Bldg., S. F. Owner, Martin Bekins. A contract has been let to the Daniel O'Day Co. for the grading and bulkheading for a six story addition to the Bekins Van and Storage Co.'s building on Otis street north of Duhoce. The structure will cover an area of 70 by 100 feet, and will be fireproof throughout. Interior has been arranged for a number of small compartments besides larger storage lofts. There will be reinforced concrete floors, walls and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Plans provide for freight elevators and metal window sash and frames and fireproof doors. Exterior of the building will be faced with cement plaster. Plans are now out for figures.

LAUNDRY—2 story and base, reinforced concrete, \$10,000. San Francisco. Architects, Fabre & Bearwald, Merchants National Bank Bldg., S. F. Owner, Mr. Betcabe. The building will be erected on the south side of Ellis street west of Hyde. The first floor will contain the laundry and upper floor will be subdivided into a number of rooms which will be occupied by the employees. Interior finish will be of pine throughout. There will be a cement floor on the ground floor. Patent store fronts will be used. Exterior of the building will be faced with marble and cement plaster. Plans are complete and figures are now being taken.

FLATS—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, Mary Gillen, 1600 Newcombe avenue. The building will be erected on the west side of Mendell, and will have a frontage of 24 feet and a depth of 50 feet. Interior has been arranged for two modern flats of five rooms and bath each. Pine and redwood will be used for finish, while some oak floors are specified. Bath rooms will have composition floors and tile wainscot. There will be an open fire place and tile mantel in each of the living rooms. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

FLATS—3 story and base, frame, \$3,000. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, D. Hader. The building has been designed to contain three small flats and will be erected on a 20-foot lot on the south side of Fell street west of Divisadero. Interiors will be finished in pine and redwood. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor. Materials are being purchased.

HOSPITAL WORK, WALKS, ETC.—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans and specifications for grading walks, yards and roads and for con-

structing sidewalks at the San Francisco Hospital have been completed. Bids are now being called for and will be opened by the Board of Public Works on January 21st. Plans can be had from the Department of Architecture.

HOTEL—6 story and base, reinforced concrete, \$30,000. San Francisco. Architect, O. R. Thayer, Merchants National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Bush street near Kearny, and will contain a number of guest rooms, about 70 per cent of which will have private baths. Interior finish will be of pine and hardwood veneer. There will be steam heat, elevator service and a hot water supply. Bath rooms will have composition floors and tile wainscot. A tile floor will be used in the lobby. Exterior of the building will be faced with cement plaster. Plans are being prepared and figures will shortly be taken.

HOTEL—7 story and base, brick and steel, \$120,000. San Francisco. Architect, G. B. Ashcroft, Balboa Bldg., S. F. Owner, C. A. Hooper. This work has been mentioned here before. Plans are complete and figures are being taken. The building will be erected on the north side of O'Farrell street adjoining the Alcazar Theatre on the east. The building will have a frontage of 50 feet and a depth of 137½ feet. Plans provide for two stores, office, lobby and two dining rooms on the first floor. Upper floors will be arranged for a total of 120 guest rooms, all of which will have private baths. Interior finish will be of pine and hardwood. Bath rooms will have composition floors and tile wainscot. There will be steam heat, elevator service, vacuum cleaning and hot water supply. Exterior of the building will be faced with pressed brick. Segregated figures are being taken.

HOTEL—3 story and base, brick and steel. Cost not stated. San Francisco. Architects, Rigbetti & Headman, Phelan Bldg., S. F. Owner, J. Allec. This building will be erected on Mission street between 17th and 18th streets. There will be stores besides the hotel lobby on the first floor. Upper two floors will be arranged for a number of single rooms and baths. Interior finish will be of pine and redwood. There will be steam heat and a hot water system. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$6,500. San Francisco. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, Earl Martin, Emporium. The dwelling has been designed for an eight-room house and will be erected in West Lake Park. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will let all contracts.

RESIDENCE—2 story and base, frame, \$2,100. San Francisco. Owner, A. T. Morris, 616 9th avenue, S. F. The dwelling will be erected on the west side of 11th avenue south of Anza street, and will be similar in design to a number of other houses recently erected in the same district by Mr. Morris. The dwelling will contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the living and dining rooms. There will be a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$13,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on the east side of 9th street between Harrison and Bryant streets, covering an area of 25 by 100 feet. There will be one store on the first floor besides the entrance. Upper floors will contain ten suites of two and three rooms with private baths. Interior finish will be of pine and redwood with some elm panels. Bath rooms will have composition floors and tile wainscot. Plans provide for steam heat and a hot water system. Exterior of the building will be covered with cement plaster on metal lath and brick veneer. Plans are complete and figures are now being taken.

APARTMENT HOUSE—2 story and base, frame, \$10,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mr. McGowan. The building will be erected on Market street near 19th, and will contain a store on the first floor and four suites of three rooms each on the upper floor. Interior finish will be of pine throughout. All apartments will have wall beds and private baths. Bath rooms will be finished in tile and will have composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and contracts will be signed at once.

APARTMENT HOUSE—3 story and base, Class C construction. Cost not stated. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, Solomon and Gossilinc. The building will be erected on a 20-foot lot on Powell street near Washington, and will have a depth of 70 feet. Interior has been arranged for five apartments of two and three rooms. Interior finish will be of pine and elm. Oak floors will be used in the living rooms and halls. There will be steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. All apartments will be equipped with wall beds. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for shortly.

HOTEL—3 story and base, frame, \$25,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mr. Mitchell. Contractor, L. Rose, general construction; The

Turner Co. plumbing; Atlas Heating and Ventilating Co. heating and oil burners. Pacific Gas and Electric Co. electric work, and the General Building Works Co. the foundation work

GRAND STAND, BLEACHERS, ETC.—\$50,000. San Francisco. Architect, Walter J. Mathews. 927 Broadway. Oakland. Owners, Recreation Park Association. Plans for one of the finest baseball parks in the west are complete and work has been started on the grading and concrete work. The park will be located on Masonic avenue and St. Rose street. Bids are now being taken on the carpenter work which includes over 1,600,000 feet of lumber. The grading and concrete work is being done by the Sunset Construction Co., Lick Bldg., S. F.

CONSTRUCTION OF SEWERS, ETC.—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete for the construction and installation of sewers in the Exposition grounds. Bids will be opened by the Buildings and Grounds Committee on January 22nd. Plans and specifications can be secured from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

RESIDENCE—1½ story and base, frame. \$2,000. San Francisco. Architect, F. W. Dakin. 210 California street. S. F. Owner, A. G. Kleinhert. The house will be erected on Curtis street north of Morse and will contain six rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room with brick mantel. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with rustic. Plans are complete and the work will be done by Day Labor under the personal direction of the architect. Materials are now being purchased.

RESIDENCE—2 story and base, frame. \$4,500. San Francisco. Architect, C. O. Clausen. Phelan Bldg., S. F. Owner, James Smith. The house will be erected at the corner of 22nd and Lake streets, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood in the living and dining rooms. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. The wainscoting will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A garage has been provided for in the basement. Plans are being prepared.

SPORES—1 story and base, brick. \$12,000. San Francisco. Architect, Earl B. Scott. Humboldt Park Bldg., S. F. Owners, Davis Street Realty Co. The building will be erected at the northeast corner of Davis and Washington streets, covering an area of 70 by 117 feet. There will be four large stores with cement floors and patent store fronts. Interiors will be finished in pine. A contract for the excavating and grading has already been awarded. Exterior of the building will be

facied with pressed brick. Plans are now out for figures.

Richmond Tunnel Bids Are Opened.

Local Firm of Shattuck, Edinger & Co., Awarded the Work and Construction will start in Thirty Days.

The following bids were received for the construction of the tunnel and highway project in Richmond. A contract has been awarded to the Shattuck, Edinger Co., 268 Market street, on their bid of \$232,084.16.

BUILDING CONSTRUCTION FOR YEAR 1913.

Twenty-One Million Dollars Invested in Building Construction.

Figures as compiled by the Bureau of Building Inspection of the Board of Public Works shows that \$21,037,264 have been invested in private building construction for the year 1913.

This is for private work only and does not include work done by the Municipality, State, Government or Panama-Pacific International Exposition Company. The following is a segregated list of figures, as compiled by this Bureau:

Class	No. of Bldg.	Amount.
Class "A".....	21	\$ 4,037,543
Class "B".....	25	1,437,138
Class "C".....	235	6,561,976
Frames.....	2131	7,242,271
Alterations.....	3193	1,758,376

Total.....5606 \$21,037,264

According to the records of this Bureau there were 6116 buildings erected in 1912, at an estimate cost of \$23,338,563.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—2 story and base, frame, \$13,000. Oakland, Cal. Architect, C. H. Miller, Dalziel Bldg., Oakland. Owners, The Midgley Co, Dalziel Bldg., Oakland. The building will be erected on the east side of Staten avenue, north of Grand, and as been designed to contain a number of two and three room suites with private baths and wall beds. Interior finish will be of pine, redwood and hardwood panels. Oak floors will be used in the principal rooms. Plans provide for steam heat, a vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—5 story and base, brick and steel, \$80,000. Berkeley, Cal. Architect, W. H. Rateliff, Jr., First National Bank Bldg., Berkeley. Owners, Elston and Clark. The building will be erected at the corner of Telegraph avenue and Durant, covering a large ground area. Interior will be arranged for suites of two and three rooms with bath and wall beds. Interior finish will be of pine and hardwood veneer with oak

floors in the halls and living rooms. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have composition floors and the wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and the architect is taking segregated figures on all parts of the work.

LODGE HALL—2 story and base, frame, \$8,000. Oakland, Cal. Architect, Ivan C. Satterlee 470 13th street, Oakland. Owners, Danish Hall Association. The building will be erected on the north side of 11th street, east of Jackson. Interior of the building will be arranged for lodge halls and offices, and will be finished in pine. A maple floor will be used. There will be a hot air system of heating. Marble, tile and terrazzo will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners, who are now taking figures on the general construction.

RESIDENCE—2 story and base, frame, \$4,000. Oakland, Cal. Architect, Maury I. Diggs, 2544 Bowditch avenue, Berkeley. Owner, J. A. Marshall. The dwelling has been designed for a nine-room house, and will be erected on the north side of Keith avenue. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, brick and frame, \$25,000. Berkeley, Alameda Co., Cal. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, J. H. Spohn. The dwelling has been designed to contain ten rooms, several baths and sleeping porches. A garage of similar construction will also be erected on the property. Interior finish will be of pine and hardwood with oak floors and white enamel. There will be a central heating system, either hot water or steam. Open fire places will be used in several of the rooms. Mantels will be of tile and brick. Bath rooms will be equipped with showers and will have tile floors and wainscot. Automatic water heaters will be installed. Exterior of the dwelling and garage will be covered with pressed brick and cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$5,000. Piedmont, Alameda Co., Cal. Architect, Charles W. McCall Central Bank Bldg., Oakland. Owner's name withheld. The house has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An auto-

matic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

SCHOOL—1 and 2 story and base, reinforced concrete. Cost not stated. Oakland, Cal. Architect, J. J. Donovan. Security Bank Bldg., Oakland. Owners, City of Oakland. The announcement has been made that the Sound Construction Co., Hearst Bldg., S. F., would complete the work on the Lockwood School. The original contract was awarded to F. J. Amweg, 244 Kearny street. Mr. Amweg was forced to abandon this contract and some work in Bakersfield.

SEWER PIPE—Reinforced concrete. Cost not stated. Berkeley, Alameda Co., Cal. Engineer, City Engineer Jessup, Berkeley. Owners, City of Berkeley. Bids will be opened on January 14th by the Berkeley Council for furnishing a large amount of reinforced concrete sewer pipe to the city. Further particulars can be secured from the City Engineer.

BUNGALOW—1½ story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, A. P. Anderson. The house will be erected on Desmond street, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine throughout. Oak floors will be used in the dining room, living room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$10,000. Pleasanton, Alameda Co., Cal. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, Mr. McKenzie. Contractor, James L. McLaughlin, 244 Kearny street, S. F. Note: The contractor is now in the market for subfurnitures on the plumbing, electric work, mill work and heating.

Contracts Awarded.

THEATRE AND AMUSEMENT PARK AND BATHS—Concrete and frame construction, \$150,000. Alameda, Alameda Co., Cal. Architect, John E. Carson, Bacon Bldg., Oakland. Owners, Sunnyvale Beach Co. Contractor, John E. Carson, Bacon Bldg., Oakland. Contract price, \$150,000.

FRESNO, MODESTO, STANIS- LAUS AND CENTRAL CALIFORNIA.

APARTMENT HOUSE AND OFFICES—3 story and base. Class A construction, \$35,000. Fresno, Fresno Co., Cal. Architect, R. F. Feichlin, Fresno. Owner, Mrs. C. E. Shaver. The building will be erected at the southwest corner of J and Merced streets, covering an area of 100 by 150 feet. Construction will be of steel and reinforced concrete with concrete floors and walls. Interior partitions will be of hollow tile and metal lath and plaster. The first floor will be arranged for stores and offices, and the second floor for modern apartment suites. Interior finish will be of pine with hardwood floors. Plans provide for steam heat, a modern oil burning plant and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with cement plaster. Patent store fronts are specified. Plans are complete and the work will be done by Day Labor.

SCHOOL—2 story and base, brick, \$45,000. Sanger, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, Sanger Union High School District. The building will contain a number of class rooms, assembly hall, laboratories, manual training and domestic science departments. Interior finish will be of pine with some maple floors. Plans provide for a hot air heating system with complete oil burning equipment. Toilets will have cement floors and tile wainscot. There will be vacuum cleaning and program clocks. Exterior of the building will be faced with pressed brick. Plans will be complete and ready for figures by January 25th. Further mention will be made of the work.

DAM—Earth and concrete, \$2,000, 000. Modesto, Stanislaus Co., Cal. Engineer, Turlock Irrigation District, Modesto. Owners, Turlock Irrigation District. Preliminary plans for Dam No. 2, which is to be erected by the Turlock Irrigation District on the Tuolumne River several miles above La Grange, have been filed at Sacramento. The proposed dam will be 253 feet high with an upper width of 200 feet. Modesto may join with Turlock in the construction. Further mention will be made of the work.

HALL OF RECORDS—2 story and base, \$40,000. Merced, Merced Co., Cal. Architect, C. H. Russell, Union League Bldg., L. A. Owners, Merced County.

Revised plans for this building have been completed and figures will be called for at once. The building will be 42 by 85 feet, classic in design and fireproof throughout. Interior has been arranged for the offices of the County Recorder, Tax Collector and Assessor. Interior finish will be of hardwoods, marble, tile and ornamental plaster. There will be fireproof vaults and metal window sash and frames. A steam heating system and oil burning plant will be installed. Exterior of the building will be faced with matt glazed terra cotta.

PUMPING PLANT—1 story and base, reinforced concrete. Cost not stated. Porterville, Tulare Co., Cal. Engineer's name not given. Owners, City of Porterville. Plans are now being prepared for a one-story reinforced concrete pumping plant, which is to complete the municipal water system in Porterville. Bids will be called for at once. Separate figures will be taken for the construction of the building and for the mechanical equipment. Further mention will be made of the work.

IRRIGATION CANALS, ETC. Cost not stated. Turlock, Stanislaus Co., Cal. Engineer, District Engineer, Turlock. Owners, Turlock Irrigation District. Plans are complete and have been approved for the extension of the Turlock Irrigation District known as Cut B. Bids will be received by the directors of the district on January 26th. Further information can be secured from the Irrigation Co. at Turlock.

DAMS AND DITCHES—Cost not stated. Hanford, Kings Co., Cal. Engineer, A. J. Nielsen, Hanford. Owner, S. Richardson, San Francisco. Plans are now being prepared for a number of small earth dams and several large ditches in connection with the reclamation project on the 4,000-acre tract near Hanford. Bids will be called for shortly. Full particulars can be secured from either the owner or engineer.

STORE ALTERATIONS AND ADDITIONS—2 story, brick. Cost not stated. Strathmore, Tulare Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, Balfour-Guthrie Co. The present two-story building will be altered into modern offices. The work will include a new heating system, interior partition work, plumbing, painting and electric installations. Exterior will not be altered. Plans are being prepared.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Venice, Los Angeles Co., Cal. Architect, Arthur G. Lindley, Hollingsworth Bldg., L. A. Owner, C. L. Smart. The structure will be erected on Billows avenue, and has been designed to contain about 60 rooms, which will be arranged in two and three room suites, all with private bath and wall beds. Interior finish will be of pine and redwood with some oak floors. Plans provide for steam heat, vacuum cleaning system, and metal lath and plaster partitions. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BRIDGE—Reinforced concrete construction. Cost not stated. San Diego, Cal. Engineer, City Engineer W. M. Rumsey, San Diego. Owners, City of San Diego. Plans for a bridge over University avenue are now complete and have received the approval of the

City Council. Bids will be called for at once. The structure is to have a span of 66 feet with a 20-foot driveway and a 4-foot walk. There will be two retaining walls, also of reinforced concrete, each 30 feet high. Some ornamental iron will be used. Full particulars can be secured from the City Engineer.

APARTMENT HOUSE—3 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architect, Thomas Preston, Higgins Bldg., L. A. Owner, Mrs. Ellis. The building will be erected on West 20th street, near Magnolia avenue, covering an area of 49 by 64 feet. There will be a total of fifteen suites of two and three rooms. All apartments will have private baths and wall beds. Interior finish will be of pine with oak floors. Plans provide for steam heat, a hot water system and metal window sash and frames. Bath rooms will be finished in tile. Exterior of the building will be faced with blue pressed brick. Plans are being prepared.

APARTMENT—1 story and base, frame, \$4,000. Pasadena, Los Angeles Co., Cal. Architects, Buchanan & Brockway, Pasadena. Owner, Mrs. S. A. Menning. The building has been designed for a bungalow apartment, the exterior being covered with shakes and timber. Interior finish will be of pine and redwood with some oak floors. An asbestos roof will be used. Plans include modern plumbing heating and electric work. Plans are complete and figures were opened on January 10th.

BANK—2 story and base. Class A construction, \$25,000. Redondo Beach Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Farmers and Merchants National Bank of Redondo Beach. Construction will be of the reinforced concrete type with reinforced concrete floors and walls. Interior partitions will be of metal lath and plaster. The entire first floor will be occupied by the bank, and will be finished in hardwood, marble, tile and ornamental plaster. Upper floor will be subdivided into ten modern offices finished in birch. Plans provide for steam heat, a vacuum cleaning system and metal window sash and frames. There will be safe deposit vaults and coin vaults. Exterior of the building will be faced with terra cotta brick. Plans have been revised and new figures are now being taken.

HOTEL—3 story and base. Class C construction, \$15,000. Los Angeles, Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Mrs. Squibbs. The building will be erected on Wilde street near Central avenue, and will cover an area of 110 by 125 feet. Plans show a total of 132 guest rooms, a number of private and public baths. Many of the baths will be equipped with showers. There will be steam heat and a hot water system. Interior finish will be of pine and hardwoods. Bath rooms will have composition floors and tile wainscot. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

GARDENS AND CASINO—1 story, reinforced concrete, \$10,000. Los Angeles, Cal. Architect, Howard W. Wood, 1745 McCadden Place, L. A.

Owner, W. F. Markham. Plans are now being prepared for formal gardens and an Italian casino at the home place of Mr. Markham on Vine street. The work will include reinforced concrete and granite, a beautiful marble fountain and other marble and tile work. A tile roof will be used. One of the features of the plan is a large pergola. Plans include plumbing and electric work. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

RESIDENCE ALTERATIONS—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Howard W. Wood, 1745 McCadden Place, L. A. Owner, H. W. Wood. The twelve-room dwelling at 1745 McCadden Place will be altered. Included in this work will be new interior partitions, plumbing, plastering, painting, electric work and heating. Interior finish will be of oak. There will be steam heat with an oil burning furnace. Exterior of the building will also undergo alterations which have been worked out in the Mission style. Plans are complete and bids will be opened for the work on January 30th.

RESIDENCE—2 story and base, frame, \$10,000. Los Angeles, Architect, Howard W. Wood, 1745 McCadden Place, L. A. Owner, W. S. Hunkins. The house has been designed for a ten-room dwelling with baths and sleeping porches. Interior finish will be largely of oak and mahogany with hardwood floors throughout. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot and floors will be used in the bath rooms. An automatic water heater will be installed. Roof will be covered with cement shingles. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work is being done by Day Labor under the personal supervision of the architect.

ORPHANAGE—2, 2 and 3 story, reinforced concrete buildings. Cost not stated. Los Angeles, Cal. Architect, I. H. Seehorn, 328 Clay street, L. A. Owners, Sisters of the Sacred Heart. These two buildings will be erected on the property of the order at the corner of Hill and Sunset Boulevard. The two-story structure will be 50 by 98 feet, and will be arranged for class rooms on the first floor and dormitories on the second floor. The three-story building will cover an area of 60 by 160 feet, and will contain dining rooms, kitchen, store rooms, boiler room and toilets on the first floor; chapel, play rooms, sewing room and class rooms on the second floor, while the third floor will be arranged for dormitories. Interior finish of both buildings will be of pine and hardwood. Partitions will be of hollow tile. Plans provide for steam heat and an oil burning plant. Marble and tile will be used in the bath rooms. Exteriors will be faced with pressed brick. Plans are being prepared. Further mention will be made of this work when plans are ready for figures.

LOFTS—4 story and base, Class C construction. Cost not stated. Los Angeles, Cal. Architect, Fred R. Dorn, Marsh-Strong Bldg., L. A. Owners, Frank E. Strong and H. H. Cottin. The building will be erected on Spring street between 6th and 7th streets, and will have a frontage of 30 feet by a depth of 120 feet. The first floor will

be arranged for stores. Upper floors will contain light lofts. Interior finish will be of pine. There will be steam heat, elevator service, vacuum cleaning plant and automatic sprinklers. Metal window sash and frames and metal lath and plaster partitions are specified. Stores will have patent fronts and marble base. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

OFFICES—12 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Noy Bldg., L. A. Owner, Abram Haas. The building will be erected at the northeast corner of 7th and Broadway, covering an area of 53 1/2 feet by 150 feet. Construction will be of the Class A type throughout, with a complete steel frame, concrete floors and walls, faced with terra cotta. Interior finish will be of mahogany and metal. Plans provide for a total of 225 offices on the upper floors and a number of stores on the ground floor. Interior partitions will be of hollow tile and metal lath and plaster. There will be one freight elevator and three passenger elevators. Marble and tile will be used extensively. There will be steam heat, vacuum cleaning plant and mail chutes. Metal window sash and frames and patent store fronts are specified. Working drawings are nearly complete and figures will be called for shortly.

OFFICES—12 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Noy Bldg., L. A. Owner, William G. Kerckhoff. The building will be erected at the northwest corner of Sixth and Los Angeles streets, covering an area of 121 by 150 feet. The building will have a complete steel frame, reinforced concrete floors and walls. There will be a number of stores on the first floor and in the neighborhood of 500 offices on the upper floors. Interior finish will be of hardwood and metal. Hollow tile and metal lath and plaster interior partitions will be used. Plans provide for steam heat, elevators, mail chutes, vacuum cleaning system and metal window sash and frames. Marble and tile will be used in the corridors. There will be sidewalk doors, lifts and lights and patent store fronts. Exterior of the building will be faced with glazed brick and terra cotta. Plans are now being prepared.

APARTMENT HOUSE—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Louis de P. Millar, St. Louis Bldg., L. A. Owner's name withheld. The building will be erected on Fair Oaks avenue, covering an area of 30 by 178 feet. There will be seven stores and a garage on the ground floor. The second floor will contain two three-room apartments and twenty single rooms. Eight baths will be installed. Interior finish will be of pine and oak. Cement and pine floors will be used. There will be four disappearing beds. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SCHOOL—1 story and base, brick \$20,000. El Centro, Imperial Co., Cal. Architect, Fred T. Harris, Holt Bldg., El Centro. Owners, El Centro School District. The building has been de-

signed to contain eight standard sized class rooms, principal's office and a library. Interior finish will be of pine with maple floors in the class rooms. Plans provide for a modern system of ventilation and metal ceilings. Slate blackboards will be used. Modern plumbing and electric work will be installed. There will be vacuum cleaning and program clocks. Exterior of the building will be faced with pressed brick. Plans are complete and have received the approval of the school trustees and figures will be called for shortly.

Contracts Awarded.

FACTORY—2, 2 story and base, brick and concrete buildings, \$130,000. Nehall, Los Angeles Co., Cal. Architect, none. Owners, Dryden Mfg. Co., Nehall. Contractors, Frank Graves & Son, Stimson Bldg., L. A. Contract price, \$130,000.

HOTEL—4 story and base, brick and steel, \$76,000. Long Beach, Los Angeles Co., Cal. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owner, Verne H. Carter, Contractors, The Dutro-Wren Construction Co., 1st and Locust streets, Long Beach. Contract price, \$76,000.

OFFICES—3 story and base, Class C, \$37,418. Los Angeles, Cal. Architect, Myron Hunt, Union Oil Bldg., L. A. Owners, Standard Oil Co. Contractors, Earl F. Low & Co., Byrne Bldg., L. A. general construction, not including heating, elevator, vacuum cleaning, finish hardware lighting fixtures and vault doors. Contract price, \$37,418.

STORE—1 story and base, brick, \$1,000. Los Angeles, Cal. Architects, Krempel & Erkes, Henn Bldg., L. A. Owner, J. Glinz. Contractor, George E. Talbert, 221 East Avenue 28, L. A. Contract price, \$1,000.

THEATRE—1 story and base, concrete and frame, \$15,000. Highland Park, Los Angeles Co., Cal. Architect, A. L. Valk, Stimson Bldg., L. A. Owner, Mr. Gore. Contractor, Heshman, Story Bldg., L. A. Contract price, \$15,000.

DOCK SHEET—Structural steel, \$83,967. Los Angeles Harbor, Los Angeles Co., Cal. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles Contractors, The Llewellyn Iron Works, L. A. Contract price, \$83,967. Other figures received were as follows: Union Iron Works, \$88,745; Willis B. Kyle, \$88,900; Security Construction Co., \$91,845; Peter Conley Manufacturing Co., \$110,000.

INFIRMARY DORMITORY—2 story and base, brick, \$15,000. Los Angeles, Cal. Architect, Elmore R. Jeffery, Citizens National Bank Bldg., L. A. Owners, Los Angeles County. Contractor, John L. Conner, 429 West 33rd street, L. A. all work except steam heat. Contract price, \$15,000.

STORES AND DANCE HALL—2 story and base brick, \$20,000. Los Angeles, Cal. Architect, A. Lawrence Valk, Stimson Bldg., L. A. Owner, Henry Lamb Contractor, A. E. Harshman, Black Bldg., L. A. Contract price, \$20,000.

PORTLAND AND OREGON.

BRIDGE—Reinforced concrete, \$35,000. Garry Beach, Ore. Engineer, none. Owners, Curry County. Bids will be received by the County Clerk for the construction and designing of a rein-

forced concrete arched span bridge, which is to be erected over the Chetco River about one mile from its mouth. The design and manner of its construction is left to the bidder. More than one plan for the design may be submitted if desired. Further particulars can be secured by addressing J. M. Caughell, County Surveyor, Gold Beach.

CITY HALL—2 story and base, reinforced concrete, \$20,000. Seaside, Ore. Architect, F. Manson White, Seaside. Owners, City of Seaside. The building has been designed in the classic style, and will house the city officials and fire department. Interior finish will be of pine and hardwood. Cement floors and metal window sash and frames are specified. There will be a central heating system, probably steam. Fireproof vaults will be called for. Special fire equipment will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be opened about February 1st. Further mention will be made of the work.

HOTEL ADDITIONS AND ALTERATIONS—Brick and concrete construction, \$15,000. Pendleton, Ore. Architects, Tourtellotte & Hummel, Rothschild Bldg., Portland. Owners, Hotel Pendleton Co. The present three-story building will be entirely rearranged and two additional stories will be constructed. Complete the hotel will contain over 90 rooms, 50 percent of which will have private baths. First floor will contain the general lobby, office, dining room and kitchen. Interior finish will be of pine and hardwood. There will be a steam heat, elevator service and a vacuum cleaning system. Exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for within a week or ten days.

STORES AND OFFICES—2 story and base, reinforced concrete, \$25,000. Seaside, Ore. Architect, F. Manson White, Seaside. Owner, Alex. Gilbert. The building will cover a considerable ground area, and will contain stores on the first floor and a number of modern offices on the second floor. Interior will be finished in pine and hardwood. Interior partitions will be of hollow tile and metal lath and plaster. There will be steam heat, a hot water supply and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be opened about February 1st.

Contracts Awarded.

JETTY WORK—Stone and concrete, \$429,000. Tillamook, Ore. Engineer, United States Engineer Major Jay J. Morrow. Owners, United States Government Contractors, Gleibisch & Joplin, Portland. Contract price not stated.

SEATTLE AND WASHINGTON.

NORMAL SCHOOL GROUP—1 and 2 story, concrete and brick buildings. Cost not stated. Cheney, Wash. Architect's name not given. Owners, State of Washington. The Bartlett-Roth Construction Co. of Portland, which secured the contract for the construction of the new Normal school group at Cheney on their bid of \$266,

000, have rescinded their contract and have had their certified check returned. The work will be readvertised for figures under slightly revised plans and specifications. This work is now being done and bids will be called for shortly. No opening date has yet been set. Further announcement will be made in these columns.

STORES AND OFFICES—3 story and base, reinforced concrete, \$30,000. St. Helen, Wash. Architect, C. A. Houghtaling, Henry Bldg., Portland. Owner, E. R. Anderson. The building will cover an area of 80 by 140 feet. The first floor will contain stores and a commercial garage. Upper floor will be arranged for modern offices. Interior finish will be of pine and hardwood. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. Exterior of the building will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.

ROADBED CONSTRUCTION—\$250,000. Tacoma, Wash. Engineer, Engineering Department Pacific and Eastern R. R. Tacoma. Owners, Pacific and Eastern Railroad. Contractor, Hans Peterson, Madison Block, Seattle. Contract price, \$250,000. Note: This contract includes the construction of 13 miles of road bed.

MASTER PLASTERERS APPEAL TO MAYOR ROLPH TO SETTLE STRIKE.

At the regular meeting of the Master Plasterers' Association held Tuesday afternoon at the Builders' Exchange, the tie up of work in the city as a result of the dispute between the journeymen plasterers and carpenters was considered and the following resolutions adopted:

San Francisco, Cal., Jan. 6th, 1914.
To Honorable James Rolph Jr., Mayor of the City and County of San Francisco, California:

WHEREAS, the dispute between the journeymen plasterers and the journeymen carpenters in the matter of the erection of exterior staff work on the Exposition buildings has spread throughout the entire city and has therefore become so acute that the business interests of all the people are being seriously injured, and

WHEREAS, According to the records of the recent convention of the Building Trades Department of the American Federation of Labor held in Seattle on November 28th, 1913, the whole question has been settled by making permanent the temporary agreement under which the two crafts had been working pending the regular convention of the A. F. of L., the provisions of which temporary agreement were that each craft should furnish half of the men on said exterior staff work, and

WHEREAS, P. H. McCarthy, representing the interests of the carpenters, appeared as a delegate at said convention and attempted to have all of the erection of this exterior staff work awarded to the carpenters, and

WHEREAS, After a thorough discussion of the subject, during which discussion the said P. H. McCarthy was fully heard in his attempt to convince the delegates from the other crafts that his contention was just, a decisive res-

olution was adopted by the Building Trades Department of the A. F. of L. by the substantial vote of 31 in the affirmative to 20 in the negative as follows: "Be it resolved, that the agreement existing between the Operative Plasterers and the Brotherhood of Carpenters in relation to the erection of exterior staff on the Panama-Pacific Exposition, which is now in contention, be extended during the life of said operation," and

WHEREAS, It being plain that the dispute had been settled by the highest authority in labor circles under the American method of the majority rule and should under the terms of the Constitution of the A. F. of L. be observed by all parties concerned, therefore

BE IT RESOLVED, That the Master Plasterers' Association, in regular session assembled at the Builders' Exchange this Sixth day of January, 1914, respectfully appeal to His Honor, Mayor James Rolph, Jr., and urge him to take a hand in this unfair dispute and use his influence to induce P. H. McCarthy, and all the interests allied with him, to abide by the decision of the A. F. of L. and thereby release the embargo that is unnecessarily crippling the business interests of San Francisco.

Respectfully submitted,

A. LEAF,
J. J. CONNOLLY,
PETER BRADLEY,
Committee.

ARIZONA METAL MINE PRODUCTION

Record Output in 1913. Increases in Gold, Silver, Copper, Lead and Zinc.

In 1913 there was a record mine production of gold, silver, copper, lead, and zinc in Arizona, according to preliminary figures of V. C. Helges, of the United States Geological Survey. The total value of the mine output was about \$71,000,000, an increase of nearly 6 per cent over the value of 1912, which was \$67,050,784. The copper output was valued at nearly \$64,000,000; the gold at about \$3,948,000; the silver at more than \$2,263,000; the lead at \$612,000; and the zinc at \$510,000.

The mine yield of gold in Arizona in 1913 was more than 191,000 ounces, an increase of 5 per cent over the output of 1912, which was 81,996.91 fine ounces. Of this total, over 42 per cent was taken from siliceous ores and most of the remainder came from copper ores, which are undoubtedly the source of the increased gold output in 1913. The three largest producing gold mines were the Tom Reed, Gold Roads, and Vulture. The Tom Reed output was about the same as in 1912, the Gold Roads had a slight increase, and the Vulture a substantial increase. In Yuma County operations were resumed at the La Fortuna mine.

The mine production of silver increased about 8 per cent, amounting to more than 3,773,000 ounces, against 3,490,387 ounces in 1912. Most of the 490,387 ounces in 1912, most of the silver was derived from copper ore, but in 1913 the increase is due largely to shipments of lead ore and concentrates from Cochise and Mohave counties. Much silver also comes from siliceous ore. About 500 tons of ore per month was shipped from the Tombstone property and a large tonnage of old tailings was taken from

the Commonwealth dump. A 350-ton cyanide mill at this property was completed during the year.

With a mine production of about 114,533,000 pounds of copper in 1913, Arizona led all other copper-producing States. The output in 1913 shows an increase of more than 49,000,000 pounds, or about 12 per cent over that of 1912, which was 365,038,649 pounds. As the price of copper was slightly lower in 1913, the value of the metal increased only about \$2,500,000. There were 11 active copper smelting plants in the State, and ore and concentrate were also sent to 6 copper and lead plants in other States. Of the former the greatest increases in output were made at the Hayden, Calumet & Arizona, Copper Queen, Old Dominion, Consolidated Arizona, and Swansea plants. At the United Verde and Detroit plants there was little change from the figures of 1912. Those making less copper were the Shannon, Arizona Copper, and Pioneer plants. New plants were completed by the Arizona Copper and Calumet & Arizona companies, and another was in course of construction for United Verde ores. The disseminated copper mines in Gila, Pinal, and Greenlee counties yielded approximately 145,500,000 pounds of copper. Included in this estimate of copper produced are the outputs of the Miami, Ray, Arizona Copper, and Detroit mines. The Miami product did not greatly exceed that of 1912. The 3,000-ton concentration plant was active and the product went mostly to Cananea, Mexico. The International Smelting & Refining Co. will build a copper plant at Miami to treat this ore and that from the Inspiration mine. Test plants using the flotation process were operated at the Miami and Inspiration, as the saving by concentration alone is not sufficient. The Ray Consolidated Copper Co. greatly increased its output, from nearly 36,000,000 pounds of copper in 1912 to about 52,000,000 pounds in 1913, treating 6000 tons of ore per day. Production from Yuma and Pima counties was not what it could have been, since the Swansea and Pioneer plants were operated only a few months. At Globe greatly increased shipments were made from the Superior & Boston, Iron Cap, and Black Warrior mines, and in Pinal County from the Magma mine.

With an increase of more than 104 per cent, the mine production of lead was larger than in any other year. The total output was nearly 14,000,000 pounds, valued at about \$612,000, as against 6,806,443 pounds, valued at \$306,290 in 1912. The mines at Bisbee produced much lead ore, and in 1913 there was a large increase. The Shattuck mine became a regular producer of silver-lead ore as well as copper ore. In Mohave County an increased tonnage was shipped regularly from the Tennessee mine to the concentration plant at Needles, California.

The mine production of recoverable spelter was about 3,100,000 pounds, valued at \$510,000, which was an increase of about 340,000 pounds, or nearly 1 per cent, over the production of 1912. On account of the lower price paid for the metal, the total value decreased more than \$30,000. The Goldconda mine, in Mohave County, formerly the largest producer, was making shipments of zinc ore and concentrates only part of the year, and there-

fore had a greatly decreased output. Much ore was, however, shipped from the San Xavier mine in Pima County and much concentrate was made from Mohave County ores milled at Needles.

ELECTRIC RAILWAY BUILT IN 1913.

The new track built and placed in service during 1913 by city systems, interurban lines and electrified steam railroads is tabulated in the accompanying list. The statistics were compiled from reports received from the railway companies themselves, and the record is complete except in the case of a few of the smaller properties whose replies were not received in time for inclusion in the list. All items which appear are, of course, accurate, and the omitted mileage, if it exists, is negligible, the reports being checked from the items appearing during the year in the construction news columns of the Electric Railway Journal.

The following summary shows the electric railway mileage built or put into operation each year since 1907 in the United States and Canada:

19073580 miles
19081258.5 miles
1909587.1 miles
19101397.2 miles
19111919.5 miles
1912596.2 miles
19131071.9 miles

Texas heads the list of states with 117.77 miles reported. This total includes the longest interurban railway built in the United States during 1913, namely, the Southern Traction Company, which built 154 miles of track connecting Waco, Dallas and Corsicana, Texas.

Missouri is second with 74.52 miles of track constructed. The largest part of this mileage is represented by the Kansas City, Clay County and St. Joseph Railway.

Pennsylvania, with 55.79 miles, is third, of which the Philadelphia Rapid Transit Company built 21.58 miles. The Hershey Traction Company completed a ten-mile line.

In Minnesota, which has a total of 54.12 miles, the Electric Short Line Railway and the Minneapolis, St. Paul, Rochester and Dubuque Electric Traction Company built twenty-five and eighteen miles of track, respectively. Two long extensions were built in Iowa. In Massachusetts the majority of new track is credited to the Berkshire Street Railway. The electric railways of Canada built 147.86 miles of track, compared with 78.37, or an increase of 47 per cent over the previous year.—Electric Railway Journal.

SACRAMENTO VALLEY DEVELOPMENT PLANS.

According to the programme mapped out for the years of 1914 and 1915, the Sacramento Valley Development Association, under the management of Edward H. Brown, will pursue the work of promoting the interests of the district, it represents with unusually keen activity.

The association proposes to assist all City or County Chambers of Commerce within its district; to encourage participation in state and county fairs and

land shows and in new enterprises of a meritorious nature and to discourage projects found wanting in merit. Interesting tourists in the Sacramento valley territory is to be one of the chief aims of the Development Association, which is planning a number of excursions through the valley for 1915 Exposition visitors.

CITY AWARDS CONTRACTS ON MUNICIPAL ROADWORKS.

Awards have been made by the Board of Public Works for track special for the Municipal Railroad extension as follows: Track special work to the United States Steel Products; air brake equipment to the Westinghouse Air Brake Co., \$210 per car; steel tie rods to Payne's Bolt Works, \$49.50 per ton; car trucks to the Baldwin Locomotive Works, \$580 per truck; car bodies to the Jewett Car Co., \$2,500 per body, plate and rail braces to Eccles & Smith Co.; rail spikes to the United States Steel Products Co., \$3.00 per 200 pounds; redwood ties to Casper Lumber Co., \$58 per hundred and motor equipment to Westinghouse Electric Mfg. Co., \$2,176 each.

Proposals.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received by the City of Kingsburg, Fresno County, California, until 8 o'clock P. M., Monday, January 20th, 1914, for furnishing the material required to construct a SANITARY SEWER SYSTEM in and for said City of Kingsburg.

Proposals must be submitted on special Bidding Schedules and be enclosed in special Bidding Envelopes obtained from the City Clerk.

Each proposal must be accompanied by a certified check on a reliable bank, or by a Bidder's Bond, with satisfactory surety, for a sum equal to ten (10) per cent of the total amount of the bid.

Bids will be received on three different schedules, to wit:

Schedule "A." The work as a whole, Schedule "B." Any or all of the required material, f. o. b. Kingsburg.

Schedule "C." Any or all of the constructing work.

NOTE.—EACH SCHEDULE REPRESENTS AN INDIVIDUAL BID AND MUST BE SUBMITTED IN ITS RESPECTIVE ENVELOPE.

The Plans, Specifications and other documents relating to the work may be seen and examined, without charge, at the office of the City Clerk in Kingsburg, or copies of same may be obtained by prospective bidders for personal use, upon the payment of Six Dollars and Eighty Cents, (\$6.80).

Bidding Schedules and Envelopes will be furnished free of cost to all prospective bidders upon request, provided that the request is accompanied by a statement that the Plans and Specifications, and all documents attached thereto, have been examined and are thoroughly understood by the prospective bidder.

The Board of Trustees of the City of Kingsburg reserves the right to reject any or all bids and to waive any irregularities in any or all bids.

THE WORK WILL CONSIST OF FURNISHING AND PLACING APPROXIMATELY:

- 310 ft. of 12 inch Pipe.
 - 14-12 inch by 6 inch Wye Branches.
 - 4800 ft. of 10 inch Pipe.
 - 980-10 inch by 8 inch Wye Branches.
 - 8720 ft. of 8 inch Pipe.
 - 247-8 inch by 6 inch Wye Branches.
 - 14270 ft. of 6 inch Pipe.
 - 105-6 inch by 5 inch Wye Branches.
 - 20 Automatic Flush Tanks.
 - 35 Manholes.
 - 14 Lampholes.
 - 1000 ft. of 12 inch Trunk.
 - 2400 ft. of Outfall Pressure Pipe.
- Dated at Kingsburg, Cal. Jan. 12, 1914.

Peerless Ironing Board.
Disappears in the Wall

PEERLESS IRONING BOARD
 SHOWING CABINET
 SET IN PARTITION
 CASED UP

The Peerless Ironing Board is perfect in compactness and convenience. Inexpensive but very valuable for apartments, flats and residences. Helps to rent or sell more quickly at better prices.

Prices \$7.50 and \$8.00

The Peerless Combination Ironing Board and Kitchenette Table combines the ironing board with a disappearing table in the most compact, inexpensive and convenient form. Invaluable for the small kitchen.

Price \$10.00

Write for circular. Agents wanted.

BANK OF ITALY

Are Open Every Day of the Year

Including Sundays and Holidays

From 8 A. M. Until Midnight. Especially
 Convenient for Builders and Contractors.

Boxes \$2 50 per year and upwards.

Junction Market, Mason and Turk Streets

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Price 50 Cents

For Sale By All Druggists, or will be sent by mail postpaid by the manufacturers.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

Building statistics for the month of December, 1913, showed a decline as compared with the same month last year. This was not such a material decline as could be expected under the conditions of business generally. For out of 83 cities, reporting to Construction News, New York, the total loss as compared to last year amounted to only 10 per cent. One fact is noticeable in the tabulation of figures and that is that the small cities have gone ahead much faster than the larger centers. Perhaps the high cost of living has given the farmer a better price for his products and thus the smaller communities have benefited in the productive districts. Comparative figures are shown below:

Cities	1912 Estimated Cost	1913 Estimated Cost
New York (Boros Man. & Bronx).....	\$15,916,468	\$16,159,032
Chicago.....	5,934,500	4,937,900
Boston & vicinity.....	4,521,000	6,620,000

Harrisburgh.....	11,250	39,350
South Bend.....	10,250	28,900
Pueblo, Colo.....	8,620	22,515
Reading, Pa.....	3,350	39,775

Totals.....\$60,067,665 \$67,411,321

These figures show building permits and estimated cost. They are not altogether accurate as the "estimates" are not made under the same conditions in the different cities. However, they are apt comparisons for the same city as they figured on the same basis. Speculative building has practically been at a stand still for the past six months. Hence the sag in the figures in the larger cities.

Statements as to business done by the port of San Francisco show that exports for the year, 1913, amounted to \$68,937,562, as against \$35,773,746 for 1910, showing an increase of almost 100 per cent for the period. Imports increased from 50,669,435 in 1910 to \$62,650,298 in 1913. Shipments to outlying possessions for the year 1913 were as follows:

To Alaska.....	\$ 3,161,273
Hawaii.....	19,994,091
Tutuila.....	167,071

While these figures show a large business to have been done by this port exclusive of domestic trade and coastwise shipping, it should increase much more rapidly in the immediately succeeding years. The port of San Francisco is the great port of the Pacific Coast and the records from now on will show it.

Government Policy In Alaska.

REPORT OF THE SECRETARY
OF THE INTERIOR.

As Alaska contains the largest supply of government lands and mineral resources, the question of how best to develop and conserve these resources has been and still is one of paramount importance to this country. Franklin K. Lane, Secretary of the Interior has made his report to the President. So much of the report as relates to Alaska is herewith appended.

December 10, 1913.

Sir: There are many matters of home concern as to which it is my pleasure to report to you, but I would give prominence to that which appeals to me as of largest and most immediate moment—the fuller and freer use of our national resources.

It is, of course, known to you that there exists a feeling in the West that its affairs and needs have not been given that consideration at the hands of the National Government which they merit. This feeling is not confined to speculators or exploiters. It is the sentiment of many who are without selfish motive and regard the matter wholly from the standpoint of national growth. They point to the conditions which obtain in Alaska as unparalleled among people of our aggressive and nation-building stock. So, too, they are unable to understand why ways have not been found by which the great bodies of coal and oil lands, of phosphate and potash lands, may be developed, and the waters of the mountains made available for the generation of power and the redemption of the desert.

There is one very simple explanation for the existence of this feeling. We have adventured upon a few policy of administering our affairs and have not developed adequate machinery. We have called a halt on methods of speculation which existed, to the great benefit of many, but we have failed to substitute methods, sane, healthful, and progressive, by which the normal enterprise of an ambitious people can make full use of their own resources. We abruptly closed opportunities to the monopolist, but did not open them to the developer.

Land Policy.

I have said that we had put into force a new land policy, which caused dismay and discontent. Let me explain what I mean by this. It was, in fact, but a new application of an old policy. Congress has always been most generous as to the disposition of the national lands. One cannot read our land laws without being struck with the fixed determination which they show that it was wisest to be quit of our lands as quickly as possible. It might almost be said that the Government regarded its lands as a burden rather than an asset. We have given generously to our railroads and to the States. There was land for all, and it was the Government's glad function to distribute it and let those profit who could. There was no thought then of creating timber barons or cattle kings,

or of coal monopoly. The sooner the land got into hands other than those of the Government the better. And this generous donor was not so petty as to discriminate between kinds of lands, the uses to which they could be put, or the purposes which those might have who got them. Land is land, save when it contains minerals; this was roughly the broad principle adopted. To classify was a task too difficult or not worth while. The lands would classify themselves when they arrived in individual ownership. And so the door was opened for monopoly and for fraud.

If the Government did not appreciate the invaluable nature of its assets there were men who did. Great fortunes were laid in the vast holdings of what had but a short time since been the property of the people. There was danger that the many still to pour into the West would by necessity become the servants of a fortunate and early few. On this discovery our indifference at once took flight. And so out of the abuse of the Nation's generosity there came a reaction against a policy that was so liberal as to be dangerous.

The Nation wanted home makers, but found its lands drifting into the hands of corporations which were withdrawing them from the market, awaiting a time when lands would be more scarce; it gave opportunity for many competing coal operators and iron manufacturers, but found the sources of raw material centering into a few large holdings; it wished its lands to be cleared of forests to make way for farms, but it found hundreds of consecutive miles reserved from use by the fiat of those who appreciated their worth, and many more miles of watershed despoiled of its needed covering in places where homes were not possible.

A reaction was inevitable. If lands were to be withdrawn from public service, why might not the Government do the withdrawing itself? The old philosophy that "land is land" was evidently unfitted to a country where land is sometimes timber and sometimes coal; indeed, where land may mean water—water for tens of thousands of needy neighboring acres. For the lands of the West differ as men do, in character and condition and degree of usefulness. We had not recognized this fact when we said "land is land." Lands fitted for dry farming and lands that must forever be mowed without irrigation; lands that are worthless save for their timber; lands that are rich in grasses and lands that are poor in grasses; lands undelimited with the nonprecious minerals essential to industry or agriculture; lands that are invaluable for reservoir or dam sites—these varieties may be multiplied, and each new variety emphasizes the fact that each kind of land has its own future and affords its own opportunity for contributing to the Nation's wealth.

So there has slowly evolved in the public mind the conception of a new

policy—that land should be used for that purpose to which it is best fitted, and it should be disposed of by the Government with respect to that use. To this policy I believe the West is now reconciled. The West no longer urges a return to the hazards of the "land is land" policy. But it does ask action. It is reconciled to the Government making all proper safeguards against monopoly and against the subversion of the spirit of all our land laws, which is in essence that all suitable lands shall go into homes, and all other lands shall be developed for that purpose which shall make them of greatest service. But it asks that the machinery be promptly established in the law by which the lands may be used. And this demand is reasonable. Already Congress has recognized in many ways the appositeness of this policy, but it is for yourself and Congress to further extend it thought into our legislation.

Surely this is not a task that may be adventured upon with recklessness or without respect for the opinions of others. And the suggestions which shall be made by me are so made in the hope that they will form a basis upon which the constructive mind may work and bring forth a more perfect, a more efficient working plan.

As to Alaska.

The largest body of unused and neglected land in the United States is Alaska. It is now nearly half a century since we purchased this territory, and it contains today less than 40,000 white inhabitants, less than 1,000 for each year it has been in our possession. The purchase was made as a means of protection against the possible aggression of a foreign nation and without the hope that it would be even self-supporting. In the intervening 46 years we have given it little more than the most casual concern, yet its mines, fisheries, and furs alone have added to our wealth the grand sum of \$500,000,000.

For almost a generation it was the rich harvest field of a single company. Individual fortunes have been made in that country larger than the price paid to Russia for the whole territory. How rich its waters are we know, because they have been proved, but how rich its lands are in gold and copper, coal and oil, iron and zinc, no one knows. The prospector has gone far enough, however, to tell us that no other section of our land today makes so rich a mineral promise. And in agriculture the Government itself has demonstrated that it will produce in abundance all that can be raised in the Scandinavian countries, the hardy cereals and vegetables, the meats and the berries of which 9,000,000 people live in Norway, Sweden and Finland. It has been estimated that there are 50,000,000 acres of this land that will make homes for a people as sturdy as those of New England. Whether this is so or not, it would appear that

Alaska can be made self-sustaining agriculturally.

This vast and unsurpassed asset lies almost undeveloped. A territory one-fifth the size of the United States contains less than a thousand miles of anything that can be called a wagon road. It has few inconsiderable stretches of railroad which terminate, with one exception, either in the wilderness or at a private industry. Only the richest of its mines can be worked, and one of its resources of greatest immediate value to the people—its coal lands—lies unworked.

The one constructive thing done by this Government on behalf of Alaska in nearly half a century was the importation of reindeer for the benefit of the Eskimo on the border of the Arctic Ocean. For the white man we have done nothing—so little, in fact, that to mention what we have done is matter for chagrin and humiliation. I have thought that perhaps the scandals that have developed in Alaska have been in some part the result of a feeling that it was No-Man's Land, where the primal instincts and powers were the only law.

This unfortunate condition cannot be explained on the ground of the inhospitality of the Alaskan climate. A careful study of isothermal lines shows that some of southeastern Alaska has a climate more temperate and more equable than that of this city, while much of the greater portion of the north has a kinder climate than Stockholm or St. Petersburg. Moreover, our people are not stayed in their quest for homes or wealth by the rigors of a long winter. The spirit and purpose which brought them from Europe to Virginia and to Massachusetts take them today to Montana and Saskatchewan. The United States lately opened to entry a tract of land in Montana for which there were 46,000 applicants for registration, and only 7,000 of these could be given an opportunity to homestead. There is more railroad building 500 miles north of the Canadian border than there is for the same distance south of it.

Why has not this land been developed? The frank answer is that we did not realize until within a few years that it was worth developing. As soon as we discovered its value as a national asset we became alarmed and drew back, affrighted at the thought that we might lose it, or at least that it would become the property of those who would exploit it without respect to the public interest. Since then we have been waiting to make up our minds as to what wisely could be done. We have hesitated and naited out of the very keenness of our appreciation of what Alaska might become. It has rather been in compliment to Alaska than in derogation of her value that we have done so little for her in late years. It was a new land to be opened under new conditions. The mistakes made there and here we did not wish to repeat. But now after a long pause it would seem to be the sense of the people that we shall proceed at once and in a large way to deal with the problem of Alaskan development.

Proposed Administrative Board.

We have withdrawn Alaska from the too aggressive and self-serving exploiter. What have we to substitute as a safer servant of public interest?

To this question I have given much thought, and my conclusion is that if we are to bring Alaska into the early and full realization of her possibilities we must create a new piece of government machinery for the purpose. We should undertake the work in the spirit and after the method of a great corporation wishing to develop a large territory. In my judgment the way to deal with the problem of Alaskan resources is to establish a board of directors to have this work in charge. Into the hands of this board or commission I would give all the national assets in that territory, to be used primarily for her improvement—her lands, fisheries, Indians, Eskimos, seals, forests, mines, waterways, railroads—all that the nation owns, cares for, controls, or regulates. Congress should determine in broad outline the policies which this board in a liberal discretion should elaborate and administer much as is done as to the Philippines. This board would of course have nothing whatever to do with the internal affairs of the organized Territory of Alaska, for it would exercise no powers save such as Congress granted over the property of the United States in Alaska.

There are several reasons which appeal to me as supporting this suggestion:

1. Such a board could advise Congress as to what should be done, without prejudice, out of a deep national interest and with first-hand knowledge of conditions.

2. Such a board would co-ordinate the present enterprises of the Government in Alaska. As it is now, the control of lands is in one department, of forests in another, of roads in another, of fisheries in a fourth, of railroads in still another. The care of black bear is in one department and of brown bear in another.

3. There can be no satisfactory administration of land laws nor any other laws at a distance of 5,000 miles from the point of action. Much less is this possible where the two sections of the country are separated by an ocean, and the land calling for attention is closed to the world one-half of the year. The eye that sees the need should be near the voice that gives the order.

4. Alaska's opening and improvement should be treated as one problem. Each step in such an administration should be part of a plan, not an isolated act. We should have a unified and consecutive program, based on immediate knowledge governing this work. Each line of activity within the Territory should be correlated with all other activities. The opening of lands and the building of railroads or wagon roads, for instance, should be part of one scheme.

5. Alaska should be developed so far as possible out of her own revenues and resources. She should have a Federal budget of her own. Her revenues and expenditures should be presented to Congress on a single sheet. The funds raised from her lands and fisheries, her furs, her forests, and her mines should be used for the construction of her roads, railroads, telegraph and telephone lines, or for any other purpose which would make her resources more quickly available to the world. I believe it could be shown

that Alaska is self-supporting today, or, what is more to the point, that by proper taxes and charges imposed upon those who are deriving large return from their enterprise in the Territory, such revenue could be derived as would support a large policy of expansion and improvement. In short, I would construct the administrative machinery that would most surely lead to a prompt and continuous development of Alaska as a part of the United States upon a plane commensurate with her possibilities industrially, agriculturally, and socially.

The members of such a board appointed by the President would be selected presumably with reference to their fitness for the work to be done. Each one could be made the administrative and residuary head of a department or division, so that there might be a commissioner of the Alaskan land office, another commissioner of highways, another, perhaps, commissioner of Indian affairs and fisheries, and so on. All would sit together, as in the commission form of municipal government, and would work for a common end, the upbuilding of Alaska as an integral and contributing part of the Union.

I apprehend the fear that with such a commission there would be danger of corruption or indifference creeping into its work. This, however, is incident to the bestowal of all authority. The commission would not go unchecked, of course, for it must report to the head of some department at Washington, and through that head to Congress, and would be always subject to investigation. Moreover, no method has yet been invented by which dishonesty or poor judgment can be guarded against in public or in private life. In the end the character and wisdom of the men appointed is the only insurance that can be given against conduct that is foolish or worse.

Alaska should not, in my judgment, be regarded as a mere storehouse of resources upon which the people of the States may draw. She has the potentialities of a State. And whatever policy may be adopted should look toward an Alaska of homes, of industries, and of an extended commerce.

Strongly as I would urge this method of management—for it offers a rare opportunity to exhibit the efficiency of a Republic—I would not have Alaska wait for needed legislation until the merits of such a plan could be passed upon by Congress. Those things which appeal to me as of immediate necessity upon which independent action may be taken are (1) the construction of railroads in the Territory and (2) the opening of her coal lands.

Alaskan Railroads.

I have already expressed my belief to Congress that it was wise for the Government itself to undertake the construction and operation of a system of trunk-line railroads in Alaska. And I am led to this view irrespective of the possibility of private enterprise undertaking such work, although my belief is that no railroads would be privately constructed in Alaska for many years to come excepting as adjuncts to some private enterprise. Be that as it may, it would seem wise for the Government to undertake this task upon grounds of

state. The rates and the service of such railroads should be fixed with reference to Alaskan development—not with regard to immediate returns. The charges fixed should be lower for years to come than would justify private investment. I would build and operate these highways in the same spirit that the counties or the States build wagon roads—not for revenue, but for the general good. After all, a railroad is little more than an operated wagon road. In many countries they still call railroad cars "wagons." Our laws as to railroads are evolved from our old laws as to carriages by wagon. Our courts speak of railroads as property charged with a public interest and so justify the regulation of their rates. But no court would justify the imposition of rates made for the purpose for which Alaskan rates should be made—the creation of a commonwealth. If this is our task, it should be done wholeheartedly and with a consciousness that the dollar spent today on an Alaskan railroad will yield no more immediate return on the investment than the dollar spent on the Panama Canal.

These, then, are the persuading reasons for the belief that the Government should undertake to drive from the coast inland one or more lines of railroad: (1) The Government already regards it as its duty to build wagon roads. Such roads when well built are almost as costly as the construction of a railroad, which is the essential modern means of transportation. (2) There can be no assurance that without surrendering our resources in Alaska private railroads will be built. (3) The opening of this new country demands that the highways of travel and commerce should be made wholly subservient not to private interest but to the upbuilding of this territory that they may be the real servants of the national purpose.

If it is thought wise to recoup the Government for its original outlay it can be done, at least in part, by following a plan not unknown to our people—by giving a land subsidy to the owners of the road. Retain in the Government one-half of the land on each side of the railroad until it has appreciated in value by the growth of the lands given to the public. Thus the Government would subsidize itself and reap some of the benefits accruing to its land from the construction of the road. Judging by the increase in land values in the newly opened sections of Canada, who could say but that long before the bonds were due the Government would thus have an asset sufficient to meet the original debt?

There seems to me no necessity for barring the way to minor privately owned roads because of the presence of longer systems of publicly owned roads. The two exist together in other countries. I would not even apply the principle of the commodities clause of the act to regulate commerce to such roads. They should be built, however, under governmental supervision, capitalized and operated under the strictest regulation, and be at any time subject to purchase by the Government at their cost, minus depreciation.

Alaskan Coal.

It is not necessary to set forth here the extent or character of the coal fields of Alaska. Neither could I add to your knowledge or that of Congress as to the need for this coal both by the Navy and by the industries and the people of the Pacific coast generally. There are almost unlimited quantities of a high grade of lignite in the interior which may not stand extended storage or transportation. This could be converted into electricity at the mouth of the mines and widely distributed for lighting, heat, and power. Toward the southern coast of the peninsula there are two well-known fields of a high-grade bituminous coal and some anthracite. These are the fields which have given rise to the troubles with which all are familiar.

These coal fields should be opened not to speculators but to operators. These should have these lands who will use them. None should be opened as a basis for a gamble in future values. If these premises express a sound public policy, there appears to me but one conclusion that can be reached as to the manner in which they may be safely turned over to the public—under a leasing and royalty system similar to that under which the State of Minnesota leases its ore lands and the States of Montana and Colorado their coal lands. The tracts opened should be disposed of to those who within a certain time would develop mines and make their product commercially available. This means that where a railroad is necessary to the operation of a mine the applicant should take a lease so conditioned for a limited period. Sufficient land should be leased as a body to justify long-continued and economical operation. As the average of all operations in the United States is 2,600 acres, including many small holdings, this might be taken as a maximum unit.

There has been much dispute between those who favor making a lease for an indeterminate period, dependent alone upon continued operation, and those who believe it wisest to fix a term for the lease, 20, 30 or more years. This dispute seems to me of much more academic than practical interest. There should be no disposition to change the lessee. If a fixed term of lease is decided upon, the original lease should have an assured preferential right to a renewal until the mine is worked out. So that in the end the fixed term is a reservation of the right on the part of the Government to make new terms at the end of a number of years, a reservation which could be fixed in an indeterminate lease.

A fixed minimum annual royalty would conduce to operation and prevent the holding of lands out of use. These are matters, however, of regulation upon which much thought should be expended, and the experience of other lands will be found helpful. If the principle of the homestead law is adopted, and one lease only permitted to any one person or group of persons, and all leases made nontransferable, excepting with the consent of a designated authority, it would seem that monopoly could be prevented. I would, however, add one other precaution—that in each field a large body of the

coal land be reserved, so that the public and the Navy might be rendered independent of private supplies if that should become necessary.

The attraction of a leasing system is that it enables an operator to put all of his capital into the promotion of his enterprise, no investment being needed for the purchase of the land. This makes it possible for the man of comparatively small means to become a coal mine operator. The lessee is pleased to pay the Government a royalty in lieu of tying up a large amount of capital in the land itself.

There is this further consideration, which those interested in Alaska's future might well consider. The royalties arising from these mines (as well as from oil) would for a long time be a source of revenue to the Government. To stimulate the opening of mines, all royalty might well be waived for a brief period; later, however, these royalties would be a not inconsiderable addition to the resources available for Alaskan development, for I would think it the wiser policy to give to this new land the full return from her properties to be used in her improvement, at least for many years.

There are many isolated places in Alaska where small mines may be opened to supply a local and small need. A license to mine a small acreage without any charge whatever on the part of the Government would meet this need.

BUILDING TRADES EMPLOYERS' ASSOCIATION OF CALIFORNIA ADOPTS RESOLUTIONS REGARDING THE PLASTERING SITUATION.

At a special called meeting of the Building Trades Employers' Association of California, held on January 2nd, 1914, to consider the Plastering situation, which body is composed of the following bodies, to wit:

The General Contractors' Ass'n.
The Concrete Contractors' Ass'n.
The San Francisco Lumbermen's Club
The Master House Smiths' Ass'n.
The Furniture & Carpet Trades Ass'n.
The San Francisco Planing Mill Owners' Association.
The Sheet Metal Contractors' Ass'n.
The Lighting Fixture Club of S. F.
The Erectors' Association of California.

The Cabinet Manufacturers' Ass'n.
The Master Roofers' & Manufacturers' and Individual Firms, the following resolution was adopted:

"WHEREAS, Local Plasterers' Union No. 66 has demanded 50% of the labor involved in nailing up staff work on Exposition Buildings, at an increased labor cost of 50%, which work heretofore, at all previous Expositions held in the United States, has been performed by Carpenters only, and

WHEREAS, The Building Trades Council of San Francisco has awarded this work to Journeymen Carpenters only, in accordance with an understanding with the Panama-Pacific Exposition officials, the Building Trades Council and the Contractors, before the contracts were awarded, as a result of which decision the members of Local Plasterers' Union No. 66 have walked out on all Plastering Work in San Francisco, and

Firms desiring ads on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 4 story and base. Class C construction. Cost not stated. Architect, Herman Barth, 12 Geary street, S. F. Owner's name withheld. The building will be erected on California street near Hyde and will cover a large ground area. Plans show a total of some 40 suites arranged in two and three room apartments. Interior will be finished in pine with elm panels and oak floors. There will be steam heat, a hot water system and vacuum cleaning. All suites will have wall beds and private bath rooms. Baths will be finished in tile and will have composition floors. Entrance and vestibule will be finished in marble and tile. Exterior of the house will be faced with pressed brick and terra cotta. Preliminary plans are now being prepared. Further mention will be made of this work.

SAN FRANCISCO—Apartment house alterations, 3 story, frame, \$6,000. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owner, Mrs. C. De Forest. The building on Clayton street north of Haight, now occupied by several flats, will be altered into a modern apartment house structure containing three and five room suites. There will be new interior finish, partitions, plumbing, electric work and heating. All apartments will be equipped with wall beds and will have private bath rooms. Interior finish will be of pine and redwood. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 5 story and base. Class C construction, \$50,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Cohn Bros. The building will be erected on a large corner lot in Berkeley, and has been designed for suites of two and three rooms. Interior will be finished in pine and elm panels with some hardwood floors. There will be steam heat, elevator service and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. All suites will be equipped with wall beds and private bath rooms. Exterior of the building will be faced with pressed brick. Preliminary plans have been approved and the architect is now engaged on the working drawings.

PORTLAND, ORE.—Apartment house 2 story and base, frame, \$15,000. Architects, Goodrich & Goodrich, Abington Bldg., Portland. Owner's name withheld. The building will be erected on the East Side, covering an area of 44 by 70 feet. Interior has been arranged for eleven suites of two and three rooms, besides a number of single rooms. All suites will have private baths and wall beds. Interior finish will be of pine and redwood. Oak floors will be used in the living rooms. Plans provide for steam heat, a hot water system and vacuum cleaning. Bath rooms will have composition

floor and tile wainscot. Exterior of the building will be covered with rustic and shiplap. Work will start in the spring.

SEATTLE, WASH.—Apartment house, 3 story and base, brick, \$25,000. Architect, F. H. Blohm, New York Bldg., Seattle. Owner, Frank Logan. The building will be erected at the southwest corner of Republican and Minor streets, and has been designed to contain fifteen suites of two and three rooms. Interior finish will be of pine and hardwood veneer. Some oak floors will be used. There will be steam heat and a hot water system. All suites will have wall beds and private baths. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick and steel, \$60,000. Architect, Fernand Parmentier, Byrne Bldg., L. A. Owner, Mrs. Harvey Ingerson. Contractors, Dutro-Wren Construction Co., Van Nuys Bldg., L. A. Note: The contract has been taken on the percentage basis and the estimated cost of the building is placed at \$60,000.

BANKS.

OROVILLE, WASH.—Bank, 2 story and base, brick and concrete, \$15,000. Architect, A. Harlan Thomas, Arcade Bldg., Seattle. Owners, First National Bank of Oroville. The building will be erected on a corner site, the entire first floor being occupied by the bank, and upper floors will be arranged for modern offices. Interior finish will be of pine and hardwood. There will be a central heating system, special coin vaults and metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are being prepared and figures will be called for within a month.

BASE BALL PARK.

Contracts Awarded.

SAN FRANCISCO—Base Ball Park, concrete and frame. Cost not stated. Architect, Walter A. Mathews, Oakland. Owners, Recreation Park Association. Contractors, Ward & Goodwin, 981 Guerrero street, S. F., carpentry work only. Contract price not stated.

BATH HOUSES.

SEA SIDE, ORE.—Bath house, 1 story, reinforced concrete, \$25,000. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owner, J. E. Oates. The building will be arranged for a large number of tub baths, showers and a large concrete swimming pool. Equipment will be of the most modern type, including filters and water heating plant. Exterior will be faced with cement plaster. No general contract will be let, the owner doing the work by Day Labor, and subcontracting all material contracts. Excavating and grading have been started.

BRIDGES AND DAMS.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Wharf, timber and creosoted piles, \$165,000. Engineer, H. J. Brunner, Sharon Bldg., S. F. Owners, City of Santa Cruz. The wharf will be about 2,750 feet long and will be erected near the present Fisherman's Wharf. The approach portion, which is 2,100 feet long will vary in width from 30 to 42 feet. The main pier will be about 650 feet long and 80 feet wide. This will have a shed on it 210 feet long and 46 feet wide. The entire construction will be of timber and creosote piles. About 2,200 piles will be required, varying in length from 30 to 70 feet, and about two million board feet of lumber. The usual bolts and fittings, spikes, drift pins, etc., will be used. There will be one track run the full length of the approach and pier. Davits and their mechanical equipment will also be used. Plans are complete and figures are being taken. Bids will be opened on February 6th. Plans and specifications can be secured from the engineer.

ESQUIMAULT, B. C.—Dry dock, concrete construction, \$1,000,000. Engineers, Dominion Government. Owners, Dominion of Canada. Details of the proposed dry dock which is to be erected at Esquimalt have been made public. The structure will have a total length of 1,150 feet with an extreme depth at the approach of 50 feet and an average depth of 40 feet at high water. Construction will be of reinforced concrete and steel. The site has been selected and preliminary work of grading has been started. Working drawings are now being completed in the Dominion offices and figures will be called for within a short time.

VANCOUVER, B. C.—Bridge, steel and concrete construction, \$2,000,000. Engineer, John Wolfe Barry, Vancouver, B. C. Owners, Burrard Inlet, Tunnel and Bridge Co. Plans for a large steel span bridge, which is to be erected over the Second Narrows, are complete, and are now in the hands of the contractors for figures. Bids will be opened on April 1st. Plans, specifications and full particulars can be secured from the engineer, who may be addressed in care of the owners.

PORTLAND, ORE.—Deck construction. Cost not stated. Engineer, G. B. Hegardt, care of the Dock Commission, Portland. Owners, City of Portland. Plans have been completed for Municipal Dock No. 2, which is to be erected on the East Side. Construction will be similar to that of Dock No. 1, including concrete, brick and heavy mill construction. The dock will be 525 feet long and will be covered with a shed. Proceeds from bonds valued at \$900,000 will shortly be available. Bids will be called for some time this month but construction will not be started until the money is available.

Contracts Awarded.

SAN FRANCISCO—Pier addition, timber construction, \$12,766. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, San Francisco Bridge Co., S. F. Contract price, \$12,766. This work is to be done at Pier No. 25.

CHURCHES.

BERKELEY, ALAMEDA CO., CAL.—Church, 1 story, frame, \$10,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, St. Peters Parish. The building will be erected on Rock Ridge Road, and has been designed in the Mission style. Interior will be arranged for a main auditorium, seating 250 people, and Sunday school rooms. Fine and redwood will be used in the finish. Plans provide for a hot air system of heating. Art glass will also be used. Exterior of the building will be covered with cement plaster. Plans are complete and figures are now being taken.

PASADENA, LOS ANGELES CO., CAL.—Church auditorium, 1 story and base, frame, \$10,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Tremont Baptist Church. The addition will be erected in the rear of the present church, and will be connected to the main body of the church by an arched corridor. The building will be 50 by 80 feet. The main auditorium, which is to occupy the entire first floor, will seat 600 people. Basement will contain a social hall and kitchen. Interior finish will be of pine throughout. There will be a central heating system. Exterior of the building will be faced with blue brick base and cement plaster on metal lath. Plans are being prepared.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Cold storage plant, 5 story and base, CLASS B construction, \$60,000. Architect, Edmund Kollofrath, 560 Belvedere street, S. F. Owners, Merchants Ice and Cold Storage Co. The building will be erected at the southeast corner of Montgomery and Lombard streets, covering an area of 88 feet 2 inches by 89 feet. Construction will be of brick and steel, with hollow tile partitions and cement floors. There will be elevator service, metal window sash and frames and fireproof doors. A large amount of special machinery will be installed. Exterior of the building will be faced with stock brick. Plans have been completed and received the approval of the owners. Construction will be started as soon as contracts can be let.

EMERYVILLE, ALAMEDA CO., CAL.—Factory, 1 story, reinforced concrete, \$15,000. Architect, none. Owners, California Pickle and Sauce Co., 133 Myrtle street, Oakland. The building will cover a ground area of 125 by 140 feet, and will be practically fireproof throughout. Interior will be finished in pine with cement floor. Some tile wainscot will be used. There will be a steam plant and special machinery. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners, who will do the work by Day Labor. Materials are now being purchased.

LONG BEACH, LOS ANGELES CO., CAL.—Packing plant, 2 story and base, brick, \$60,000. Architect, none. Owners, National Tuna Fishing and Packing Co., Charles E. Williamson, Pres., Long Beach. This building is to be erected on the harbor front and will cover a large area. Construction will be of the extra heavy type. There will

be a large amount of special machinery, metal window sash and frames and fireproof doors. Plans provide for steam heat, pine trim, modern electric and plumbing work. Exterior of the building will be faced with pressed brick. Plans are being prepared and when complete will be turned over to the owners who will take figures.

Contracts Awarded.

NAPA, NAPA CO., CAL.—Laundry building, 1 story and base, brick and concrete, \$16,500. Architect, State Department of Engineering, Sacramento. Owners, State of California. Contractor, R. S. K. MacMillen, S. F. Contract price, \$16,500.

SEATTLE, WASH.—Warehouse, 3 story and base, reinforced concrete, \$75,000. Architect's name not given. Owners, Oregon-Washington Railroad and Navigation Co. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price, \$75,000. Note: When complete the building will be occupied by the Western Hardware and Metal Co.

FIRE HOUSES AND JAILS.

SAN FRANCISCO—Fire house, 2 story and base, brick and concrete, \$60,000. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, City and County of San Francisco. Working drawings for Engine House No. 12, which is to be erected at the corner of Drumm and Commercial streets, have been completed and have received the approval of the Supervisors. Figures will be called for at once. The building will contain the apparatus room and stable on the first floor, and quarters for the men on the second floor. Interior finish will be of pine and hardwood. There will be cement and tile floors. Plans provide for steam heat, a hot water system and vacuum cleaning. Baths will be equipped with showers. Special plumbing and electric work are called for in the specifications. Exterior of the building will be faced with brick and stone.

SAN FRANCISCO—Fire alarm station, 1 and 2 story, concrete and brick, \$36,000. Architect, City Architectural Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. A new building will be erected in Jefferson Square, probably on the site of the old Central Emergency Hospital, which will house the fire alarm equipment and repair department of the city fire department. There will be a general office, several repair shops and storage space. Interior will be finished in pine. There will be steam heat and special wiring. Exterior of the building will be faced with pressed brick. Plans are to be completed at once and figures will be taken by the Board of Public Works.

VENTURA COUNTY, CAL.—Jails, 3, 1 story and base, reinforced concrete. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Ventura County. These buildings will be erected at the following locations: Fillmore, Moorpark and Camorilla. All will be of the same design and construction, with cement and pine floors, steel cells, composition roofs; modern jail plumbing and electric work. There will be wrought iron window grilles and steel doors. Exteriors will be

faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Fire houses, 4, 2 story and base, brick, \$10,000 each. Architect, J. J. Backus, 24 City Hall, L. A. Owners, City of Los Angeles. These buildings will be erected at 1st and Reno, Vermont and Santa Monica, Florence and Moneta and 39th and Western. Each building will house two pieces of apparatus on the first floor, and will be arranged for living quarters for the men on the upper floor. Interiors will be finished in pine. There will be special plumbing and electric work. Exteriors will be faced with pressed brick. Plans are being prepared and figures will be called as soon as working drawings can be completed.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,500. Architect, none. Owner, John J. Binet, 68 Ramona avenue, S. F. The building will be erected on the east side of Guerrero street south of 19th, and has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine with some elm panels and oak floors. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Tile wainscot will also be used in the kitchens. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. Materials are now being purchased.

GARAGES.

WHITTIER, LOS ANGELES CO., CAL.—Garage and warehouse, 1 story and base, brick and concrete, \$15,000. Architects, Rea & Garistang, Black Bldg., L. A. Owners, Standard Oil Co. The building has been designed in the shape of an L, and will house the company's office in the front portion, a warehouse and garage in the rear. The structure will cover an area of 33 by 67½ feet and 22 by 74 feet. Interior of the offices will be finished in pine and hardwoods. The garage will have a cement floor. Metal window sash and frames will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

GOVERNMENT WORK AND SUPPLIES.

Pumps, Mare Island and Puget Sound. The specifications for centrifugal pumps, etc., required in the central power plants, navy yard, Mare Island, Cal., and Puget Sound, Wash., bids for which are to be opened at the bureau of yards and docks, Navy Department, on February 14, state:

General Intention.—It is the declared and acknowledged intention and meaning to provide, secure, and install two motor-driven centrifugal fire pumps in the central power plant at the United States navy yard, Mare Island, Cal., and two steam turbine driven centrifugal hot water heating system pumps in the central power

plant, United States navy yard, Puget Sound, Washington.

General Description.—The motor-driven 1,000 gallon per minute pumps are to be used for fire and general flushing service at Mare Island, Cal. These pumps shall be suitable for pumping sea water. The turbine-driven 1,000 gallon per minute pumps are to be used for the circulation of fresh hot water in a heating system at Puget Sound, Wash. There shall also be furnished all material and labor necessary to raise the present heating system heater and install new suction piping at the navy yard, Puget Sound, Washington.

The power plants are now operating and these pumps will be installed in pits below the basement floors as shown on the drawings, taking their suction from the existing outlets and discharging into existing distributing systems. All the piping, valves and fittings for connections from the existing outlet to points shown on the drawings are to be furnished under this specification. The pumps for Mare Island shall have such characteristics as to make them suitable for fire, flushing, and circulating service, taking their suction direct from the well below the pump pit floor.

La Junta, Colo., Post Office.

The supervising architect, Treasury Department, Washington, D. C., has rejected all bids received for the construction, complete, of the U. S. post office at La Junta, Colo.

Cheyenne, Wyo., Repairs, Etc.

The following bids were received by the custodian U. S. post office, Cheyenne, Wyo., for repairing and painting in the U. S. post office building at Cheyenne, Wyo.:

B. M. Bruce, Cheyenne, Wyo., \$4,475.

J. P. Sullivan, Chicago, Ill., \$3,744.
Grohne Contracting Co., Joliet, Ill., \$4,940.

The Sherman Co., Cheyenne, Wyo., \$1,578.50.

Rock Springs, Wyo., Vault Shelving.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the U. S. post office at Rock Springs, Wyo.:

The H. H. Shults Co., Gowanda, N. Y., \$82.

The Canton Art Metal Co., Canton, Ohio, \$98.

The Berger Mfg. Co., Canton, Ohio, \$105.

Art Metal Construction Co., Jamestown, N. Y., \$108.

Crown Metal Construction Co., Jamestown, N. Y., \$111.50.

Watson Mfg. Co., Jamestown, N. Y., \$118.

The Van Dorn Iron Works, Cleveland, Ohio, \$16.

Grand Junction, Colo., Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring, interior lighting fixtures and approaches) of the U. S. post office at Grand Junction, Colo.:

Blid 1. W. C. Boyer, Grand Junction, Colo.

2. F. H. Cowell, Central Savings Bank Building, Denver, Colo.

3. J. H. Wiese, 1301 City National Bank Building, Omaha, Neb.

4. Hiram-Lloyd Building and Construction Co., Odd Fellows' Building, St. Louis, Mo.

5. Frank Kirchhof Lumber Co., Denver, Colo.

For using light colored Colorado marble for all exterior stonework, except where granite is required—Bid 1, \$36,954; 2, \$100,545; 3, \$102,110; 4, \$105,217; 5, \$111,014.

For using Colorado sandstone for all exterior stonework, except where granite is required—Bid 2, \$34,725; 5, \$104,900.

For using light colored limestone for all exterior stonework, except where granite is required—Bid 1, \$30,354; 2, \$93,382; 3, \$93,314; 4, \$97,717; 5, \$104,300.

For alternate 1: Substituting Keene's cement for hard plaster on walls of finished rooms as specified, add—Bid 3, \$600; 4, \$800; 5, \$550.

For painting plaster walls of finished rooms and finishing ceilings in distemper, as specified, add—Bid 3, \$1,500; 4, \$2,500; 5, \$1,800.

Amount included in the proposal for furnishing and installing of all interior lighting fixtures—Bid 1, no bid; 2, \$312; 3, \$2,000; 4, \$1,150; 5, \$900.

New Irrigation Project.

Pursuant to the approval of the Secretary of the Interior of the contract between the State of Washington and the United States providing for the investigation of the Palouse Irrigation project, Governor Lister, Mr. E. McCulloch, engineer in the Reclamation Service, who will have charge of the work, and Supervising Engineer C. H. Swigart, in charge of Washington Irrigation projects, held a meeting to outline future work and discuss the steps necessary for handling the appropriation provided by the State.

The entire work of the survey will be under the control of the Reclamation Service. The problem is to find sufficient feasible reservoir sites to impound water for the irrigation of a smaller project than the one originally planned, as the Washuena Coulee was considered infeasible by the board of engineers reporting on the Palouse project, and railroad construction has made the site at the diversion point on the Palouse River infeasible.

The engineer in charge has gone over a number of proposed reservoir sites and a portion of the Washuena Coulee. A reconnaissance will be made in a short time of the headwaters of the Palouse River for the purpose of locating reservoir sites.

Brigham City, Utah, Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete (including mechanical equipment, interior lighting fixtures and approaches), of the U. S. post office at Brigham City, Utah:

Blid 1. Campbell Building Co. of Utah, Salt Lake City, Utah.

2. The Parrott Bros. Co., P. O. Box 984, Salt Lake City, Utah.

3. North Pacific Construction Co., Twin Falls, Idaho.

4. The George Hinchliff Co., Paragould, Ark.

Proposal No. 1. Using limestone for all stone work, except where granite is required—Bid 1, \$55,849; 2, \$56,600; 3, \$59,131; 4, \$69,600.

Proposal No. 2. Using sandstone for all stone work, except where granite is required—Bid 2, \$60,600; 3, \$61,431.

For alternate No. 1 (substituting Keene's cement for hard plaster on walls in the first and mezzanine stories, as specified), add—Bid 1, \$320; 2, \$175; 3, \$185; 4, \$300.

For alternate No. 2 (painting plastered surfaces of all finished rooms in first and mezzanine stories, as specified), add—Bid 1, \$298; 2, \$283.75; 3, \$750; 4, \$900.

Amount included in the proposal for furnishing and installing of all interior lighting fixtures—Bid 1, \$298; 2, \$16; 3, \$216; 4, \$400.

San Jose, Cal., Screens.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for furnishing door and window screens for the U. S. post office at San Jose, Cal.:

Santa Clara Valley Mill & Lumber Co., San Jose, Cal., \$500.

Hipolite Screen & Door Co., San Jose, Cal., \$975.

R. O. Summers, San Jose, Cal., \$936.

Willier Mfg. Co., Milwaukee, Wis., \$1,175.

Oil Engines for the Navy.

Lieutenant F. X. Gyax, U. S. Navy, who has been on duty in Switzerland superintending the construction of Diesel engines for submarine boat G-3, returned to this country last week and has reported for duty in the bureau of steam engineering of the Navy Department. These engines were constructed for the Lake Torpedo-Boat Co., but, as the contract has been taken over by the Government, the engines will be shipped to this country and installed at the New York navy yard. Lieutenant Gyax is understood to have acquired much valuable information regarding the Diesel engines during his tour of duty abroad. Work has been begun on the construction of the experimental oil engines intended for installation on the naval collier Maumee at the New York navy yard. Much discussion has been prevailing among the naval engineers as to the scope of the internal-combustion engine. The most conservative naval view is that it will be limited to small craft, notably in the submarines, where oil propulsion is almost universal. Information received at the Navy Department indicates that the foreigners have encountered much trouble with the Diesel motors. One reason is the high speed of these, most of them from 350 to 450 revolutions per minute. The piston speed has to be as much as 1,000 feet a minute, as against 600 feet a minute in the mercantile type. Hence the time available for the dissipation of the heat by the jacket water is very small, the difficulty of cooling the piston effectively therefore being greater than in the ordinary type of motor. The result may be a crack, which is a serious

matter, since the fuel charge may enter the crank chamber and cause explosions. In this way accidents have happened on several occasions. The experience gained on merchant vessels propelled by oil has helped towards the solution of the naval problem, because even in their engines cracked cylinder covers occur. Poth in design and material, however, improvement is taking place as engineers adapt the oil motor to marine conditions. Curiously enough, accidents have been more frequent in French submarines than in those of any other country. But since the cast-steel piston has been replaced by one of cast iron the trouble has been largely overcome. Unlike other navies, too, the French navy has many submarines driven by steam. Apparently that government has declined not to place entire confidence in the Diesel motor.

Tender Sequoia, Reprints.

The following bids were received by the lighthouse inspector, 18th district, San Francisco, Cal., for making repairs to generator of tender Sequoia:

Marine Electric Co., San Francisco, Cal., \$92; accepted.

Crocker-Wheeler Co., San Francisco, Cal., \$190.

Alameda, Cal., Vault Shelving.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the U. S. post office at Alameda, Cal.:

The H. H. Shults Co., Gowanda, N. Y., \$137.

Crown Metal Construction Co., Jamestown, N. Y., \$153.45.

The Watson Mfg. Co., Jamestown, N. Y., \$155.

Art Metal Construction Co., Jamestown, N. Y., \$168.85.

The Berger Mfg. Co., Canton, Ohio, \$266.

The Van Dorn Iron Works, Cleveland, Ohio, \$380.

Reverse Gear Mechanism.

The following bids were received by the U. S. Reclamation Service at Los Angeles, Cal., for reverse-gear mechanism for gasoline engine, Salt River project, advertisement No. 263:

Fairbanks-Morse Co., Los Angeles, Cal., \$45 net; at Los Angeles; weight, 150 lbs.

Marine Engine Supply Co., Los Angeles, Cal., \$55; at Los Angeles; weight, 100 lbs.

Balanced Valves, Elephant Butte.

The Secretary of the Interior has authorized the Reclamation Service to execute contract with the Best Mfg. Co., of Pittsburgh, Pa., for furnishing balanced valves for service conduits of the Elephant Butte dam, Rio Grande irrigation project, New Mexico. The contract price is \$24,980.

Wiring, Fort Mason.

The contract for power wiring at the transport wharf, Fort Mason, Cal., has been awarded to Newberry-Bendheim Electric Co., of 214 Humboldt Bank Building, San Francisco, Cal., at \$1,095.

THE DALLES, ORE. — Garage, 1 story and base, reinforced concrete and brick, \$15,000. Architect, John V. Bennes, Chamber of Commerce Bldg.,

Portland. Owner, Max A. Vogt. The building has been designed for a commercial garage, and will cover a ground area of 100 by 180 feet. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. Besides the storage space the building will contain display rooms, office and a completely equipped machine shop. Exterior will be faced with cement plaster. Plans are complete and will probably be turned over to the owner, who will build by Day Labor and purchase all materials.

FORT ROSECRANS, CAL. — Oil pipe line and oil burners. Cost not stated. Engineer, Lieut. H. A. McCune, Fort Rosecrans. Owners, United States Government. Bids are now being called for furnishing and installing an oil pipe line and oil burners at Fort Rosecrans. Included in the work is a large central air supply tank for all burners. Plans and specifications can be secured from Lieut. H. A. McCune. An official proposal appears in another column of this issue. Bids will be opened on February 4th.

MARE ISLAND, NAPA CO., CAL. — Pumps and motors, \$14,600. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Bids will be opened on February 14th in Washington, D. C., for furnishing and installing on foundations now complete at the central power plants at Mare Island and Puget Sound two motor-driven fire pumps each of 1,000 gallons per minute capacity, and two steam turbine driven heating system pumps each of 1,000 gallons per minute capacity. Plans can be secured from the commandants of either navy yard. An official proposal appears in another column of this issue.

—HALLS & SOCIETY BLDGS.—

OAKLAND, CAL. — Lodge hall, 3 or 4 story and base, brick and steel, \$40,000. Architects, Cunningham & Pelotte, First National Bank Bldg., S. F. Owners, Sons of St. George. The building will be erected at the corner of 26th and San Pablo streets, and will cover a considerable ground area. There will be stores on the first floor and lodge rooms above. Interiors of the upper floors will be finished in hardwoods and pine. Maple floors will be used in the banquet hall and ball rooms. Plans provide for steam heat, a vacuum cleaning system and patent store fronts. Marble base in entrance vestibule will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN RAFAEL, MARIN CO., CAL. — Auditorium and bath house, 1 story, reinforced concrete, \$150,000. Architect, Thomas O'Connor, 104 D street, San Rafael. Owners, City of San Rafael. Only preliminary plans for this work have been prepared. The structure will cover an area of 100 by 194 feet, and will be practically fireproof throughout. There will be cement floors, steel roof trusses and metal window sash and frames. Considerable tile will be used. Special heating system will be installed. Exterior of the building will be faced with cement plaster. Working drawings are to be prepared.

FRESNO, FRESNO CO., CAL. — Lodge hall, 4 story and base. Class A construction, \$100,000. Architect, C. A.

Meusdorffer, Humboldt Bank Bldg., S. F. Owners, Eagles' Hall Association, Fresno. The building will be erected at the corner of M and Fresno streets, having a 125 foot frontage on one street and 75 feet frontage on the other. Several stores besides the main entrance will occupy the first floor. Upper floors will be arranged for the offices of the organization, social rooms, lodge halls, banquet rooms and ball rooms. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service and a vacuum cleaning system. Marble and tile will be used extensively. Patent store fronts, metal window sash and frames are also specified. Exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete.

HOSPITALS

SAN FRANCISCO — Hospital, 1 story and base, reinforced concrete, \$17,500. Architect, George Colmesnil, Lick Bldg., S. F. Owners, City and County of San Francisco. Plans have been prepared and received the approval of the Building Committee of the Board of Supervisors for an emergency hospital which is to be erected in the Potrero District. The building will contain a general office, operating room and two wards. Interior will be finished in pine and tile. There will be a central heating system. Operating room will be equipped in the most modern manner. Exterior of the building will be faced with cement plaster. Plans will be shortly out for figures.

MEDICAL LAKE, WASH. — Institutional buildings, 1 and 2 story, brick and concrete. Cost not stated. Architect, Julius Zittle, Jamieson Bldg., Spokane. Owners, State of Washington. This group will comprise the new Institution for the Feeble Minded, and will consist of the following buildings: Two cottages, each 2 story and base, 68x94 feet; a 2 story school house, 32x108; a 2 story, 60x108 foot store house and a main building, 2 stories high, an over all length of 266 feet, divided into two custodian wings, 114 feet long each. The wings will be 75 feet wide, the central portion will be 38 feet wide and 123 feet long. All buildings will be of concrete and brick construction, with hollow tile floors and partitions. Tile roofing is specified. Bids will be opened by the State Board of Control on January 31st.

LAKEVIEW, WASH. — Hospital, 2 story and base, hollow tile construction, \$30,000. Architects, Sundberg & Mahon, Tacoma. Owners, Pierce County. The building has been designed for a tuberculosis hospital, and will contain several wards and private rooms. Interior finish will be of pine throughout. There will be a central heating system, vacuum cleaning and modern operating equipment. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for by the Board of Supervisors within a few days.

Contracts Awarded.

LOS ANGELES, CAL. — Hospital, 5 story and base, reinforced concrete, \$99,000. Architects, Garrett & Purrell, Currier Bldg., L. A. Owners, Methodist Hospital Association. Contract

tors, Hudson-McCutcheon Construction Co., L. A., general construction, which includes all work except the elevator equipment. Contract price, \$93,000.

HOTELS.

CORCORAN, KINGS CO., CAL.—Hotel, 3 story and base, brick and steel, \$16,000. Architect, H. Y. Davis, Visalia. Owner, F. A. Cleveland. The building will be designed for a modern commercial hotel, and will contain stores, the main lobby and office and a public dining room on the first floor. Upper floors will be divided into about 60 guest rooms and a number of baths. Interior finish will be of pine and hardwood, with tile floor in the lobby. Plans provide for steam heat, a complete oil burning plant, passenger elevator and hot water supply. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance and lobby. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 2 story and base, brick and concrete, \$30,000. Architect, E. B. Rust, Title Insurance Bldg., L. A. Owner, Charles Nemethi. The building will be erected on West 11th street, covering an area of 50 by 138 feet. The first floor will contain two large stores besides the hotel entrance. Upper floor will be arranged for 52 guest rooms and 20 baths. There will be steam heat and a hot water supply. Interior finish will be of pine. Bath rooms will have composition floors and tile wainscot. Patent store fronts and plate glass windows are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared, and when complete the work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 3 story and base. Class C construction, \$90,000. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Walter H. Fisher. Contractor Alex Grant, 1201 West 37th street, L. A., general construction only. Note: This contract does not include excavating, foundation work, structural steel, fire escapes, plumbing, heating or automatic sprinklers.

LOS ANGELES, CAL.—Hotel, 3 story and base. Class C construction, \$15,750. Architect, J. B. Nicholson, Wright and Callender Bldg., L. A. Owners, R. J. Dunn and H. J. Coates. Contractor, A. E. Harshman, Black Bldg., L. A. Contract price, \$15,750.

PANAMA - PACIFIC EXPOSITION WORK.

Contracts Awarded.

SAN DIEGO, CAL.—Exposition buildings, frame and plaster construction, \$150,000. Architect, Frederick Heinlein, Lissner Bldg., L. A. Owners, Panama Oriental Co. Contractors, Foss Designing and Building Co., 100 East Colorado street, L. A. Contract price, \$150,000. These buildings will be known as the Oriental City.

POST OFFICES.

BERKELEY, ALAMEDA CO., CAL.—Post office, 2 story and base, brick, concrete and stone, \$150,000. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. The building will cover a ground area of approximately 11,890 square feet, and will be of fireproof construction. The main portion of the building will be two stories high while the rear will be but one story. Interior finish will be of pine and hardwood. There will be steam heat and a vacuum cleaning system. Marble and tile will be used in the corridors. Exterior of the building will be faced with pressed brick, stone and terra cotta. Plans are being figured and bids will be opened on February 18th.

DENVER, COLO.—Post office work, elevator equipment. Cost not stated. Architect, Supervising Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids are now being called for the installation of elevator equipment, including car, grilles and mechanical equipment for the post office building at Denver. Bids will be opened on February 16th. Plans and specifications can be secured from the Supervising Architect at Washington.

HILLO, HAWAII—Post office, 2 story and base, steel and stone. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids opened at Washington, D. C., on January 15th for the construction of this building show the Campbell Building Co., of Salt Lake, low men at \$196,922. Their figures for lava stone are specified, for granite and sandstone and for granite and limestone were all the same. No contract has been awarded. A complete list of all bids for this work will be found under the heading of San Francisco in this issue.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, E. W. Elliott, 1376 Waller street, S. F. The dwelling will be erected on the east side of 41st avenue north of Balboa, and has been designed to contain six rooms and bath. Interior will be finished in pine throughout. There will be some oak floors. Mantels will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and in the hands of the owner. Work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Johnson and Johnson, 55-A Devilsadero street, S. F. The house will be erected on the east side of 23rd street north of Irving, and will contain six rooms and bath. Interior finish will be of pine with some elm panels and oak floors. There will be a large open fire place in the living room with a brick mantel. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the

dwelling will be covered with cement plaster on metal lath and rustic. Plans are in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame \$3,500. Architect Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, H. E. Walsh. The dwelling will be erected on Shafter avenue near College, and has been designed to contain seven rooms and bath. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Frederick A. Allard. The dwelling will be erected in Crocker Highlands, and has been designed for an eight-room house with two baths and sleeping porch. Interior finish will be of pine, hardwood and white enamel. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile and will have composition floors. There will be an automatic water heater. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures will be called for within a few days.

SAN BRUNO, SAN MATEO CO., CAL.—Residence, 2 story and base, frame, \$8,000. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Father W. J. Cantwell. The dwelling will contain twelve rooms, three baths and a sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. A small hall is provided for in the basement. Exterior of the dwelling has been designed in the Mission style to harmonize with the church, and will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for about the first of February.

SAN FRANCISCO—Residence, 2 story and base, frame, \$7,800. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, John W. Proctor. The dwelling will be erected on the south side of Sea Cliff, west of 25th avenue, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine and hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heat, a hot water system and open fire places. Mantels will be of brick and tile. Bath rooms will have composition floors and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Michael Fauth, 29 Alma street, S. F. The dwelling has been de-

signed for a seven-room house with bath, and will be erected on 26th avenue south of Irving. Interior will be finished in pine and redwood with some hardwood veneer. Oak doors will be used in the living and dining rooms. There will be a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

PERKELEY, ALAMEDA CO., CAL.—Bungalows, 3, 1 story and base, frame, \$3,000 each. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley, Owners, Alameda Home Builders. These house will be erected in the central part of the city, and each has been designed to contain six rooms and bath. Interiors will be finished in pine, redwood and some hardwoods. Oak doors will be used in the living rooms, dining rooms and reception halls. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are being prepared and when complete will be turned over to the owners, who will do the work by Day Labor.

PALO ALTO, SANTA CLARA CO., CAL.—Residence, 2 story and base, frame, \$7,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Prof. Campbell and Prof. Allidie. The house will contain eight rooms, baths and sleeping porch. Interior finish will be of pine and hardwood. There will be furnace heat and open fire places. Mantels will be of brick. Oak floors are specified in several of the rooms. Bath rooms and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and figures are being taken.

SACRAMENTO, CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owner, E. A. Pierce, 3520 Park Avenue, Sacramento. The house will be erected on the Boxler Tract, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be largely of pine with hardwood veneer in the dining room. Oak doors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SCHOOLS.

SAN FRANCISCO—School, 2 story and base, brick and steel, \$115,000. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, City and County of San Francisco. This building, which is to be known as the Cooper School, will be erected at the corner of Jones

and Lombard streets. Plans show sixteen class rooms, and a large assembly hall. Construction will be practically fireproof. Interior finish will be of pine and hardwood with maple floors. There will be steam heat, vacuum cleaning system, program clocks and a modern system of ventilation. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and have been approved by the Board of Education. Bids will be called for by the Board of Public Works within a very short time.

CALIXICO, IMPERIAL CO., CAL.—School, 1 and 2 story, brick or reinforced concrete, \$50,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Calixico School District. These architects have just been commissioned to prepare plans for a new high school building which is to be erected in Calixico. Preliminary plans are to be prepared at once and will be submitted to the Board of Education for approval. No details of the work can be given at this time. Further mention will be made when working drawings have been completed.

GLENDORA, LOS ANGELES CO., CAL.—School, 1 story and base, brick. Cost not stated. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Glendora School District. This work was mentioned here before when plans were first started. The working drawings are now complete and figures will be opened on February 2nd. The building will contain a number of standard sized class rooms, principal's office, teachers' rooms and an assembly hall. Plans provide for a central heating system, modern electric work and plumbing. Exterior of the building will be faced with pressed brick. Interior will be finished in pine with some maple floors. Plans can be secured from the architects. Bids will be taken for the general construction, with alternates A, B, C, and D for the plumbing and sewer work with alternates A, B, and C, and for the heating and ventilating.

ARLINGTON, ORE.—School, 1 story and base, brick and concrete, \$15,000. Architect, Charles F. Burgegraf, Albany Owners, City of Arlington. The building will contain six class rooms, teachers' room and principal's office. Construction will be of brick and hollow cement blocks. Interior will be finished in pine. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are being prepared and will be ready for bids within a week or ten days.

INGLEWOOD, LOS ANGELES CO., CAL.—School group, 5, 1 and 2 story and base brick buildings, \$150,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Inglewood Union High School District. Bids will be advertised for as soon as the plans are approved by the county superintendent of schools, which will probably be this week. There will be five new buildings consisting of a science hall, two stories 110x73 feet; household economy building, three stories, 110x62 feet; manual arts building, part one and two stories, 18x294 feet; gymnasium, one story, 138x68 feet, with an outdoor swimming pool; and the central heating plant. The build-

ings will be of brick construction with pressed brick facing.

MESA, ARIZONA—School group, 3, 1 and 2 story buildings, brick or reinforced concrete, \$200,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Mesa School District. The School Board at Mesa has been authorized to call a special bond election to vote funds for the construction of three new buildings. Architect Marsh has been commissioned to prepare plans, and he is now at work on the preliminary sketches. Details of these buildings will be furnished as soon as working drawings are under way.

PORTLAND, ORE.—Convent, 3 story and base, concrete and hollow tile construction, \$20,000. Architect, Joseph Jacobberger, Board of Trade Bldg., Portland. Owners, Sisters of the Holy Child. The building will be erected on a corner lot, covering an area of 48 by 102 feet. Interior will be arranged for class rooms, chapel, work rooms and dormitories. Interior finish will be of pine. There will be steam heat and a hot water system. Exterior of the building will be faced with cement plaster. A general contract, including plumbing and heating, will be let. Plans are complete and cut for figures. Bids will be opened on February 1st.

CORVALLIS, ORE.—School, 2 story and base, brick or reinforced concrete, \$60,000. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, City of Corvallis. At a joint meeting of the Board of Education and a citizens' committee, the original idea of remodeling the present high school building was discarded, and the architects were instructed to prepare plans for a new building. No details of the structure can be given at this time. Bonds in the amount of \$75,000 will be voted, and all but \$10,000 will be spent in the construction of the building. Further mention will be made of the work.

Contracts Awarded.

FIXLEY, TULARE CO., CAL.—School, 1 story and base, concrete and brick, \$20,000. Architect, H. Y. Davis, Visalia Owners, Fixley School District. Contractors, George A. Noble & Sons, Visalia. Contract price, \$20,000.

SEWERS, STREET WORK AND WATER SYSTEMS.

FORT MASON, CAL.—Sewer system extensions. Cost not stated. Engineer, Constructing Quartermaster's Department, Fort Mason. Owners, United States Government. Plans are complete and figures are now being called for, extending the present sewer system at Fort Mason. Bids will be opened on January 27th. Plans can be secured from the Constructing Quartermaster's office at Fort Mason. An official proposal appears in another column of this issue.

FRESNO, FRESNO CO., CAL.—Storm water sewer system, \$150,000 to \$160,000. Engineer, City Engineer B. E. Cronkite, Fresno. Owners, City of Fresno. The City Engineer is now preparing plans and specifications for an entire new storm water sewer system. It is planned to embrace the entire city. Further mention will be made of the work.

AMITY, ORE.—Water system, \$20,000. Engineer, Louis C. Kelsey, Selling Bldg., Portland, Owners, City of Amity. Only preliminary plans have been prepared, but these show a system embracing the entire town. A concrete power house will be included. Pumping equipment is not included in the estimate of \$20,000. Bonds will be voted on February 2nd, and if they carry work will be started at once.

Contracts Awarded.
BERKELEY, ALAMEDA CO., CAL.—Sewer pipe, reinforced concrete. Cost not stated. Engineer, City Engineer Jessup, Berkeley. Owners, City of Berkeley. Contractor, T. J. Shea. Contract price, \$52,505.40.

LOS ANGELES, CAL.—Tunnel work, \$184,800. Engineer, City Engineering Department, L. A. Owners, City of Los Angeles. Contractor, Lynn S. Atkinson, Central Bldg., L. A. Contract price, \$184,800.

CHEHALIS, WASH.—Municipal Water system, \$161,750. Engineer's name not given. Owners, City of Chehalis. Contractor, W. H. Mitchell, Holland Hotel, Seattle. This contract was originally signed two years ago, but a court decision has only recently been secured in which the right of the City of Chehalis to issue bonds to a contractor in payment of construction was sustained. Mr. Mitchell will start the work at once. He may be addressed at either the hotel named above or in care of the City Clerk at Chehalis.

STORES.

SAN FRANCISCO.—Stores, 1 story and base, reinforced concrete, \$5,000. Architect, A. W. Pattiani, Merchants' Exchange Bldg., S. F. Owner, A. S. McDonald. The building will be erected on Third street, south of Harrison, and will have a frontage of 25 feet and a depth of 77½ feet. Foundations and walls have been designed heavy enough to carry three additional stories. At present there will be one store finished in pine and with a cement floor. Plans show patent store fronts and plate glass windows. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

OAKLAND, CAL.—Stores and offices, 2 story and base, steel and brick. Cost not stated. Architect, William Wilde, Altany Bldg., Oakland. Owner, B. M. Cancianulo. The building will be erected on the west line of Broadway, north of 17th street, and will have a frontage of 25 feet by a depth of 125 feet. There will be two stores on the first floor and a number of modern offices on the upper floor. Interior finish will be of pine and redwood. Metal window sash and frames and patent store fronts are specified. The present plans have been designed with a view to adding five additional stories in the near future. The building will be equipped with steam heat. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Store and theatre, 1 story and base, brick, \$16,500. Architect, A. Lawrence Valk, Stimson Bldg., L. A. Owner, B. Lustig. The building will be erected on Main street, covering an area of 60 by 140 feet, and will contain two stores be-

sides a moving picture theatre. The theatre will have a seating capacity of 800 people. Interior of the building will be finished in pine. There will be a modern system of ventilation in the theatre. Marble base and patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.
STOCKTON, SAN JOAQUIN CO., CAL.—Bank and offices, 10 story and base. Class A construction, \$250,000. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, Commercial and Savings Bank. Contractors, P. J. Walker Co., Monadnock Bldg., S. F., general construction. Contract price, \$250,000.

THEATRES.

TACOMA, WASH.—Theatre, 4 story and base, steel and reinforced concrete, \$100,000. Architect, Max Umbrecht, Seattle. Owner, Eugene Levy, Grand Theatre, Seattle. Mr. Levy has leased the site on the west side of C street, between the Tacoma Theatre and the Pythian Theatre, and will shortly start construction on a fireproof playhouse. No details of the work have yet been announced. Construction will be of reinforced concrete and steel, and it is stated that the house will have a seating capacity of 1200 people. Several stores will occupy the street front. Further mention will be made of the work.

SEALED PROPOSALS.

PROPOSAL FOR NEW JERSEY BUILDING.

SEALED PROPOSALS for the construction of the New Jersey State Building to be erected on the site selected on the grounds of the Panama-Pacific International Exposition at San Francisco, California, from the plans and specifications prepared by the Department of Charities and Corrections, Mr. Hugh Roberts, Consulting Architect, will be received at the office of the State Treasurer, in the State House, at Trenton, New Jersey, at 2 o'clock on the afternoon of **Monday of January, 1914**, when they will be publicly opened and read. Proposals must be submitted sealed in opaque envelopes, addressed to the New Jersey Commission for the Panama-Pacific International Exposition, care of the State Treasurer, and marked "Proposals for the New Jersey Building." Each proposal must be accompanied by cash or a certified check, drawn to the order of the State Treasurer, for 10 per cent of the amount thereof as a guarantee that the bidder will enter into a contract for the performance of the work, should his proposal be accepted, within a reasonable time thereafter. Each bidder must be prepared to furnish an acceptable Surety Bond for one-half the amount of the contract. The right to reject any or all bids is reserved. Plans and specifications may be obtained by application to the Commissioner of Charities and Corrections, State House, Trenton, New Jersey; or to Captain Asher Carter Baker, Exposition Building, San Francisco, Cal. (Signed) C. A. PANCOAST, Secretary.

PROPOSALS FOR CANAL SUPPLIES.
CANAL CIRCULAR X19—Proposals for Four Steel Tugboats for Handling and Docking of Vessels at the Entrances of the Panama Canal.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until **10:30 a. m., March 23, 1914**, at which time they will be opened in public for furnishing the above mentioned tugboats. Blanks and gen-

eral information relating to this circular (No. 819) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR CANAL SUPPLIES.
CANAL CIRCULAR X19—Proposals for Forms for Steel Cylinders, Rivets, Bolts, Planished Iron, Bronze Bars, Nails, Shovels, Tool Waste, Manila Rope, Oakum, Unslacked Lime, Lime, Chipped Soap, Putty, Pitch, White Zinc, Turpentine, Japan Drier, Lard Oil, Linsed Oil, Cressote Oil, Paints, Shellac, Varnish, Lambblack, Paper, Cardboard, Untreated Piles, and Cressoted Switch Ties.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until **10:30 a. m., January 27, 1914**, at which time they will be opened in public for purchase of the above mentioned articles. Blanks and general information relating to this circular (No. 820) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR HARBOR WORK.
OFFICE OF THE STATE HARBOR COMMISSIONERS. Union Depot and Ferry House, San Francisco.

Sealed proposals or bids will be received at this office at or prior to **11 o'clock a. m., on Thursday, January 22, 1914**, for furnishing materials and constructing Pier No. 46 on the waterfront of the City and County of San Francisco in accordance with the plans and specifications prepared therefor by the Assistant State Engineer and adopted by the Board March 6, 1913, and on file in this office to which special reference is hereby made.

The materials to be used in this work shall consist of the requisite quantities of cressoted piles and green piles (which will be furnished the contractor by the Board), Douglas yellow fir lumber, redwood lumber, cedar lumber, structural steel, castings, rods, bolts, washers, cotter pins, rails and fastenings, roofing and painters' materials, glass, window frames, etc. All materials used must be of the best of their kind and kind as especially specified herein. All materials used in the structure will be subjected to a rigid examination and test, and if defective, undersize, unsuitable or not as specified, will be condemned and must be immediately removed from the work by the contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office. Each bid shall be accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the order of the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six days after the award is made, in that case said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect and shall be paid into the San Francisco Harbor Improvement Fund.

The bond required to be not less than one-half of the amount of the bid, with two or more sureties to be approved by the Board of State Harbor Commissioners, and the conditions for the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning thereof, to the satisfaction of said Board; and said bond shall also be effective as provided in an act approved March 1911, for the protection of material men, mechanics and laborers.

Bids will not be considered by this Board unless the bidder has the Secretary or to the Assistant Secretary at

the office of the Secretary, at or prior to 11 o'clock, on Thursday, January 22, 1914, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids.

Plans and specifications of this work to be had at room No. 18, Union Depot and Ferry House, upon depositing \$20.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid "Bid for Pier 16."

J. J. DWYER,

THOMAS S. WILLIAMS,

Board of State Harbor Commissioners.

JEROME NEWMAN,

Asst. State Engineer.

LEO V. MERLE, JR.,

Secretary.

PROPOSALS FOR HEATING AND VENTILATING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 4th day of February, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The installation of a heating and ventilating system in the City Hall.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works and completed within the time limits as set forth in the specifications.

The amount of bond for faithful performance of contract has been fixed at \$20,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms. The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR FILE CASE.

STEEL FILE CASE—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until 2 p. m. on Thursday, January 22, 1914, and then opened for supplying a steel file case for the U. S. post office at Reno, Nev. in accordance with office drawing and specifications. The department reserves the right to reject any or all bids or to waive defects. Telegraphic bids or communications of any kind will not be considered. WETMORE, acting supervising architect.

PROPOSALS FOR PIPE LINE AND OIL BURNERS.

PIPE LINE AND OIL BURNERS—Office Quartermaster, Fort Rosecrans, Cal.—Sealed proposals, in triplicate, will be received at this office until 4 p. m., February 4, 1914, and then opened for extension of oil pipe line and installation of oil burners in officers' quarters; also, all plant to all oil burners. Further information may be obtained by applying at this office. H. A. McCUNE, 1st Lieut., C. A. C. Q. M.

PROPOSALS FOR ELEVATOR.

ELEVATOR—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until 4 p. m., February 16, 1914, and then opened for an elevator plant in the United States post office at Denver, Colo., in accordance with the drawings and specifications, copies of which may be

had at this office or at the office of the architect, Tracy, Swartwout & Litchfield, 244 Fifth Avenue, New York, N. Y., in the discretion of the supervising architect, OSCAR WENDEROTH, Washington, D. C.

PROPOSALS FOR MILE ROCK TUNNEL.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 28th day of January, 1914, for doing the following work to wit:

The construction of the Mile Rock Tunnel.

Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within three hundred and sixty-five (365) calendar days from the date of the contract to be made and entered into by the City and County.

The amount of the bond for faithful performance has been fixed at \$50,000.00.

All proposals offered shall be accompanied by a check, certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR STEEL.

STRUCTURAL STEEL—Sealed proposals are invited for Structural Steel for Five Buildings which will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., February 7, 1914, and then and there publicly opened, for about 1,100 tons of fabricated structural steel, including castings and pipe rods for stairways for five buildings and about 100 tons of steel reinforcing rods. Erection is not included. Plans and specifications are provided by the department, at the bureau. H. R. STANFORD, chief of bureau.

PROPOSALS FOR PUMPS.

PUMPS—Sealed and indorsed "Proposals for Heating System, Fire and Flushing Pumps" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., February 14, 1914, and then and there publicly opened, for furnishing and installing on foundation, provided by the department, in the central power plants, United States navy yards, Mare Island, Cal., and Fugate Island, Wash., two motor-driven fire pumps of 1,000 gallon minute capacity, 400 feet head, and two steam turbine-driven heating system pumps of 100 gallons per minute capacity, 150 pounds per square inch gauge head. Estimated cost, \$14,000. Plans and specifications can be obtained on application to the bureau or to the commandants of the navy yards named, H. R. STANFORD, chief of bureau.

PROPOSALS FOR OIL PIPE LINE.

OIL PIPE LINE AND BURNERS—Office Quartermaster, Fort Rosecrans, Cal.—Sealed proposals, in triplicate, will be received at this office until 4 p. m., February 2, 1914, and then opened for extension of oil pipe line, installation of oil burners, and central oil plant, at this post. Further information obtained by applying this office. H. A. McCUNE, 1st Lieut., C. A. C.

PROPOSALS FOR JAIL EQUIPMENT.

PERSHANT to Institution No. 127 N. S., the Council of the City of Oakland will receive on Thursday, January 22, 1914, proposals or bids, and alternate bids or proposals, for materials, labor and workmanship required for the Plumbing for the Jail in

the City Hall Building in the City of Oakland, California.

All proposals to be made upon and conform to the requirements of the forms of proposals prepared and furnished by the City, through the Architect, and shall be enclosed in sealed envelopes, endorsed "Bid for furnishing all materials, labor and workmanship, with all necessary connection with the Plumbing for the Jail in the City Hall Building," addressed to the Council and deposited by the bidder, or his agent, with said Council, while in session between eleven o'clock a. m. and twelve o'clock noon, Pacific Time, on the 20th day of January, 1914, in the room of the Council in the City Hall, Fourteenth and Washington Streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by and be in accordance with the plans, drawings and specifications prepared therefor and on file in the office of Palmer, Hornbostle & Jones, Architects, at 1111 Broadway, New York, which said plans and specifications reference is hereby made.

The contract for the furnishing of all the labor and material entering into the construction and completion of the said work indicated on the drawings and called for in the specifications, is to be let or awarded as a whole or general contract.

No bid will be received or considered unless it is not accompanied by a check, certified by a responsible bank, payable to the order of Frank M. Smith, City Clerk, in an amount not less than ten per cent (10%) of the aggregate amount of the proposal submitted by the bidder.

All information relative to the requirements of the bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Architect upon application at their office at the City of Oakland. The right is reserved to the Council in accordance with the provisions of the specifications of the City of Oakland, to reject any or all bids submitted.

Each bid shall bear the affidavit of a bidder as required by Section 126 of the Civil Code.

FRANK M. SMITH City Clerk.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received by the City of Kingsburg, Fresno County, California, until 11 o'clock P. M., January 20th, 1914, for furnishing the material and labor to construct a SANITARY SEWER SYSTEM in and for said City of Kingsburg.

Proposals must be submitted on special Bidding Schedules and be enclosed in special Bidding Envelopes obtained from the City Clerk.

Each proposal must be accompanied by the Architect's bond, or by a Bidder's Bond, with satisfactory surety, for a sum equal to ten (10) per cent of the total amount of the bid.

Bids will be received on three different schedules, to wit:

Schedule "A": The work as a whole.

Schedule "B": Any or all of the requirements of the Sewer Subdividing.

Schedule "C": Any or all of the constructing work.

NOTE.—EACH SCHEDULE REPRESENTS AN INDIVIDUAL BID. ANY MUST BE SUBMITTED IN ITS RESPECTIVE ENVELOPE.

The Plans, Specifications and other documents relating to the work may be seen at the examination of the plans at the office of the City Clerk in Kingsburg, or copies of same may be obtained by prospective bidder, for personal use, upon the payment of Six Dollars and Eighty Cents, (\$6.80).

Bidding Schedules and envelopes will be furnished free of cost to all prospective bidders upon request, provided that the request is accompanied by a statement that the Plans and Specifications, and all documents attached thereto, have been read and explained and fully understood by the prospective bidder. The Board of Trustees of the City of Kingsburg reserves the right to reject any or all bids, or to waive any informality in any or all bids.

THE WORK WILL CONSIST OF

**FURNISHING AND PLACING AP-
PROXIMATELY:**

830 ft. of 12 inch Pipe.
14-2 inch by 6 inch Wye Branches.
4800 ft. of 10 inch Pipe.
98-10 inch by 6 inch Wye Branches.
14-2 inch by 8 inch Pipe.
247-8 inch by 6 inch Wye Branches.
14270 ft. of 6 inch Pipe.
405-6 inch by 6 inch Wye Branches.
20 Automatic Flush Tanks.
35 Manholes.
14 Lampholes.
1 Septic Tank.
10 ft. of 6 inch Fall Pressure Pipe.
Dated at Kingsburg, Cal., Jan. 12, 1914.
H. E. VERBLE,
City Clerk. (*)

NOTICE TO CONTRACTORS.

**OFFICE CONSTRUCTING QUARTER-
MASTER, Fort Mason, Cal., January 12, 1914—SEALED PROPOSALS** in triplicate, for extensions of sewer system at Fort Mason, Cal., will be received here until **11 A. M., January 27, 1914**, and then opened. Plans, specifications, and bank necessary information can be obtained here. Deposit of \$10.00 required to insure return of plans, etc. Envelope containing proposals to be sealed, and marked "sewer system, Fort Mason, Cal.", and addressed to **LIEUT. COL. GEO. McK WILLIAMSON, Q. M. C.** (*)

NOTICE TO CONTRACTORS.

POSALS on February 16, 1914, for the construction (including mechanical equipment and approaches) of a two-story and basement (with a 1-story extension) stone, cream-colored terra cotta and stucco faced building of 11,800 square feet ground area; nonfireproof construction (except first floor); containing and to roof; for the United States post office at Berkeley, Cal. Drawings and specifications may be obtained from the custodian at Berkeley, Cal., or at this office, in the discretion of the Supervising Architect, O. WENDEROOTH, Supervising Architect. (*)**

**PROPOSALS FOR MECHANICAL
EQUIPMENT.**

MECHANICAL EQUIPMENT—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. February 16, 1914, for the mechanical equipment (except piping and electrical) for the United States post office at Denver, Colo. Drawings and specifications may be obtained on or after January 5, 1914, at this office or at the office of the architects, Tracy, Swartwout & Litchfield, 244 Fifth Avenue, New York, N. Y., in the discretion of the supervising architect, O. WENDEROOTH, supervising architect. (*)

**PROPOSALS FOR STATE HIGHWAY
WORK.**

SEALED proposals will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until 2 o'clock P. M., on February 2nd, 1914, at which time they will be publicly opened and read, for the construction of the following special reference is made, portions of State highway as follows:
El Dorado County from El Dorado to Placerville (III-E-D-II-C), about 6 1/2 miles in length, to be built of water-bound macadam.
Tulare County from Traver to the Northernly Boundary (VI-Tul-4-E), about 5 1/2 miles in length, to be built of Portland cement concrete.
Kern County from Lerdo to Famosa (VI-Ker-E), about 8 1/2 miles in length, to be built of Portland cement concrete.
Kern County from Bakersfield to Lerdo (VI-Ker-4-D), about 10 1/2 miles in length, to be built of Portland cement concrete.
San Bernardino County from the Westernly Boundary to Upland (VII-S-BD-9-D), about 1 1/2 miles in length, to be built of Portland cement concrete.

Ventura County from Ventura to Sea Cliff (VII-Ven-2-D & E), about 7 1/2 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Santa Margarita to Atascadero Creek (V-S-BD-2-C), about 3 1/2 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Paso Robles to the Northernly Boundary (V-S-BD-2-A), about 10 1/2 miles in length, to be built of Portland cement concrete.

Santa Cruz County from the Easternly Boundary to Glenwood (IV-S-Cr-5-A), about 5 1/2 miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the envelope of proposals, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

**STATE OF CALIFORNIA
DEPARTMENT OF ENGINEERING
CALIFORNIA HIGHWAY COMMISSION**

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until 2 o'clock P. M., on February 2nd, 1914, at which time they will be publicly opened and read, for the construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

El Dorado County from El Dorado to Placerville (III-E-D-II-C), about 6 1/2 miles in length, to be built of water-bound macadam.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—4 story and base, Class C construction. Cost not stated. San Francisco, Architect. Herman Barth, 12 Geary street, S. F. Owner's name withheld. The building will be erected on California street near Hyde, and will cover a large ground area. Plans show a total of some forty suites arranged in two and three room apartments. Interior will be finished in pine with elm panels and oak floors. There will be steam heat, a hot water system and vacuum cleaning. All suites will have wall beds and private bath rooms. Baths will be finished in tile and will have composition floors. Entrance and vestibule will be finished in marble and tile. Exterior of the house will be faced with pressed brick and terra cotta. Preliminary plans are now being prepared. Further mention will be made of this work.

**APARTMENT HOUSE ALTERA-
TIONS—3 story, frame, \$6,000. San**

Tuolumne County from the Westernly Boundary of Keystone (II-Tuo-13-A), about 10 1/2 miles in length, to be graded.

Tulare County from Traver to the Northernly Boundary (VI-Tul-4-E), about 5 1/2 miles in length, to be built of Portland cement concrete.

Kern County from Lerdo to Famosa (VI-Ker-4-E), about 8 1/2 miles in length, to be built of Portland cement concrete.

Kern County from Bakersfield to Lerdo (VI-Ker-4-D), about 10 1/2 miles in length, to be built of Portland cement concrete.

San Bernardino County from the Westernly Boundary to Upland (VII-S-BD-9-D), about 1 1/2 miles in length, to be built of Portland cement concrete.

Ventura County from Ventura to Sea Cliff (VII-Ven-2-D & E), about 7 1/2 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Santa Margarita to Atascadero Creek (V-S-BD-2-C), about 3 1/2 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Paso Robles to the Northernly Boundary (V-S-BD-2-A), about 10 1/2 miles in length, to be built of Portland cement concrete.

Santa Cruz County from the Easternly Boundary to Glenwood (IV-S-Cr-5-A), about 5 1/2 miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

Dated, December 31, 1913. (*)**

Francisco. Architect. N. W. Sexton, Chronicle Bldg., S. F. Owner, Mrs. C. De Forest. The building on Clayton street north of Haight, now occupied by several flats, will be altered into a modern apartment house structure containing three and five room suites. There will be new interior finish, partitions, plumbing, electric work and heating. All apartments will be equipped with wall beds and will have private bath rooms. Interior finish will be of pine and redwood. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

FIRE HOUSE—2 story and base, brick and concrete, \$60,000. San Francisco. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, City and County of San Francisco. Working drawings for English House No. 12 which is to be erected at the corner of Drumm and Commercial streets, have been completed and have received the approval of the Supervisors.

Figures will be called for at once. The building will contain the apparatus room and stable on the first floor and quarters for the men on the second floor. Interior finish will be of pine and hardwood. There will be cement and tile floors. Plans provide for steam heat, a hot water system and vacuum cleaning. Baths will be equipped with showers. Special plumbing and electric work are called for in the specifications. Exterior of the building will be faced with brick and stone.

COLD STORAGE PLANT—5 story and base. Class B construction, \$60,000. San Francisco. Architect, Edmund Kollofrath, 560 Belvedere street, S. F. Owners, Merchants Ice and Cold Storage Co. The building will be erected at the southeast corner of Montgomery and Lombard streets, covering an area of 98 feet 2 inches by 89 feet. Construction will be of brick and steel with hollow tile partitions and cement floors. There will be elevator service, metal window sash and frames and fireproof doors. A large amount of special machinery will be installed. Exterior of the building will be faced with stock brick. Plans have been completed and received the approval of the owners. Construction will be started as soon as contracts can be let.

FLATS—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owner, John J. Blinet, 68 Ramona avenue, S. F. The building will be erected on the east side of Guerrero street south of 19th, and has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine with some elm panels and oak floors. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Tile wainscot will also be used in the kitchens. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. Materials are now being purchased.

SEWER SYSTEM EXTENSIONS—Cost not stated. Fort Mason, Cal. Engineer, Constructing Quartermaster's Department, Fort Mason, Owners, United States Government. Plans are complete and figures are now being called for extending the present sewer system at Fort Mason. Bids will be opened on January 27th. Plans can be secured from the Constructing Quartermaster's office at Fort Mason. An official proposal appears in another column of this issue.

OIL PIPE LINE AND OIL BURNERS—Cost not stated. Fort Rosecrans, Cal. Engineer, Lieut. H. A. McCune, Fort Rosecrans. Owners, United States Government. Bids are now being called for furnishing and installing an oil pipe line and oil burners at Fort Rosecrans. Included in the work is a large central air supply tank for all burners. Plans and specifications can be secured from Lieut. H. A. McCune. An official proposal appears in another column of this issue. Bids will be opened on February 4th.

PUMPS AND MOTORS—\$14,000. Mare Island, Napa Co., Cal. Engineer, Bureau of Yards and Docks, Washington D. C. Owners, United States Govern-

ment. Bids will be opened on February 14th in Washington, D. C., for furnishing and installing on foundations now complete at the central power plant at Mare Island and Puget Sound two motor-driven fire pumps, each of 1,000 gallons per minute capacity, and two steam turbine driven heating system pumps each of 1,000 gallons per minute capacity. Plans can be secured from the commandants of either navy yard. An official proposal appears in another column of this issue.

HOSPITAL—1 story and base, reinforced concrete, \$17,500. San Francisco. Architect, George Colmesnil, Lick Bldg., S. F. Owners, City and County of San Francisco. Plans have been prepared and have received the approval of the Building Committee of the Board of Supervisors for an emergency hospital, which is to be erected in the Potrero District. The building will contain a general office, operating room and two wards. Interior will be finished in pine and tile. There will be a central heating system. Operating room will be equipped in the most modern manner. Exterior of the building will be faced with cement plaster. Plans will shortly be out for figures.

FIRE ALARM STATION—1 and 2 story, concrete and brick, \$40,000. San Francisco. Architect, City Architectural Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. A new building will be erected in Jefferson Square, probably on the site of the old Central Emergency Hospital, which will house the fire alarm equipment and repair department of the city fire department. There will be a general office, several repair shops and storage space. Interior will be finished in pine. There will be steam heat and special wiring. Exterior of the building will be faced with pressed brick. Plans are to be completed at once and figures will be taken by the Board of Public Works.

POST OFFICE WORK—Elevator equipment. Cost not stated. Denver, Colo. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids are now being called for the installation of elevator equipment, including car, grilles and mechanical equipment for the post office building at Denver. Bids will be opened on February 16th. Plans and specifications can be secured from the Supervising Architect at Washington.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, E. W. Elliott, 1376 Waller street, S. F. The dwelling will be erected on the east side of 41st avenue north of Balboa, and has been designed to contain six rooms and bath. Interior will be finished in pine throughout. There will be some oak floors. Mantels will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and in the hands of the owner. Work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Johnson and Johnson, 55-A Devisadero street, S. F. The house will be erected on the east side

of 23rd Ave. north of Irving, and will contain six rooms and bath. Interior finish will be of pine with some elm panels and oak floors. There will be a large open fire place in the living room with a brick mantel. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath and rustic. Plans are in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$7,800. San Francisco. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, John W. Proctor. The dwelling will be erected on the south side of Sea Cliff, west of 25th avenue, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine and hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heat, a hot water system and open fire places. Mantels will be of brick and tile. Bath rooms will have composition floors and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Michael E. Fauth, 29 Alma street, S. F. The dwelling has been designed for a seven room house with bath, and will be erected on 26th avenue south of Irving. Interior will be finished in pine and redwood with some hardwood veneer. Oak floors will be used in the living and dining rooms. There will be a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. Materials are now being purchased.

POST OFFICE—2 story and base, steel and stone. Cost not stated. Hilo, Hawaii. Architect, Supervising Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids opened at Washington, D. C., on January 15th for the construction of this building, show the Campbell Building Co. of Salt Lake low men at \$156,922. Their figures for lava stone, as specified, for granite and sandstone and for granite and limestone were all the same. No contract has been awarded. A complete list of all bids for this work will be found under the heading of San Francisco in this issue.

SCHOOL—2 story and base, brick and steel, \$115,000. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, City and County of San Francisco. This building, which is to be known as the Cooper School, will be erected at the corner of Jones and Lombard streets. Plans show sixteen class rooms, and a large assembly hall. Construction will be practically fireproof. Interior finish will be of pine and hardwood with maple floors. There will be steam heat, vacuum cleaning system, program clocks and a modern system of ventilation. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and have been ap-

proved by the Board of Education. Bids will be called for by the Board of Public Works within a very short time.

STORES—I story and base, reinforced concrete, \$5,000. San Francisco. Architect, A. W. Pattiani, Merchants' Exchange Bldg., S. F. Owner, A. S. Macdonald. The building will be erected on Third street, south of Harrison, and will have a frontage of 25 feet and a depth of 77½ feet. Foundations and walls have been designed heavy enough to carry three additional stories. At present there will be one store finished in pine and with a cement floor. Plans show patent store fronts and plate glass windows. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

BASE BALL PARK—Concrete and frame. Cost not stated. San Francisco. Architect, Walter A. Mathews, Oakland. Owners, Recreation Park Association. Contractors, Ward & Goodwin, 981 Guerrero street, S. F., carpentry work only. Contract price not stated.

PIER ADDITION—Timber construction, \$12,766. San Francisco. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, San Francisco Bridge Co., S. F. Contract price, \$12,766. This work is to be done at Pier No. 25.

City Bids Opened.

Board of Public Works Opens Bids For Plumbing to New City Hall, Lowest Bid From Alex. Coleman.

Bids opened by the San Francisco Board of Public Works at their Wednesday afternoon meeting for furnishing and installing plumbing in the new City Hall show Alex. Coleman low at \$56,553 on proposition A. Two propositions were asked for. Mr. Coleman did not bid on the second. Following is a complete list of the bidders:

Figures For Hilo Post Office Opened.

Campbell Building Co. of Salt Lake City Low Men. Several Local Contractors Figure Work.

(By Special Wire)

WASHINGTON, D. C., Jan. 16th—Campbell Building Co. of Salt Lake City, submitted the lowest figure for the construction of the Hilo Federal Building at Hilo, Hawaii. Their figures for lava stone, as specified, and for granite and limestone and granite and sandstone were the same.

Bids were submitted as follows: First, for lava stone; second, for granite and limestone and third, for granite and sandstone. A complete list of the figures follows:

Wire trouble throughout the East has badly interfered with the telegraphic service and delayed the message. In the case of the bid of the Sound Construction & Engineering Co. figures have been transposed and while their bid is not within reach of the low man, may be incorrect as it appears below.

General Construction, Hilo Post Office.

Campbell Building Co., Salt Lake (a) \$156,922; (b) same; (c) same.

Sound Constr. & Engineering Co., Seattle (a) \$279,032; (b) \$251,052; (c) \$241,052.

Lord, Young Engineering Co., Honolulu (a) \$237,500; (b) \$228,470; (c) \$223,700.

Spaulding Constr. Co., S. F. (a) \$237,339; (b) \$241,939; (c) —

Frank Gallagher, S. F. (a) \$239,950; (b) \$247,190; (c) \$242,976.

W. N. Concannon, S. F. (a) \$275,000; (b) \$267,700; (c) —

General Constr. Co., Milwaukee, Wis. (a) \$281,090; (b) \$263,253; (c) \$260,730

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—5 story and base. Class C construction, \$50,000. Berkeley, Alameda Co., Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Cohn Bros. The building will be erected on a large corner lot in Berkeley, and has been designed for suites of two and three rooms. Interior will be finished in pine and elm panels with some hardwood floors. There will be steam heat, elevator service and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. All suites will be equipped with wall beds and private bath rooms. Exterior of the building will be faced with pressed brick. Preliminary plans have been approved and the architect is now engaged on the working drawings.

FACTORY—1 story, reinforced concrete, \$15,000. Emeryville, Alameda Co., Cal. Architect, none. Owners, California Pickle and Sauce Co., 133 Myrtle street, Oakland. The building will cover a ground area of 125 by 140 feet and will be practically fireproof throughout. Interior will be finished in pine with cement floor. Some tile wainscot will be used. There will be a steam plant and special machinery. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

LODGE HALL—3 or 4 story and base, brick and steel, \$40,000. Oakland, Cal. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Sons of St. George. The building will be erected at the corner of 26th and San Pablo streets and will cover a considerable ground area. There will be stores on the first floor and lodge rooms above. Interior of the upper floors will be finished in hardwoods and pine. Maple floors will be used in the banquet hall and ball rooms. Plans provide for steam heat, a vacuum cleaning system and patent store fronts. Marble base and en-

trance vestibule will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

POST OFFICE—2 story and base, brick, concrete and stone, \$150,000. Berkeley, Alameda Co., Cal. Architect Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. The building will cover a ground area of approximately 11,800 square feet, and will be of fireproof construction. The main portion of the building will be two stories high, while the rear will be but one story. Interior finish will be of pine and hardwood. There will be steam heat and a vacuum cleaning system. Marble and tile will be used in the corridors. Exterior of the building will be faced with pressed brick, stone and terra cotta. Plans are being figured and bids will be opened on February 18.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, H. E. Walsh. The dwelling will be erected on Shafter avenue near College, and has been designed to contain seven rooms and bath. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Frederick A. Allardt. The dwelling will be erected in Crocker Highlands, and has been designed for an eight-room house with two baths and sleeping porch. Interior finish will be of pine, hardwood and white enamel. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile and will have composition floors. There will be an automatic water heater. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures will be called for within a few days.

BUNGALOWS—3, 1 story and base, frame, \$3,000 each. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Alameda Home Builders. These houses will be erected in the central part of the city and each has been designed to contain six rooms and bath. Interiors will be finished in pine, redwood and some hardwoods. Oak floors will be used in the living rooms, dining rooms and reception halls. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are being prepared and when complete will be turned over to the owners, who will do the work by Day Labor.

CHURCH—1 story, frame, \$10,000. Berkeley, Alameda Co., Cal. Architect,

W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, St. Peters Parish. The building will be erected on Rock Ridge Road, and has been designed in the Mission style. Interior will be arranged for a main auditorium, seating 250 people, and Sunday school rooms. Pine and redwood will be used in the finish. Plans provide for a hot air system of heating. Art glass will also be used. Exterior of the building will be covered with cement plaster. Plans are complete and figures are now being taken.

STORES AND OFFICES—2 story and base, steel and brick. Cost not stated. Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owner, B. M. Cianciarulo. The building will be erected on the west line of Broadway, north of 17th street, and will have a frontage of 25 feet by a depth of 125 feet. There will be two stores on the first floor and a number of modern offices on the upper floor. Interior finish will be of pine and reowood. Metal window sash and frames and patent store fronts are specified. The present plans have been designed with a view to adding five additional stories in the near future. The building will be equipped with steam heat. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

SEWER PIPE—Reinforced concrete. Cost not stated. Berkeley, Alameda Co., Cal. Engineer, City Engineer Jessup. Berkeley. Owners, City of Berkeley. Contractor, T. J. Shea. Contract price, \$52,595.40.

Annual Meeting Of Oakland Exchange.

This Year's Social Event Following Election of Officers Proves a Big Success, Enjoyed by all.

Saturday night the Oakland Builders' Exchange held their annual meeting, followed by a very enjoyable evening of music and speeches. At the meeting the following men were elected to serve as Directors for the coming year: J. F. Dingwell, Wm. Makin, T. D. Sexton, John Howard Jr., C. G. Chipchase, Robert Swan, Ed. Hunt, O. A. Edwall, Geo. Lelter, M. E. Whitmore and J. B. Cruz.

The committee in charge of the evening's festivities were, O. A. Edwall, T. D. Sexton and Wm. Makin and they were the recipients of many congratulations for the program they provided.

The secretary, P. F. Bradhoff, acted as toastmaster and gave a short talk on working together for the continued upbuilding of the Exchange, and showed how the members would be benefited if they would remember that there is always two sides to any question.

The members were then favored with vocal selections by Frank Oates, Wm. Makin, Mr. Young, James Pedgrift, Tony Galardin and "Nigger" Wilson, whose dialect songs were a great hit. Speeches were made by Robert Knox, Honorary Member; James Pedgrift, Past President of the Exchange, and

Charles Downey. After a recess, during which the members partook of refreshments, a troupe from the Gaiety Theatre sang, danced and gave monologues.

Altogether it was a huge success and the affair will long linger in the minds of the members as one of the most enjoyable evenings they ever spent.

SAN JOSE AND THE SANTA CLARA VALLEY.

WHARF—Timber and crossotied
piles, \$165,000. Santa Cruz, Santa Cruz
Co., Cal. Engineer, H. J. Brunner,
Slaron Bldg., S. F. Owners, City of
Santa Cruz. The wharf will be about
2,750 feet long and will be erected
near the present Fisherman's Wharf.
The approach portion, high is 2,100
feet long, will vary in width from 30
to 42 feet. The main pier will be about
650 feet long and 80 feet wide. This
will have a shed on it about 210 feet
long and 46 feet wide. The entire con-
struction will be of timoer and creos-
ote piles. About 2,200 piles will be
required, varying in length from 30 to
70 feet, and about 2,000,000 board feet
of lumber. The usual bolts and fitt-
ings, spikes, drift pins, etc., will be
used. There will be one track run the
full length of approach and pier.
Devits and their mechanical equip-
ment will also be used. Plans are com-
plete and figures are being taken.
Bids will be opened on February 6th.
Plans and specifications can be secured
from the engineer.

RESIDENCE—2 story and base,
flame, \$8,000. San Bruno, San Mateo
Co., Cal. Architect, John J. Foley, 46
Kearny street. S. F. Owner, Father
W. J. Cantwell. The dwelling will
contain twelve rooms, three baths and
a sleeping porch. Interior finish will
be of pine and hardwood. Oak floors
will be used in the principal rooms.
There will be furnace heat and open
fire places. Mantels will be of brick.
A small hall is provided for in the
basement. Exterior of the dwelling
has been designed in the Mission style
to harmonize with the church, and will
be covered with cement plaster on
metal lath. Plans are being prepared
and figures will be called for about
the first of February.

RESIDENCE—2 story and base,
frame, \$7,000. Palo Alto, Santa Clara
Co., Cal. Architect, W. H. Ratcliff, Jr.,
First National Bank Bldg., Berkeley.
Owners, Prof. Campbell and Prof. All-
dile. The house will contain eight
rooms, baths and sleeping porch. In-
terior finish will be of pine and hard-
wood. There will be furnace heat and
open fire places. Mantels will be of
brick. Oak floors are specified in se-
veral of the rooms. Bath rooms and
kitchen will have tile wainscot. An
automatic water heater will be in-
stalled. Exterior of the dwelling will
be covered with cement plaster on
metal lath. A clay tile roof will be
used. Plans are complete and figures
are being taken.

FRESNO, MODESTA, SANIS- LAUS AND CENTRAL CALIFORNIA.

HOTEL—3 story and base, brick and
steel, \$40,000. Corcoran, Kings Co.,
Cal. Architect, H. Y. Davis, Visalia.
Owner, F. A. Cleveland. The building

will be designed for a modern commercial hotel, and will contain stores, the main lobby and office and a public dining room on the first floor. Upper floors will be divided into about 60 guest rooms and a number of baths. Interior finish will be of pine and hardwood, with the floor in the lobby. Plans provide for steam heat, a complete oil burning plant, passenger elevator and hot water supply. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance and lobby. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LODGE HALL—4 story and base. Class A construction, \$160,000. Fresno, Fresno Co., Cal. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owners, Eagles' Hall Association, Fresno. The building will be erected at the corner of M and Fresno streets, having a 125-foot frontage on one street and 75 feet frontage on the other. Several stories besides the main entrance will occupy the first floor. Upper floors will be arranged for the offices of the organization, social rooms, lodge halls, banquet rooms and ball rooms. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service and a vacuum cleaning system. Marble and tile will be used extensively. Patent store fronts, metal window sash and frames are also specified. Exterior of the building will be faced with brick and terra cotta. Plans are nearly complete.

STORM WATER SEWER SYSTEM—\$150,000 to \$160,000. Fresno, Fresno Co., Cal. Engineer, City Engineer R. E. Cronkite, Fresno. Owners, City of Fresno. The City Engineer is now preparing plans and specifications for an entire new city storm water sewer system. It is planned to embrace the entire city. Further mention will be made of the work.

Contracts Awarded.

SCHOOL—1 story and base, concrete and brick, \$20,000. Pixley, Tulare Co., Cal. Architect, H. Y. Davis, Visalia. Owners, Pixley School District. Contractors, George A. Noble & Sons, Visalia. Contract price, \$20,000.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

PUNGALOW — 1 story and base, frame, \$3,000. Sacramento, Cal. Architect, none. Owner, E. A. Pierce, 3520 Park avenue, Sacramento. The house will be erected in the Boxler Tract, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be largely of pine with hardwood veneer in the dining room. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Lahor.

Contracts Awarded.

LOS ANGELES AND SOUTH-ERN CALIFORNIA.

PACKING PLANT—2 story and base, brick, \$60,000. Long Beach, Los Angeles Co., Cal. Architect, none. Owners, National Tuna Fishing and Packing Co., Charles E. Williamson, Pres., Long Beach. This building is to be erected on the harbor front and will cover a large area. Construction will be of the extra heavy type. There will be a large amount of special machinery, metal window sash and frames and fireproof doors. Plans provide for steam heat, pine trim, modern electric and plumbing work. Exterior of the building will be faced with pressed brick. Plans are being prepared, and when complete will be turned over to the owners who will take figures.

SCHOOL—1 and 2 story, brick or reinforced concrete, \$50,000. Calexico, Imperial Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Calexico School District. These architects have just been commissioned to prepare plans for a new high school building which is to be erected in Calexico. Preliminary plans are to be prepared at once, and will be submitted to the Board of Education for approval. No details of the work can be given at this time. Further mention will be made when working drawings have been completed.

SCHOOL—1 story and base, brick. Cost not stated. Glendora, Los Angeles Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Glendora School District. This work has been mentioned here before when plans were first started. The working drawings are now complete and figures will be opened on February 2d. The building will contain a number of standard sized class rooms, principal's office, teachers' room and an assembly hall. Plans provide for a central heating system, modern electric work and plumbing. Exterior of the building will be faced with pressed brick. Interior will be finished in pine with some maple floors. Plans can be secured from the architects. Bids will be taken for the general construction with alternates A, B, C, and D; for the plumbing and sewer work with alternates A, B, and C; and for the heating and ventilating.

CHURCH AUDITORIUM — 1 story and base, frame, \$10,000. Pasadena, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Tremont Baptist Church. The addition will be erected in the rear of the present church, and will be connected to the main body of the church by an arched corridor. The building will be 50 by 80 feet. The main auditorium, which is to occupy the entire first floor, will seat 600 people. Basement will contain a social hall and kitchen. Interior finish will be of pine throughout. There will be a central heating system. Exterior of the building will be faced with blue brick base and cement plaster on metal lath. Plans are being prepared.

JAILS—3, 1 story and base, reinforced concrete. Cost not stated. Ventura County, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Ventura County. These buildings will be erected at the following locations: Fillmore, Moorpark and Camorilla. All

will be of the same design and construction, with cement and pine floors, steel cells, composition roofs, modern jail plumbing and electric work. There will be wrought iron window grilles and steel doors. Exteriors will be faced with cement plaster. Plans are being prepared.

FIRE HOUSES—4, 2 story and base, brick, \$10,000 each. Los Angeles, Cal. Architect, J. J. Backus, 24 City Hall, L. A. Owners, City of Los Angeles. These buildings will be erected at 1st and Reno, Vermont, and Santa Monica, Florence and Moneta, and 39th and Western. Each building will house two pieces of apparatus on the first floor, and will be arranged for living quarters for the men on the upper floor. Interiors will be finished in pine. There will be special plumbing and electric work. Exteriors will be faced with pressed brick. Plans are being prepared and figures will be called as soon as working drawings can be completed.

GARAGE AND WAREHOUSE — 1 story and base, brick and concrete, \$15,000. Whittier, Los Angeles Co., Cal. Architects, Rea & Gerstang, Black Bldg., L. A. Owners, Standard Oil Co. The building has been designed in the shape of an L, and will house the company's offices in the front portion, a warehouse and garage in the rear. The structure will cover an area of 33 by 67½ feet and 22 by 74 feet. Interior of the offices will be finished in pine and hardwoods. The garage will have a cement floor. Metal window sash and frames will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—2 story and base, brick and concrete, \$30,000. Los Angeles, Cal. Architect, E. B. Rust, Title Insurance Bldg., L. A. Owner, Charles Nemethi. The building will be erected on West 11th street, covering an area of 50 by 138 feet. The first floor will contain two large stores besides the hotel entrance. Upper floor will be arranged for 52 guest rooms and 29 baths. There will be steam heat and a hot water supply. Interior finish will be of pine. Bath rooms will have composition floors and tile wainscot. Patent store fronts and plate glass windows are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared, and when complete the work will be done by Day Labor.

SCHOOL GROUP—5, 1 and 2 story and base, brick buildings, \$150,000. Inglewood, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Inglewood Union High School District. Bids will be advertised for as soon as the plans are approved by the county superintendent of schools, which will probably be this week. There will be five new buildings, consisting of a science hall, two stories, 110x73 feet; household economy building, three stories, 110x62 feet; manual arts building, part one and two stories, 182x94 feet; gymnasium, one story, 138x68 feet, with an outdoor swimming pool; and the central heating plant. The buildings will be of brick construction with pressed brick facing.

SCHOOL GROUP—3, 1 and 2 story buildings, brick or reinforced concrete, \$200,000. Mesa Arizona. Architect,

Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Mesa School District. The school board at Mesa has been authorized to call a special bond election to vote funds for the construction of three new buildings. Architect Marsh has been commissioned to prepare the plans, and he is now working on the preliminary sketches. Details of these buildings will be furnished as soon as working drawings are under way.

STORE AND THEATRE—1 story and base, brick, \$16,500. Los Angeles, Cal. Architect, A. Lawrence Valk. Stimson Bldg., L. A. Owner, E. Lustig. The building will be erected on Main street, covering an area of 50 by 140 feet, and will contain two stores besides a moving picture theatre. The theatre will have a seating capacity of 800 people. Interior of the building will be finished in pine. There will be a modern system of ventilation in the theatre. Marble base and patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

HOSPITAL—5 story and base, reinforced concrete, \$99,000. Los Angeles, Cal. Architects, Garrett & Farrell, Currier Bldg., L. A. Owners, Methodist Hospital Association. Contractors, Hudson-McCutcheon Construction Co. L. A. general construction, which includes all work except the elevator equipment. Contract price, \$99,000.

EXPOSITION BUILDINGS—Frame and plaster construction, \$150,000. San Diego, Cal. Architect, Frederick Heinlein, Lisner Bldg., L. A. Owners, Panama Oriental Co. Contractors, Foss Designing and Building Co., 100 East Colorado street, L. A. Contract price, \$150,000. These buildings will be known as the Oriental City.

APARTMENT HOUSE—3 story and base, brick and steel, \$60,000. Los Angeles, Cal. Architect, Fernand Parmentier, Byrne Bldg., L. A. Owner, Mrs. Harvey Ingerson. Contractors, Dutro-Wren Construction Co., Van Nuyes Bldg., L. A. Note: The contract has been taken on the percentage basis and the estimated cost of the building is placed at \$60,000.

HOTEL—3 story and base. Class C construction, \$90,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Walter H. Fisher. Contractor, Alex. Grant, 1201 West 37th street, L. A. general construction only. Note: This contract does not include excavating, foundation work, structural steel, fire escapes, plumbing, heating or automatic sprinklers.

HOTEL—3 story and base. Class C construction, \$15,750. Los Angeles, Cal. Architect, J. B. Nicholson, Wright and Cullender Bldg., L. A. Owners, R. J. Dunn and H. J. Coates. Contractor, A. E. Harshman, Black Bldg., L. A. Contract price, \$15,750.

TUNNEL WORK—\$184,800. Los Angeles, Cal. Engineer, City Engineering Department, L. A. Owners, City of Los Angeles. Contractor, Lynn S. Atkinson, Central Bldg., L. A. Contract price, \$184,800.

SEATTLE AND WASHINGTON.

DRY DOCK—Concrete construction, \$4,000,000. Esquimalt, B. C. Engineers, Dominion Government. Own-

ers, Dominion of Canada. Details of the proposed dry dock which is to be erected at Esquimalt have been made public. The structure will have a total length of 1,150 feet with an extreme depth at the approach of 50 feet and an average depth of 40 feet and of high water. Construction will be of reinforced concrete and steel. The site has been selected and preliminary work of grading has been started. Working drawings are now being completed in the Dominion offices, and figures will be called for within a short time.

BRIDGE—Steel and concrete construction, \$2,000,000. Vancouver, B. C. Engineer, John Wolfe Barry, Vancouver, B. C. Owners, Burrard, Inlet, Tunnel and Bridge Co. Plans for a large steel span bridge which is to be erected over the Second Narrows are complete and now in the hands of the contractors for figures. Bids will be opened on April 1st. Plans, specifications and full particulars can be secured from the engineer who may be addressed in care of the owners.

BANK—2 story and base, brick and concrete, \$15,000. Orville, Wash. Architect, A. Harlan Thomas, Arcade Bldg., Seattle. Owners, First National Bank of Orville. The building will be erected on a corner site, the entire first floor being occupied by the bank and upper floors will be arranged for modern offices. Interior finish will be of pine and hardwood. There will be a central heating system, special coin vaults and metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are being prepared and figures will be called for within a month.

INSTITUTIONAL BUILDING—1 and 2 story, brick and concrete. Cost not stated. Medical Lake, Wash. Architect, Julius Zittle, Jamieson Bldg., Spokane. Owners, State of Washington. This group will comprise the new institution for the Feeble Minded, and will consist of the following buildings: Two cottages, each 2 stories and base, 68x94 feet; a 2 story school house, 32x 108; a 2 story, 60x108 foot store house and a main building 2 stories high, an over all length of 266 feet, divided into two custodian wings, 14 feet long each. The wings will be 75 feet wide, the central portion will be 38 feet wide and 123 feet long. All buildings will be of concrete and brick construction, with hollow tile floors and partitions. The roofing is specified. Bids will be opened by the State Board of Control on January 31st.

HOSPITAL—2 story and base, hollow tile construction, \$30,000. Lakeview, Wash. Architects, Sundberg & Mahon, Tacoma. Owners, Pierce County. The building has been designed for a tuberculosis hospital, and will contain several wards and private rooms. Interior finish will be of pine throughout. There will be a central heating system, vacuum cleaning and modern operating room equipment. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for by the Board of Supervisors within a few days.

THEATRE—4 story and base, steel and reinforced concrete, \$100,000. Tacoma, Wash. Architect, Max Umbrecht, Seattle. Owner, Eugene Levy, Grand Theatre, Seattle. Mr. Levy has leased

the site on the west side of C street, between the Tacoma Theatre and the Pythian Theatre, and will shortly start construction on a fireproof playhouse. No details of the work have yet been announced. Construction will be of reinforced concrete and steel, and it is stated that the house will have a seating capacity of 1200 people. Several stores will occupy the street front. Further mention will be made of the work.

APARTMENT HOUSE—3 story and base, brick, \$25,000. Seattle, Wash. Architect, F. H. Blohne, New York Bldg., Seattle. Owner, Frank Logan. The building will be erected on the southeast corner of Republican and Minor streets, and has been designed to contain fifteen suites of two and three rooms. Interior finish will be of pine and hardwood veneer. Some oak floors will be used. There will be steam heat and a hot water system. All suites will have wall beds and private baths. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

WAREHOUSE—3 story and base, reinforced concrete, \$75,000. Seattle, Wash. Architect's name not given. Owners, Oregon-Washington Railroad and Navigation Co. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price, \$75,000. Note: When complete the building will be occupied by the Western Hardware and Metal Co.

MUNICIPAL WATER SYSTEM—\$161,750. Chehalis, Wash. Engineer's name not given. Owners, City of Chehalis. Contractor, W. H. Mitchell, Holland Hotel, Seattle. This contract was originally signed two years ago, but a court decision has only recently been secured in which the right of the City of Chehalis to issue bonds to a contractor in payment of construction was sustained. Mr. Mitchell will start work at once. He may be addressed at either the hotel named above, or in care of the City Clerk at Chehalis.

PORTLAND AND OREGON.

GARAGE—1 story and base, reinforced concrete and brick, \$15,000. The Dalles, Ore. Architect, John V. Bennes, Chamber of Commerce Bldg., Portland. Owner, Max A. Vogt. The building has been designed for a commercial garage, and will cover a ground area of 100 by 180 feet. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. Besides the storage space the building will contain display rooms, office and completely equipped machine shop. Exterior will be faced with cement plaster. Plans are complete and will probably be turned over to the owner who will build by Day Labor and purchase all materials.

SCHOOL—1 story and base, brick and concrete, \$15,000. Arlington, Ore. Architect, Charles F. Burggraf, Albany. Owners, City of Arlington. The building will contain six class rooms, teachers' room and principal's office. Construction will be of brick and hollow cement blocks. Interior will be finished in pine. There will be a central heating system. Exterior of the

building will be faced with pressed brick. Plans are being prepared and will be ready for bids within a week or ten days.

APARTMENT HOUSE—2 story and base, frame, \$15,000. Portland, Ore. Architects, Goodrich & Goodrich, Abington Bldg., Portland. Owner's name withheld. The building will be erected on the East Side, covering an area of 40 by 70 feet. Interior has been arranged for eleven suites of two and three rooms besides a number of single rooms. All suites will have private baths and wall beds. Interior finish will be of pine and redwood. Oak floors will be used in the living rooms. All suites will have private baths and wall beds. Interior finish will be of pine and redwood. Oak floors will be used in the living rooms. Plans provide for steam heat, a hot water system and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and ship-lap. Work will start in the spring.

BATH HOUSE—1 story, reinforced concrete, \$25,000. Sea Side, Ore. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owner, J. E. Oates. The building will be arranged for a large number of tub baths, showers and a large concrete swimming pool. Equipment will be of the most modern type, including filters and water heating plant. Exterior will be faced with cement plaster. No general contract will be let, the owner doing the work by Day Labor, and subcontracting all material contracts. Excavating and grading have been started.

DOCK CONSTRUCTION—Cost not stated. Portland, Ore. Engineer, G. B. Hegardt, care of the Dock Commission, Portland. Owners, City of Portland. Plans have been completed for Municipal Dock No. 2, which is to be erected on the East Side. Construction will be similar to that of Dock No. 1, including concrete, brick and heavy mill construction. The dock will be 525 feet long and will be covered with a shed. Proceeds from bonds valued at \$560,000 will shortly be available. Bids will be called for sometime this month, but construction will not be started until the money is available.

CONVENT—3 story and base, concrete and hollow tile construction, \$20,000. Portland, Ore. Architect, Jacob Javoberger, Board of Trade Bldg., Portland. Owners, Sisters of the Holy Child. The building will be erected on a corner lot covering an area of 45 by 102 feet. Interior will be arranged for class rooms, chapel, work rooms and dormitories. Interior finish will be of pine. There will be steam heat and a hot water system. Exterior of the building will be faced with cement plaster. A general contract, including plumbing and heating will be let. Plans are complete and out for figures. Bids will be opened on February 1st.

SCHOOL—2 story and base, brick or reinforced concrete, \$60,000. Corvallis, Ore. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, City of Corvallis. At a joint meeting of the Board of Education and a citizens' committee, the original idea of remodeling the present high school building was discarded, and the architects were instructed to prepare plans for a new building. No details of the structure can be given at this

time. Bonds in the amount of \$75,000 will be voted, and all but \$10,000 will be spent in the construction of the building. Further mention will be made of the work.

WATER SYSTEM—\$20,000. Amity, Ore. Engineer, Louis C. Kelsey, Selling Bldg., Portland. Owners, City of Amity. Only preliminary plans have been prepared, but these show a system embracing the entire town. A concrete power house will be included. Pumping equipment is not included in the estimate of \$20,000. Bonds will be voted on February 2nd and if they carry work will be started at once.

♦ PANAMA-PACIFIC EXPOSITION NOTES. ♦

Prizes aggregating \$25,000 for the musical competitions at the Panama-Pacific International Exposition were announced last Friday by the 1915 Elistedad Association. The first prize amounts to \$10,000 and will be given for the chief choral competition for mixed choirs of not less than 150 voices. This will be competed for by many of the greatest choral societies in the world.

The program consists of fourteen musical events including women's choral competitions, children's choral competitions and instrumental music. In the military band competition \$2000 will be awarded as a premium.

As a preliminary step to the meeting of the Transcontinental Passenger Association in this city on March 25th to take final action on railroad rates to San Francisco in 1915, a conference of the local passenger traffic managers of terminal lines was held recently in the offices of A. M. Mortensen, Traffic Manager for the Panama-Pacific International Exposition. In the Exposition Building.

At this meeting a schedule of 1915 railroad rates prepared by Mortensen was submitted to the local passenger traffic managers for their consideration. This was an important step in advance of the meeting in March when representatives of all the railroads west of Chicago will assemble in San Francisco. The fixing of railroad rates to San Francisco during the Universal Exposition of 1915 will be one of the principal orders of business to come before the convention and final action will be taken.

The matter of railroad rates to San Francisco in 1915 is of the utmost importance to prospective visitors and exhibitors throughout the United States and abroad and the action of the railroad companies in this matter is being watched eagerly. The Exposition officials have taken an intense interest in the matter of railroad rates and are anxious to see equitable rates to San Francisco fixed by all of the lines coming into San Francisco.

J. R. Hanly, special yachting commissioner for the Panama-Pacific International Exposition left last Saturday for New Orleans, Cuba and New York. From New York Mr. Hanly will journey along the Atlantic Coast visiting all yachting and shipping people with a view to studying the most approved types of boats to be entered in the 1915 yacht races. These races will be held in San Francisco Bay in April. The principal events will

be held with the 12 metre boats, for which a cup has been offered by President Wilson.

Sir Thomas Lipton is now building a boat to compete in the races. The 12 metre boats which have become so popular in the East and Europe average 39 feet, four inches on the water line and 60 feet over all. It is expected that representatives of the royal families of Europe will send their 12 metre boats to participate in the contest.

With the removal of the miles of staging from the walls of the Palace of Machinery, at the Panama-Pacific International Exposition, which is now almost completely cleared, the visitor to the Exposition has now a favorable opportunity to admire in massive architecture of that huge building and to realize what its appearance will be when the color work on it is finished. A considerable amount of this work has already been done and the richly toned marble covering for the six great columns before the main entrance is now being put in place. The sixteen flag poles tipped with their many pointed gold stars, now decorate the entire front of the building. Within, the interior finishing is progressing rapidly.

The two hundred and first convention to meet in San Francisco during the Panama-Pacific International Exposition in 1915 was booked Friday when James A. Barr, Manager of the Bureau of Conventions and Societies of the Exposition, received a telegram announcing that the Phi Kappa Sigma National College Fraternity had accepted the invitation to convene in San Francisco during the Exposition. Final action was taken by the fraternity at its annual convention in Nashville, Tennessee, after four of its California members, officially delegated by President Chas. C. Moore of the Exposition, had renewed the invitation to hold its next convention in San Francisco.

♦ CALIFORNIA METAL MINE PRODUCTION IN 1913. ♦

Preliminary Figures Show Increased Output in All Metals.

California shows an increase in output of gold, silver, copper, lead, and zinc in 1913, compared with 1912, according to preliminary figures compiled by Charles G. Taft, of the United States Geological Survey. The mine figures for 1912 were \$19,713,478 in gold and 1,300,136 ounces of silver; the estimates for 1913 indicate an output of gold valued at \$20,013,274 and 1,606,261 ounces of silver, an increase for 1913 of \$299,896 in gold and 306,125 ounces of silver. There are about 1,100 producing metal mines in the State, and the deep mines are yielding about 2,700,000 tons of ore annually. It is probable that the increase in gold has come mainly from the deep mines, while the added quantity of silver has come from increased output of copper and lead-silver ores.

The producing deep gold mines of the State, which yield about 56 per cent of the total gold output each year, are between 450 and 530 in number and are situated in 26 counties. They have nearly 200 reduction plants, with a daily capacity of over 12,000 tons.

White Brothers

5th and Brannan Streets

San Francisco

The largest production from this source is derived from the five Mother Lode counties, where about 1,300,000 tons of ore are annually treated with an average recovery of \$3.70 a ton. During the year 1913 several of the old mines along the foothills and in the mountain counties have been reopened and equipped after lying idle for years, and some new "prospects" have been opened. It is a matter of encouragement to deep mining that the two deepest mines in the State—in Amador county—are in excellent ore and are in a prosperous condition. The Kennedy, at Jackson, is producing gold ore from a vertical depth of 3,600 feet, and the Aikona from 3,300 feet. The ore bodies in both these representative mines are large and well defined at the depths stated and the ore is profitably worked. At these and other quartz mines tailings are not allowed to pass into the streams as heretofore, by agreement with farming communities which claimed damages from such tailings. At the Kennedy four large elevating wheels lift the tailings and pass them to a 200-acre tract where they are deposited away from the streams that might carry them down to the farming lands.

In placer mining in California the dredges continue to furnish about 86 percent of the gold derived from the auriferous gravels. Of the total gold yield from all sources, deep and placer mines, the dredges produce about 38 per cent. As yet there are special signs to indicate any diminution of the total yield of gold from dredging operations, but some of the older fields are on the decline, the best ground having been worked out. A few of the companies have entirely worked out the plying ground in their holdings and have ceased operations. The operating companies in the old Oroville field of Butte County (the first worked in the State) are seeking new fields in the smaller streams and areas of dredging ground, notably along American, Mokelumne, and Trinity Rivers, where extensive prospecting has been going on during 1913. As for large operations the companies operating on Yuba River near Marysville and in Sacramento County near Folsom have still very extensive dredging areas in reserve and unworked. In consequence these companies have during 1913 been installing new equipment of greater capacity and efficiency, thereby reducing costs. Dredge No. 14 of the Yuba Consolidated Goldfields, an all-steel dredge and the largest in California, was built during the year

and started work on December 16, 1913. This machine has buckets of 16 cubic feet capacity, will handle between 1,000 and 12,000 cubic yards of gravel daily, and will dig 65 feet below the water line and pile tailings 40 feet above water line. Another dredge of this company, at work for two years past, handles from 9,000 to 10,000 cubic yards daily. During the year one dredge has been moved from Oroville to American River, and another from the same place has been rebuilt on Mokelumne River. Dredge No. 7 of the Natomas Consolidated has been rebuilt and put into operation. In the early part of the year some prospecting for dredging ground was done in Humboldt County and prospecting operations are now being carried on along Trinity River and on Coffee Creek in Trinity County. It seems probable that several dredges will be installed in small areas along Trinity River. The larger dredging companies have during 1913 been making experiments to perfect the gold-saving features of the dredges, and notably for handling the "black sands," which carry much very fine gold, a good deal of which is now lost in the mining operations. So far, however, no developments of great importance have resulted. In extensive operations it seems difficult to determine the exact point where the saving of fine gold is of sufficient commercial importance to justify extra machinery, extra handling of material, or slower operating speed.

Dredging has the advantage over most forms of placer mining that it requires less water in proportion to the quantity of gravel handled, and dredge miners are not materially affected by "dry seasons," which occur occasionally in California. The winter of 1912-13 was very dry and there was a scarcity of water for mining operations. As a result the output of the hydraulic, drift, and surface placer mines of the State was restricted. The hydraulic mining industry suffered most and many of the mines had only a few weeks' water supply to wash the gravel, and others only a few months' supply. Extensive operations in hydraulic mining are now largely confined to the northwestern counties of the State, where there are no legal restrictions compelling the miners to impound their debris or tailings, as there are in the central counties, in the drainage basins of Sacramento and San Joaquin Rivers. But even in Siskiyou and Trinity counties no new operations of magnitude have been be-

gun during 1913, although a number of smaller mines have been started up or equipped for work for this winter. The hydraulic mines now produce only about 8 per cent of the placer-gold yield in California, and it is difficult to interest capital in them, though there are large unworked areas for hydraulic mining in many counties. The drift-mining industry of the State is even less prosperous and very few of these mines have been opened during 1913. Only about 4.50 per cent of the placer gold has come from the drift mines in late years, whereas they formerly yielded 10 to 15 per cent. The necessity of running long tunnels to reach the auriferous gravel lying beneath the lava-capped divides involves considerable investment before profits may be expected. Some of these mines are paying their owners well after preliminary work has been done. The surface or sluicing mines of the State are now of small moment compared with other forms of gold mining. Most of the available ground has long since been worked out, and it is only in small areas that work of this class is being carried on, mainly by foreign-ers.

Contrary to expectation the copper output of California in 1913, according to preliminary estimates, exceeded that of 1912, when the mine production was 33,451,672 pounds. The estimate for 1913 shows an output of 36,790,420 pounds, an increase of 3,338,758 pounds, notwithstanding continued agitation by farming communities against the damage claimed to be done by smaller fumes and the fact that several of the larger copper-smelting plants, idle from that cause in 1912, still continue unproductive. The largest copper mine in the State, the Mammoth, of Shasta County, continues mining and smelting and it is generally understood that fume damage has not been a great as represented. The Bully Hill mine, also in Shasta County, is still experimenting with a leaching process for its zinc ores but produced no copper in 1913. The Balaklava mine, in the same county, has been shipping small lots of ore to another smelter, but its reduction plant has been idle during 1913. This company is now considering the shipment of its ores by rail from Shasta County to San Francisco and thence to the smelter at Tacoma, Wash. Some ore will also be shipped from the mine to the Mason Valley smelter in Nevada. The Mountain Copper Co., of Keswick, Shasta County, ships the ore from its mines by rail to its smelter on the shores of San Francisco Bay. In the old Iron Mountain mine of this company extensive

bodies of low-grade copper ore have been discovered, and plans have been made for a large concentrating plant to be erected at the mine, the concentrates to be shipped to the smelter of the company.

During 1913 a commission was appointed to look into the matter of fumes from the plant of the Selby Smelting and Lead Co. on San Francisco Bay and is still at work, its report not being expected before next May.

Lead mining in the State made a marked advance in 1913. The mine report for 1912 showed a lead output of 1,144,731 pounds, while the estimated returns for 1913 show a yield of 5,060,841 pounds. This is an increase of 3,916,110 pounds and is due mainly to the renewal of mining and shipping operations of the Tecopa Mining Co., of Inyo County. Lead is mined in California in the counties of Inyo, Mono, and San Bernardino.

In zinc mining an advance in output is also shown, though it is small. In 1912 the mine report showed a yield for California of 4,345,591 pounds; the estimate for 1913 is 4,506,000 pounds, an increase of 159,509 pounds. Most of the zinc comes from the old Cerro Gordo mines of Inyo County, formerly worked for silver-lead ores.

PETROLEUM AGAIN BREAKS RECORD.

Production in 1913 Estimated by United States Geological Survey at Over 240 Million Barrels.

The remarkably great output of petroleum during each year of this century was more than maintained in 1913. The amount produced in the past 12 months exceeded 240,000,000 barrels, or about 32,000,000 metric tons, according to estimates of David T. Day, of the United States Geological Survey. The production in 1912, which made the record up to that time, was 222,113,218 barrels. The rate of increase in 1913 was greater at the end of the year than at the beginning. California increased at least 10,000,000 barrels over 1912, almost reaching 100,000,000 barrels. The consumption in California almost equaled the production, and the addition to stocks was very slight. Oklahoma also showed a significant increase, with about 6 per cent addition to the stocks. Texas and Louisiana likewise increased their product. The output of the Gulf field declined, but this was more than offset by the increases in northern Louisiana and Texas. Wyoming showed a significant increase from the Salt Creek field. Other States generally showed a decline, which was greatest in Illinois.

The following is an estimate of the production in 1913, compared with the statistics for 1912:

Petroleum production in 1913 (estimated) and 1912, in barrels.

States	1913	1912
California	98,000,000	86,450,767
Oklahoma	62,400,000	51,427,071
Illinois	22,600,000	28,601,308
Texas	14,000,000	11,735,057
Louisiana	12,000,000	9,263,439
West Virginia	11,000,000	12,128,962
Ohio	8,000,000	8,969,007
Pennsylvania	7,000,000	7,837,948
Wyoming	3,600,000	1,572,306
Kansas	2,000,000	1,592,796
Indiana	900,000	970,000

New York	800,000	874,128
Kentucky	500,000	484,368
Colorado	200,000	206,052
Other States	100,000

Totals242,000,000 222,113,218

Appalachian Region.

In New York and Pennsylvania great efforts were made to increase production by new drilling and more especially by cleaning out old wells. No great success was obtained, and the usual decline resulted. A deep test boring at Derrick City, near Bradford, Pa., was carried to 5,673 feet with the hope of finding oil in the Medina sands. This boring is being continued.

In West Virginia no new pools comparable with the Blue Creek discovery of the previous year were opened. The drilling in Roane, Ritchie, and many other counties was successful enough to check the expected decline due to the decreased yield of Blue Creek.

The possibilities of finding oil in western Kentucky aroused general interest.

Eastern Ohio was actively drilled with fair results, and in the Ohio River region an interesting innovation in handling old wells gave promise of very beneficial conservation of old oil fields in the future. Compressed air was forced into the nearly exhausted oil-bearing sands through a well situated centrally in a group of old wells and the increase in yield was marked.

Limestone Fields.

The decline in the Lima (Ohio and Indiana) field was no greater than usual; in fact, the new development in Sullivan County, Ind., added an encouraging new supply.

Illinois continued the marked decline of 1912. Wildcatting gave unsatisfactory results.

Mid-Continent Field.

The entire Mid-Continent region, showed an increase, with a record total output. In Kansas prospecting returned to many localities which had been temporarily abandoned when the Glenn pool attracted all available capital to Oklahoma. During last year the high prices asked for favorable locations in Oklahoma reacted in favor of Kansas. The phenomenal bonuses obtained in auctioning leases on Osage Indian lands showed the high value of Oklahoma lands. The oil also increased in price to \$1.03 a barrel and would have gone higher but for the excessive production, which put oil into storage and created uncertainty as to future prices. Besides satisfactory development of the new Cushing and Cleveland pools, interesting prospects for new pools have been found at Newkirk, Wann, and Healdton.

Large Wells in Louisiana.

As usual, many large wells, difficult of control, were obtained in the Caddo region, Louisiana, including Mooringsport, and fires were disastrous. The product was irregular but showed an increase. In the Gulf region the product declined.

Through the efforts of the Louisiana Conservation Commission, the United States Bureau of Mines, and the oil operators the gas well near Oil City, which had run wild since the opening of the Caddo region, was closed.

Increase in Texas.

The Elctra and other fields in northern Texas continued to increase, and the decline in the Gulf region was

slight. Much wildcatting was in progress at many points over the State. Chief interest centered in a new development at Moran, in Shackelford County.

Increase in Wyoming.

Production increased in the Salt Creek field of Wyoming, and the erection of additional refineries was commenced. An important suit was begun by the Federal Government to recover oil lands entered upon since the first withdrawal order of former President Taft.

Increase in California.

At the close of 1912 consumption in California had so nearly balanced the productive rate as to encourage the producers and at least to defeat concerted effort toward restriction of drilling. Many of the wells of 1913 were gushers of the phenomenal type and aided greatly in increasing the supply. The efforts to increase consumption succeeded fairly well, so that except during the month of greatest production, September, when about 9,000,000 barrels were produced, the consumption almost kept pace with the output and the amount sent to storage was less than a million barrels.

The Fullerton field continued to yield large gushers with sufficient frequency to justify the attempts to reach the unusually great depth of the oil sands.

Farther north the "west side" fields of Kern County continued as strong factors in the increasing output of the State, and the Buena Vista Hills, Elk Hills, and other new districts gained in interest. Even the comparatively old Kern River field near Bakersfield sustained interest by wildcatting to the northwest, where the Standard Oil Co.'s well went into oil and aroused geological and financial speculation over a large area. The product of the district declined.

Coalinga's year had many eventful features, including extensions of territory to the east and the discovery of additional deep sands yielding oils containing paraffin. The value of the field was indicated by the sale of the California Oil Fields, Ltd., to the Snell Trading & Transportation Co., an ally of the Royal Dutch Syndicate, late in the year.

The Santa Maria field benefited by increased technologic development by which the oils were topped and dehydrated with markedly great efficiency. These developments included the successful introduction of the Cottrell electric dehydration process. The adoption of the Trumble and Dyer topping and dehydrating processes and the great advance in methods for obtaining gasoline from natural gas were among the striking achievements of the year, but while less spectacular, the economies effected by many minor improvements in the great refineries at Point Richmond, Oleum, and El Segundo contributed perhaps equally to the general problem of efficient refining.

In transportation the new pipeline of the General Petroleum Co. over Tehachapi Pass effected cheaper transportation to the south, and the natural-gas line to Los Angeles were equally advantageous. Meanwhile several new tank oil carriers and oil-burning steamships were added to the Pacific coast trade and aided in increasing consumption.

Fuel Oil for the Navy.

On account of the increased cost of

fuel oil for battleships and the fact that foreign corporations are rapidly purchasing reserves of oil in the United States, the Secretary of the Navy has recommended to Congress the policy of producing crude oil from the naval reserves and obtaining fuel oil from it.

There has been unusual progress in many parts of the country during the year in petroleum refining, especially in the dehydration of heavy crude oils, in obtaining gasoline from natural gas and synthetically from heavy oils, and in obtaining many special products from crude oils.

IRON ORE BREAKS RECORD.

Production of 1913 Exceeds by Large Tonnage the Record Figures of 1910.

The quantity of iron ore mined in the United States in 1913 is estimated by E. F. Burchard, of the United States Geological Survey, to have been between 58,000,000 and 60,000,000 long tons. This estimate is based on preliminary reports from 25 of the largest iron-mining companies, which represent the principal iron-producing districts and whose combined output is about 81 per cent of the total iron ore mined in 1912.

The average increase in output shown by these 25 companies was 8 per cent over that for 1912, and if this increase should be maintained by all the iron companies in the United States the total output of iron ore for 1913 should reach 59,500,000 long tons. At any rate, it appears almost certain that the former high record of iron ore mined, 57,014,096 long tons in 1910, has been surpassed in 1913. The reports received for 1913 showed considerable variation in the percentage of changes in output compared with 1912, the maximum range being from a decrease of 36 per cent to an increase of 56 per cent. These apparently wide variations were evidently due to conditions affecting particular companies rather than to general or even local conditions of the iron-mining industry; moreover, they concerned, for the most part, the operations of companies whose production is not sufficiently great to affect largely the grand total tonnage.

In the Lake Superior district, where about 85 per cent of the domestic iron ore is mined, the increase in production corresponded closely with that for the United States in general, or about 8 per cent, thus indicating a total production for that district of about 50,000,000 long tons, compared with 46,368,775 tons in 1912. The year 1913 is therefore a record year for production and shipments in this district also. The preliminary figures indicate that the shipments of Lake Superior ore by water will exceed 49,000,000 long tons, which, together with the all-rail shipments of more than 800,000 tons, brings the figures for total shipments of Lake ore very close to the tonnage of ore mined and indicates that not much change has occurred in the stocks of ore at the mines in the Lake district. These stocks amounted at the close of 1912 to about 9,500,000 long tons of ore.

In the Birmingham district, Alabama, the production of iron ore in 1913 as indicated by the preliminary returns was about 10 per cent greater than that for 1912. In Tennessee there was apparently a slight decrease and in North

Carolina a slight increase. New Jersey and New York both showed slight increases, while Pennsylvania showed a slight decrease. In the Rocky Mountain district of Wyoming, Colorado, and New Mexico there was a slight decrease.

The types of iron ore produced commercially consist of red and specular hematite, brown ore, magnetite, and siderite, or spathic ore. Hematite constitutes about 90 per cent of the output. Only a very small fraction of 1 per cent of the output is siderite, the production of brown ore and magnetite together constituting nearly 10 per cent of the total.

THE WORLD'S GREATEST MANUFACTURING CITY.

The metropolitan district of New York City, says a census report, embraces 616,928 acres of territory, of which 183,555 acres constitute the area of New York and 433,373 acres the area of the outside territory. The population of the city of New York in 1910 was 4,766,883 and that of the outside territory 1,707,685, the total for the district being 6,474,568. As defined at the census of 1910, the metropolitan district includes in addition to the central city, fifteen cities, forty-one boroughs, two villages, seventeen towns and seventeen townships.

In 1909 the New York city district had 31,782 manufacturing establishments, which gave employment to an average of 948,706 persons during the year and paid out \$607,755,267 in salaries and wages. Of the persons employed, 789,175 were wage earners. These establishments turned out products to the value of \$2,970,143,382, to produce which material's costing \$1,719,324,660 were utilized. The value added by manufacture was thus \$1,259,818,722. The New York city district ranked first in 1909 among all the metropolitan districts of the United States in the value of its manufactured products.

In the New York city district the greater part of the value of the manufactured products of the district was reported by factories within the central city, which is the leading commercial city and the industrial metropolis of the United States. New York city contained nearly three-fourths (73.6 per cent) of the population of the district in 1910, and contributed more than two-thirds (68.3 per cent) of the value of products in 1909. Its manufacturing establishments constituted over four-fifths (81.6 per cent) of all in the district, and gave employment to more than seven-tenths of the wage earners (70.2 per cent).

ADVERSE REPORT ON OIL IN MOHAVE DESERT.

Government Geologist Holds Out No Hope for "Strike" Near Barstow, California.

From time to time since 1900 the region between Mohave and Barstow in the Mohave Desert, California, has attracted attention as a possible oil field, and a report that valuable light-gravity oil occurs there has been widely circulated. Great stretches of land in the northern part of the desert have been located as oil claims, a consider-

able number of derricks have been erected, and wells have been drilled at four rather widely separated localities. Indications of oil have been reported in at least two of these wells. In the early part of December, 1912, R. W. Pack, a geologist of the United States Geological Survey, made a reconnaissance of the eastern part of this region in order to obtain a general understanding of its broader geological features and to determine if possible whether oil might reasonably be expected to occur there in sufficient amounts to be commercially valuable. A number of wells were examined ranging from about 1,000 to 3,000 feet in depth, but while a little oil has been reported from some of the wells and showings in others, in none has oil been struck in commercial quantities.

Further Drilling a Waste of Money.

The main conclusion arrived at as a result of Mr. Pack's examination has been entirely adverse to the idea that oil occurs in this region. Traces of oil and gas are present in different parts of the world in fine-grained sedimentary beds, and it is possible that similar traces of oil may exist in the fine-grained detrital beds of this region, but it is believed to be highly improbable that oil and gas occur here in greater amounts, and Mr. Pack's opinion is that the northern part of the Mohave Desert between Barstow and Mohave offers practically no promise of becoming a productive oil field and that further drilling will prove but a waste of money.

Even if oil was originally distributed in minute quantities through the rock, the structure is not such that it would have tended to collect or trap the oil. Irregular and faulted folds occur in at least three places northwest of Barstow, and it is generally reported that a well marked anticline passes through the hills north of Barstow. Indeed, it is believed by some that such a fold extends along the north side of the desert from Tehachapi Pass nearly to Barstow. This idea is erroneous, for the only folds here are small, discontinuous, and much faulted. Faults, not folds, dominate the structure. Thus the structure is much more favorable for the escape of any oil that might possible have been accumulated here than for its concentration in appreciable quantities.

This and additional information on the oil prospects of the Barstow-Kiamer region is contained in Bulletin 541-E of the United States Geological Survey, copies of which may be obtained free on application to the Director of the Survey Washington, D. C.

WATERPROOFING CLOTH.

Wiley Got the Idea From an Accident in a Dye House.

The waterproofing of cloth so universal today was unknown twenty-five years ago. In 1890 Thomas Fearnley Wiley of Bedford, England, took out the first patent for the process known as waterproofing cloth.

He got the idea from an accident in a Yorkshire dye-house. Certain goods had been wrongly dyed, and the workmen were directed to wash out the surplus logwood color with alum. After the goods had been dried the im-

provement was so marked that the dyer ordered a repetition of the alum washing. The cloth was sent to the wetting machine, but the workmen found that they could not wet it. It passed through the water and came out dry. Thus was the discovery made that cloth could be waterproof and yet remain porous.

The process used today is as follows: Cloth intended for rainproofing are first freed from grease and are then saturated in specially constructed machines with the clear liquor obtained in adding together solutions of pure sulphate and alumina and acetate of lead. The lead is precipitated out, and the acetate of alumina is dried in the fabric. The cloth undergoes further treatment with wax, and in one system wax is applied frictionally from a block under the pressure of a pneumatic roller. Under the method more generally used the wax or mixture of waxes, is melted by heat and applied in an infinitesimally fine film by the action of a ductor roller.—New York World.

DEPARTMENT OF THE INTERIOR.

Bureau of Mines.

New Publications. (List 25.—January, 1914.)

BULLETINS

Bulletin 66. Tests of permissible explosives, by Clarence Hall and S. P. Howell. 1913. 3 1/2 pp., 1 pl., 6 figs.

Bulletin 70. A preliminary report on uranium, radium, and vanadium, by R. B. Moore and K. L. Kilb. 1913. 101 pp., 4 pls., 2 figs.

TECHNICAL PAPERS.

Technical Paper 50. Metallurgical coke, by A. W. Belden. 1913. 48 pp., 21 figs.

Technical Paper 54. Errors in gas analysis due to assuming that the molecular volumes of all gases are alike, by G. A. Burrell and F. M. Selbert. 1913. 16 pp., 1 fig.

Technical Paper 56. Notes on the prevention of dust and gas explosions in coal mines, by G. S. Rice. 1913. 22 pp.

MINERS' CIRCULAR.

Miners' Circular 7. The use and misuse of explosives in coal mining, by J. J. Rutledge. 1913. 52 pp., 8 figs.

The Bureau of Mines has copies of these publications for free distribution, but can not give more than one copy of the same bulletin to one person. Requests for all papers can not be granted without satisfactory reason. In asking for publications, please order them by number and title. Applications should be addressed to the Director of the Bureau of Mines, Washington, D. C.

COUNTY COURT HOUSE REPAIRS.

STOCKTON, January 15.—The feasibility of adding three stories to the county Courthouse, the removal of the dome, which is considered the worst firetrap in town, and the installation of steel in the construction work, if such a theory happens to be advanced properly, were questions brought up in a discussion by prominent citizens at the Courthouse recently.

That the addition would greatly enhance the beauty of the building and that the proposed work would do away with the erection of a City Hall, in case the city decided to erect one, were points enlarged upon by several.

It is understood that the Board of Supervisors appreciates these facts, and is now awaiting action on the part of the city officials before going ahead with the plans.

QUESTION OF A FRANCHISE.

STOCKTON, January 15.—The Railroad Commission recently denied the Oro Electric Company a certificate to permit it to do business in Stockton. An appeal, taken to the Supreme Court, was argued and submitted. Stockton granted the Oro Company a franchise and the Supreme Court is asked to decide that the franchise is sufficient. Decision in favor of the company would limit to a considerable extent the powers granted the Railroad Commission by the Legislature.

PLANS ARE PREPARED FOR MORE CITY BUILDINGS.

The Board of Works has requested the Supervisors to authorize the construction of these buildings: Cooper School, at Jones and Lombard streets, at an estimated cost of \$15,000, the plans being prepared by Houghton Sawyer; engine house No. 12, at Drumm and Commercial streets, according to Ward & Blomme's plans, at an estimated cost of \$60,000; auxiliary fire alarm station in Jefferson square, according to the City Architect's plans, at a cost of \$40,000; Potrero Emergency Hospital, according to G. Colmesnill's plans, at a cost of \$17,500.

The Board has invited bids for the heating and ventilating system for the new City Hall, the cost of which is estimated by the architects at \$75,000.

J. D. McPherson, an engineer, has been appointed by the Board at \$250 a month to go to Johnstown, Pa., to inspect the special track work for the municipal railway lines that is to be manufactured under contract by the United States Steel Products Company, which will defray his traveling and hotel expenses.

CANAL TO OPEN FOR SHIPS JULY 1.

The use of the Panama canal for commercial shipping will not be practical before July 1st, according to information received by the Chamber of Commerce from Colonel Goethals. Numerous inquiries at the office of the foreign trade department from various transportation companies and other enterprises to be affected by the use of the great waterway prompted the local organization to cable Goethals at Culebra on Thursday, requesting the approximate date of opening.

Several large shipping concerns have already chartered steamers and are in readiness for the first trip through the canal. Reports a while back stated that February or March would mark the completion of work in connection with the canal in the event that further slides did not interfere. Colonel Goethals' latest announcement is not accompanied by an explanation of the latest delay.

LOCAL MAN BUYS BIG TRACT IN THE VALLEY.

STOCKTON, January 10.—It is announced that the big McLaughlin tract, near Tracy, has been purchased by Louis Titus of San Francisco. It is also said that Titus will spend at

least half a million dollars for improvements.

The tract involves perhaps close to 12,000 acres and is known in Stockton as the Crocker-Winship property. There are some 8000 acres under cultivation, while about 4000 acres are unclaimed. The price was not stated.

CITY ORDINANCE RULES OVER STREET OPENING.

The city Attorney notified the supervisors and the Board of Public Works of the decision of the Supreme Court sustaining the validity of the new street opening ordinance under which public service corporations must obtain permits before cutting up pavements to extend their service. The decision was given in a case growing out of the arrest of an employe of the Pacific Gas & Electric Company.

The city attorney also rendered an opinion to the effect that the city should pay the premium on the surety bonds required of employes of the Municipal Railway.

FIRST WORK IS DONE ON VAN NESS CITY LINE.

Members of the department of engineering, as one of the preliminary steps in the building of the new Municipal lines, have just measured the curves and cross sections of the Union and Geary street municipal railways where they will turn into Van Ness avenue.

The building of the Van Ness line will be one of the first pieces of railway construction to be done under the recent bond election. This will be one of the main arteries leading to the Exposition.

STATE ACCIDENT BOARD READY.

SACRAMENTO, January 15.—The State Accident Insurance Commission held its first meeting at Sacramento recently and discussed expenditures with the State Board of Control. Commissioners Harris Weinstock, Will J. French and Secretary Ira B. Cross were present.

The first claim under the new law, that of John F. Burns against the Yuba Construction Company, was discussed. Burns fell through a hatchway on a dredger and broke a rib. The commission took the case under advisement.

More than \$200,000 in premiums has already been paid into the commission, representing insurance on payrolls aggregating \$20,000,000, and the organization which the commission is preparing to take care of possible injured is an extensive one.

PLAN NEW SCENIC ROAD.

RICHMOND, January 15.—The John Nicholl Company is preparing to construct a scenic road from the extension of Richmond avenue on the west side of the city over the hills facing on the inner harbor and going around Columbian Knob.

The road will be a loop and will tie in with Richmond Avenue. Construction is to start as soon as the rains cease.

ALAMEDA COUNTY'S FAIR CONTRACT.

OAKLAND, Jan. 15.—The contract between the County of Alameda and the

Panama-California Exposition in San Diego in 1915 was received. The agreement calls for 2000 feet of space in the building to be devoted to the central coast counties. The amount involved is \$5000. The contract was based upon the recommendations of the Alameda county exposition commission and the contract was accepted by unanimous vote. The county must pay \$2500 down, 25 per cent in 90 days and the balance on the completion of the central counties building.

HARBOR BONDS FIND ONE BIDDER.

RICHMOND, Jan. 15.—Only one bidder offered to take the \$200,000 bond issue for harbor bonds which the city council has offered to sell. The opening of bids was up last evening and the bid was that of Farson, Son & Company of Chicago, who offered a premium of \$11 for the issue.

The bid went over for one week for a report from the City Attorney

NEW PLANING MILL FIRM.

Otto F. E. Burmeister and J. A. Hart have formed a co-partnership under the firm name of Hart & Burmeister for the transaction of a general planing mill business at 1065 Brannan street, near Tenth, being the former plant of the Usona Mfg Co.

Both these men are practical men of many years experience and any work entrusted to their care will be done right.

CALL BOND ELECTION.

RICHMOND, CAL., Jan. 13.—The Board of Education has set January 31st, a Saturday, as the date when the proposition of issuing bonds in the sum of \$150,000 for new school buildings will be submitted to the electors of this city.

PLANS BIG OIL TANKS.

BAKERSFIELD, Jan. 12.—The Standard Oil Company is preparing to build a field of oil tanks at Pond station, and will employ a crew of about 200 men and with seven hundred head of horses and mules prosecute the work. The work will be started within 60 days. Forty or more tanks ranging in size from 35,000 to 55,000 barrel capacity will be constructed.

UNION STATION WANTED AT MODESTO.

MODESTO, January 15.—The move for a union station for Modesto has been launched by the Chamber of Commerce. It is planned to have the Tidewater Southern trains, operating between here and Stockton; the Modesto-Empire trains, which connect Modesto with the Santa Fe at Empire, and the Southern Pacific trains all enter at one station. The Southern Pacific is planning to build a new station here this year. Frank Cressy Jr., succeeded J. W. Corson as president of the chamber.

IRRIGATION PROJECT 10.

RED BLUFF (Tehama, Co.), January 13.—A meeting of the Board of Directors of the Iron Canyon Project Association, consisting of Harry K. Willard, Charles A. Lange, William F. Lunning, G. G. Stice, A. L. Conrad, Ed F. Lennon, Earl L. Gams, J. H. Bradley, John O'Connor, John Trede

and H. P. Andrews, will be held this evening in the Court House.

Hon. E. G. Hopson of the United States Reclamation Service will be present to discuss matters of great importance to the Association.

\$500,000 MARINE HOSPITAL FOR SAN FRANCISCO.

WASHINGTON, January 15.—A new \$500,000 marine hospital building for San Francisco was asked in a bill introduced by Senator Perkins.

WHEN PHOTOGRAPHY WAS DISCOVERED.

Perhaps it is difficult fully to understand the panic into which the followers of the art of painting were thrown on the discovery of photography, since to us the place of the two arts is so thoroughly assured and so assuredly separate. But we must remember that to an unphotographed age the art of painting necessarily meant something quite different from what it means to our own kodaked generation. "Figure to yourself," cries a writer in shrill excitement in the *Moniteur Universel*, January 14, '33, "figure to yourself a mirror, which, after receiving your image, presents you your portrait, as indelible as a painting and much more faithful!" And in rendering the image of nature, how immensely significant becomes the language of the bill which was introduced before the French Chamber to pension M. Daguerre: "To the traveler the apparatus of M. Daguerre would become a continual and indispensable necessity. It will enable them to fix their impressions without having recourse to the hand of a stranger."—Annie Nathan Meyer in *Atlantic*.

SPREAD OF THE SOCIAL CENTER IDEA.

That the social-center idea has come to stay is indicated in a report just compiled by Clarence Arthur Perry, of the Russell Sage Foundation, New York city. Perry shows that in places where the movement has already started the rate of growth is much higher than the rate at which it spreads in new localities. In other words the actual results of the social center are more effective in getting public support than the words of its most enthusiastic champions. The work is getting on a more solid basis. seventy-one cities had, during the winter of 1912-13, paid workers for some form of social center activity, as opposed to forty-four the previous season, and the amount expended in the maintenance of school centers has grown from \$139,535 in 1912 to \$324,375 in the past year. There are 1927 paid workers reported. This, with the volunteer workers, brings the number of persons engaged in social center direction considerably above the 3000 mark. That the general social and recreational possibilities of the "wider-use-of-the-school-plant" movement are making a constantly greater appeal may be seen from the fact that in 981 schoolhouses there were public entertainments and lectures; in 496 school buildings there were open meetings of adults to discuss local problems; athletics or folk dancing in 474 schools; and social dancing in 190. A notable development of "wider use" in

1912-13 was for election and other civic purposes. Balloting during elections took place in 529 schoolhouses; 259 buildings were used for registering voters; and political rallies to the number of 481 took place in school edifices

Proposals.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received by the CITY OF MANHATTAN BEACH, Los Angeles County, California, until 5 O'CLOCK P. M. THURSDAY, FEBRUARY 7th, 1914, for furnishing the material and labor required to construct a MUNICIPAL WATER WORK SYSTEM in and for said City of Manhattan Beach.

Proposals must be submitted on special Bidding Schedules and enclosed in special Bidding Envelopes obtained from the City Clerk.

Each proposal must be accompanied by a certified check on a reliable bank or by Bidder's Bond, in satisfactory surety, for a sum equal to ten (10) per cent of the total amount of the bid. Bids will be received on three (3) different schedules, to-wit:

Schedule "A." The work as a whole.
Schedule "B." Any or all of the required material 1. o. b. Manhattan Beach.

Schedule "C." Any or all of the construction work.

EACH SCHEDULE REPRESENTS AN INDIVIDUAL BID AND MUST BE SUBMITTED IN ITS RESPECTIVE ENVELOPE.

Each a different type or kind of the same material shall be considered an individual bid and must be submitted on separate schedules, but there is no limit to the number of individual bids which may be submitted in the same schedule envelope.

The Plans, Specifications and other documents relating to the work may be seen and examined, without charge, at the office of the City Clerk in Manhattan Beach, or copies of same may be obtained by prospective bidders, for personal use, upon the payment of Eight Dollars and Sixty Cents (\$8.60).

Bidding Schedules and Envelopes will be furnished free of cost to all prospective bidders upon request, provided the request is accompanied by a statement that the Plans and Specifications, and all documents attached thereto, have been examined and are thoroughly understood by the prospective bidder, and that the schedule or schedules wanted be specifically named.

The Board of Trustees of the City of Manhattan Beach reserves the right to reject any or all bids and to waive any irregularities in any or all bids, and it is hereby stipulated that the submission of a bid to the City shall constitute a waiver by the bidder of any obligation on the part of the City of Manhattan Beach to contract for the purchase of any or all material or labor herein advertised for.

THE WORK WILL CONSIST OF PUMPING AND PLACING APPROXIMATELY:

- 1576 feet of 12 inch Pipe.
 - 5501 feet of 10 inch Pipe.
 - 5560 feet of 8 inch Pipe.
 - 1922 feet of 6 inch Pipe.
 - 4783 feet of 4 inch Pipe.
 - 25917 feet of 3 inch Pipe.
 - 5248 feet of 2 inch Pipe.
 - 1945 Tons of Special Fittings.
 - 1 Twelve inch Gate Valve and Case.
 - 2 Ten inch Gate Valves and Cases.
 - 4 Eight inch Gate Valves and Cases.
 - 7 Six inch Gate Valves and Cases.
 - 62 Four inch Gate Valves and Cases.
 - 32 Three inch Gate Valves and Cases.
 - 103 Two inch Gate Valves and Cases.
 - 103 Two Stream Fire Hydrants.
 - 17 One Stream Fire Hydrants.
 - 1 Frame Pump House.
 - 1-315 G. P. M Direct Connected Well Pump.
 - 1-800 O. P. M. Direct Connected Pressure Pump.
 - 1-2000 ft. 21 feet x 178 feet Reinforced Concrete Reservoir.
 - 1 Steel Water Storage Tank.
 - 3000 Metered House Connections.
- Dated at Manhattan Beach, California, January 17th, 1914.

BOOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

CALL Douglas 2944

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT

Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires

Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London
The Ritz, London

The Hyde Park, London

The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hostelryes with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

OTIS ELEVATOR COMPANY

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

“KINNEAR” STEEL ROLLING DOORS & SHUTTERS

KINNEAR STEEL ROLLING DOORS are designed to afford fire protection and for the closure of all openings in which ease and speed of operation and economy of space are considerations. They are adaptable to all classes of new or old building construction and by their use make possible the closing of very large openings which could not otherwise be conveniently covered.

In addition to the above uses, their extensive employment for fire protection and the high degree of efficiency shown by them in actual fires, has caused the KINNEAR Company to produce a shutter of a distinctly fire retardant character. With this end in view, numerous tests extending over a period of five years were made, and effects carefully noted. As a result, we are now in a position to offer for special fire protective purposes KINNEAR Steel Rolling Doors and Shutters of the “Abacus” Construction, all of which bear the label of the “National Board of Fire Underwriters’ Laboratories.”

Special Catalogue showing Abacus Construction can be obtained on application.

Recent great conflagrations have fully vindicated the claim of the “KINNEAR” STEEL ROLLING DOOR to pre-eminence as a fire-stop. Placed side by side with various other forms of fire retardants it has in every case remained in place even after the others were destroyed.

We will consider ourselves favored if allowed to explain and make quotations on any constructions meeting your definite needs.

**We have just received from the press a new

Editorial Comment.

The status of the Hetch-Hetchy water supply was a hopeless tangle till Engineer Freeman made his report on the subject. Then the atmosphere was clarified, a layman could understand the subject. Then the atmosphere was formulated whereby the city could get a water supply.

In an analogous way the attitude of the United States in regard to Alaska has been made plain by Secretary Lane in his report. Under Baillinger and former Secretaries of the Interior there was a lot of report and divers contentious and nobody seemed to know just what the situation was. The present Secretary in his report for the fiscal year ending June 30, 1913, has clearly stated the condition of that country, the immense wealth that it contains and the duty that the United States owes to this vast country in the frozen zone.

The government has withdrawn Alaska from the possibility of being exploited by the money interests of the country. The Guggenheim interests are no longer a menace to the coal lands and the timber and mineral wealth of the country. But as yet the government has done nothing to substitute a safer guardian for the public interests and for the development of the country.

Secretary Lane suggests that a Board of Directors should be established into whose hands would be given all the national assets of the country, its lands, its forests, its mines, its fisheries, its waterways and railroads. This board would have nothing to do with the internal affairs of the country and would exercise no powers save such as Congress might grant over the property of the United States.

The arguments set forth by the Secretary in favor of this policy are briefly these: In the first place this board would advise Congress what to do from a first hand knowledge of conditions. And it would bring authority under one head so that there would be some definite responsibility and unity of action. As matters stand the control of land is in one department, of forests in another, of roads in another, of fisheries in a fourth, of railroads in another department and so on. And to show to what ridiculous ends this subdivision is carried the Secretary cites the fact that the care of brown bears is in one department and that of black bears in another. No wonder that there is no satisfactory administration of government under such conditions. One would seem to think that authority had been purposely sub-

divided to render it inefficient and make it impossible to fix responsibility.

The Secretary very appropriately states that there can be no satisfactory administration of land laws or of any other laws at a distance of 5000 miles. That Alaska's opening and improvement should be treated as one problem and that "the eye that sees the need should be near the voice that gives the order."

During the forty-six years that we have owned Alaska it has added to our wealth more than \$500,000,000 through the yield of its mines, fisheries and furs. Secretary Lane believes that the territory should be developed so far as possible out of her own revenues and resources. The funds raised from the revenues derived from her mines, her forests, her fisheries and her furs to be used in the construction of railroad and telegraph and telephone lines and for any other purpose which would make her resources more available to the world.

A great deal of criticism has been made of President Wilson concerning his attitude on the Mexican situation, by the socialists. Their idea seems to be that the peons should be restored to the land of their fathers and that the lands that have been taken by the oligarchy of the Mexican republic should be restored to the place they originally belonged. They say that the peons do not want progress, that they want to live as their fathers did, till the soil to get enough to exist on and continue in the way of their fathers.

This may all be a pretty theory but it stops short of the one essential of all government—and that is protection of life and property. How are bandits to be prevented from robbing their neighbors, and how is crime to be prevented? By what magical transformation are all people going to obey the moral law? Suppose every body was restored to their lands who would protect them in their rights of property and guarantee them personal safety or prevent them from being murdered by their neighbors?

These socialistic theories are usually half baked and leave out many essential elements of human nature and political philosophy. The preamble to the United States Constitution recites the purposes for which the constitution is enacted to be "to establish justice, insure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity." This sort of constitutional government the President is seeking to have established in Mexico. How best to secure it is the great problem which seems well nigh impossible of solution. In the meantime every fly-up-

the creek philosopher is telling how it could be done over night. Willie Randolph Hearst is exhorting about the American people and every jawsmith is having his say. So far the President has the support of the great mass of the thinking people of the country. The majority think he is of the right mind and that he knows more of the situation than all his critics combined.

Among the unemployed in Los Angeles it was found that the men accepted any job under any conditions, at any wages, and that the women likewise accepted any job under any conditions, at any wages, provided it was something else than domestic service. Many of them would not accept domestic service at all, though plenty of positions were offered at good wages. This is perhaps not so surprising as the other fact that of those who were willing to accept domestic services nearly all were extremely particular as to the nature of the place accepted. A woman looking for clerical work took the first place she could get and asked no questions. Another woman looking for washing, scrubbing or similar hard work likewise took the first place she could get and asked no questions. But every woman looking for domestic work scrutinized the conditions of the places very critically and usually refused several places before being induced to accept one.

This at first blush would seem to be a serious commentary on the conditions imposed by many employers in domestic service. Possibly, however, some of the difference is inherent in the very nature of the jobs. All other forms of work affect only a portion of the life of the worker. Almost any conditions are endurable for eight hours a day. The social stigma which has somewhat attached itself to domestic service doubtless keeps many otherwise willing workers out of it. But even among those who are not deterred by this social stigma there is more disposition to distinguish between one job and another than in any other occupation.

Another interesting sidelight on domestic service as shown by the report that in Los Angeles servants working for more than \$40 a month are never out of a job, while large numbers of servants working for less than \$30 a month are chronically unemployed in the face of the fact that more than an equal number of employers of such servants are chronically without help. The two classes of course are those who have learned the business and those who have not. For the cook who can cook, the waitress who can wait, or the general housekeeper who can do house work there is always a job at high wages. For the servant who wants a place but will not condescend to learn the trade there is also a place, but there is usually dissatisfaction on both sides.—Fresno Republican.

The San Francisco Examiner has become the champion for the abolition of prize fighting. Editorially it comes forth for the abolition of the brutal sport. Which reminds one that if the public was interested in the sport as it was a few years ago the Examiner would hire all the literary men in the country and devote four-fifths of its space.

The Bulletin, for instance, is leading the hysterical wave that seems to be sweeping over the country in regard to crimes and criminals and the white slave problem. Just now the people are standing in line to see the exhibition of moving pictures as to the inside of the white slave traffic and a curious mob falls over itself to see a lot of pictures that an intelligent person ought not to look at if he was paid a dollar an hour for his time.

Anything to get a circulation and make money for the paper. Such has become the office of the "great dailies" as they are called. If it is to debauch the public taste and espouse a crime in order to fill its purse the average newspaper will do it. And the present state of the theatre, the moving picture shows, and the confessions that run in the papers that cater to the ever changing taste of the multitude seem to indicate the public taste is not improving at any alarming rate of speed.

Edgar Lucien Larkin, the astronomer at Mt. Lowe observatory, has come out with the statement that it is impossible to predict the appearance of sunspots and as a consequence Father Ricard's theory as to the cause of storms must of necessity fail. If what Mr. Larkin says is true that the records of years past that have recorded every sunspot that has ever appeared during the time show that there is no law by which the appearance of sunspots can be foretold with any degree of accuracy it would necessarily follow that storms depending upon such phenomena for their cause could not be foretold.

This controversy will have some good effect in that it will call popular attention to the study of astronomy and the almost incomprehensible mathematical laws by which the movements of the majestic suns and worlds are determined.

The question of Japanese exclusion is again up before Congress and it is said that the Baker bill has been suppressed for the time being. It is a strange thing that the people of the Eastern States and particularly the Eastern press wish to decide questions off hand in which the people of California are interested and are particularly hostile to us. In the case of the Dutch-Hetchy water supply, for instance, the general attitude of the Eastern press was that San Francisco was a burglar and seeking to steal by the method of a highwayman the property that belonged to the National Government. And in this they were led by the great and only John D. Works, Senator from the great State of California.

It is a strange thing that there is no objection by the Japanese against the action of Canada in regard to exclusion. In the case of Canada the laws are much more drastic. But here the Japanese are evidently backing on the sentiment of the Western people and the Eastern press and their power in Congress and in the meantime California has to bear the burden imposed upon it by a prejudiced press.

The National Geographic Magazine for December has a leading article

upon the Religious Penances and Punishments Self Inflicted by the Holy Men of India. It is illustrated with seventy-five photographs showing the strange and often horrible self torture that these religious fanatics inflict upon themselves. It is interesting to know that such sects still exist in a land where religious philosophy and metaphysical research has been carried to such a degree of refinement.

Generally speaking religious ideas have changed materially in the last half century. Mechanical and industrial progress and universal education have led the average mind to view man in his relation to the world at a different angle and the scientific investigations of modern times have rendered untenable many preconceived ideas of former years. This adjustment is aptly referred to in an editorial of the Kansas City Star entitled "The Sea of Faith."

In the middle of the last century Matthew Arnold voiced the doubt that engulfed the scientific men of his time in his poem, "Dover Beach."

The Sea of faith

Was once, too, at the full, and round
Earth's shore

Lay like the folds of a bright girdle
furled.

But now I only hear
Its melancholy, long, withdrawing roar,
Retreating, to the breath
Of the night wind, down the vast
regions drear

And naked shingles of the world.

In the sadness of these lines is embodied the tragedy of so many of the men of his generation who were brought up in a faith which they were unable to make their own when the time came to work out their independent philosophy of life. It was an age of disillusionment, in which many a heart cried out, "They have taken away my Lord and I know not where they have laid him."

But "Dover Beach" belongs definitely to the middle of the last century, when it looked to many men as if the foundations of their beliefs were crumbling. In recent years a change has come in the mood of the men of the Arnold type. It might be called the practical need.

Men have discovered that as they worked, as they took up the duties of everyday life, as they met their obligations to their neighbors, the tide of faith came back. This was a fact that had to be taken into the account by the philosophers and psychologists. They saw that man really was a religious animal and that his devotion to ideals was as much a part of his life as his eating and sleeping were.

The careful studies of men of scientific temper, like Royce and James in the United States, and Bergson and Eucken abroad—to say nothing of a host of lesser men—have explained the reality of the religious life. "Explained" is the word, rather than "demonstrated." For this reality is experienced, not proved, by logic. So today more than ever before, the naked shingles of the world are suffused with light and everywhere hosts of men and women are working to realize those ideals which the prophets of all ages have proclaimed.

ELEMENTS ON STONE.

**Effect of Heat and Corrosion by Gases
as Determined from Experiments
with Building Stone.**

By Wm. A. Parks, B.A., Ph.D.*

From Report on the Building and Ornamental Stones of Canada, published by the Canadian Department of Mines, Ottawa.

The atmosphere consists essentially of oxygen, carbonic acid gas, and nitrogen; the last of these is practically inert, but both the oxygen and carbonic acid act as chemical agents towards effecting the destruction of stone. As an accessory constituent of the atmosphere, water is always present; on setting from the atmosphere the water, whether as rain, dew, snow, or hoar frost, is charged with a certain amount of both oxygen and carbonic acid gas. The water, therefore, which enters the interstices of stone, or which may act on the surface only, is not pure water but a mild acid and an oxidizer as well. It is to the presence of these chemical agents in the water that is due the oxidizing of the uncolored salts, and also the gradual change of silicates, such as feldspar, into a soft clay-like material. Pure water is able to dissolve limestone scarcely at all, but ordinary rain water, with its little charge of carbonic acid, effects the solution of limestone with comparative ease. The great caves of Kentucky have been cut out of beds of limestone by the solvent water of percolating rain water. It is not to be expected that buildings constructed of limestone will escape. As there is no means of avoiding the carbonic acid, the builder must exercise all possible precautions to guard against the soaking of water into the walls of the building. This simply brings us back to the question of porosity which has already been considered. Other things being equal, a porous limestone will dissolve more quickly than a compact one. The percentage of carbonic acid in the atmosphere of large cities is slightly greater than in the open country, the difference, however, is much less than is ordinarily supposed. The average volume per cent of carbonic acid gas in the atmosphere is 0.03 to 0.04 per cent. In London on clear days it is 0.038 per cent, on dull days 0.045 per cent, and on cloudy days 0.051 per cent. The direct action of the gas cannot therefore be greatly different in cities and in the country. Experiments have been made to determine the effect of an atmosphere of carbonic acid in the presence of moisture on samples of limestone and marble. The tables published show little deterioration in the short period of time over which the experiments extended.

As it is not only in a moist atmosphere but when the stone is soaked with water that the carbonic acid produces its injurious effects, it was decided to determine the corrosive action of this material on specimens immersed in water. For this purpose cubes were prepared having an approximate size of one inch and therefore presenting six square inches to the action of the solvent. The cubes were dried at 110 degrees C., and carefully

weighed; they were then measured and the exact superficial area determined. The specimens were suspended by threads in a large bottle filled with distilled water into which a stream of carbonic acid gas was conducted. The water was renewed every four days and the action allowed to continue for four weeks. At the expiration of this time the specimens were removed washed in distilled water and rubbed with the tips of the fingers to remove loose particles, as such grains constitute an essential loss as well as the particles which fall from the cubes while suspended in the bottle. After thorough drying, the specimens were weighed and the loss noted. A very interesting and valuable series of figures was obtained, which is believed to express, as well as any single set of results can, the relative durability of the different stones tested. In the table given in the appendix the loss is expressed in grams per square inch of surface exposed. While the actual loss is in itself small in most cases, the figures regarded in a comparative way show a wide divergence in the resistance of the different stones to the action of carbonic acid, which must be regarded as the most potent agent in promoting the decomposition of stone. An analysis of the table shows that the limestones and dolomites varied from 0.005 grams to 0.33 grams, that the sandstones show a range from 0.0018 grams to 0.1135 grams, and that the crystalline limestones and dolomites vary from 0.0019 grams to 0.9 grams. It is interesting to note also that the granites and gneisses were effected to an extent ranging from 0.000184 to 0.0045 grams per square inch of surface.

The change in color brought about by the action of the carbonic acid is very distinct and corresponds closely with the alteration resulting from natural weathering of long duration in all cases known to the writer; it is inferred, therefore, that this test furnishes a ready means of determining the change in color that will take place on exposing a stone to the weather. A table is inserted in the appendix expressing the change in color as thus determined.

It is well known that dolomite is much less easily dissolved by carbonic acid than calcite and it would seem therefore that dolomite is the more durable material. In all the tests made the dolomites lost far less in weight and suffered less change in color than the limestones, in spite of which, authors state that it has been proved by experience that limestones are less durable than dolomites. It is apparent that one must remember the nature of the stone when using these figures for comparative purposes. It would be absurd to state that a limestone which loses ten times as much as sandstone is ten times less durable. But, it is believed that, within the group of limestones, those which suffer the greater loss are the less durable.

Likewise, the sandstones which lose a greater amount are less durable than those in which the loss is not so large.

In cities where large amounts of coal are consumed the air is contaminated with sulphurous acid which is a much stronger corrosive than carbonic acid. It is advisable to ascertain, in the case of stone intended for use near railway stations and manufacturing, its resistance to the action of such limes. Buckley performed this test by placing small cubes of stone, carefully dried and weighed, in a large glass bottle in which smaller bottles of water with open mouths served to keep the atmosphere moist. Sulphurous acid gas was then introduced, and allowed, with occasional renewals, to act on the stone for 44 days. The specimens were then removed, washed, dried, and weighed and the loss noted. Discoloration, development of cracks, etc., were also observed. Buckley found that some of his samples increased in weight while others lost; they were all, however, more or less discolored and etched.

The Custom House at Niagara Falls, Ont., is constructed of Queenstown limestone. This stone, in most structures, presents a good appearance after many years of exposure, but in the building mentioned, the dressed work shows bad exfoliation as well as corrosion along the bedding planes of the stone. There is little doubt that this unfortunate result is to be attributed to the sulphurous acid fumes from the locomotives of the nearby Michigan Central Railway.

Effect of Heat on Stone.

Like nearly all substances, stone expands when heated and contracts on cooling; the frequent repetition of this process from day to day cannot fail to impair the strength of the stone. The deterioration usually manifests itself by scaling and exfoliation. In some cases, also, incipient cracks are developed which permit of the more ready escape of water thereby facilitating decay. In climates where there is a considerable difference between the temperature of night and day, more attention must be given to the selection of stone of slight expansibility than in more uniform climates. Another injurious effect of the expansion and contraction is to open the joints between contiguous blocks of stone. Small as the opening is, it is sufficient to allow the entrance of water with all its harmful effects. The amount of expansion of the different types of stone has been determined by different authors. The figures obtained by W. H. Barlett are most commonly quoted as follows:

In. per foot for each degree
Granite expands 0.00004825
Marble expands 0.00005668
Sandstone expands 0.00009523
It should also be noted that delicate experiments have proven that stone once expanded by heat never quite contracts to its original size. The difference may be only infinitesimal, but

It is sufficient to show that the stone has suffered some permanent injury. Numberless repetitions of the same treatment cannot fail to weaken the whole stone throughout its mass. It is generally considered that fine grained and homogeneous stone is less liable to injury than coarser and less uniform varieties.

The excessive heating of stone when subjected to fire causes a relatively large expansion, followed by rapid contraction. The change may be extremely sudden, as when the flow from a fire hose comes in contact with the hot stone. The fire resisting properties of stone are therefore a matter for serious consideration on the part of builders, particularly in large cities. It may as well be plainly stated that no stone will pass through a serious fire uninjured. The amount of injury resulting from a fire of given intensity varies greatly with the character of the stone. Some stones withstand fairly well a temperature as high as 1200 degrees F., while others are totally destroyed at a much lower temperature. With regard to the heat resisting power of the different types of stone there seems to be some difference of opinion. It would seem, however, that limestone and marble, if the heat has not endured long enough to calcine the stone throughout, are more durable than granite and sandstone. Certain siliceous examples of the sandstones and conglomerates are, however, able to withstand a very high temperature.

Tests to determine the fire resisting power of stone are made by subjecting prepared cubes to a temperature of 500 degrees F., which is gradually increased up to 1200 degrees or 1500 degrees. The specimens are then allowed to cool naturally or they are rapidly cooled by being plunged in water. Buckley found that all three types of stone were practically destroyed at temperatures between 1200 degrees and 1500 degrees F.

CIVIC OWNERSHIP PAYS IN SEATTLE.

By Edward P. E. Troy.

Seattle may just boast of possessing the largest municipal electric plant in the United States, with an income greater than any similar American municipal undertaking. The vote of its people last year, approving of the purchase of the Lake Cushman and White River power sites, will enable that city soon to operate one of the greatest electric plants in the world. It will furnish at cost 215,000 horse power for the lighting of the city and its homes, and the operation of its manufacturing industries, thus insuring the commercial supremacy of that place.

From the beginning of the city in 1869 its charter has provided for municipal lighting. In 1902 the voters approved of a bond issue for that purpose, and in two years the plant was in operation. The private company was charging 20 cents per kilowatt for residence lighting. Immediately after the city commenced to build its plant this rate was reduced to 12 cents.

The city commenced supplying current for 8½ cents; in 1911 reduced its charge to 7 cents, and last year to 6

cents. The company has been forced to follow the city in these reductions. As a result of municipal ownership, the people of Seattle are paying today one dollar for the same quantity of electricity that they had to pay three dollars for to the private company.

The city plant has also established a rate of 3 cents for cooking, washing, sewing, ironing and other domestic appliances. The people of Seattle, through municipal ownership, are furnished the great modern convenience—electricity—for all purposes in the home at such a low cost as will permit its use by every one.

There are over 800 arc and more than 5,000 other electric lamps in the municipal street lighting system. The cluster lights alone illuminate more than twenty-five miles of streets. The company formerly furnished 213 arcs at \$66 per year, and 1,891 other lights at \$15. The municipal plants get \$54 for each arc and \$9.60 for incandescents. It will be seen that the company charged 66 per cent more than does the city for incandescents, and 22 per cent more for arc lamps. Thus municipal ownership has enabled Seattle to greatly increase its street lighting, making it one of the best lighted cities of America. Portland, San Francisco and Los Angeles could do as well if they became free from the corrupt influence of private lighting companies.

The total revenue of the plant for 1911 was \$727,384, and the operating expenses, including interest, \$315,016. Of the profit, \$161,581 was set aside for depreciation, and the balance put into new construction. The power lines are being connected with those of the Tacoma municipal electric plant, insuring continuous service to each city should either of the plants meet with any accident. This will save the building of steam reserve plants by either city.

The entire plant was built by City Engineer R. H. Thompson, and his assistant, J. D. Ross, the latter of whom is now in charge of the plant. Mr. Ross gives the loyal citizens of Seattle credit for the splendid success of this plant, in spite of vicious opposition of the corrupt corporations opposing.

ELECTROLYTIC EXTRACTION OF COPPER IN CHILE.

German electrical apparatus is now installed in a plant located in Chile for extraction of copper from the ore, and the works are said to be operating quite successfully at present. It makes use of the new Siemens-Schuckert electrolytic process. The electric station is situated at Cobija, on the coast and 180 miles from the copper mines, which are inland, and the current is sent to the copper extraction plant at the mines by a power line. The electric station is steam operated, and is equipped with 16 boilers which are fired by oil fuel. Four steam turbines are each coupled to an alternator of 15,000 horse-power size which delivers 5,000 volts, and step-up transformers raise the voltage to 110,000 volts for operating the power line. At the copper mines is a sub-station containing motor generator sets of 3,000 horsepower size which receive the current from the line and convert it to 250-190 volt current for use in the electrolytic tanks—Scientific American.

California has untold quantities of

copper ore. The only question is smelting and extraction of the metal from the ore. Power is cheap in the high Sierras where the ore is found and if a practical means of the extraction of the metal by electrical process has been perfected there is no reason why a great industry should not be developed.

THE LEANING TOWERS.

There is an Italian story of an invalid old gentleman who by long looking at the leaning tower of Pisa came to the delusion that the tower was perpendicular and everything else was slanting. A friendly priest, who sought to dissuade him, asked a favorite grandchild of the old man to say whether the tower was straight.

"Of course it leans," the little boy told the grandfather.

Mr. Wilson in Washington desires the fresh view. By the concentrated, invalid view of professional Washington the tower is perpendicular, and everything else slants.

Specialists in any department of thought or action assume that only they are competent to judge correctly of their specialty. But they, too, have their crooked towers that, by long gazing on, they think are straight. It was not the old generals who changed the rules of war. It was the young Bonapartes who did not know the rules of war—or, rather, who did know them well enough to know that they "leaned."

Practitioners of the law are likely to despise the rash layman who criticizes their tower. It stands for "the accumulated wisdom of the centuries." It is impious to say it leans. If it is not in true proportion it is only because the life surrounding the tower has become oblique.—Kansas City Star.

A CITY OF HOTELS.

Of the building of hotels, as of theatres, there is no end. The newest, about to be opened, cost \$10,000,000, covers an entire block, has 26 stories and 1,000 bed rooms, each with a bath. If the next ten years repeat the story of the last ten years, the new hotel will soon take its fixed place among the leading hotels of the city and ten or a dozen newer ones will arise to dispute public favor. New York has learned to view calmly the wonders of its great buildings; in the rapid change of conditions they rapidly lose their air of novelty.

One huge hotel that will house a whole townful of people in luxury seems to make no difference. Old ones go and new ones come to meet growing needs. It is all part of the normal expansion of the first city of the country. Neither London nor Paris nor Berlin nor any other European capital has provided on the same scale splendid accommodations for travelers or its own people.

In the old days the foreign visitor used to laugh at the United States, where every hotel was called a "palace." So far as present-day New York is concerned, the old gibes have lost their point. In their equipment and arrangement, in their comforts, conveniences and provisions for entertainment, our hotels have become more luxurious than any palace both in appointments and prices.—New York World.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

OAKLAND, CAL.—Apartment house, 2 story and base, frame, \$10,000. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The building will be erected on 31st street near San Pablo avenue, and will be arranged for suites of two and three rooms. All apartments will have private bath rooms and wall beds. Interior finish will be of pine and redwood. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in tile and marble. Gas grates and tile mantels will be used. Exterior of the house will be covered with rustic and shiplap. Plans are now being completed.

RICHMOND, CONTRA COSTA CO., CAL.—Apartment house, 2 story and base, brick, \$12,000. Architect, James T. Nabrett, Richmond. Owner, O. E. Liddell. The building will be erected at the corner of Agnew and Richmond avenues, and will be arranged for two, three and four room apartments. The interior will be finished in pine and redwood. Some hardwood floors will be used. There will be steam heat and a hot water system. Bath rooms will be finished in tile wainscot and will have composition floors. Wall beds will be installed. Exterior of the building will be faced with pressed brick. Plans are now nearly complete and figures will be asked for shortly.

SEATTLE, WASH.—Apartment house, 3 story and base, brick, \$35,000. Architect, none. Owner, John Hakanson, 2725 Nob Hill avenue, Seattle. The building will be erected at the corner of Spruce and 12th avenue, and will cover an area of 50 by 120 feet. Plans provide for sixteen suites of two, three and four rooms. Interior finish will be of pine and redwood, with hardwood floors in the living rooms and halls. There will be steam heat, an oil burning system, vacuum cleaning and hot water supply. Bath rooms will have tile wainscot and composition floors. All suites will be equipped with wall beds. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. Bids will be taken in about two weeks for materials.

APARTMENT HOUSES adn, ek

LOS ANGELES, CAL.—Apartment house, 2 story and base, brick and steel, \$40,000. Architects, Blanchard, Green & Tifal, Van Nuys Bldg., L. A. Owner, B. F. Stevens. The building will be erected on Santee street near 16th, and will cover an area of 50 by 140 feet. Interior has been arranged for a total of 78 rooms, which will be divided into two and three room suites. All apartments will have private baths and wall beds. Interior finish will be of pine with some hardwood panels and oak floors. Plans provide for steam heat, a hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor under

the superintendence of Webb & O'Neill, Lankershim Bldg., L. A.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick and steel. Cost not stated. Architects, R. D. King and E. C. Taylor. Consolidated Realty Bldg., L. A. Owner, Elias Sheoudy. The building will be erected at the corner of 38th and Main streets, covering an area of 50 by 130 feet. There will be a total of 65 rooms arranged in two and three room suites. The first floor will contain three stores besides the entrance. Interior will be finished in pine with elm panels and hardwood floors. Plans provide for steam heat, a vacuum cleaning system, wall beds and hot water plant. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SACRAMENTO, CAL.—Apartment house, 2 story and base, frame, \$10,000. Architect, none. Owner, A. W. Norris, 409 21st street, Sacramento. The building will be erected on 18th street, and has been arranged to contain four modern suites of three and four rooms. Interior finish will be of pine with oak floors in the living rooms. All suites will have private bath rooms and wall beds. There will be gas grates and tile mantels. Bath rooms will have composition floors and tile wainscot. A central heating system and hot water supply will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, reinforced concrete, \$60,000. Architect, Malnew O'Brien. Foxcroft Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Devisadero and Duboce streets and will cover a large area. Suites will contain two, three and four rooms with bath. Interior finish will be of pine and hardwoods with oak floors in the principal rooms. All apartments will be equipped with wall beds. Plans provide for steam heat, elevator service, a hot water system and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Apartment house, 4 story and base, reinforced concrete, \$22,750. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, J. D. Reite. The building will be erected on the south side of Post street west of Larkin, having a frontage of 25 feet by a depth of 120 feet. There will be pine and hardwood panels with some oak floors. Plans provide for steam heat, an automatic elevator and vacuum cleaning. All suites will be equipped with wall beds and will have private bath rooms. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with cement plaster.

Plans are complete and the work will be done by Day Labor. All materials are being purchased.

Contracts Awarded.

SEATTLE, WASH.—Apartment house, 6 story and base, reinforced concrete, \$75,000. Architect's name not given. Owner, Mr. Dow. Contractor, David Dow, 21st and Spruce streets, Seattle. Contract price, \$75,000.

BANKS.

REDONDO BEACH, LOS ANGELES CO., CAL.—Bank, 2 story and base. Class A construction, \$25,000. Architect, L. R. Pemberton. Auditorium Bldg., L. A. Owners, Farmers' and Merchants' National Bank. The building has been designed in the classic passad uña paay aq tñw pur øtñs brick and terra cotta. Walls and floors will be of reinforced concrete. Interior partitions will be of hollow tile and metal lath and plaster. The entire first floor will be occupied by the bank, and will be finished in hardwoods, marble, ornamental plaster and bronze grilles. Upper floor will be subdivided into ten offices finished in birch. There will be steam heat, a vacuum cleaning system and metal window sash and frames. Special vault work is also called for. Plans have been revised and figures are now being taken.

BRIDGES AND DAMS.

Contracts Awarded.

SAN FRANCISCO—Pier construction, \$148,215. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, Healy-Thibbitts Construction Co., S. F. Contract price, \$148,215. Other figures submitted for this work will be found under the heading of San Francisco in this issue.

CHURCHES.

SAN FRANCISCO—Church, reinforced concrete construction, \$50,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, Star of the Sea Church. The building will be erected at the corner of Geary and 8th avenue, and will be designed in the Mission style. Interior will contain an auditorium seating 750 people, Sunday school rooms and social rooms. Interior finish will be of pine and redwood. Exterior of the building will be faced with cement plaster. Roof will be of red clay tile. Working drawings are being prepared.

REDONDO BEACH, LOS ANGELES CO., CAL.—Church, 1 story and base, brick, \$12,000. Architect, Frank T. Kegley, Consolidated Realty Bldg., L. A. Owners, Roman Catholic Church. The building will cover an area of 40 by 166 feet and will contain an auditorium seating 300 people, vestry, sacristy and social hall. Interior will be finished in pine and redwood. A number of art glass windows will be used. Exterior will be faced with blue pressed brick. Roof will be of clay tile. Plans are being prepared and figures will be called for about the middle of February.

SEATTLE, WASH.—Church, 1 story and base, frame, \$10,000. Architects, Wilcox & Sayward, Central Bldg., Seattle. Owners, Keystone Congrega-

tional Church. Work will be started at once on the new building to be erected on 31st street. There will be a main auditorium seating 300 people, pastor's study and Sunday school rooms. Interior finish will be of pine throughout. A central heating system will be installed. Exterior of the building will be covered with rustic and shiplap. The work will probably be done by Day Labor. Some art glass is specified.

CITY MORGUE.

SAN FRANCISCO—Morgue. Class A construction, \$31,320. Architect, City Department of Architecture. Temporary City Hall. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works show T. W. McClenahan low at \$34,330. He will probably be awarded the contract. A complete list of the figures received will be found under the heading of San Francisco in this issue.

♦ FACTORIES & WAREHOUSES.

SAN FRANCISCO—Engine house and stables, reinforced concrete and frame Cost not stated. Architect, Edmund Kolofrath, 560 Bellvedere street, S. F. Owners, Merchants Ice and Cold Storage Co. These buildings will form a part of the new plant which is to be erected at the southeast corner of Lombard and Montgomery streets. The engine house will be of reinforced concrete while the stable building will be of frame construction. Plans for a large six-story ice and cold storage plant have also been completed and will go out for figures at once.

LOS ANGELES, CAL.—Warehouse, 1 story and base. Class A construction. Cost not stated. Architects, Train & Williams, Exchange Bldg. L. A. Owners, Bradford Baking Co. This building will be erected at 401 North Avenue 20, and will cover an area of 50 by 165 feet. Walls and floors will be of reinforced concrete. There will be metal lath and plaster interior partitions, metal window sash and frames. Interior finish will be of pine. A covered platform 30 by 165 feet will also be constructed. Exterior of the building will be faced with cement plaster. Modern plumbing and electric work are specified. Plans are complete and figures are being taken.

LONG BEACH, LOS ANGELES CO., CAL.—Ice and cold storage plant, 2 story, brick and frame, \$65,000. Architect, Paget Engineering Co., Central Bldg. L. A. Owners, People's Ice and Cold Storage Co. The plant will be erected at the corner of Ocean Park avenue and 3rd street, and will cover an area of 200 by 125 feet. The first story will be of brick construction with plaster exterior, the second story, which will cover half the area, will be of frame construction with plaster over metal lath on the exterior. A complete equipment of refrigerating machinery will be installed, a well drilled and pumping plant put in. The company will manufacture ice, distilled water, ice cream and soda water. Plans are being prepared.

Contracts Awarded.

GRESHAM, ORE.—Factory, 1 story and base, reinforced concrete, \$25,000. Architect, P. Chappell Browne, Mohawk Bldg., Portland. Owners, Beaver State Motor Car Co. Contractors,

James P. Taylor Co., Couch Bldg., Portland. Contract price, \$25,000.

♦ FIRE HOUSES AND JAILS.

OAKLAND, CAL.—Jail plumbing. Cost not stated. Architects, Palmer & Hornbostel, New York and City Hall Bldg., Oakland. Owners, City of Oakland. All bids received sometime ago for the furnishing and installation of special jail plumbing were rejected and new figures are being called. Bids will be opened on January 29th. Plans and specifications can be secured from the architects.

SEATTLE, WASH.—Fire station and jail, 3 story and base, reinforced concrete, \$100,000. Architect, D. R. Huntington, Seattle. Owners, City of Seattle. A resolution has been introduced by Supervisor Pierce calling for a bond election to secure funds for a combination fire station and jail in the Denny Hill District. Preliminary plans of the architect accompanied the resolution. Further mention will be made of the work.

♦ FLATS.

SAN FRANCISCO—Flats, 2, 2 story and base, frame, \$5,000 each. Architect, Herbert A. Schmidt, Royal Insurance Bldg., S. F. Owner, Charles J. U. Koenig, 520 Church street. These two buildings will be erected on the north line of Broadway, east of Larkin streets. Each has been designed to contain two modern flats of five and six rooms each. Interiors will be finished in pine with some oak floors and elm panels. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. There will be automatic water heaters. Exteriors will be covered with rustic, cement plaster on metal lath and a pressed brick veneer base. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architects, Rousseau & Rousseau Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected on the south side of Greenwich street west of Larkin, covering an area of 27½ feet by 46½ feet. There will be two flats of five rooms each. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. Bath rooms and kitchens will have tile wainscot. Exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Frediani Bros. The building will be erected on Folsom street near Third, and will be arranged for one store on the first floor and two flats on the upper floors. Interior finish will be of pine and redwood. Gas grates and tile mantels will be used. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with shiplap and rustic. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, James Flanagan, 3342

Army street, S. F. The building will be erected on Serpentine street, east of Mission, covering an area of 25 by 53½ feet. There will be four flats of five rooms and bath each. Interiors will be finished in pine and redwood with some oak floors. Each living room will have an open fire place and tile mantel. Bath rooms will have composition floors. Kitchens and baths will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by day labor. All materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,200. Architect, none. Owner, E. F. Maxwell, 738 Clement street, S. F. The building will be erected on the north side of Clement street east of 9th avenue. The first floor will be occupied by a store, while the upper floor will be arranged for a five-room flat. Interior of the flat will be finished in pine and redwood with some oak floors. There will be an open fire place and tile mantel. Bath room and kitchen will have tile wainscot. There will be patent store fronts. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$2,500. Architect, none. Owner, W. G. McDiarmid, 56 Ellsworth street, S. F. The building will be erected on the north side of 26th street, west of Dolores, covering an area of 27 by 32 feet. Interior will be finished in pine and redwood. There will be two small flats. Bath rooms and kitchens will have tile wainscot. Open fire places and tile mantels are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flat alterations, frame construction, \$2,000 and \$3,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. Plans are complete and figures are now being taken for the alteration of two flat buildings. Included in the work will be new store fronts, plumbing, electric work, plastering, interior finish and exterior painting and plaster work.

♦ GARAGES.

Contracts Awarded.

SEATTLE, WASH.—Garage, 2 story and base, \$20,000. Architect, none. Owners, Waterhouse-Sands Co., Contractors, Sound Construction and Engineering Co., Lowman Bldg., Seattle. Contract price, \$30,000.

♦ GOVERNMENT WORK AND SUPPLIES.

Structural Steel.

Under advertisement appearing elsewhere in this issue for furnishing fabricated structural steel, etc., for the naval station, Pearl Harbor, Hawaii, bids to be opened February 7 at the bureau of yards and docks, Navy Department. The specifications provide as follows:

It is the declared and acknowledged intention and meaning to provide and

secure the fabricated structural steel, reinforcing rods, with castings and pipe handrails for stairways required for five shop buildings, viz. Boat storehouse, pattern shop, paint shop and rigging loft, steel storehouse and metal and lumber storehouse, properly marked, bundled, and delivered, out not erected. No anchor bolts will be required under this contract.

The material required for the various buildings is comprised in the following general description:

(a) Paint Shop and Rigging Loft.—Structural steel for trusses, purlins, struts, diagonal bracing, columns, second-floor framing, side and end wall girts, window framing, stairs, elevator shaft, and door slides and hangers; reinforcing rods for second floor; castings for stair treads, and pipe railings for stairs.

(b) Pattern Shop.—Structural steel for roof, monitor, stairs, and window framing in monitor, and reinforcing rods for floors, beams, girders, walls, and columns; cast-iron treads for stairs, and pipe railing for stairs.

(c) Steel Storehouse. — Structural steel for trusses, purlins bracing, columns, wall girts, window framing, and crane runway.

(d) Metal and Lumber Storehouse.—Same as (c) above, omitting crane runway.

(e) Boat Storehouse.—Same as (c) above.

The estimated weights of structural steel, including castings and pipe railing for the various buildings are as follows:

Paint shop and rigging loft, 520,800 pounds; pattern shop, 195,000 pounds; steel storehouse, 504,800 pounds; metal and lumber storehouse, 382,000 pounds; boat storehouse, 591,000 pounds; total, 2,193,600 pounds.

Weights and lengths of reinforcing rods required:

Paint shop and rigging loft: Two hundred and thirty 4 1/2-inch round rods 21 feet 6 inches long, 635 7-16-inch round rods 16 feet 6 inches long, and 345 7-16-inch round rods 24 feet long.

Pattern shop: Eight hundred and twenty 3/4-inch rounds 21 feet 6 inches long, 1,230 3/4-inch rounds 23 feet long, 116 1/2-inch rounds 15 feet long, 10 1/2-inch rounds 22 feet long, 375 3/4-inch rounds 21 feet long, 5 3/4-inch rounds 15 feet long, 15 3/4-inch rounds 35 feet long, 475 3/4-inch rounds 20 feet 9 inches long, 155 3/4-inch rounds 24 feet long, 225 1-inch rounds 20 feet 6 inches long.

Approximate total weight reinforcing rods 79,000 pounds.

Fort Warden, Wash., Bakery.

The contract for the construction of an addition to the bakery at Fort Warden, Wash., has been awarded to Koken & Mowat, of Seattle, Wash., at prices as follows: Construction, \$1,218.71, plumbing, \$415; heating, \$560; wiring, \$48; fixtures are to be in accordance with government specification of June, 1910.

Albany, Ore., Post Office.

As previously reported, the contract for the construction of the U. S. post office at Albany, Ore., was awarded to Fred A. Erlison, Salem, Ore., at \$58,282. In the construction of the building fixtures and material manufactured by

the following named firms will be used: Plumbing fixtures, L. Wolf Mfg. Co.; boiler, American Radiator Co.; nonconducting coverings, Johns-Manville Co.; radiator valves, Jenkins Bros.; damper regulator and air valves for radiators, American Radiator Co.; air valves for end of steam mains, do; radiators, American Radiator Co.; cabinet and tablet, Frank Adam Electric Co.; conduit, National Metal Molding Co.; rubber-covered wire, Detroit Insulated Wire Co.; plug receptacles and snap switches, Metropolitan Electric Mfg. Co.

Cheyenne, Wyo., Repairs, Etc.

The contract for repairs and painting in the U. S. post office building at Cheyenne, Wyo., has been awarded to J. P. Sullivan, Chicago, Ill., at \$3,744.

San Francisco, Cal., Plaster Models.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for furnishing plaster models for the U. S. subtreasury at San Francisco, Cal.:

Neuman & Evan, New York city, \$1,556.

H. R. Ludeke, New York city, \$1,453.

Donnelly & Ricci (Inc.), New York city, \$1,485.

Menconi Bros, New York city, \$1,495.

Rochetti & Parzini, New York city \$1,550.

Outlet Pipes.

Abstract of bids opened at Los Angeles, Cal., under advertisement No. 256-F for outlet pipes for Minatara dam, North Platte project:

The East Jersey Pipe Co., 50 Church street, New York city, \$1,288; at Paterson, N. J., 20 days; weight 127,675 lbs.

The Wm. B. Pollock Co., Youngstown, Ohio, \$5,800, riveted pipe, at Youngstown, Ohio, 60 days, 169,024 lbs.

Ritter-Conley Mfg. Co., Pittsburgh, Pa., \$6,310, riveted pipe; at Leetsdale, Pa., 70 days; 137,000 lbs.

American Spiral Pipe Works, Chicago, Ill., \$6,475, lap-welded pipe; at Chicago, Ill., 80 days; 111,500 lbs.

S. Morgan Smith Co., York, Pa., \$6,600, riveted pipe; at York, Pa., 130 days; 152,000 lbs.

Pelton Water Wheel Co., New York city, \$7,300, riveted pipe; at Harrisburg, Pa., 80 days; 145,000 lbs.

Fulton Engine Works, Los Angeles, Cal., \$12,234, riveted pipe, at Los Angeles, Cal., 90 days; 155,000 lbs.

Controversy with Belzina Contractor.

A long-standing controversy between the constructing quartermaster at Honolulu and a manufacturing concern of Brussels, Belgium, over the delay in the delivery of certain special tool-steel bars, etc., has been terminated. The order for the material was placed in July, 1911; the material was shipped in November of that year, and did not reach Honolulu until March, 1912, too late to be of any use. It was claimed that the delivery was not made within a reasonable time after the date of the order, and the quartermaster refused to accept it. The foreign firm, in the course of the correspondence, expressed a willingness to make a reduction in its bill of \$350. It appears that there was nothing in the original order to indicate the time of delivery, and the

contractors were not informed at any time that there was urgent need of the steel. It is held by the War Department that the question devolves on the definition of what may be regarded, under the circumstances, as "a reasonable time which may be taken by the contractors for the delivery of the material, and, in view of the fact that the steel was shipped within four months of the date of the order, the shipment is regarded as having occurred within a reasonable time. There was, however, considerable delay between the date of shipment and the arrival of the material at Honolulu, but there is nothing to show why or where this delay occurred.

Government Manufacture of War Material.

In the hearings which have been conducted this session before the House military and naval committee it is observed that some of the members expressed the keenest interest in ascertaining whether more work may not be done at government plants. The chief of ordnance of the Army, for instance, and the chief of the quartermaster corps were asked repeatedly by members of the military committee whether there would not be a material saving in the public expense by having supplies made at government plants instead of purchased under contract. It is evidently desired to increase as much as possible the output of the military-naval shops. It so happens that this agitation is created for the most part by members in whose districts are located navy yards or arsenals or other government plants, and the desire for economy in that direction is born of the expectation that the increase in plant output will mean the employment of additional labor. One of the questions presented to General Crozier had to do with the increase of the plant at Rock Island Arsenal with a view to making a saving of 25 per cent on contract prices on artillery vehicles, such as carriages, limbers, and caissons manufactured at Rock Island. The estimates are made sufficiently large to permit of such vehicles, for which the capacity is limited, being manufactured by contract. This is necessary, as conditions are not always such when appropriations become available as to permit of the work being done in a reasonable time at an arsenal. The increased capacity at Rock Island to manufacture artillery vehicles is equivalent to appropriations of about \$1,200,000 a year. A saving of 25 per cent on the carriages, limbers, and caissons included in appropriation of \$1,200,000 will be made and the saving used to secure additional material. This saving would amount to approximately \$215,000. If all the artillery vehicles covered by this year's estimate could be manufactured at an arsenal under as favorable conditions as at Rock Island, the saving would be approximately \$350,000. Under present conditions as to the arsenal equipment for manufacturing field artillery material no saving could be made on the estimates for the amount of the appropriation of \$1,200,000.

Riverside, Cal., Vault Shelving.

The contract for installing metal vault shelving in the U. S. post office

at Riverside, Cal., has been awarded to Watson Mfg. Co., Jamestown, N. Y., at \$271; time 90 days.

Protest of Supply Firm.

In the award of a contract under the War Department during the present week an interesting question was presented. The bidder whose proposal was accepted specified a certain type of fixtures for installation in the general work in which he was interested. After the contract was awarded the successful bidder represented to the War Department that it would be to his advantage if he could furnish an article or fixture from a manufacturing source different from that he had specified. The recommendation was made that the substitute type of article would be accepted. This led to a protest from the firm which had been originally named as the source of the fixtures.

The protest appears to have been well taken. It is in the interest of the government that bidders be required to furnish an article which they have specified or which is exclusively named in the specifications. Of course, when something "equally good" is permitted then it becomes a matter within the discretion of the government official which of several substitutes designated are acceptable to the government. When an article is named to the exclusion of all others, either by the successful bidder or in the government specifications on which the bid was made, it is important that there be no exception, which in the end permits the establishment of a dangerous precedent. With such a departure from a strict rule the government is in the position of never knowing what it may obtain. Those whose bids were not accepted are not treated fairly, because with the opportunity to amend the specifications they, too, might have occasion to modify their bids. If the government is going to accept a new rule it should do this before bids are opened, in order that there may be no opportunity on the part of rival bidders to entertain a grievance or to believe themselves the victims of favoritism.

Billings, Mont., Furniture.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing furniture in the U. S. post office at Billings, Mont.:

Louck & Hill Co., Richmond, Ind., \$1,197.85; 90 days.

Federal Equipment Co., Carlisle, Pa., \$1,851.25; 100 days.

Commercial Cabinet Co., Chicago, Ill., \$2,160; 60 days.

Improvement in Comptroller's Office.

It is gratifying to observe that Comptroller Downey, who has succeeded Comptroller Tracewell in the Treasury Department as the official who must finally pass upon the claims of contractors and other subjects in controversy with the accounting officers of the government, is manifesting a liberality and breadth of view, which is, to say the least, refreshing. Under the former administration the claimant had a right to feel that it was somewhat of the "hit and miss" variety of decision to which his interests

were subjected. The chief objection against the action taken by the comptroller's office under the late administration arose from the fact that the tenor of the decisions appeared to be belligerent and bellicose. There seemed to be a disposition to find out just where in the contractor could be set back by an exact interpretation of law and regulations. There was not that practical consideration of questions which might be expected of a judicial officer. Since Mr. Downey has been comptroller the tenor and tone of the comptroller's decisions have perceptibly changed for the better. There seems to be a willingness to believe that the contractor now and then, at least, has a meritorious claim.

Naval Torpedo Station for the West Coast.

The recommendation of the Secretary of the Navy to expend \$260,000 for the increase in the facilities of the torpedo station at Newport has suggested the question among members of the House Naval Committee as to the wisdom of having this sum, or a part of it, used toward the establishment of a torpedo factory on the Pacific Coast. There was an appropriation made two or three years ago for the purchase of land on the west coast for the establishment of a repair torpedo station, with a view to repairing torpedoes on that coast instead of going to the expense of transporting them across the continent, but the land which was selected at Keyport Peninsula, Wash., was held at such a high figure by the "land sharks" that the Navy Department was forced to abandon the idea of acquiring this tract. Since then no better success has attended the efforts of the naval authorities to obtain the land or any other site which would be equally available for the purpose.

—HALLS & SOCIETY BLDGS—

RICHMOND, CONTRA COSTA CO., CAL.—Lodge hall, 3 story and base, brick, \$50,000. Architect, James T. Narbett, Richmond. Owners, Richmond Eagles Hall Association. Mr. Narbett and a Building Committee are now considering several sites for a new lodge building. Two sites on Richmond avenue are said to be most favorably considered. In case either of these is selected the building will be designed with stores on the first floor and lodge rooms and offices on the upper floors, which arrangement will afford the owners an income. Further particulars of the building will be given as plans progress.

HOSPITALS

TURLOCK, STANISLAUS CO., CAL.—Hospital, 2 story and base, reinforced concrete, \$10,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Sisters of Providence. A site has been secured and funds are now nearly all available for the construction of a modern hospital. Funds have been donated by the citizens, and the hospital will be conducted as a non-sectarian institution. Plans will be arranged for two wards, a number of modern private rooms, operating rooms, office and nurses' quarters. Interior will be finished in pine, hard-

wood and tile. Construction will be fireproof. There will be steam heat, oil burning plant, hot water system and vacuum cleaning. Exterior of the building will be faced with cement plaster. Plans are being prepared.

NAPA, NAPA CO., CAL.—Recreation building, frame and concrete. Cost not stated. Architect, State Architect McDougall, Sacramento. Owners, State of California. Plans for a recreation building which is to be erected at the Napa State Hospital have been completed and are now out for figures. Bids will be opened on February 24th by the State Board of Control. Plans and specifications can be secured from the State Department of Engineering. An official proposal appears in another column of this issue.

MARTINEZ, CONTRA COSTA CO., CAL.—Hospital addition, 2 story and base, reinforced concrete, \$30,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Contra Costa County. The building will be in the nature of a new wing to the County Infirmary and will contain wards and private rooms. A modern operating room and equipment will also be installed. Interior finish will be of pine. Plans provide for steam heat, a hot water system and vacuum cleaning. Tile and marble will also be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared and figures will be called for within a short time.

◆HOTELS◆

SAN FRANCISCO—Hotel, 3 story and base. Class C construction, \$15,000. Architect, David C. Coleman, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Third street near Bryant, and will be designed for stores on the first floor and a number of hotel rooms and several baths on the upper floor. Interior will be finished in pine throughout. There will be steam heat and a central heating system. Bath rooms will have tile wainscot and composition floors. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are out for figures.

SAN FRANCISCO—Hotel, 4 story and base. Class C construction, \$40,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, M. C. and J. B. Kennedy. This building will be erected at the corner of Ellis and Larkin streets, covering a considerable ground area. There will be a store besides the hotel entrance and lobby on the first floor. Upper floors will be arranged for in the neighborhood of 70 guest rooms, a large percentage of which will have private baths. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Sake wall beds will be used. Exterior of the building will be faced with pressed brick. Working drawings are being prepared.

OAKLAND, CAL.—Hotel, 7 story and base, reinforced concrete, \$110,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, Frank Eliger. The building will be erected on the north side of 16th street between San

Patlo and Telegraph avenues. Construction will be practically fireproof. Interior finish will be of pine and hardwoods. There will be in the neighborhood of 150 guest rooms, nearly all having private baths. There will be a large lobby and office. Plans provide for steam heat, elevator service, wall beds, vacuum cleaning and hot water system. Metal window sash and frames will be used. Ornamental plaster, marble and tile will be used in the entrance and lobby. Exterior of the building will be faced with cement plaster. Plans are being prepared.

OAKLAND, CAL.—Hotel work, \$2,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Morris & Muller. Plans are being prepared for the ornamental plaster work, marble work, light fixtures, mantels and wall paper in the lobby and lounging rooms of the seven-story hotel building being erected at the corner of 14th and Jefferson streets. Owners will take figures.

SEATTLE, WASH.—Hotel, 6 story and base, brick and steel, \$60,000. Architect, John Graham, Lyon Bldg., Seattle. Owner, P. J. Murphy. The building will be erected at the corner of 6th and Jackson streets and will cover a large area. Construction will be practically fireproof with a steel frame, brick walls, reinforced concrete floors and hollow tile interior partitions. All guest rooms will have private baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, a vacuum cleaning system and metal window sash and frames. A complete oil burning system will be installed. Bath rooms will have composition floors and tile wainscot. Ornamental plaster, marble and tile will be used in the entrance and lobby. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

SUTHERLIN, ORE.—Hotel, 2 story and base, brick, \$30,000. Architect, Earl A. Roberts, Selling Bldg., Portland. Owner, F. B. Waite. The building will be erected on a corner site. The first floor will contain a large store besides the main hotel office, lobby, dining room, kitchen and ice storage plant. Upper floor will be divided into 40 guest rooms, 15 of which will have private baths. Interior finish will be of pine throughout. Plans provide for steam heat and patent store fronts. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are being prepared.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Canadian Exhibit Palace, frame and plaster construction, \$200,000. Architect, G. F. Freeman, London, now at the Palace Hotel. S. F. Owners, Dominion of Canada. Final plans for the Canadian building at the Exposition were submitted by the Canadian architect and approved by the division of works of the Exposition yesterday. Actual building work is to be started shortly. Colonel William Hutchinson, Canadian Exposition Commissioner, who has been here for the last couple of weeks arranging the

first details for Canada's exhibit, has been in constant communication with the heads of the various departments and divisions of the Exposition, and it is his desire to rush the work with all possible speed. Canada is to be one of the foremost exhibitors at the Exposition. The pavilion alone will cost in the neighborhood of \$300,000, and will be among the greatest of national and state buildings, being 340 feet long, 240 feet wide and 50 feet high. It will be the largest exposition building ever erected by Canada. The estimates for Canada's exhibits here in 1915 call for an expenditure of \$600,000. Practically the entire exhibit of Canada at the Ghenc Exposition is en route here now.

SAN FRANCISCO—Washington State exhibit building, frame construction, \$60,000. Architect, A. F. Heide, 46 Kearny street, S. F. Owners, State of Washington. Architect A. F. Heide has secured the approval of the Washington State Building Committee to his plans for their building to be erected at the Panama-Pacific Exposition. A two-story building is to be erected in place of the original three-story, as intended. Washington will expend about \$60,000 in construction. Bids will be called for shortly.

SAN FRANCISCO—Oriental concession building, frame construction, \$50,000. Architect, Alfred I. Coffey, Humboldt Bank Bldg., S. F. Owners, Fung Nung and Mr. Sullivan, Bankers' Investment Bldg. The building will be a three-story structure with a large central tower. A site 100 by 200 will be completely covered by the building. The design has been carried out in the true Oriental style. Modern plumbing and electric work will be installed. Exterior will be covered with cement plaster and a large amount of galvanized iron will also be used. Bids will be taken by the owners.

SAN FRANCISCO—Wisconsin State Exhibit building, frame construction. Cost not stated. Architects, R. M. Messmer & Bros., Milwaukee, Wis. Owners, State of Wisconsin. Plans recently submitted in competition with a number of the leading architects of Wisconsin resulted in the selection of the above named architects to design the Wisconsin State building. The exact amount of money to be expended has not yet been determined, and the question of the type of building to be erected is also an open subject at this time. Further mention will be made of the work.

SAN FRANCISCO—Court of Palms and Flowers, frame construction, \$184,000. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Streblow, Freeze & Peterson submitted the lowest figure at \$184,000 for the construction of this building. Neil A. McLean was the next lowest bidder at \$197,000. A contract will be awarded in the course of a week.

SAN FRANCISCO—Exhibit building, frame construction, \$15,000. Architects, Bakewell & Brown, 231 Kearny street, S. F. Owners, Ghirardelli Chocolate Co. Plans are being prepared for a private concession building which will be occupied by the Ghirardelli Company. The design will probably be in the Mission style with the exterior covered with cement plaster on metal

lath. Preliminary drawings are being prepared. Further mention will be made of the work.

RESIDENCES.

SAN FRANCISCO—Residence, 3 story and base. Class A construction, \$150,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, I. W. Hellman, Jr. This building will be erected on the owner's property at the corner of Broadway and Broderick streets in one of the finest residential sections of the city. The building will contain twenty rooms, including hilliard hall, conservatory and dance hall. There will be a complete steel frame with exterior walls faced with terra cotta and stone. Interior finish will be of hardwoods with hardwood floors throughout. There will be a central heating system, probably steam heat, elevator service and vacuum cleaning system. All bath rooms will be equipped with shower bath and will be finished in tile. A garage will also be erected on the lot. Working drawings are now being prepared and figures will be called for shortly.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, Louis K. A. Colton, 534 Battery street, S. F. The dwelling has been designed for a seven-room house, and will be erected on the west side of 10th avenue south of Balboa street. Interior will be finished in pine and redwood with some hardwood panels. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and shingles and a pressed brick veneer base. Plans are in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$15,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The dwelling will be erected in Forest Hill on a lot about 45 by 100 and will contain a large living room, reception hall, library, breakfast room, dining room and kitchen on the first floor, and bed rooms and open air porches on the second floor. The basement, which is elevated above the ground, will contain servants' rooms, hilliard room, furnace room and cellars. The interior on the first floor will be finished in fumed oak in the craftsman style. The bed rooms will be finished in Louis XVI style and the sleeping porches will have cement floor and cement walls in regular country cottage style. The exterior elevations will be of cement plaster over metal lath in the true Spanish style. Plans are being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The dwelling will be erected in St. Francis Wood, and will contain a large living room on the first floor, reception hall, large dining room with French doors at one end leading to a conservatory, which will be used also as a

breakfast room, there will also be kitchen and servants' rooms on the first floor. The second story will contain a sewing room and three large bed rooms and a large open air sleeping porch. The interior will be finished in red gum throughout and the exterior will be in the old English style, half timber and cement plaster. Plans are being prepared.

SAN FRANCISCO—Rungalow, 1½ story and base, frame, \$2,000. Architect, none. Owner, N. J. Nelson, 4278 2nd street, S. F. The dwelling will contain six rooms and bath, and is to be erected on 17th street, west of Cole. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be a large open fire place in the living room with a brick mantel. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic ad cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, C. A. Hall, 1318 5th avenue, S. F. The house will be erected on the east side of 23rd avenue, south of Lake street, and will contain seven rooms and bath. Interior finish will be of pine and some hardwood panels. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete. The owner will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 1½ story and base, frame, \$2,500. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck avenue, Berkeley. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some oak floors. There will be furnace heat and an open fire place. Mantel will be of brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,650. Architect, Claude Barton, Security Bank Bldg., Oakland. Owners, Newman and Wilkinson. The dwelling will be erected in Claremont Tract, and will contain seven rooms, bath and sleeping porch. Pine and redwood finish and hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,500. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner,

Dr. Shannon. The dwelling has been designed for a seven-room house and will be erected in the Piedmont Tract. Interior will be finished in pine and hardwoods. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$7,000. Architect, Alvin Stern, 1522 Broadway, Oakland. Owner, Roger Coit. This house will be erected at the southeast corner of Lennox and Montecito streets, and has been designed to contain eight rooms, baths and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath rooms will have tile floors and wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

BYRON, CONTRA COSTA CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architect, E. B. Brown, Masonic Temple, Stockton. Owner, Mr. Kamond. The dwelling will contain seven rooms, bath and sleeping porch. Interior will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantel will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures will be taken at once.

MONTEREY, MONTEREY CO., CAL.—Residence, 2 story and base, frame and concrete, \$30,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owner, Juan Copper. The house will be designed for a large country home, containing in the neighborhood of twenty rooms, three baths and sleeping porches. Interior finish will be of pine and hardwood with oak floors in the principal rooms. Bath rooms will be finished in tile and will be equipped with showers. There will be a central heating system, probably hot water heat, a vacuum cleaning plant and hot water supply. Exterior of the dwelling will be faced with cement plaster. Roof will be of red clay tile. Plans are now being prepared.

SAN JOSE, SANTA CLARA CO., CAL.—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, W. Reinhold, Jr., 316 North 12th street, San Jose. The dwelling has been designed for a five-room house with bath. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be a large open fire place and brick mantel. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

CAPISTRANO, ORANGE CO., CAL.—Residence, 2 story and base, reinforced concrete. Cost not stated. Architects,

Walker & Vawter, Hibernian Bldg., L. A. Owner, Grace Dolph. The dwelling will contain ten rooms and four baths. Interior finish will be of pine and hardwoods with oak floors in the principal rooms. Bath rooms will have tile floors and wainscot. There will be steam heat and a hot water system, vacuum cleaning and special electric work. Several large open fire places with brick and tile mantels will be used. Exterior of the house will be faced with cement plaster. Art glass is also specified. Plans are complete and ready for figures.

SAN FRANCISCO—Residences, 2 story and base, frame, \$1,500 each. Architect, none. Owner, E. Nelson, 30 Presidio Terrace, S. F. These houses will be erected on the west line of 15th avenue north of California. Each dwelling will contain six rooms and bath. Interiors will be finished in pine with some hardwood panels. Oak floors will be used in the living rooms and dining rooms. There will be large open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the houses will be covered with cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor. All materials are now being purchased.

SCHOOLS.

SAN FRANCISCO—School, 2 story and base. Class A construction, \$100,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the Washington Irving School, to be erected on the north side of Broadway between Sansome and Montgomery streets have been approved and are now out for figures. Bids will be opened by the Board of Public Works on February 11th. Separate bids are being taken for the general construction, brick work, plumbing and gasfitting, electric work and heating and ventilating. An official proposal appears in another column of this issue. Plans can be secured from the Department of Architecture.

SAN FRANCISCO—School, 3 story and base, reinforced concrete, \$70,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Paul's Church. The building will be erected at the corner of 29th and Church streets, and will be designed for a parochial school. There will be a number of classrooms, general office and a large auditorium. Interior will be finished in pine. Plans provide for a central heating system, probably steam, program clocks and vacuum cleaning. Exterior will be faced with cement plaster. Working drawings are being prepared.

PALMS, LOS ANGELES CO., CAL.—School, 1 story and base, brick, \$15,000. Architects, Dennis & Hewitt, Fay Bldg., L. A. Owners, Palms School District. The building will contain eight classrooms, an auditorium seating 600 people, boys' and girls' playrooms, domestic science department and manual training department. Construction will be of brick and steel. Interior finish will be of pine with maple floors in the class rooms. Modern school plumbing, steam heat and a program

clock system will be installed. Exterior will be faced with cement plaster. Separate bids will be taken on the general construction, plumbing, heating and ventilating and electric work. Plans are complete and figures will be opened on anuary 31st. Plans and specifications can be secured from the architects.

GLENDORA, LOS ANGELES CO., CAL.—School, 1 and 2 story and base, brick, \$65,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Glendora High School District. The buildings will conform to the present building in design and construction. The household arts building will be a two-story and basement structure 36x104, with a central rear wing 70x70 feet. It will contain a cafeteria, lunch room, laundry, metal hammering room and furnace room in the basement; two study halls, library, commercial department, offices and rooms for stenography, typewriting and musical courses in the first story; and domestic science, sewing, and art departments, office and model flat in the second story. The manual arts building will be one story 172x180 feet, and will provide for wood working, pattern making, machine room, foundry, lecture room, forge and mechanical drafting. The buildings will be of brick construction with sand lime brick exterior facing, concrete foundations, composition roofs, pine trim, pine and maple floors, lavatories, plumbing, electric wiring, heating and ventilating.

EL CENTRO, IMPERIAL CO., CAL.—School, 1 story and base, brick, \$30,000. Architect, Fred T. Harris, Holt Bldg., El Centro. Owners, El Centro School District. The building has been designed to contain eight standard sized class rooms, principal's office, teachers' rooms and an assembly hall. Interior finish will be of pine with maple floors in the class rooms. Steel ceilings, steam heat and slate blackboards are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be opened on February 9th. Plans can be secured from the architect.

ONTARIO, SAN BERNARDINO CO., CAL.—School, 2 story and base, brick, \$10,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Chaffey Union High School District. The building is 190 by 105 feet. The concrete foundation and about one-half of the brick walls are standing. All interior work, carpentry, plumbing and electric work is still to be completed. Architect Marsh has the working drawings complete and is now taking figures. Bids will be opened on February 5th. Plans and specifications can be secured from the architect.

THE DALLES, ORE.—School, 2 story and base, brick and concrete, \$100,000. Architect, C. K. Crandall, The Dalles. An announcement of the selection of the architect has just been made by the Board of Education. Details of the building cannot be published at this time. It is the intention of the Board to erect a modern high school structure.

Contracts Awarded.

SANTA PAULA, VENTURA CO., CAL.—School, 2 story and base, brick, \$53,911. Architects, Allison & Allison, Hibman Bldg., L. A. Owners, Santa

Paula School District. Contractors, The Ventura Mill and Lumber Co., Santa Paula. Contract price, \$53,911.

SEWERS, STREET WORK AND WATER SYSTEMS.

MANHATTAN BEACH, LOS ANGELES CO., CAL.—Municipal water system. Cost not stated. Engineer, Frank A. Lathrop, Los Angeles. Owners, City of Manhattan Beach. Plans for a municipal water system have been completed and figures are now being taken. Bids will be opened on February 7th. An official proposal appears in another column of this issue. Bids will be received on three schedules (a) The work as a whole, (b) Any or all of the required materials f. o. b. Manhattan Beach, (c) Any or all of the construction work. The work will consist of furnishing and placing approximately the following: 1,576 feet of 12-inch pipe; 5,594 feet of 10-inch pipe; 6,560 feet of 8-inch pipe; 16,202 feet of 6-inch pipe; 48,783 feet of 4-inch pipe; 25,917 feet of 3-inch pipe; 5,248 feet of 2-inch pipe. 1 1/2 tons of special fittings; 1 12-inch gate valve and case; 2 10-inch gate valves and cases; 4 8-inch gate valves and cases; 7 6-inch gate valves and cases; 62 4-inch gate valves and cases; 43 3-inch gate valves and cases; 10 2-inch gate valves and cases; 103 two-stream fire hydrants; 17 one-stream fire hydrants; 1 frame pump house; 1 315 O. P. M. direct connected well pump; 1 800 O. P. M. direct connected pressure pump; 1 10x11x17 1/2 foot reinforced concrete reservoir; 1 steel water storage tank; 300 metered house connections.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Office building, 10 stories or more. Class A construction, \$500,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Firemen's Fund Insurance Co. The announcement that Lewis P. Hobart has been selected as the architect for this building has just been made. The structure, which will rank among the most modern of San Francisco's office buildings, will be erected at the corner of California and Sansome streets, covering a considerable ground area. Construction will be fireproof throughout with a complete steel frame, exterior walls of brick and concrete faced with pressed brick and terra cotta. Floors will be of reinforced concrete with hollow tile partitions. Metal trim, metal window sash and frames will add to the fire resisting qualities of the building. Hardwoods, marble and tile will be used for interior finish. The entire first floor, mezzanine and a part of the second floor will be occupied by the Firemen's Fund Insurance Co. A total of some 300 offices will occupy the balance of the building. Plans provide for steam heat, passenger and freight elevators, vacuum cleaning and mail chutes. Working drawings are being completed and figures will be called for shortly.

SAN FRANCISCO—Restaurant alterations. Cost not stated. Architect, Oscar H. Ostlund, 61 Rausch street, S. F. Owner, G. W. White. The building now located at 122 to 130 Kearny street is to undergo extensive alterations, and will be fitted up for a high-class

restaurant. Included in the work will be concrete and marble floors, interior finish, plumbing, electric work and painting. Circassian walnut, blue gum and other hardwoods will be used. Plans are complete and figures are being taken.

MODESTO, STANISLAUS CO., CAL.—Department store, 1 story and base, brick and steel, \$15,000. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Charles Daunt. The building will be erected at the corner of K and 10th streets, covering an area of 50 by 150 feet. The basement as well as the ground floor will be arranged for stores. There will be considerable steel used. Interior finish will be of pine and hardwoods. A cement floor, metal window sash and frames and steam heat will be installed. The entire building has been leased to the Richdale Co. Exterior will be covered with pressed brick. Patent store fronts and plate glass windows are specified. Plans are nearly complete and figures will be called for at once.

LOS ANGELES, CAL.—Bank and offices, 12 story and base. Class A construction, \$1,000,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Commercial Fireproof Building Co. Property at the north-east corner of 5th and Spring streets, covering an area of 115 by 155 feet, will be improved by the construction of a Class A building. The first floor will be occupied by the Citizens' National Bank. The building will be of steel frame and brick construction, with concrete foundation, terra cotta facing, plate glass windows, composition roofing, hollow tile and concrete floors. There will be hardwood interior trim, marble wainscot and floors in corridors and entrance. There will be five elevators. Metal frames and sash and wired glass will be used. Each office will have a lavatory. There will be steam heat, vacuum cleaning, mail chutes, plumbing and electric wiring. Plans are now being prepared.

LOS ANGELES, CAL.—Stores and lofts, 5 story and base. Class C construction. Cost not stated. Architects, Train and Williams, Exchange Bldg., L. A. Owner, J. F. Hosfield, Monrovia. The building will be erected on the east side of Broadway, adjoining the City Hall, and will cover an area of 60 by 160 feet. The first story will have an 18-foot ceiling with a mezzanine floor and will be occupied by stores. Upper floors will be arranged for lofts. There will be freight and passenger elevators, metal lath and plaster partitions, fireproof doors, metal window sash and frames, steam heat and a vacuum cleaning system. Patent store fronts with plate glass windows will be installed. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

PHOENIX, ARIZ.—Offices, 8 story and base, reinforced concrete construction, \$200,000. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Dwight B. Heard and associates. The building is to be erected on Central avenue, covering an area of 70 by 146 feet. The first floor, basement and second floor will be occupied by a large mercantile firm. Upper six floors will contain 156 offices. There will be a freight and passenger elevators in the store section and two

passenger elevators in the office section. Construction will be of reinforced concrete throughout with concrete floors and hollow tile and metal lath and plaster partitions. Entrance lobby, corridors and halls will be finished in marble. Offices will have hardwood and metal trim. Window sash and frames will be of metal. Plans also provide for steam heat and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans will be complete and figures taken by March 1st.

LOS ANGELES, CAL.—Stores and theatre, 1 story and base, brick, \$25,000. Architect, A. Lawrence Valk, Stimson Bldg., L. A. Owner, B. S. Lustig. The building will be erected on Main street between Winston and Fifth, and will contain several stores besides a motion picture theatre. The building will cover an area of 60 by 140 feet, the theatre having a seating capacity of 800 people. Interior will be finished in pine. There will be a modern system of ventilation. Exterior will be faced with pressed brick. Plans are complete and figures will be taken at once.

Contracts Awarded.

LOS ANGELES, CAL.—Loritts, 3 story and base, brick and steel, \$55,000. Architect, Fred B. Dorn, Marsh-Strong Bldg., L. A. Owner, Frank R. Strong, Contractors, The Davidson Construction Co., 16th and Tennessee streets, L. A. All work except structural steel, elevators, plumbing and heating. Contract price, \$55,000.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received by the Council in an open meeting at the City Hall at the City of Santa Cruz, California, 10:00 A. M., Saturday, February 7th, 1914, for the Construction of a Trestle Pile and Timber Deck Wharf and Appurtenances at the foot of Pacific Avenue. The Wharf is about 2750 feet long varying in width from 30 to 80 feet. All to be in accordance with plans and specifications prepared by H. J. Brunner and on file in the office of the City Clerk.

Each proposal must be accompanied by a certified check payable to the Order of T. W. Drullard, Mayor of the City of Santa Cruz, in the amount of Five (5) per cent of bid.

The City reserves the right to reject any and all bids. Progressive payments will be made.

Plans and specifications may be obtained at the office of H. J. Brunner, 312 Sharon Bldg., San Francisco, California.

By order of the City Council. T. W. DRULLARD, Mayor.

J. L. WRIGHT, Clerk
Jan 22-23-24-25-27.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Tuesday, February 24, 1914, and bids then and there to be publicly opened and read for furnishing all plant, machinery, and labor, and doing the work required for the construction and erection of a building known as the Recreation Hall at the Napa State Hospital, Napa, California. In accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a bidder's bond, or a certified check in the sum of ten per cent (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bids received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposals for Recreation Hall, Napa State Hospital, Napa, California."

(SIGNED) W. F. MCCLURE, State Engineer. (*)

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received by the CITY OF MANHATTAN BEACH, Los Angeles County, California until 8 O'CLOCK P. M. SATURDAY, FEBRUARY 7th, 1914, for furnishing the material and labor to construct a MUNICIPAL WATER WORKS SYSTEM in and for said City of Manhattan Beach.

Proposals must be submitted on special Bidding Schedules and enclosed in special Bidding Envelopes obtained from the City Clerk.

All proposals must be accompanied by a certified check on a reliable bank

or by a Bidder's Bond, with satisfactory surety, for a sum equal to ten (10) per cent of the total amount of the bid.

Bids will be received on three (3) different schedules, to-wit:

Schedule "A." The work as a whole "SCHEDULE B." Any or all of the required material f. o. b. Manhattan Beach.

Schedule "C." Any or all of the construction work.

EACH SCHEDULE REPRESENTS AN INDIVIDUAL BID AND MUST BE SUBMITTED IN ITS RESPECTIVE ENVELOPE.

Each different type or kind of the same material bid and must be submitted on separate schedules, but there is no limit to the number of individual bids which may be submitted in the same schedule envelope.

The Plans, Specifications and other documents relating to the work may be seen and examined, without charge, at the office of the City Clerk in Manhattan Beach, or copies of same may be obtained by prospective bidders, for personal use, upon the payment of Eight Dollars and Sixty Cents (\$8.60).

Bidding Schedules and Envelopes will be furnished free of cost to all prospective bidders upon request, provided such request is accompanied by a statement that the Plans and Specifications, and all documents attached thereto, have been examined and are thoroughly understood by the prospective bidder, and that the schedule or schedules wanted be specifically named.

The Board of Trustees of the City of Manhattan Beach reserves the right to reject any or all bids and to waive any irregularities in any or all bids, and it is hereby understood that the submission of a bid to the City shall constitute a waiver by the bidder, of any obligation on the part of the City of Manhattan Beach to contract for the purchase of any portion of the material or labor herein advertised for.

THE WORK WILL CONSIST OF FURNISHING AND PLACING APPROXIMATELY:

- 1576 feet of 12 inch Pipe.
 - 5564 feet of 10 inch Pipe.
 - 3040 feet of 8 inch Pipe.
 - 16202 feet of 6 inch Pipe.
 - 47873 feet of 4 inch Pipe.
 - 25917 feet of 3 inch Pipe.
 - 1000 feet of 1 inch Pipe.
 - 194 Tons of Special Fittings.
 - 1 Twelve Inch Gate Valve and Case.
 - 2 One Inch Gate Valves and Cases.
 - 2 Eight Inch Gate Valves and Cases.
 - 7 Six Inch Gate Valves and Cases.
 - 62 Four Inch Gate Valves and Cases.
 - 100 Three Inch Gate Valves and Cases.
 - 10 Two Inch Gate Valves and Cases.
 - 103 Two Stream Fire Hydrants.
 - 1 One Stream Fire Hydrant.
 - 1 Fire Hose.
 - 1—315 O. P. M. Direct Connected Well Pump.
 - 1—800 O. P. M. Direct Connected Pressure Pump.
 - 1—10 feet x 71 feet x 178 feet Reinforced Concrete Reservoir.
 - 1 Steel Water Storage Tank.
 - 3000 cubic feet of Excavation.
- Dated at Manhattan Beach, California, January 17th, 1914.

C. E. JENKINS, City Clerk of Manhattan Beach. (*)
Mr. Frank A. Lathrop, Consulting Engineer, will be at the City Hall, Manhattan Beach, all day February 7, 1914, to furnish data to bidders.

PROPOSAL FOR NEW JERSEY BUILDING.

SEALED proposals for the construction of the New Jersey State Building to be erected on the site selected on the grounds of the Panama-Pacific International Exposition in San Francisco, California, from the plans and specifications prepared by the Department of Charities and Corrections. Mr. Hubert H. Rutherford, Architect, will be received at the office of the State Treasurer, in the State House, at Trenton, New Jersey, at 2 o'clock, P. M., on Friday, the 30th day of January, 1914, when they will be publicly opened and read. Proposals must be submitted sealed in envelopes addressed to the New Jersey Commission for the Panama-Pacific International Exposition, care of the State Treasurer, and marked "Proposal for the New Jersey Building." Each proposal must be ac-

companied by cash or a certified check, drawn to the order of the State Treasurer, for 10 per cent of the amount thereof as a guarantee that the bidder will enter into a contract for the performance of the work, should his proposal be accepted, within a reasonable time hereafter. Each bidder must be prepared to furnish an acceptable Surety Bond for one-half the amount of the contract of the State. Plans and specifications may be obtained by application to the Commissioner of Charities and Corrections, State House, Trenton, New Jersey; or to Captain Asher Carter Baker, Exposition Building, San Francisco, Cal. (Signed) C. A. PANOSTA, Secretary.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 819—Proposals for Four Steel Tugboats for Handling and Docking of Vessels at the Entrance of the Panama Canal—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 A. M., March 23, 1914, at which time they will be opened in public for furnishing the above mentioned tugboats. Blanks and general information relating to this circular (No. 819) may be obtained from this office or the office of the assistant purchasing agent, 1886 North Point Street, San Francisco, Cal., or from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR HEATING AND VENTILATING.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock P. M. and 3 o'clock P. M. on Wednesday, the 4th day of February, 1914, for doing the heating and ventilation the furnishing of the necessary labor and materials therefor, to wit:

The installation of a heating and ventilating system in the City Hall.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) days from the receipt of written notice from the Board of Public Works and completed within the time limits as set forth in the specifications.

The amount of bond for faithful performance of contract has been fixed at \$20,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the Architect and all proposals must be made upon such forms. The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR STATE HIGHWAY WORK.

SEALED proposals will be received at the office of the California Highway Commission, 515 Forum building, Sacramento, Cal., until 2 o'clock P. M., on February 2nd, 1914, at which time they will be publicly opened and read, for the construction in accordance with the specifications therefor, to which special reference is made, of portions of State highway as follows:

El Dorado County from El Dorado to Placerville. (III-ED-II-C.) About 16 1/2 miles in length to be built of water-bound macadam.

Tuolumne County from the Western Boundary to Keystone (III-Tuo-13-C.) About 16 1/2 miles in length, to be graded.

Tulare County from Traver to the Northernly Boundary (VI-Tul-4-E), about 5.3 miles in length, to be built of Portland cement concrete.

Kern County from Lerdo to Famosa (VI-Ker-E), about 8.9 miles in length, to be built of Portland cement concrete.

KERN County from Bakersfield to Lerdo (VI-Ker-4-D), about 10.1 miles in length, to be built of Portland cement concrete.

San Bernardino County from the Westernly Boundary to Upland (VII-S-Bd-9-D), about 1.7 miles in length to be built of Portland cement concrete.

Ventura County from Ventura to Sea Cliff (VII-Ven-2-D & E), about 7.7 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Santa Margarita to Atascadero Creek (V-S. L. O-2-C), about 8.4 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers are located at Willets, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

BURTON A. TOWNE,

CHARLES D. BLANEY,

NEWELL D. DARLINGTON,

California Highway Commission.

AUSTIN B. FLETCHER,

Highway Engineer.

WILSON R. ELLIS, Secretary.

Dated: December 31, 1913.

STATE OF CALIFORNIA

DEPARTMENT OF ENGINEERING

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 1000 Broadway Bldg., Sacramento, Cal., until 2 o'clock P. M. on February 2nd, 1914, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

2) Dorado County from El Dorado to Placerville (III-E-D-11-C), about 6½ miles in length, to be built of waterbound macadam.

3) Plumbume County from the Westernly Boundary of Keystone (III-Tuo-13-A), about 10.8 miles in length, to be graded.

Tulare County from Traver to the Northernly Boundary (VI-Tul-4-E), about 5.3 miles in length, to be built of Portland cement concrete.

Kern County from Lerdo to Famosa (VI-Ker-4-E), about 8.9 miles in length, to be built of Portland cement concrete.

Kern County from Bakersfield to Lerdo (VI-Ker-4-D), about 10.1 miles in length, to be built of Portland cement concrete.

San Bernardino County from the Westernly Boundary to Upland (VII-S-Bd-9-D), about 1.7 miles in length, to be built of Portland cement concrete.

Ventura County from Ventura to Sea Cliff (VII-Ven-2-D & E), about 7.7 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Santa Margarita to Atascadero Creek (V-S. L. O-2-C), about 8.4 miles in length, to be built of Portland cement concrete.

(V-S. L. O-2-A), about 10.6 miles in length, to be built of Portland cement concrete.

Santa Cruz County from the Easternly Boundary to Glenwood (IV-S. Cr-5-A), about 5.7 miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers are located at Willets, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

C. until 11 o'clock a. m. February 7, 1914, and then and there publicly opened, for about 1,100 tons of fabricated structural steel, including castings and pipe rails for stairways for five buildings and about 40 tons of steel reinforcing rods. Erection is not included. Plans and specifications can be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 820—Proposals for Forms for Steel Cylinders, Rivets, Bolts, Pulleys, Iron, Bronze Bars, Nails, Shovels, Wool Waste, Manila Rope, Oakum, Unslacked Lime, White Chipped Soap, Putty, Pitch, Lime, Zinc, Tapering, Japan, Primer, Lead Oil, Linseed Oil, Cressote Oil, Paints, Shellac, Varnish, Lampblack, Paper, Parboiled, Untreated Piles, and Cressote Swallow Ties—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C. until 10:30 a. m. January 27, 1914, at which time they will be opened in public for purchasing the above mentioned articles. Plans and general information relating to this circular (No. 820) may be obtained from this office or the office of the assistant purchasing agent, John North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. ROGERS, major, corps engineer, U. S. A., general purchasing officer.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE — 3 story and base. Class A construction, \$150,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, I. W. Hellman, Jr. This building will be erected in the owner's property at the corner of Broadway and Broderick streets, in one of the finest residence sections of the city. The building will contain twenty rooms, including billiard hall, conservatory and dance hall. There will be a complete steel frame with exterior walls faced with terra cotta and stone. Interior finish will be of hardwoods with hardwood floors throughout. There will be a central heating system, probably steam heat, elevator service and vacuum cleaning system. All bath rooms will be equipped with shower baths and will be finished in tile. A garage will also be erected on the lot. Working drawings are now being prepared and figures will be called for shortly.

RESIDENCE — 2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, Louis K. A. Colton, 534 Battery street, S. F. The dwelling has been designed for a seven-room house, and will be erected on the west side of 10th avenue, south of Balboa street. Interior will be finished in pine and redwood with some hardwood panels. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and shingles and a pressed brick veneer base. Plans are in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, \$15,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The dwelling will be erected in Forest Hill on a lot about 45 feet by 160, and will contain a large living room, reception hall, library, breakfast room, dining room and kitchen on the first floor and bed rooms and open air sleeping porches on the second floor. The basement, which is elevated above the ground, will contain servants' rooms, billiard room, furnace room and cellars. The interior on the first floor will be finished in fumed oak in the craftsman style. The bed rooms will be finished in Louis XVI style and the sleeping porches will have cement floor and cement walls in regular country cottage style. The exterior elevations will be of cement plaster over metal lath in the true Spanish style. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$12,000. San Francisco. Architect, Charles J. Rousseau 46 Kearny street, S. F. Owner's name withheld. The dwelling will be erected in St. Francis Wood and will contain a large living room on first floor, recep-

tion hall, large dining room with French doors at one end leading to a conservatory, which will be used also as a breakfast room, there will also be kitchen and servants' rooms on the first floor. The second story will contain a sewing room and three large bed rooms and a large open air sleeping porch. The interior will be finished in red gum throughout, and the exterior will be in the old English style, half timber and cement plaster. Plans are being prepared.

BUNGALOW — 1½ story and base, frame, \$2,000. San Francisco. Architect, none. Owner, N. J. Nelson, 4278 23rd street, S. F. The dwelling will contain six rooms and bath, and is to be erected on 17th street, west of Cole. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be a large open fire place in the living room with a brick mantel. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, C. A. Hall, 1318 5th avenue, S. F. The house will be erected on the east side of 23rd avenue, south of Lake street, and will contain seven rooms and bath. Interior finish will be of pine and some hardwood panels. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete. The owner will do the work by Day Labor.

CANADIAN EXHIBIT PALACE — Frame and plaster construction, \$300,000. San Francisco. Architect, G. F. Freeman, London, now at the Palace Hotel, S. F. Owners, Dominion of Canada. Final plans for the Canadian building at the Exposition were submitted by the Canadian architect and approved by the division of works of the Exposition yesterday. Actual building is to be started shortly. Colonel William Hutchinson, Canadian Exposition Commissioner, who has been here for the last couple of weeks arranging the first details for Canada's exhibit, has been in constant communication with the heads of the various departments and divisions of the Exposition, and it is his desire to rush the work with all possible speed. Canada is to be one of the foremost exhibitors at the Exposition. The pavilion alone will cost in the neighborhood of \$200,000, and will be among the greatest of national and state buildings, being 340 feet long, 240 feet wide and 50 feet high. It will be the largest Exposition building ever erected by Canada. The estimates for Canada's exhibits here in 1915 call for an

expenditure of \$600,000. Practically the entire exhibit of Canada at the Ghent Exposition is en route here now.

WASHINGTON STATE EXHIBIT BUILDING — Frame construction, \$60,000. San Francisco. Architect, A. F. Heide, 46 Kearny street, S. F. Owners, State of Washington. Architect A. F. Heide has secured the approval of the Washington State Building Committee to his plans for their building to be erected at the Panama-Pacific Exposition. A two-story building is to be erected in place of the original three-story as intended. Washington will expend about \$60,000 in construction. Bids will be called for shortly.

ORIENTAL CONCESSION BUILDING — Frame construction, \$50,000. San Francisco. Architect, Alfred I. Coffey, Humboldt Bank Bldg., S. F. Owners, Fung Ming and Mr. Sullivan, Bankers' Investment Bldg. The building will be a three-story structure with a large central tower. A site 160 by 200 will be completely covered by the building. The design has been carried out in the true Oriental style. Modern plumbing and electric work will be installed. Exterior will be covered with cement plaster and a large amount of galvanized iron will also be used. Bids will be taken by the owners.

WISCONSIN STATE EXHIBIT BUILDING — Frame construction, Cost not stated. San Francisco. Architects, R. M. Messmer & Bros., Milwaukee, Wis. Owners, State of Wisconsin. Plans recently submitted in competition with a number of the leading architects of Wisconsin resulted in the selection of the above named architects to design the Wisconsin State Building. The exact amount of money to be expended has not yet been determined, and the question of the type of building to be erected is also an open subject at this time. Further mention will be made of the work.

COURT OF PALMS AND FLOWERS — Frame construction, \$184,000. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Strehlow, Freeze & Peterson submitted the lowest figure at \$184,000 for the construction of this building. Nell A. McLean was the next lowest bidder at \$197,000. A contract will be awarded in the course of a week.

CHURCH — Reinforced concrete construction, \$50,000. San Francisco. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, Star of the Sea Church. The building will be erected at the corner of Geary and 8th avenue, and will be designed in the Mission style. Interior will contain an auditorium seating 750 people, Sunday school rooms and social rooms. Interior finish will be of pine and redwood. Exterior of the building will be faced with cement plaster. Roof will be of red clay tile. Working drawings are being prepared.

ENGINE HOUSE AND STABLES — Reinforced concrete and frame. Cost not stated. San Francisco. Architect, Edmund Kollofrath, 550 Belvedere street, S. F. Owners, Merchants' Ice and Cold Storage Co. These buildings will form a part of the new plant which is to be erected at the southeast corner of Lombard and Montgomery streets. The engine house will be of reinforced concrete while the stable

building will be of frame construction. Plans for a large six-story ice and cold storage plant have also been completed and will go out for figures at once.

FLATS—2, 2 story and base, frame, \$5,000. San Francisco. Architect, Herbert A. Schmidt, Royal Insurance Bldg., S. F. Owner, Charles J. U. Koenig, 520 Church street. These two buildings will be erected on the north line of Broadway east of Larkin street. Each has been designed to contain two modern flats of five and six rooms each. Interiors will be finished in pine with some oak floors and elm panels. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. There will be automatic water heaters. Exterior will be covered with rustic and cement plaster or metal lath and a pressed brick veneer base. Plans are complete and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected on the south side of Greenwich street west of Larkin, covering an area of 27½ feet by 46½ feet. There will be two flats of five rooms each. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. Bath rooms and kitchens will have tile wainscot. Exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

FLATS—3 story and base, frame, \$7,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Frediani Bros. The building will be erected on Folsom street near Third and will be arranged for one store on the first floor and two flats on the upper floors. Interior finish will be of pine and redwood. Gas grates and tile mantels will be used. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with shiplap and rustic. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, James Flanagan, 3342 Army street, S. F. The building will be erected on Serpentine street east of Mission, covering an area of 25 by 53½ feet. There will be four flats of five rooms and bath each. Interiors will be finished in pine and redwood with some oak floors. Each living room will have an open fire place and tile mantel. Bath rooms will have composition floors. Kitchens and baths will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner, who will do the work by Day Labor. All materials are now being purchased.

FLAT AND STORE—2 story and base frame, \$3,260. San Francisco. Architect, none. Owner, E. F. Maxwell, 738 Clement street, S. F. The building will be erected on the north side of Clement street east of 9th avenue. The first floor will be occupied by a store, while the upper floor will be arranged for a five room flat. Interior of the flat will be finished in pine and redwood with some oak floors. There will be an open fire place and tile mantel. Bath room

and kitchen will have tile wainscot. There will be patent store fronts. Exterior of the building will be covered with shiplap. Plans are complete and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, W. G. McDiarmid, 56 Ellisworth street, S. F. The building will be erected on the north side of 26th street west of Dolores, covering an area of 27 by 32 feet. Interior will be finished in pine and redwood. There will be two small flats. Bath rooms and kitchens will have tile wainscot. Open fire places and tile mantels are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

FLAT ALTERATIONS—Frame construction, \$2,000 and \$3,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. Plans are complete and figures are now being taken for the alteration of two flat buildings. Included in the work will be new store fronts, plumbing, electric work, plastering, interior finish and exterior painting and plaster work.

HOTEL—3 story and base. Class C construction, \$15,000. San Francisco. Architect, David C. Coleman, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Third street near Bryant and will be designed for hotels on the first floor and a number of store rooms and several baths on the upper floor. Interior will be finished in pine throughout. There will be steam heat and a central heating system. Bath rooms will have tile wainscot and composition floors. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are out for figures.

HOTEL—4 story and base. Class C construction, \$40,000. San Francisco. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, M. C. and J. B. Kennedy. This building will be erected at the corner of Ellis and Larkin streets, covering a considerable ground area. There will be a store beside the hotel entrance and lobby on the first floor. Upper floors will be arranged for in the neighborhood of 70 guest rooms, a large percentage of which will have private baths. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Some wall beds will be used. Exterior of the building will be faced with pressed brick. Working drawings are being prepared.

SCHOOL—2 story and base. Class A construction, \$100,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the Washington Irving School, to be erected on the north side of Broadway between Sansome and Montgomery streets, have been approved and are now out for figures. Bids will be opened by the Board of Public Works on February 11th. Separate bids are being taken for the general construction, brick work, plumbing and gasfitting, electric work and heating and ventilating. An official

proposal appears in another column of this issue. Plans can be secured from the Department of Architecture.

SCHOOL—3 story and base, reinforced concrete, \$70,000. San Francisco. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Paul's Church. The building will be erected at the corner of 29th and Church streets, and will be designed for a parochial school. There will be a number of class rooms, general office and a large auditorium. Interior will be finished in pine. Plans provide for a central heating system, probably steam, program clocks and vacuum cleaning. Exterior will be faced with cement plaster. Working drawings are being prepared.

OFFICE BUILDING—19 stories or more. Class A construction, \$500,000. San Francisco. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Firemen's Fund Insurance Co. The announcement that Lewis P. Hobart has been selected as the architect for this building has just been made. The structure which will rank among the most modern of San Francisco's office buildings, will be erected at the corner of California and Sansome streets, covering considerable ground area. Construction will be fireproof throughout with a complete steel frame, exterior walls of brick and concrete faced with pressed brick and terra cotta. Floors will be of reinforced concrete with hollow tile partitions. Metal trim, metal window sash and frames will add to the fire resisting qualities of the building. Hardwoods, marble and tile will be used for interior finish. The entire first floor, mezzanine and a part of the second floor will be occupied by the Firemen's Fund Insurance Co. A total of some 300 offices will occupy the balance of the building. Plans provide for steam heat, passenger and freight elevators, vacuum cleaning and mail chutes. Working drawings are being completed and figures will be called for shortly.

RESTAURANT ALTERATIONS—Cost not stated. San Francisco. Architect, Oscar H. Ostlund, 64 Raush street, S. F. Owner, G. W. White. The building now located at 122 to 130 Kearny street is to undergo extensive alterations and will be fitted up for a high class restaurant. Included in the work will be concrete and marble floors, interior finish, plumbing, electric work and painting. Brazilian walnut, blue gum and other hardwoods will be used. Plans are complete and figures are being taken.

MORGUE—Class A construction, \$73,330. San Francisco. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works show T. W. McClenahan low at \$73,330. He will probably be awarded the contract. A complete list of the figures received will be found under the heading of San Francisco in this issue.

APARTMENT HOUSE—3 story and base, reinforced concrete, \$60,000. San Francisco. Architect, Matthew O'Brien, Foxcroft Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Divisadero and Duboce streets, and will cover a large area. Suites will contain two, three

San Francisco

Lewis P. Hobart, Architect
San Francisco

and four rooms with bath. Interior finish will be of pine and hardwoods with oak floors in the principal rooms. All apartments will be equipped with wall beds. Plans provide for steam heat, elevator service, a hot water system and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—4 story and base, reinforced concrete, \$32,750. San Francisco Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, J. D. Reite. The building will be erected on the south side of Post street west of Larkin, having a frontage of 25 feet by a depth of 120 feet. There will be 27 suites of two and three rooms. Interiors will be finished in pine and hardwood panels with some oak floors. Plans provide for steam heat, an automatic elevator and vacuum cleaning. All suites will be equipped with wall beds and will have private bath rooms. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor. All materials are being purchased.

EXHIBIT BUILDING—Frame construction, \$15,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Ghirardelli Chocolate Co. Plans are being prepared for a private concession building which will be occupied by the Ghirardelli Company. The design will probably be in the Mission style with the exterior covered with cement plaster on metal lath. Preliminary drawings are being prepared. Further mention will be made of the work.

RESIDENCES—2, 2 story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, F. Neilson, 30 Presidio Terrace, S. F. These houses will be erected on the west line of 15th avenue north of California. Each dwelling will contain six rooms and bath. Interiors will be finished in pine with some hardwood panels. Oak floors will be used in the living rooms and dining rooms. There will be large open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the houses will be covered with cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor. All materials are now being purchased.

Contracts Awarded.

PIER CONSTRUCTION—\$146,215 San Francisco. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, Healy-Thibbitts Construction Co., S. F. Contract price, \$146,215. Other figures submitted for this work will be found under the heading of San Francisco in

PLANS FILED FOR MUSEUM.

Plans were filed January 23rd with John P. Horgan, Chief Inspector of Buildings of the Board of Public Works, for the construction of a museum in Golden Gate Park, to cost approximately \$200,000. Plans for this structure were prepared by Architect Lewis P. Hobart.

Much New Work At Army Posts.

Working Drawings for New Stables Being Completed and Figures Will Be Called For Shortly.

The Constructing Quartermaster's office at Fort Mason are now working over 1000 men on the various construction enterprises on which the department is engaged. About 500 of these men are from the ranks of the unemployed and were turned over to the Constructing Quartermaster by the city authorities and were put to work on the construction of McDowell avenue.

NEW STABLE BUILDINGS.

The Secretary of War has allotted about \$90,000 for the construction of five new reinforced concrete stables, which are to be erected for the Presidio and Fort Scott. Each building will be about 185 feet long and 65 feet wide. Floors will be of paving brick while the most approved stable equipment will be installed, including electric lights and plumbing. Each stable will have a capacity of about 100 animals. Exteriors will be covered with cement plaster and roofs will be of red clay tile. As soon as plans and specifications can be finished the work will be advertised for bids. The site for the buildings is now being cleared by day labor, but a contract will probably be let for the grading. Plans for a complete drainage system through the stable site have been complete and sent to Washington for approval.

MUCH NEW ROAD WORK.

McDowell avenue, on which over 500 of the unemployed are at work, is to be converted into a scenic boulevard about four miles long. The roadway will consist of a one course six inch concrete pavement, using a one part cement, two parts sand and three and one-half parts stone mix, laid fairly dry. The rest of the roads in the reservation will be constructed of oiled macadam. All work will be done by day labor except the placing of the concrete, which will be let by contract.

PIER AND BREAKWATER.

Plans for a new pier and breakwater, which is to be erected at Fort Berry, have been prepared by the Constructing Quartermaster's office and have been sent to Washington for approval. The pier and breakwater will be of stone with an apron wharf on one side 200 by 50 feet and an approach of 115 by 25 feet. The pier will be carried on 10 inch iron pile, the superstructure being of frame. An estimated cost of \$65,000 is placed on the work.

HOSPITAL IMPROVEMENTS.

A ward for the treatment of special cases at the Letterman General Hospital has been authorized by the Surgeon General. This building will be two stories high covering an area of 80 by 28 feet, construction being of reinforced concrete. Exterior will be faced with cement plaster and a red clay tile roof will be used. Plans include modern heating, electric work and ventilating. An estimated cost of \$20,000 is placed on the work.

The refrigerating plant at the Letterman General Hospital is to be enlarged by the addition of another ice

machine and ice tank. Plans for this work are now being completed by Engineer O. W. Degen of the Constructing Quartermaster's office.

Work of converting Fort Point into a detention barracks for 500 men will be started in a few days. The work will be done by the purchase of materials and prison labor.

Bids For Court Of Palms and Flowers.

Strehlow-Freeze & Peterson Low Men For Big Exposition Building Nell A. McLean Next.

The lowest bid received for the construction of the Court of Palms and Flowers was presented by Strehlow-Freeze & Peterson at \$184,000, while the next lowest figure came from Nell A. McLean at \$197,000.

Bids were opened by the Buildings and Grounds Committee of the Panama Pacific Exposition Company.

State Harbor Board Award Pier Contract.

Healy-Thibbitts Construction Company Will Build Pier No. 46. Bids to Be Called For on Two Jobs.

Bids were opened by the State Board of Harbor Commissioners on Thursday, January 22nd, for the construction of Pier No. 46. The lowest figure was submitted by Healy-Thibbitts Construction Company at \$146,215 and a contract has been awarded. A complete list of bids follow:

Pier No. 46.

San Francisco Bridge Co.	\$151,770
Healy-Thibbitts Constr. Co.	146,215
Thompson Bridge Co.	149,870
Hyde-Harjes Co.	156,000

At the same meeting the Secretary was instructed to advertise for bids on widening pier No. 54 and for the construction of Ferry Slip No. 8.

City Bids Opened.

Bids Received For the City Morgue, Four Bidders Identical on Furnishing Copper Nail Bonds.

Bids were opened by the Board of Public Works at their Wednesday afternoon session for the construction of the morgue in the new Hall of Justice. T. W. McClanahan presented the low figure at \$34,330. Other figures received were as follows:

Morgue, Hall of Justice.

William Bateman	\$43,250
Newsom, Wold & Kohn	35,760
Sound Constr. & Eng. Co.	36,527
Grant Fee	40,000
Caldwell & Son	36,572
T. W. McClanahan & Co.	34,330
McSheehy Bros.	35,933
Monson Bros.	35,837
O. C. Holt	37,940

Bids were also received for furnishing copper nail bonds for the new Municipal lines. Unit prices were asked for on eight propositions. The

figures submitted by the United States Steel Products, Westinghouse Electric Mfg. Co., Electric Service Co., and the General Electric Co. on each of these propositions were identical. Holabird & Reynolds, bidding on two of the propositions were somewhat below the others.

Death Notice.

**Architect William Curlett Passes Away
At His Home in Menlo Park After
Long Illness.**

It is with the deepest regret that the "Builder" announces the death of Architect William Curlett at his home in Menlo Park on Wednesday morning, January 21st.

Mr. Curlett was one of the ablest and most respected members of the architectural profession and has devoted the greater part of a life extending over seventy years to his profession. Among the many notable structures which were designed by him, may be mentioned: The Los Angeles County Court House, the Mary Pauline Payne residence at Menlo Park, the McLean and Addison Head Buildings in this city and other large commercial structures in various parts of the State.

Mr. Curlett's death comes as the result of an illness extending over a considerable period, during which he has been confined to his home at Menlo Park.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—1 1/2 story and base,
 frame, \$7,500. Berkeley, Alameda Co.,
 Cal. Architect, none. Owners, Patrick
 Nelson Co., 2011 Shattuck avenue, Ber-
 keley. The dwelling has been designed
 for a six-room house with bath and
 sleeping porch. Interior finish will be
 of pine and redwood with some oak
 floors. There will be furnace heat and
 an open fire place. Mantel will be of
 brick. Bath room will have tile wains-
 cot and composition floor. An auto-
 matic water heater will be installed.
 Exterior of the dwelling will be cov-
 ered with cement plaster on metal lath.
 Plans are complete and the work will
 be done by Day Labor. Materials are
 now being purchased.

RESIDENCE — 2 story and base,
 frame, \$3,600. Oakland, Cal. Archi-
 tect, Claude Barton, Security Bank
 Bldg., Oakland. Owners Newman and
 Wilkinson. The dwelling will be erect-
 ed in Claremont Tract, and will con-
 tain seven rooms, bath and sleeping
 porch. Pine and redwood finish and
 hardwood floors will be used in the
 principal rooms. There will be fur-
 nace heat and open fire places. Man-
 tels will be of tile and brick. An au-
 tomatic water heater will be installed.
 Bath room will have composition floor
 and tile wainscot. Exterior of the
 dwelling will be covered with cement
 plaster on metal lath. Plans are com-
 plete and figures are being taken.

RESIDENCE — 2 story and base,
 frame, \$4,500. Piedmont, Alameda Co.,
 Cal. Architect, Charles W. McCall.
 Central Bank Bldg., Oakland. Owner,
 Dr. Shannon. The dwelling has been
 designed for a seven-room house and
 will be erected in the Piedmont Tract.
 Interior will be finished in pine and
 hardwoods. Oak floors will be used
 in the living room, dining room and
 reception hall. There will be furnace
 heat and open fire places. Mantels will
 be of brick and tile. Bath room will
 have tile wainscot and composition
 floor. An automatic water heater will
 be installed. Exterior of the dwelling
 will be covered with cement plaster
 on metal lath. Plans are being pre-
 pared.

RESIDENCE — 2 story and base,
 frame, \$7,000. Oakland Cal. Archi-
 tect, Alvin Stern, 1523 Broadway, Oak-
 land. Owner, Roger Col. This house
 will be erected at the southeast cor-
 ner of Lennox and Monterito streets,
 and has been designed to contain eight
 rooms, baths and sleeping porch. In-
 terior finish will be of pine and hard-
 wood. Oak floors will be used in the
 principal rooms. Plans provide for
 furnace heat and open fire places. Man-
 tels will be of tile and brick. An au-
 tomatic water heater will be installed.
 Bath rooms will have tile floors and
 wainscot. Exterior of the dwelling
 will be covered with cement plaster on
 metal lath. Plans are being prepared.

APARTMENT HOUSE—2 story and
 base, frame, \$10,000. Oakland, Cal. Ar-
 chitects, Hutchinson Bros., 470 13th
 street, Oakland. Owner's name with-
 held. The building will be erected on
 31st street near San Pablo avenue, and
 will be arranged for suites of two and
 three rooms. All apartments will have
 private bath rooms and wall beds. In-
 terior finish will be of pine and red-
 wood. Bath rooms will have composi-
 tion floors and tile wainscot. Entrance
 will be finished in tile and marble. Gas
 grates and tile mantels will be used.
 Exterior of the house will be covered
 with rustic and shingle. Plans are now
 being completed.

JAIL PLUMBING—Cost not stated.
 Oakland, Cal. Architects, Palmer &
 Hornbostel, New York and City Hall
 Bldg., Oakland. Owners, City of Oak-
 land. All bids received sometime ago
 for the furnishing and installing of
 special jail plumbing were rejected and
 new figures are being called. Bids
 will be opened on January 29th. Plans
 and specifications can be secured from
 the architects.

HOTEL—7 story and base, reinforced
 concrete, \$110,000. Oakland, Cal. Ar-
 chitect, C. W. Hickey, Central Bank
 Bldg., Oakland. Owner, Frank Bilger.
 The building will be erected on the
 north side of 16th street, between San
 Pablo and Telegraph avenues. Con-
 struction will be practically fireproof.
 Interior finish will be of pine and hard-
 woods. There will be in the neigh-
 borhood of 150 guest rooms, nearly all
 having private bath. There will be a
 large lobby and office. Plans provide
 for steam heat elevator service, wall
 beds, vacuum cleaning and a hot water
 system. Metal window sash and frames
 will be used. Ornamental plaster,
 marble and tile will be used in the en-
 trance and lobby. Exterior of the
 building will be faced with cement
 plaster. Plans are being prepared.

HOTEL WORK — \$2,000. Oakland,
 Cal. Architect, Clay N. Burrell, Albany
 Bldg., Oakland. Owners Morris and
 Muller. Plans are being prepared for
 the ornamental plaster work, marble
 work, light fixtures, mantels and wall
 paper in the lobby and lounge rooms
 of the seven-story hotel building being
 erected at the corner of 14th and Jeffer-
 son streets. Owners will take fig-
 ures.

ALAMEDA COUNTY BUILDING REC- ORD.

The building record for 1913 for the
 cities on the east side of the Bay
 shows a substantial gain over the
 year 1912. The figures are given be-
 low month by month for each city:

Oakland.	
January	\$ 608,822.25
February	596,264.00
March	571,022.30
April	635,176.20
May	1,282,345.60
June	577,517.00
July	560,588.25
August	1,080,960.10
September	456,124.00
October	777,387.45
November	414,236.25
December	1,099,621.70
Total	\$3,106,191.40

Berkeley.	
January	\$ 119,800
February	162,000

March	331,850
April	236,900
May	180,800
June	201,800
July	133,000
August	123,750
September	144,000
October	158,050
November	205,500
December	233,250

Total .. \$2,236,700

January	\$100,130
February	80,141
March	58,176
April	54,797
May	64,517
June	62,232
July	37,635
August	34,187
September	52,068
October	33,972
November	36,835
December	30,220

Total .. \$645,800

As the city of Richmond is so close by it might be well to add these also.

From January to June, 1913, the figures reached \$451,507 and for the last six months of the year building operations amounted to \$233,518 making a total of \$733,325, and a healthy gain over 1912.

SAN JOSE AND THE SANTA CLARA VALLEY.

RECORDER'S ANNUAL REPORT.

H. O. Heiner of San Mateo County Sets Record for Early Return of Papers—Office Prosperous.

The following statement made by County Recorder H O. Heiner of San Mateo County for the year 1913, while it shows a decrease in the total number of papers recorded for the year, still leaves the county a very fine profit.

One of the most interesting statements brought out by the report is that relating to the average length of time required by the Recorder to file, copy, index, compare and return papers to the patrons. In San Mateo County this process takes but four days. This is one of the best records for time in the state.

Deeds	4,724
Trust Deeds	122
Mortgages	802
Release of Mortgages (full or partial)	625
Builders' Contracts	146
Maps	19
All other documents	1,152

Number of papers recorded	7,390
Total amount of fees collected	\$10,793 30
Expended for salaries of Recorder, two deputies and five copyists	\$3,316 74

Profit to County 2,476 56
 Compared with 1912 and 1911, the year 1913 in the business of the Recorder's office shows a decrease, as follows:

No. of papers recorded	Total fees
1911	\$11,128 50
1912	\$11,833 90
1913	\$10,793 30

RESIDENCE — 2 story and base, frame and concrete, \$4,000. Monterey, Cal. Architects, Silex & Lofquist, Bankers' Investment Bldg., S. F. Owner, Juan Copper. The house will be designed for a large country home, containing in the neighborhood of twenty rooms, three baths and sleeping porches. Interior finish will be of pine and hardwood with oak floors in the principal rooms. Bath rooms will be finished in tile and will be equipped with showers. There will be a central heating system, probably hot water heat, a vacuum cleaning plant and hot water supply. Exterior of the dwelling will be faced with cement plaster. Roof will be of red clay tile. Plans are now being prepared.

RESIDENCE — 1 story and base, frame, \$2,000. San Jose, Santa Clara Co., Cal. Architect, none. Owner, V. Reinhold, Jr., 346 North 12th street, San Jose. The dwelling has been designed for a five-room house with bath. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be a large open fire place and brick mantel. Bath room and kitchen will have

tile wainscot. Exterior of the house will be covered with rustic and ship-lap. Plans are complete and the work will be done by Labor.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

RESIDENCE—2 story and base, frame, \$3,560. Byron, Contra Costa Co., Cal. Architect, E. B. Brown. Masonic Temple. Stockton. Owner, Mr. Kamond. The dwelling will contain seven rooms, bath and sleeping porch. Interior will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures will be taken at once.

APARTMENT HOUSE—2 story and base, brick, \$12,000. Richmond, Contra Costa Co., Cal. Architect, James T. Nabbert, Richmond. Owner, O. E. Liddell. The building will be erected at the corner of Agnew and Richmond avenues and will be arranged for two, three and four room apartments. The interior will be finished in pine and redwood. Some hardwood floors will be used. There will be steam heat and a hot water system. Bath rooms will be finished in tile wainscot and will have composition floors. Wall beds will be installed. Exterior of the building will be faced with pressed brick. Plans are now nearly complete and figures will be asked for shortly.
LODGE HALL—3 story and base.

Wybro

San Francisco

Be Particular--- Use Wybro Panels

Get the most for your money, even
when buying Veneered Panels.

Particular people appreciate the su-
periority of the Wybro Panels over all
others. Are you?

Wybro Panels cost no more than
others, but their quality is far superior.

brick, \$50,000. Richmond, Contra Costa Co., Cal. Architect, James T. Norbett. Richmond. Owners, Richmond Eagles Hall Association. Mr. Norbett and a Building Committee are now considering several sites for a new lodge building. Two sites on Richmond avenue are said to be most favorably considered. In case either of these is selected the building will be designed with stores on the first floor and lodge rooms and offices on the upper floors, which arrangement will afford the owners an income. Further particulars of the building will be given as plans progress.

RECREATION BUILDING—Frame and concrete. Cost not stated. Napa, Napa Co., Cal. Architect, State Architect, McDougall, Sacramento. Owners, State of California. Plans for a recreation building which is to be erected at the Napa State Hospital have been completed and are now out for figures. Bids will be opened on February 24th by the State Board of Control. Plans and specifications can be secured from the State Department of Engineering. An official proposal appears in another column of this issue.

HOSPITAL ADDITION—2 story and base, reinforced concrete, \$30,000. Martinez, Contra Costa Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Contra Costa County. The building will be in the nature of a new wing to the County Infirmary, and will contain wards and private rooms. A modern operating room and equipment will also be installed. Interior finish will be of pine. Plans provide for steam heat, a hot water system and vacuum cleaning. Tile and marble will also be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared and figures will be called for within a short time.

Telephone Kearny 2622

615 Phelan Building, San Francisco

Foley, 46 Kearny street, S. F. Owners, Sisters of Providence. A site has been secured and funds are now nearly all available for the construction of a modern hospital. Funds have been donated by the citizens and the hospital will be conducted as a non-sectarian institution. Plans will be arranged for two wards, a number of modern private rooms, operating rooms, office and nurses quarters. Interior will be finished in pine, hardwood and tile. Construction will be fireproof. There will be steam heat, oil burning plant, hot water system and vacuum cleaning. Exterior of the building will be faced with cement plaster. Plans are being prepared.

DEPARTMENT STORE—1 story and base, brick and steel, \$15,000. Modesto, Stanislaus Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Charles Daunt. The building will be erected at the corner of K and 10th streets, covering an area of 50 by 150 feet. The basement as well as the ground floor will be arranged for stores. There will be considerable steel used. Interior finish will be of pine and hardwoods. A cement floor, metal window sash and frames and steam heat will be installed. The entire building has been leased to the Rockdale Co. Exterior will be covered with pressed brick. Patent store fronts and plate glass windows are specified. Plans are nearly complete and figures will be called for at once.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

APARTMENT HOUSE—2 story and base, frame, \$10,000. Sacramento, Cal. Architect, none. Owner, A. W. Norris, 409 21st street, Sacramento. The building will be erected on 18th street, and has been arranged to contain four modern suites of three and four rooms. Interior finish will be of pine with oak floors in the living rooms. All suites will have private bath rooms and wall beds. There will be gas grates and tile mantels. Bath rooms will have composition floors and tile wainscot. A central heating system and hot water plant will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SCHOOL—2 story and base, brick and concrete, \$100,000. The Dalles, Ore. Architect, C. K. Crandall, The Dalles. An announcement of the selection of the architect has just been made by the Board of Education. Details of the building cannot be published at this time. It is the intention of the Board to erect a modern high school structure.

Contracts Awarded.

FACTORY—1 story and base, reinforced concrete, \$25,000. Gresham, Ore. Architect, P. Chappell Browne, Mohawk Bldg. Portland. Owners, Beaver State Motor Car Co. Contractors, James P. Taylor Co., Couch Bldg., Portland. Contract price, \$25,000.

SEATTLE AND WASHINGTON.

APARTMENT HOUSE—3 story and base, brick, \$35,000. Seattle, Wash. Architect, none. Owner, John Hakanson, 3725 Nob Hill avenue, Seattle. The building will be erected at the corner of Spruce and 12th avenue, and will cover an area of 50 by 126 feet. Plans provide for sixteen suites of two, three and four rooms. Interior finish will be of pine and redwood with hardwood floors in the living rooms and halls. There will be steam heat, an oil burning system, vacuum cleaning and hot water supply. Bath rooms will have tile wainscot and composition floors. All suites will be equipped with wall beds. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. Bids will be taken in about two weeks for materials.

HOTEL—6 story and base, brick and steel, \$60,000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owner, P. J. Murphy. The building will be erected at the corner of 6th and Jackson streets, and will cover a large area. Construction will be practically fireproof with a steel frame, brick walls, reinforced concrete floors and hollow tile interior partitions. All guest rooms will have private baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, a vacuum cleaning system and metal window sash and frames. A complete oil burning system will be installed. Bath rooms will have composition floors and tile wainscot. Ornamental plaster, marble and

tile will be used in the entrance and lobby. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

CHURCH—1 story and base, frame, \$19,000. Seattle, Wash. Architects, Wilcox & Sayward, Central Bldg., Seattle. Owners, Keystone Congregational Church. Work will be started at once on the new building to be erected on 31st street. There will be a main auditorium seating 300 people, pastor's study and Sunday school rooms. Interior finish will be of pine throughout. A central heating system will be installed. Exterior of the building will be covered with rustic and ship-lap. The work will probably be done by Day Labor. Some art glass is specified.

FIRE STATION AND JAIL—3 story and base, reinforced concrete, \$100,000. Seattle, Wash. Architect, D. R. Huntington, Seattle. Owners, City of Seattle. A resolution has been introduced by Supervisor Pierce calling for a bond election to secure funds for a combination fire station and jail in the Denny Hill District. Preliminary plans of the architect accompanied the resolution. Further mention will be made of the work.

Contracts Awarded.

APARTMENT HOUSE—6 story and base, reinforced concrete, \$15,000. Seattle, Wash. Architect's name not given. Owner, Mr. Dow, Contractor, David Dow, 21st and Spruce streets, Seattle. Contract price, \$15,000.

GARAGE—2 story and base, brick, \$36,000. Seattle, Wash. Architect, none. Owners, Waterhouse-Sands Co. Contractors, Sound Construction and Engineering Co., Lowman Bldg., Seattle. Contract price, \$30,600.

THE USES OF BIRCH.

Birch is so popular for interior finish that our readers will doubtless appreciate an authentic statement of the properties and uses of this versatile wood. Fortunately, we are able to give them this information based upon a recent bulletin of the United States Forest Service.

The bulletin speaks of "sweet" birch, meaning the species known botanically as *Betula lenta*, "but since a great deal of the so-called 'sweet' birch used in the factories is simply the red heartwood of yellow birch (*Betula lutea*), the information given is of interest to every producer of birch throughout the United States. We quote from the bulletin as follows:

Early Uses.

Though in early times sweet birch was used chiefly for fuel, there is evidence that it was on the market as timber more than a century ago. As early as 1791 shipments were going regularly to Clyde and Liverpool.

Birch is believed to have been the first wood employed as an imitation of mahogany in this country, but the exact date is uncertain. Boston furniture makers were putting it to that service very early. It is still so used, and one of its commercial names is mahogany birch, given it because of its success as a counterfeit. Cherry birch is another of its names, due to its success as a substitute for cherry. It is sometimes called red and white birch, the first

name bentwood because the heartwood is red, and the second because the sapwood is white.

While Boston was staining birch and selling it as mahogany in furniture and musical instruments, New York carriage makers were building fine panels of it and finding ready sale for their product without biding it under false names. The artistic front of many a chest of drawers passed for mahogany a century ago (and may still pass as such in antique collections), though the wood grew in Massachusetts, New York or Pennsylvania.

Furniture.

Among the earliest attempts to make high grade furniture of sweet birch were those successfully carried out at Boston. Hand-carved arms for chairs were turned out in attractive designs. The early hand processes expanded and developed into manufacturing as the term is now understood. Sweet birch, being a wood of high grade, has been prominent in furniture manufacture from the first successful attempts. It is physically equal to nearly any wood; it is heavy, dense, of good milling qualities, lends itself to stains and fillers, and holds finish well. There is probably no important line of furniture produced in this country which does not make use of some birch. The earliest furniture of this wood seems to have been chairs, and at this day chairs are of sufficient importance to claim first place. The range rises from the cheap camp chair or stool to the finest rocker. The entire article is not necessarily birch; in fact, it seldom is. This wood may supply only the back, the seat, the arms, the rockers, or some of the slats, rounds, or spindles. A special place for it is found in opera chairs, in which three or five ply veneer, the visible wood being birch, is shipped for seats and backs. School desks in large numbers are manufactured in similar patterns. Morris chairs, of which the arms at least are of this wood, are widely sold, and a still higher grade is found in upholstered and plain parlor suites, including davenport, sofas, settees, squabs, and lounges. The heavier of these articles are on casters, which are often of birch, as its hardness, and strength fit it for such service.

Several important places in church furniture and fittings are admirably filled by sweet birch, although it is not so extensively employed as oak. It is made into pews, pulpits, communion tables, contribution plates, pulpit chairs, and Bible stands.

It is a popular cabinet wood and enters into the construction of a long list of articles, from kitchen tables and cupboards to elastic bookcases and filing cabinets. It is not always the outside wood, but it usually is, especially the richly colored heartwood. It should be borne in mind that there are two kinds of birch as the cabinet-maker views it—heartwood and sapwood. The difference in color is apparent at a glance, and the workman selects his material for the sake of color. He selects it as carefully for another reason, if he employs glue to fasten the parts together. Birch does not split readily, because of its tendency to split, and much of it is either dovetailed or glued. If it is glued the best results are attained only when sap-

wood is glued to sapwood and heartwood to heartwood. Birch appears in many kinds of desks, not only as an imitation of cherry or mahogany but on its own merit. Smoking stands and card tables of this wood are also popular. Children's cribs, folding beds, china closets, extension tables, wall cases, ball trees, taboretts, umbrella stands, chiffoniers and dressers of sweet birch are listed by many factories.

◆

Proposal

STATE OF CALIFORNIA, DEPARTMENT OF ENGINEERING, CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until 2 o'clock P. M. on February 24th, 1914, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

San Mateo County from the south line Daly City to South San Francisco (V-S, M-2-A), about 4 miles in length, to be built of Portland cement concrete with asphalt surface.

San Diego County from Las Flores to the Western Boundary (VII-S, D-2-D), about 11.5 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids and to accept the bid deemed for the best interests of the State.

Dated: January 22, 1914.

CHARLES D. BLANEY

NEWELL D. LINGLINGTON,

CHARLES F. STERN,

California Highway Commission.

ALSTIN B. FLETCHER

Highway Engineer.

WILSON R. ELLIS, Secretary. (•)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 215 of the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 10:00 A. M. Thursday, February 5, 1914, for Electric Wiring of the Buildings and Grounds of the Transportation Building in accordance with the plans and specifications on file in the office of the Director of Works, and Chestnut Streets, San Francisco.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company. In the sum of (10) per cent of the amount bid or the same will not be considered. When the award of contract is made the check will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfac-

tory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$25.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and specifications must submit a bid which will forfeit the deposit of Twenty-five Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee,
WILLIAM H. CROCKER,
Chairman.

NOTICE TO CONTRACTORS.

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS, Union Depot and Ferry House, San Francisco, January 28, 1914.

SEALED PROPOSALS or bids will be received at this office on or prior to 11 o'clock A. M. on Wednesday, February 11, 1914, for furnishing materials for constructing an addition to the north side of Pier No. 54, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Assistant State Engineer, and adopted by the Board of August 16, 1912, and on file in this office to which special reference is hereby made.

The materials to be used in this work shall consist of the following quantities: Portland cement and Douglas fir piles (which will be furnished to the contractor by the Board); sand, crushed rock, gravel, railroad ties, lumber, castings, structural steel, rods, bolts, spikes, car springs, asphalt paving, etc.

All materials used must be of the best of their respective kinds, if not especially specified herein. All materials used in the structure will be subjected to a rigid examination, test, and if found defective, undersize, unsuitable or not as specified, will be condemned and must be immediately removed from the work by the contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office, and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal. The same must be made payable to the Secretary of the Board of State Harbor Commissioners. If the proposal is accepted and the contract awarded and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect and shall be paid into the San Francisco Harbor Improvement Fund.

The bond is required to be not less than one-half of the total amount of the bid, with two or more sureties, to be approved by the Board of State Harbor Commissioners, and conditioned that the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning of the same, and the satisfaction of the Board, and said bond shall also be effective as provided in an Act approved May 1, 1911, for the protection of materialmen, mechanics and laborers.

Bids will not be considered by the Board unless delivered to the Secretary or the Assistant Secretary to the office of the Secretary at or prior to 11 o'clock A. M. on Wednesday, February 11, 1914, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of bids.

J. DWYER,

THOMAS S. WILLIAMS,

J. H. McALLUM,

Board of State Harbor Commissioners.

BOOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

CALL Douglas 2944

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT
Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires

Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London

The Ritz, London

The Hyde Park, London

The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hosteleries with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

OTIS ELEVATOR COMPANY

Stockton, North Point and Beach Sts.
San Francisco

Offices in all Principal Cities of the World.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

“KINNEAR” STEEL ROLLING DOORS & SHUTTERS

KINNEAR STEEL ROLLING DOORS are designed to afford fire protection and for the closure of all openings in which ease and speed of operation and economy of space are considerations. They are adaptable to all classes of new or old building construction and by their use make possible the closing of very large openings which could not otherwise be conveniently covered.

In addition to the above uses, their extensive employment for fire protection and the high degree of efficiency shown by them in actual fires, has caused the KINNEAR Company to produce a shutter of a distinctly fire retardant character. With this end in view, numerous tests extending over a period of five years were made, and effects carefully noted. As a result, we are now in a position to offer for special fire protective purposes KINNEAR Steel Rolling Doors and Shutters of the “Abacus” Construction, all of which bear the label of the “National Board of Fire Underwriters’ Laboratories.”

Special Catalogue showing Abacus Construction can be obtained on application.

Recent great conflagrations have fully vindicated the claim of the “KINNEAR” STEEL ROLLING DOOR to pre-eminence as a fire-stop. Placed side by side with various other forms of fire retardants it has in every case remained in place even after the others were destroyed.

We will consider ourselves favored if allowed to explain and make quotations on any constructions meeting your definite needs.

**We have just received from the press a new Handbook on Steel Rolling Doors and Shutters Illustrated only with California Installations.

Editorial Comment.

The government railroad in Alaska is to be built in the near future. Forty millions of dollars is to be spent in the construction of the road and in the development of the country and all people will have an equal chance in shipments over the road. The Chronicle reluctantly admits that the road is to be constructed and that Alaska and the Pacific Coast will greatly benefit thereby, but states that if the rest of the country is willing to pay for the construction that we should not complain.

It is the plan of Secretary Lane to have Alaska pay for its own development. This, it no doubt will do in very short order. It is a vast country of very great resources and the wealth of its forests and mines and coal lands and fisheries will no doubt soon repay the government for any money expended.

What the Chronicle and all the other organs of special privilege would have liked would have been to see the resources of Alaska turned over to the Guggenheims or some other similar syndicate. The railroads would then have been controlled by special interests and only those on the inside would have had the advantage. The country would probably have been developed if it would make money for the syndicate but only the privileged classes would have had a show. The construction of the government railroads will set a new standard of development and when it is once established there will be no return to the old feudal methods.

One feature of the Exposition that will be interesting to builders will be a first hand production of the architecture of other nations in the construction of their respective buildings. The world will be represented. And the religion, the climate and the mode of life will be embodied in the architecture that has grown up under different conditions and environments. After all the main feature of the Exposition will be its buildings and grounds, its landscape gardenings and lighting effects, so that while the industries of the world will be represented and the progress of mankind chronicled in its exhibits the art of the builder will be the first and last exhibit of the great show.

Now the question comes up in the matter of trying the condemnation suit of the property of the Spring Valley Water Company. The company insists upon trying a pending rate case before going ahead with the condemna-

tion proceedings. Delay is certainly a word that is over worked in the attempt to get a water supply for this city. The safeguards that are hedged about citizens are often taken advantage of by the unscrupulous. These interminable delays interposed in the path of progress makes one wish for the plenary power of an autocratic ruler that would kick some of the obstructionists into the Pacific ocean.

The Senate has passed the bill for the leasing for a period of six years of the dry dock to be constructed at Hunter's Point by the Union Iron Works. As the bill is practically assured of passage it means the construction here of a dry dock big enough to take any vessel of the American Navy and ship that can pass the Panama canal. As San Francisco Bay is thus recognized as the logical base for the Pacific Navy the merchant marine of the world will find a similar base at this port. San Francisco will eventually come to its own, because of its geographical position and its relation to the commerce of the western world.

Twelve good men and true have returned a verdict that Leah Alexander, who shot J. D. Van Buren, is not guilty of the crime of murder. It is reported that the jury found that she was temporarily insane when the crime was committed.

There seems to be a strange standard of life in the minds of most people. When it happens that a woman kills a man for any reason she is generally treated as if she was an irresponsible being and not endowed with any brains. The old standard of morals of the middle ages is placed upon modern society where women have as much, as if not more, rights and liberties than men.

In the case of the Alexander woman it was a clear case of partners in crime. She could not plead deception or apologize for her own acts in the matter. Society had not wronged her, she had as good a chance in the world as thousands upon thousands of other girls. So that it would seem that she had no more excuse for the plea of insanity than the man who gets crazy drunk and runs amuck and murders his fellow men and offers the excuse that he was drunk when he committed the crime.

Meanwhile the white slave pictures are drawing immense houses and being eulogized by the pulpit and press. All fair minded citizens will be disposed to give the woman the best of it when it is shown that she has been taken advantage of by reason of ignorance, poverty or weakness of any sort. But the sort of sentiment that now seems to have the hold on the public is not based on a rational view of human

nature and it puts a premium on sorts of wickedness that should be condemned as strongly as the crimes it is supposed to expose.

A decision has been handed down by the Circuit Court of Appeals sustaining the contention of the Wright Brothers in their infringement suit on their patents to the aeroplane. This sustains the popular opinion for the Wright Brothers were certainly the first to practically demonstrate aerial navigation. It is true they did not apply any new principle. But they combined and adjusted the ideas already developed and made a success of what had before been a failure. As the Scientific American says:

"This is the history of many other inventions. Morse, Bell, Fulton and the rest, all of them seized the abandoned devices of their predecessors and combined them into commercial operative inventions. To the world at large it seems but a little thing to step in this manner from failure to success; yet only a master mind succeeds in grasping the true relation of a dozen mechanical devices, hitherto uncombined, and in uniting them in some brilliant invention for which the world is immeasurably richer.

The decision in the Wright case ought to lay low the idea that the invention of a light, gasoline motor made the flying machine possible. If that were really true, the man-carrying aeroplane should have appeared twenty years ago. To be sure, the motors of that period were not light; but on the other hand, the long flights that have been made in recent years with two, three and even five passengers, proved conclusively that lightness of motor was not the only consideration. The Wright brothers succeeded, not because they built a light motor with their own hands, but because they had solved a problem in aero-dynamics which had baffled the best scientific thought of centuries."

The most noted architect in Japan, Matsunosuke Moriyama, who recently made an extended visit to America for the purpose of studying the engineering phases of our modern buildings, in commenting on the skyscraper, says: Generally speaking, there is no architecture in America, in the real sense of the term. When I say that there is no architecture in this country, I make a clear distinction between a product of architecture and a mere building. There are many immense buildings in New York, but there are few that can be rightly regarded as the products of architecture proper. Most of them are nothing but mere accumulations of wood, stone, iron and clay, because they have no artistic value at all. If you travel in Europe you will see many buildings of high architectural value. When you look at them they will appeal to you, and the impression you get will be entirely different from that you get out of most of the American buildings. The former impression comes from fine arts, while the latter comes from the mere accumulation of the building materials put together unartistically.

Mr. Moriyama attributes the lack of high class architecture here to America's short existence; her lack of delicate aesthetic taste, and her haste in building the nation. In referring to

the possibility of a characteristic style in this country, he says: America has not her own school of architecture as yet, but a mere imitation of the French school. In the near future, however, the Americans will have their own. They will begin to modify the skyscrapers. They cannot be satisfied with the mere accumulation of big boxes when their artistic nature demands a better type. I can see with a clear vision that the time is coming when there will be many beautiful skyscrapers in New York with high architectural merit. As the skyscrapers are an American production, America will have her own school, distinctly different from other foreign schools, when she has skyscrapers with architectural merit.

The Woolworth building indicates this tendency. There has never been such a skyscraper as the Woolworth building. It has beautiful sky lines, harmony and good proportion from an architectural point of view. I do not hesitate to say that it has been successful in all respects. When America has such skyscrapers as the Woolworth building, the world's opinion of the American architecture will be entirely different from now.

In architectural engineering America is ahead of all nations of the world. You can find no country with a more scientific system of heating or better building materials. Though I can learn almost nothing about the architectural side of the buildings here, I am expecting to get more benefit in this country from the engineering character of them than in any other country in the world.—Construction.

Sometimes the Examiner has an intelligent editorial and the real men of brains on the newspaper voice their independent thought that is not colored by the personal ambition or petty spite of Willie Randolph Hearst. For example writing the following editorial of yesterday's Examiner concerning syndicated news publications of Julian Hawthorne's life in prison:

DISGRACING A GREAT NAME.

"Following the example of other impudent and shameless jaibirds, Julian Hawthorne has been peddling his prison experiences in print. A special investigating commission, appointed by the Department of Justice, has just reported that Julian's 'experiences' are mostly lies, which was to have been expected, as Julian has been little else than a cheap parasite, trading on his father's honored name, all his life long.

Hawthorne's offense was of a peculiarly mean sort. He used his name to cheat hundreds of poor men and women of their earnings, selling bogus securities. He was arrested, tried, convicted and very properly sent to the Federal penitentiary in Atlanta. He served an inadequate term of a few months and then appeared in print wearing the halo of a self-elected martyr.

It is bad enough to have commonplace crooks thrust their frontony and shamelessness upon the public. But it is a blacker shame to see the name of a great genius and high-souled gentleman who gave the world 'The Scarlet Letter' thus dragged in the mire by the mean-spirited son who brings his own dishonor to the market

in which unscrupulous sensation mongers bid for the printed output of base and ill-smelling scribbles."

If the Examiner would apply its own criticisms to its own columns and renovate its own sensationalism the public and its subscribers would be much benefited.

Thomas Carlyle said that the best government in the world would be an absolute monarchy, provided we could get the best and most capable man for monarch. An instance of the truth of his statement is seen in the government of the Canal zone by Colonel Gotthals and there is a demonstration of what a really capable man can do when he knows his business, is absolutely honest and eminently fairminded and just.

Just now he is offered a number of places in the civil life of the country. The Mayor of New York has offered him the place of commissioner of police of that city. There seems to be a probability of his accepting the place. He is said to consider it on the ground that he be given absolute power. That would mean that there would be no political pulls or vote getting organizations that would have to be looked after. It would mean that the Colonel would have a free hand in the organization of the police of the city and with his wide knowledge of administration and military organization he could be expected to make the police force something entirely different from what it now is.

WANT SANITARY LAWS ENFORCED.

The Commission of Conservation at Ottawa has received the following interesting and important resolution from the "Trades and Labor Congress of Canada."

"Whereas, the heavy increasing death rate and infant mortality, particularly in some of our large cities, is due in a large measure to the unsanitary systems of heating, ventilation and sanitation, thereby causing a serious condition of life, and

Whereas, the present laws recognized by some of our Provincial and Municipal bodies are in many instances contrary to the laws of sanitation, lacking effectiveness and uniformity, and thereby endangering the lives of the people, and

"Whereas, the question of the health of the community should be the first consideration of all our governing bodies, and as all important scientific and medical bodies declare the urgent necessity of the highest standard of sanitation for the conservation of human life and the adoption of modern systems for all cities and towns.

"Be it resolved, that this Congress endorse the action of the United Association of Plumbers and Steamfitters in its efforts to establish Dominion and Provincial laws governing the installation of modern sanitary systems of plumbing and heating, and that the officers of this Congress, along with the officers of the United Association, endeavor to place this important matter before the Dominion Conservation Commission, with a view to their recognizing the necessity of Dominion legislation in sanitation instead of the present unsatisfactory Provincial and Municipal laws governing this matter at present."

The Railroad Commission And The Public.

By John S. Eastwood.

The railroad commission of the state of California should fix all the rates of all the public service companies in the state of California. It should be given full power to act as a court of arbitration between the public service companies and the public. It should be given the opportunity to assist the public service companies as well as to limit them, thereby benefitting the public as well, and it should perform the function of fixing rates, for by so doing they can assist the public service companies by giving them the necessary financial stability, impossible under the present methods.

By having complete control of all the rate fixing as well as the regulating power it will be possible for the railroad commission to protect the public service companies from the public and the public from the public service companies. Each needs protection from the other. The stabilizing of the public service companies will benefit the public.

That each one of the above statements is true needs no demonstration.

The growth of public service is recent, has been rapid and is ever expanding and including new functions, and to its rapid growth can be laid most of the faults, real or imaginary, ascribed to public service companies by the public.

A hostility has grown up between the public service companies and the public due to their peculiar relationship, but mainly because of the more or less monopolistic character of the service, also because of the ability of the public service company to deprive the consumer of the service upon non-payment of bills.

Most people believe and insist that they are honest, and that they are sincere in this belief cannot be gainsaid, but too often they are influenced in their standard of honesty by their personal feelings, which are not a safe guide.

The account of the butcher, the baker and the candle-stick maker can be stood off, and they have no recourse when beaten out of their accounts, for many others are doing business in the same lines, but the public service company's service is one that cannot be had elsewhere, conveniently, and this is the galling fact.

This condition compels a payment for a service that has been rendered at the date of presentation of the account. Too many people look upon this condition as an infringement on their rights, many look upon it as impugning their honesty. People hate to be forced to pay a bill.

Look the matter squarely in the face and you will know that this is at the bottom of any grievance, real or imaginary, you have against the public service company.

We are all alike, we want what we want when we want it, and what we want is certainly not to pay for a common place service that has been

rendered, if we can help it, but to spend our money for joy.

We prefer to spend our money for the joys of life, not for the dead horse bills for necessities.

Our joys may be fine raiment, the bright lights, the music, the tinkle of glasses with a silver bucket on the side, or it may be gasoline and high speed with a highball now and then, or again it may even be sweet charity, or white ribbons and tea, but whatever our joys are, they are the things we delight to spend our money for.

It is often said that in this world there is nothing certain but death and taxes.

All people hate a tax. A tax must be paid or property will be taken for its satisfaction.

A public service is not a tax, but the conditions of our modern life make it come very near it.

Property cannot be taken for the non-payment, the consumer has had the service, and is obliged to get along without it for what he has had unless he pays the public service company has an unpaid account, and both have a grouse.

It is therefore hopeless to think of an entire removal of hostility.

Some people think the only cure is public ownership.

Public ownership will shift the position of the difficulty, and possibly the distribution of the burden of payment but does not remove the difficulty.

The same conditions as to payment of bills must remain.

It is the last stage, and there is no recourse.

People who cry for it will then have not only to pay, but pay more for less efficient service.

None of the utopian dreams or rosy ideas work out in practice, principally because all incentive to good and economical service is removed as soon as it is in the hands of the municipal employee.

What is everybody's business is nobody's business.

There is no way to compel efficient municipal public service.

The functions are so many and needs of the municipalities so great, in addition to that of public service, that there is not, and cannot be, property value enough in the municipalities to permit bonding them to acquire all the public service required by modern conditions.

That being the case there is no other way, than to have privately owned public service companies for this service has become a necessity.

If they must remain in private ownership, they must furnish service to the public on a reasonable basis.

A reasonable basis is that there should be a fair return to the owners of the public service company for the service.

But the determination of what is a fair return is one of the biggest problems now before the public service

commissions, whose duty it is to do the rate fixing.

It is a problem that is intricate and variable, and can only be solved by those having the facilities to determine and integrate all the factors that enter into it.

The rate fixing should be in the hands of the state railroad commission, for it alone is in a position to get the necessary data upon which to arrive at a fair basis for rate fixing.

The rate fixing should be in the hands of the state railroad commission, for it alone has the service of experts to solve the problem of the fair basis of the rate fixing.

The rate fixing should be in the hands of the state railroad commission because it alone is capable of doing so in strict justice between the public service companies and the public.

The railroad commission should not be hampered in the performance of this enormous task by being compelled to hire any but the very highest grade expert talent, for such service to the public is cheap at any price.

The last person in the world that should have the rate fixing power is the councilman of a municipal corporation, because he is in every way unfitted and disqualified for this work.

He cannot do it in fairness to himself, the public or the public service company.

He has not the knowledge, the time, or the ability to acquire the knowledge to enable him to take up the matter of the solution of the problem of the fair rate fixing basis.

He is under political obligations to the voters of his ward, and there is a definite, or implied promise on his part to reduce rates in return for his election.

He is himself a consumer of public service and has his own natural inclinations to resist, when he is a fair-minded person.

When he is not a fair and honorable citizen, and such cases have been known, it is impossible to tell where he will stand.

There can be no more unfair condition imagined than to expect a fair adjustment of public service rates from a man who has absolutely no element in his relationship to the public service company, other than that to lead him to cut the rates down.

The question always is, "how much are the rates to be cut down?" And not "how are the rates to be adjusted?"

The councilman is handicapped by public suspicion of graft if he is fair to the public service company, or is blamed by the citizens for not doing his duty to his constituents who elected him, if he does not cut the rates down.

The rates for public service have been thus forced down in price at about the same rate that other necessities of life have gone up.

A decrease in rates cannot continue indefinitely, for sooner or later it will reach the zero point.

During the period in which the pub-

tic service has been developed. It has been steadily forced down in price, while labor and the cost of living and most all materials have steadily gone up.

It stands to reason that with two things moving in the opposite directions, the one down the other up, the apparent speed of their departure from each other is rapid, and it takes but a short time for them to reach the extremes of separation.

The public service companies have been bled till they are anaemic.

They have been starved till they are unable to make the necessary improvements, except at ruinous financial sacrifices, which weaken them still further.

They have been cut to the quick until the very nerve centers are laid bare.

They are in the condition of the farmer's horse that was being trained to live on a straw less every day—their bones are emerging.

The public service has become the big end of business, and it stands to reason if the big end of the business is sick, the remainder of the business body cannot long remain well.

That is what is increasing the army of unemployed.

Samson destroyed himself as well as his enemies when he pulled down the pillars of the temple.

The public service companies are suffering from a lack of confidence on the part of the investing public in their safety and stability.

It is an often heard complaint that they are overcapitalized and that stock is watered.

This is partly true in some cases, but is largely due to laws made to harass rather than to help corporations.

All the pioneers in public service know to their sorrow that when a demand had first to be created for the service, all the so-called securities were liquid, and a buyer of bonds was not an investor, but a hold speculator.

If the tide took him in, he was successful, if it took him out he was a wreck.

Corporations were and are obliged to lay a large foundation to meet the conditions of growth, and are obliged to make their provisions in the start of the business for future growth, due to the cumbersome corporation laws, that make enlargement so difficult.

There has been forced on them the combination of small corporations, that were organized to meet the small demands for service in the beginning, and these companies must be kept alive and fully organized until the last of their obligations have been met.

Thus the holding company, interlocking directorates and affiliated companies, under the corporation laws, become a necessity.

It has been made more and more onerous and difficult to incorporate companies and to transact corporate business, the idea being to harass and discourage rather than to aid corporate investment.

All of these things have made it more difficult to finance these concerns, reconstituting stock bonuses, but none of the obstacles of law are so potent as the fear on the part of the investing public that they will be ground to powder between the upper and nether millstones of commission regulation

and municipal rate fixing.

This condition of financial instability may not seem to be of much interest to the consumer of public service, but in the end the consumer will pay for the ruinous sacrifices the public service company has had to make in order to deliver the service.

With the settled condition that would be brought about by the complete regulation of policies and income by a just tribunal, the finances of the companies should be so vastly improved that it would be possible to sell their securities at or near par in the open market, for they would then be sought as a safe investment, rather than as a speculation, the contract for works could be let to the lowest responsible bidder, and the company and the public through it would have the full value of the economy in cost in the reduced cost of the service.

The condition of the public service company may be justly compared with that of a snake trying to crawl through a hole under a high wall, the public service commission punching it on the tail to speed it up, the public on the other side heating its head off.

To give good service, the public service company must be properly sustained, it cannot be expected to furnish the best service at the best economy under the strain of fear of annihilation of the values of its securities.

And under the present conditions this fear is ever present for there are so many people that would like to use the machinery of municipal competition to wreck the privately owned public service company.

This effort is now being made in the two largest municipalities in the state and many of the best citizens have their sense of honor so eclipsed by petty spite, that they think it a square deal.

This desire on the part of the people to get the public service in some lines into the ownership of the municipality is due on the part of many who know they will have to pay more for poorer service, to their antipathy to the public service company.

It is due on the part of many more, who honestly believe on account of representations made to them that there will be a lower rate and better service, even though they know the investment and operating expense will be higher.

It is a hope that some way, some one else will have to carry their burdens.

All the experiments thus far made with the municipal ownership have proven that municipal public service costs more to somebody than privately owned public service.

The reason that in some cases it appears to be cheaper is because of the method of distribution of costs by the bookkeeping methods employed. The burden is not so fairly distributed, as the tax deficit must be borne by the property owner, who may not even be a consumer of public service.

Competition in public service between a municipal and privately owned public service company is unfair and expensive, both to the public service company and the municipality.

It should be made possible by a law giving such power to the railroad commission as to prevent competition between a municipality and a privately owned public service company.

At least such municipal public service as is in competition with privately owned public service in the same line should be regulated by the railroad commission.

Another phase of the situation to which the above leads, and that is that competition between regulated privately owned public service companies is not only unnecessary, but is wasteful.

Though the Federal Government, through the Sherman law, is trying to create a condition of artificial competition by the trust busting methods, its acts so far have not been shown in any increase of efficiency or decrease in cost of the products of the busted trusts.

It would be far wiser were a law enacted by the congress to begin at the seat of the trouble and regulate the trusts as to their financial stability and the prices of their products to the public, and thereby make the present big business securities a safe investment for the many, rather than to try to scatter the evil, only to add to the cost of their administration and reduce their ultimate efficiency.

The need of competition between the public service companies in the same market is entirely removed where the finances, the rates and the quality of service are all regulated by a public service commission.

It should be the policy of the public and of the public service commissions to encourage combinations in the same natural field, for this all tends towards and leads to, a reduction of the cost of the public service both by the reduction of the overhead costs, and also by the removal of unnecessary duplication of plant.

Competition and duplication in telephone service particularly is not only utterly under regulation, it is a crime against the common people. The removal of competition should also add to the element of financial security and lead to the economy of extension of service, that can be had only with financial stability.

A sane state regulation removes any excuse for the foolish, impractical and drastic regulations imposed on the development of water power in the forest reserves by the officials of the Federal Government.

The people of the states where the public utilities are commission regulated are only hampered by these Federal regulations, and the Federal regulations of water power development should be discontinued in all such states.

These regulations are intended to cover the same jurisdiction as that of the public service commission, but they are unsettling of the financial standing, owing to the revoking clause, and are based on the Federal policy of preventing combination, which is also bad.

The people of the state should not be obliged to pay the Federal Government for the use of its own water, for this is what the forest service charges amount to.

No water power is worth anything to anyone not connected with an extending power company, for the reason that it is the policy of the railroad commission to prevent competition except as a matter of public convenience and necessity.

This policy is not only right as tending to stabilize the existing companies but it is to the interest of the public as well.

There will be no new water power development in California for general distribution, except by some one or other of the existing companies, and there should not be.

As time goes on, more and more of the necessities and comforts of life that are subject to general distribution will come under the head of public service, for there is a constant accretion of inventions that at first are luxuries and finally become by use necessities, and their general distribution make them public service.

The rates as well as the finances of the public service companies should be regulated by the railroad commission, because it is the only fair tribunal capable of coming to a just decision as to the relations of the public service companies to the public and the public to the public service companies; because it is the only way that confidence can be restored in the public service securities, and stability given to the investment; because this stability insures to the benefit of the consumer who will thereby receive the maximum of service at the minimum cost; and because the public needs protection from the exactions of the public service companies, and the public service companies need to be protected from the avarice of the public.

FIGURING BRICK WORK IN BUILDING CONSTRUCTION.

The cost of brick work must, of course, vary considerably owing to the wage scale and the cost of bricks, sand, lime and labor. The rather arbitrary rules figured by masons to ascertain the cost may serve as a general guide in figuring out estimates, but they are frequently far off the actual cost. The only sure way for taking up the problem intelligently is to study all the various items carefully, and then making estimates for the particular job based on this data. If one is considering a job of any size great care should be exercised in verifying these figures.

In making such estimates the cost should be made first on the materials and then on the labor, including all incidental expenses. A rule that is adopted by engineers for brickwork is to figure on 14 bricks per square foot of 9-inch wall, and 21 bricks per square foot of 13½-inch wall, making deductions for all openings. This means an allowance of 7 bricks per square foot for each half-brick thickness of wall.

If we accept this method of figuring we have 48 square feet of 12½-inch wall for each thousand bricks, or practically 2 cubic yards. This frequently taken as the standard unit of measurement. Masons, however, usually figure on 22½ bricks per square foot of 12-inch wall, which includes all openings and corners.

In former years manufacturers of bricks had a few standard sizes, and it was much simpler to apply the arbitrary rules for estimating by the thousand; but today the size and thickness of bricks varies considerably, and the tendency is to increase the number. The unit of measurement must, therefore, show wide variations in dif-

ferent localities. The average size of bricks is generally placed at 8¼ to 8½ inches long, 4 inches wide and 2¼ to 2½ inches thick. But there are plenty of bricks both larger and smaller than this size. Some in New York are used as small as small as 7½x3½x2 inches, and as large as 9x4½x2½ inches. The larger size with joints will lay up 800 to the thousand in a wall of standard measurement, and the small size 1100 and more to the thousand-brick measurement.

Variation in Prices of Brick.

Bricks vary in price as much as in size, and while \$6.50 to \$7 per thousand may be the average price at the yard, they may in some instances cost \$8 to \$10 per thousand or seconds as low as \$6 per thousand. The quality of the bricks must be clearly specified before any figuring can be undertaken. The cost of getting the bricks delivered varies greatly, depending upon conditions. Usually in cities where brick-yards are near the manufacturers charge a uniform price for delivery. If shipped by train from the brick-yards, the cost of freight, unloading and hauling must all be added to the cost of the materials. These charges may amount to several dollars per thousand in some localities. The conditions of the streets and roads makes an important factor in the situation. For instance while a team may haul 1500 bricks as a load across good city streets, the same team could barely haul more than 500 bricks over rough dirt roads of the country. All these factors must be considered before the contractor can place an estimate to yield a profit.

The cost of mortar and scaffolding required should next be taken up. Of course, the amount of mortar used depends upon the thickness of the joints, and the joints vary a good deal in different classes of work. Taking the standard joints as a guide the amount of mortar required per thousand bricks will be as follows:

With ¾-inch joints, ¾ cubic yard mortar. With ½-inch joints, ¾ cubic yards mortar. With ¼-inch joints, 4-5 cubic yards mortar.

The amount of mortar needed being ascertained, it is next wise to proportion the ingredients so that orders can be placed accordingly. Lime mortar is used today only in the cheaper class of structures, and it should never be used in any heavy work, neither should it be used when exposed to great dampness. In engineering structures and in underground work all cement mortar is frequently specified and used. But for the majority of jobs sand and Portland cement in the proportion of 1 to 3, 4 or 5 are used for the mortar. To make up a cubic yard of 1 to 3 mortar there will be required .55 cubic yard of sand and 2 barrels of Portland cement or lime. Usually both lime and cement are used with the sand, but these vary considerably in proportion. One part lime, one part cement to six parts sand is a common specification.

One reason why one part lime is generally added with the cement is that it makes the mortar much easier to work with, and in the cost of labor this amounts to considerable. In the modern efficiency movement attention must be given to such little details. A bricklayer working with cement mortar

lays fewer by and bricks in an hour than if he used mortar softened with one part lime.

For a cubic yard of mortar then, with sand at 50 cents per cubic yard, lime at 50 cents per barrel and cement at \$1.75, we would have about the following costs with a proportion of 1 in 3 lime mortar:

Sand, .85 cubic yards, at 50c, \$0.43; 2 barrels lime at 50c, \$1.00; total, \$1.43.

A richer and better formula of lime, cement and sand in the proportion of 1 to 2, would have the following cost:

Sand, .85 cubic yards, at 50c, \$0.43; 1 barrel lime at 50c, \$0.50; 1 barrel cement at \$1.75, \$1.75; total, \$2.68.

For a stronger cement commonly used for engineering and underground work with a proportion of 1 to 3, we would have this:

Sand, .85 cubic yards, at 50c, \$0.43; 2 barrels cement at \$1.75, \$3.50; total, \$3.93.

The cost of sand is purely arbitrary and cannot be fixed. It can often be obtained for the cost of carting, but it rarely costs as much as \$1 per cubic yard. However, this must be considered for each locality, and prices obtained before any estimates are put in.

If 1000 bricks of 8½x4x2½ inches were piled up solid without mortar, they would occupy 1.65 cubic yards of space. If the bricks cost \$6.50 per thousand a cubic yard of them would cost then approximately \$3.96. This comparison will enable one to see at a glance the relative cost of bricks and mortar. In the case of the cement mortar the cost of bricks would be practically the same as the mortar, but for lime, cement and sand mortar the cost of the latter would be about one-third less than the bricks, and for plain lime mortar the difference in the cost is more striking.

Having analyzed the cost of materials, so that the estimator can get clearly in mind the relative amount and cost of the various ingredients of his trade, the labor cost should next be taken up. Labor is the one item that makes brick laying so expensive in some parts of the country. The cost of materials are fairly constant throughout the country, but labor is not. This varies as greatly as the efficiency of the men themselves. High wages do not always mean high-grade, efficient workmen.

Bricklayers are paid all the way from 50 and 75 cents and more per hour. Probably 60 cents is as near the average paid throughout the country as can be made. Hod carriers' and masons' helpers, who keep the bricklayer supplied with mortar and building scaffolds, receive from 30 to 45 cents and more per hour. These rates vary so materially that one can never figure on a job in another town or state without knowing exactly beforehand the union scale of wages prevailing there. It is never safe to assume that the same wages are paid in any two places. Many a contractor has lost heavily on contracts simply through failure to ascertain in advance the exact scale of wages prevailing in certain towns both for masons, laborers, hod carriers and carpenters. Figured on wage scale basis, one might ask how much does labor cost per thousand bricks.

Cost of Labor per M Bricks.

The answer to this depends upon the

ability and efficiency of the men and the amount of work the contractor can be laying of 50 bricks by a man may be considered a good day's work, the get from them in a day. While working on narrow piers and projections, average on a 9-inch wall may be at the rate of 1100 to 1400 in a nine-hour day. On 13-inch walls the average should run as high as 1300 to 1600 bricks, and on an 18-inch to 22-inch wall from 1500 to 2500 bricks in nine hours per man. On heavy foundations where the work is the simplest, it is not uncommon for bricklayers to average 3,000 bricks a day and even 5,000 bricks have been laid by bricklayers when rushed.

On buildings equipped with an elevator and distributing arrangements, the labor of laying bricks may be as low as \$1 per thousand, but on high buildings and narrow walls the labor may run all the way from \$2 to \$4 per thousand. The cost of scaffolding must be considered in all such contracts, for this takes labor and materials. A carpenter must be employed for scaffold erection at rates ranging from 20 to 40 cents per hour. The carpenters may be withdrawn from some other part of the building to erect the scaffolds, but the charges for their time should be placed to the cost of bricklaying. It hardly pays to get masons or masons' helpers to erect the scaffolds. They do the work clumsily, and oftentimes in such a way that the scaffolds are dangerous. Besides this it takes them much longer to do the work than a skilled carpenter. Hod carriers and mortar men are better at it at their particular jobs, and it rarely pays to attempt to turn them to another skilled trade even in emergencies.

The cost for laying a cubic yard of bricks in a wall may then be figured out as follows:

Materials.

459 bricks at \$7 per M.....	\$2.84
Freight on bricks56
1/4 cubic yard sand11
1/2 Freight on sand06
0.22 bbl. of cement at \$2 per bbl.44
1 bu. lime at 20 cents20

Total

Labor for Cubic Yard of Wall.

Bricklayers	\$2.62
Laborers93
Carpenters39
Unloading materials58

Total labor

Total materials

Labor and materials

As 1000 bricks of the average size when piled up solid without mortar makes practically 1.65 cubic yards and the amount of mortar used for good joints increases this pile so that the thousand bricks when laid up in a wall equals about two cubic yards, it will be seen that doubling the above estimate for each cubic yard of wall we have the cost per thousand bricks at \$17.46, which includes all materials and labor.

The work figured by the ordinary rules for a snap estimate will be a few dollars under this estimate. But a snap estimate is never intended to be more than a guide. Masons generally employ the ordinary rule and then add a dollar or two to make sure of coming

out even. There are many things which interfere with the proper working out of the rules. The character of the wall, time lost through the non-delivery of materials, interruptions of one thing and another, and faulty work of some bricklayers which necessitates tearing down a part of the work, all tend to increase the cost. On the other hand some contractors can stimulate their men to such efforts that they can get one-third more work

out of them. This, however, is something, that is very uncertain, and can hardly be placed in the calculations. Good work is essential to the success of a mason contractor, and he cannot afford to drive his men to the point that details are overlooked. Masonry must be sound, plumb in line and well set throughout to pass inspection, and a fault here and there in the walls may be sufficient to condemn the whole wall or building.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 7 story and base, reinforced concrete. Cost not stated. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner's name withheld. This building will be erected on Powell street near Washington area. Construction will be practically fireproof. Interior will be arranged for a large number of two, three and four room suites. Pine and hardwoods will be used in the interior finish. Plans provide for steam heat, elevator service, vacuum cleaning, a hot water supply and dumb waiters. All suites will have wall beds and private baths. Bath rooms will have composition floors and tile wainscot. Main entrance lobby and reception hall will be finished in hardwood with ornamental plaster. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster and pressed brick. Plans are being prepared.

SAN FRANCISCO—Apartment house, 2 story and base, frame, \$10,000. Architect, none. Owners, Mr. and Mrs. Kohly, represented by J. Prout, 2020 Turk street, S. F. The building will be erected on the south side of Fulton street west of Broderick, and has been designed to contain four modern apartments of three and four rooms each. Interior finish will be of pine and redwood. Oak floors will be used in the dining rooms. All suites will have wall beds and private bath rooms. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Each living room will have an open fire place with tile mantel. Entrance will be finished in tile and marble. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor under the direction of Mr. Prout.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$25,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner's name withheld. The building will be erected on Mission street, and has been designed for stores on the first floor and a number of two and three room suites on the upper floors. All suites will have wall beds and private bath rooms. There will be a steam heating system and hot water supply. Interior finish will be of pine throughout. Bath rooms will have composition floors and tile wainscot. Patent store fronts are

specified. Exterior of the building will be covered with rustic, shiplap and cement plaster on metal lath. Plans are now being prepared.

TACOMA, WASH.—Apartment house, 4 story and base, brick and steel, \$135,000. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owner's name withheld. The building will be erected at the corner of 13th and C streets, covering a considerable area. There will be a total of twenty-two suites of from two to five rooms. Interior finish will be of pine and hardwood with some oak floors. Plans provide for steam heat, elevator service, a vacuum cleaning plant and hot water supply. Bath rooms will have tile wainscot and composition floors. Wall beds will be installed in all apartments. Exterior of the building will be faced with pressed brick and terra cotta. Plans will go out for figures within thirty days.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick and steel. Cost not stated. Architects, R. D. King and E. C. Taylor, Consolidated Realty Bldg., L. A. Owner, Elias Sheddouy. The building will be erected on a corner site covering an area of 50 by 130 feet. There will be three stores on the first floor and a total of 65 rooms arranged in two and three room suites on the upper floors. Interior will be finished in pine throughout. There will be steam heat, a hot water system and vacuum cleaning. Patent store fronts and plate glass windows are specified. Bath rooms will be finished in tile and will have composition floors. Wall beds will be used in all apartments. Exterior of the building will be faced with pressed brick. Plans are being prepared and when complete the work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 2 story and base, brick, \$20,192. Architects, Buchanan & Brockway, 65 North Raymond avenue, L. A. Owner, F. De Witt Smith. Contractor, William C. Crowell, Chamber of Commerce Bldg., L. A. Contract price, \$20,192.

♦ BAKS.

Contracts Awarded.

REDONDO BEACH, LOS ANGELES CO., CAL.—Bank, 2 story and base. Class A construction, \$17,600. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Farmers' and Merchants' Bank. Contractor, Carl Leckardt, H. W. Hellman Bldg., L. A. Contract price, \$17,600.

BATH HOUSES.

SAN RAFAEL, MARIN CO., CAL.—Bath house, 1 story, reinforced concrete. Cost not stated. Architect, Thomas O'Connor, 104 B street, San Rafael. Owners, City of San Rafael. This work has been mentioned here before when plans were being prepared. Working drawings have been completed and received the approval of the City Trustees and figures are now being called. Bids will be opened on February 9th. Plans and specifications can be secured from the architect. Construction will be of reinforced concrete throughout. Exterior will be faced with cement plaster. Mechanical equipment, modern bath house plumbing and electric work will be included in the general contract.

BRIDGES, DAMS AND HARBOR WORK.

SAN FRANCISCO—Wharf construction, timber and pile. Cost not stated. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Plans for the construction of Pier No. 54, which will be erected on the waterfront south of the Ferry Building, have received the approval of the State Board of Control and are now out for figures. The structure will be similar to several of the new piers with timber piles and heavy timber superstructure. Plans can be secured from the Assistant State Engineer, Ferry Building. Bids will be opened by the Board of Harbor Commissioners on February 11th. An official proposal appears in another column of this issue.

TACOMA, WASH.—Bulkhead and wharf, \$100,000. Engineer, City Engineer, Tacoma. Owners, City of Tacoma. Bonds in the sum of \$100,000 will be voted on at the general election in April for the construction of a bulkhead and wharf at Old Town. Preliminary plans are now being prepared by the City Engineer. Further mention will be made of the work.

SEATTLE, WASH.—Bridges, steel and concrete construction, \$1,830,000. Engineer not selected. Owners, City of Seattle. At a meeting of the City Council an ordinance was passed providing for the submission to the voters on March 3rd of a bond issue in the sum of \$1,830,000 for the construction of bridges over the Lake Washington Canal and the East Waterway.

Contracts Awarded.

SAN FRANCISCO—Wharf office, frame construction, \$2,800. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractor, Joel Johnson. Contract price, \$2,800. Note: A complete list of the figures received for this work appears under the heading of San Francisco in this issue.

CHURCHES.

SAN FRANCISCO—Church, 2 story and base, semi-ironproof construction, \$20,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Emidius Parish, Rev. Father J. Hartnett. Working drawings are now being prepared for the church edifice which is to be erected in the newly created parish of St. Emidius in Englewood. The

design is in the Tudor Gothic style, the building being built in the shape of a cruciform with transepts. There will be a main auditorium seating in the neighborhood of 600 people, Sunday school rooms and social hall. Interior finish will be of pine and oak with ornamental plaster. Art glass windows and a marble sanctuary will be used. Exterior of the building will be faced with cement plaster. Bids will be called for shortly.

SAN FRANCISCO—Church, 2 story and base. Class A construction, \$75,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Central Methodist Church. The building will be erected on property adjoining the present Sunday school rooms at the southwest corner of Leavenworth and O'Farrell streets. The main auditorium will seat about 1,000 people. Interior will be finished in pine and hardwood with considerable ornamental plaster. Steam heat will be installed. Art glass and marble are specified. Exterior of the building will be faced with Colusa Sandstone. Plans are nearly complete.

VENICE, LOS ANGELES CO., CAL.—Church, 1 story, tower and base, brick, \$10,000. Architects, C. H. Russell & Co., Union League Bldg., L. A. Owners' name withheld. The building will be erected on Innes street and will contain a main auditorium seating 350 people, Sunday school rooms and pastor's study. A hot air system of heating will be installed. Interior finish will be of pine. A tower containing a set of chimes will also be erected. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Mission building, 3 story and base, brick and steel. Cost not stated. Architect, Robert H. Orr, Van Nuys Bldg., L. A. Owners, Christian Church, Department of Women's Home Missions. The building will be erected on Wall street, and has been arranged for a chapel, offices and class rooms on the first floor, 20 bed rooms on the second floor and six suites of three rooms each on the third floor. Interior finish and floors will be of pine. There will be steam heat and a hot water system. Exterior of the building will be faced with pressed brick. Working drawings are being completed and figures will be taken in the spring.

Contracts Awarded.

SEATTLE, WASH.—Mausoleum, 1 story, reinforced concrete, \$750,000. Architect, Marbury Somervell, White Bldg., Seattle. Owners, Northwest Mausoleum Co. Contractors, Cornell Bros., Savage-Scotfield Bldg., Seattle. Contract price, \$750,000.

FACTORIES & WAREHOUSES.

OAKLAND, CAL.—Oil refineries, tanks, pipe line, office, etc., \$150,000. Engineer, Engineering Department Pacific States Oil Refineries Co., 110 Sutter street, S. F. Owners, Pacific States Oil Refineries. Plans are now complete for rehabilitating the plant recently destroyed by fire. Architect, Walter H. Parker, Holbrook Bldg., has prepared plans for a warehouse, corrugated iron construction 200 by 100 feet, and for an office building, one story frame construction, which will

be erected at once by Day Labor. Included in the plans for the mechanical equipment are a number of large steel tanks, pipe and pipe lines, pumps, condensers and stills. Practically all work will be done by Day Labor. Full particulars can be secured from the San Francisco offices of the owners.

Contracts Awarded.

GRESHAM, ORE.—Motor car factory, 1 story and base, reinforced concrete, \$25,000. Architect, P. Chappell Browne, McHawk Bldg., Portland. Owners, Beaver Motor Car Co., Lumbermen's Bldg., Portland. Contractor, James P. Taylor, Couch Bldg., Portland. Contract price, \$25,000. Note: This is the first unit of a large plant which is to be erected this year.

COLTON, SAN BERNARDINO CO., CAL.—Factory, 1 story, brick, \$14,000. Architect, Lyman Farwell, Story Bldg., L. A. Owners, Hydraulic Truck Co. Contractor, H. M. Holloway, Wilcox Bldg., L. A. Contract price, \$14,000.

LOS ANGELES, CAL.—Brewery addition, 4 story, brick and steel, \$15,000. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Los Angeles Brewing Co. Contractor, Harry C. Brown, 1666 Westmoreland avenue, L. A. Contract price, \$15,000.

FIRE HOUSES AND JAILS.

BERKELEY, ALAMEDA CO., CAL.—Fire houses, 3, 2 story and base, frame. Cost not stated. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. These buildings will be erected in North Berkeley, South Berkeley and Claremont. Each station will provide space for one piece of apparatus and sleeping quarters for the men. Interior finish will be of pine throughout. Modern plumbing and electric work will be installed. Exteriors will be faced with cement plaster on metal lath. Plans will be completed shortly and figures will be called. Further mention will be made of the work at that time.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame. Cost not stated. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on the north side of Pacific avenue near Taylor street, covering an area of 25 by 62 feet. Plans show three modern flats of five rooms each. Interior finish will be of pine with some elm panels and oak floors. Each living room will have a large open fire place with brick or tile mantel. Bath rooms will be finished in tile and will have composition floors. Automatic water heaters will be installed. Entrance to the building will be finished in marble and tile. Exterior will be covered with cement plaster on metal lath. A pressed brick veneer base is specified. Plans are complete and figures are being taken for the work.

SAN FRANCISCO—Flats, 2, 2 story and base, frame. Cost not stated. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. These buildings will be erected on adjoining property on California street near 21st avenue, and each building will contain two flats of four rooms

each and a basement garage. The rooms have been designed so as to give the largest possible amount of space and will receive sunlight from all sides. Interiors will be finished in pine and hardwoods with oak floors in the living and dining rooms. Bath rooms will have composition floors and tile wainscot. Entrances will be finished in marble and tile. Each living room will have an open fire place and tile mantel. Electric heaters and tile mantels will be used in the bed rooms. Exteriors of the buildings will be covered with rough cement plaster on metal lath. Clay tile cornices will be used. Plans are complete and figures are being taken.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base. Class C construction. \$10,000. Architect, Matthew O'Brien, Foxcroft Bldg., S. F. Owner, J. J. McEgan. The building will be erected on the south side of Pine street west of Fillmore, and has been designed for a commercial garage. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. Interior will be finished in pine. Besides the storage space plans provide for a large well equipped machine shop. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

Contracts Awarded.

SEATTLE, WASH.—Garage, 2 story and base, brick, \$30,000. Architect, nre. Owners, Waterhouse-Sands Co., Seattle. Contractors, Sound Construction and Engineering Co., Lowman Bldg., Seattle. Contract price, \$30,000.

GOVERNMENT WORK AND SUPPLIES.

PROSPECTIVE BIDDERS.

Supervising Architect.

Specifications for work under the office of the supervising architect have been furnished to the following firms in addition to those previously noted in these columns:

Berkeley, Cal., Construction, Feb. 18. J. H. Wiesse, City National Bank Building, Omaha, Neb.

Grant Fee, San Francisco, Cal. Spaulding Construction Co., San Francisco, Cal.

Flinth & Morton, 189 Jessie street, San Francisco, Cal.

Campbell Building Co., Salt Lake City, Utah.

King Lumber Co., Charlotteville, Va. Thurston & Co., San Francisco, Cal. A. T. Spencer, 180 Jessie street, San Francisco, Cal.

Frank Gallagher, 180 Jessie street, San Francisco, Cal.

Roberts, San Francisco, Cal. Frederick J. Amweg, Marston Building, San Francisco, Cal.

Bonerville, Mo., Construction, Feb. 11. The Potters Lumber Co., East Liverpool, Ohio.

C. W. Bernsing, 612 Massachusetts Building, Kansas City, Mo.

Hiram Lloyd Building and Construction Co., 503 Odd Fellows Bldg., St. Louis, Mo.

J. H. Wise, 1301 City National Bank Bldg., Omaha, Neb.

John G. Unkefer, Minerva, Ohio. Thomas W. Cissel, 220 S. Market street, Wooster, Ohio.

George W. Stiles Construction Co., 1036 Rookery Bldg., Chicago, Ill.

General Construction Co., 21st and Galena streets, Milwaukee, Wis.

James Corse, 506 Robinson Bldg., Racine, Wis.

Rogers & Kaiser, Peoples Gas Bldg., Chicago, Ill.

N. H. Shields, Baum Bldg., Danville, Ill.

Richards, McCarthy & Pulford, Hartman Bldg., Columbus, Ohio.

L. N. Wyatt, Columbus, Ohio. E. E. Cassidy, Columbus, Ohio.

King Lumber Co., Charlottesville, Va. W. H. Fissell & Co., 1133 Broadway, New York City.

Walla Walla, Wash., Files.

The contract for installing book and file case in the U. S. post office at Walla Walla, Wash., has been awarded to Davis-Kaser Co., Walla Walla, Wash., at \$514.92.

Pearl Harbor Dry Dock Investigation.

When Secretary Daniels appears before the House Naval Committee, he will be prepared to give some interesting information concerning the investigation which has been conducted concerning the disaster which overtook the big dry-dock at the Pearl Harbor naval station. The best obtainable information shows that the accident was due to the failure to place piles of sufficient length to withstand the pressure. The question before the naval committee has been one which aims to fix the extent of the responsibility of the dock builders on account of a clause inserted in the contract making them responsible to a certain degree. The Navy Department authorized modifications in the design, and it must be determined whether the government is sufficiently responsible in the matter to warrant payment to the contractors of a certain sum of money. It is desired that the work shall be completed by the builders who have undertaken the project. Already one year's work has been lost on account of the accident and the delay to make the necessary investigation and to adjust the claims of the contractors. It will also be necessary to have an additional appropriation of what amount remains to be determined. That is one of the aspects of the situation which will be brought out by Mr. Daniels in his hearing on the subject.

Phoenix, Ariz., Files.

The following bids were received by the custodian, U. S. post office and court house, Phoenix, Ariz., for installing filing equipment in the U. S. weather bureau, Phoenix, Ariz.:

The Shaw-Walker Co., Muskegon, Mich., \$87.20.

Automatic File & Index Co., Green Bay, Wis., \$91.25.

The Globe-Wernicke Co., Washington, D. C., \$102.50.

Dorris-Heyman Furniture Co., \$126.45.

The Canton Art Metal Co., Canton, Ohio, \$147.90.

Art Metal Construction Co., Jamestown, N. Y., \$158.

The Van Dorn Iron Works, Cleveland, Ohio, \$201.60.

Civilian Navy-Yard Management.

There is an animated revival of the discussion among members of the House Naval Committee of legislation which shall touch in a vital way on the management of navy yards. When Secretary Daniels appears before the committee in the course of the next week or two he will be asked to give his views on the subject. He has been looking into the problem and has had the benefit of the advice of Mr. E. H. Evans, formerly an officer of the naval construction corps, who resigned to accept a position with a shipbuilding concern on the west coast. Mr. Evans, who is regarded as an expert on organization and management, has not only talked with Mr. Daniels, but has seen members of the House Naval Committee, and is understood to be at work on a measure which will provide for civilian management of navy yards. Some of the members of the committee who were on the inspection trip of navy yards last summer entertain decided views as to the need of a change in the system, but they have found that there is by no means unanimity of opinion entertained by officers of the service and others who may be regarded as in a position to know what is best to be done. Mr. Daniels has not signified his own views and will probably withhold his opinion until he appears before the naval committee.

Reno, Nev., File Case.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for furnishing one steel file case for the U. S. post office at Reno, Nev.:

Typewriter and Office Supply Co., Washington, D. C., \$311.85; 60 days.

Crown Metal Construction Co., Jamestown, N. Y., \$369.40; 60 days.

Berger Mfg. Co., Canton, Ohio, \$366; 75 days.

Watson Mfg. Co., Jamestown, N. Y., \$397; 70 days.

Invincible Metal Furniture Co., Monroe, Wis., \$430; 90 days.

General Fireproofing Co., Washington, D. C., \$463.67; 75 days.

Art Metal Construction Co., Jamestown, N. Y., \$467.25; 60 days.

The H. H. Shults Co., Gowanda, N. Y., \$469.50; 90 days.

Bernstein Mfg. Co., Philadelphia, Pa., \$498.60; 20 days.

Metal Office Furniture Co., Grand Rapids, Mich., \$498.60; 60 days.

Steel Fixture Mfg. Co., Topeka, Kan., \$518; 90 days.

O. M. Edwards Co., Syracuse, N. Y., \$575; 60 days.

Hilo, H. T., Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction (including plumbing, gas piping, electric wiring and approaches) of the U. S. post office, custom house and court house at Hilo, Hawaii:

Alternate No. 1. Substituting granite and limestone for the lava stone required for the building.

No. 2. Substituting granite and sandstone for all lava stone required for the building.

Campbell Building Co. of Utah, Salt Lake City, Utah, \$196,922; alternate 1, no addition; 2, no deductions.

Sound Construction & Engineering

Co., Lowman Building, Seattle, Wash., \$207,932; alternate 1, deduct \$2,780; 2, deduct \$3,780.

Lord-Young Engineering Co., Ltd., Honolulu, H. T., \$237,590; alternate 1, deduct \$9,030; 2, deduct \$13,800.

Spalding Construction Co., Riako Building, San Francisco, Cal., \$237,939; alternate 1, add \$4,000; 2, none.

Frank Gallagher, 180 Jessie street, San Francisco, Cal., \$239,950; alternate 1, add \$7,240; 2, add \$3,020.

W. N. Concanon Co., 525 Market street, San Francisco, Cal., \$235,000; alternate 1, deduct \$7,300; 2, no bid.

General Construction Co., Milwaukee, Wis., \$281,000; alternate 1, \$17,745; 2, deduct \$14,270.

Alameda, Cal., Vault Shelving.

The contract for installing metal vault shelving in the U. S. post office at Alameda, Cal., has been awarded to the H. H. Shults Co., Gowanda, N. Y., at \$137.

Pocatello, Idaho, Post Office.

The contract for the construction, including plumbing, heating apparatus, gas piping, conduits, wiring, interior lighting fixtures, and approaches, of the U. S. post office and court house at Pocatello, Idaho, has been awarded to Palmberg & Mattson, Astoria, Ore., at \$93,575, using Boise sandstone for all stone work except where granite is required; time to complete, July 5, 1915.

Puget Sound, Quay Wall.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for the construction of a quay wall at the U. S. naval magazine, Puget Sound, Wash.:

Item 1, number of linear feet of wall proposed to be built within the amount available (see par. 41) in accordance with the plans and specifications, measured on the front edge of the wall coping, beginning the measurement at the point marked "X," as shown on sheet No. 1, the distance from "X" to "Y" to be considered 413 feet; item 2, under this item bidders may submit proposals for the complete work in accordance with the spirit of the specifications, but with such modifications of methods and details as they desire, provided all such modifications are fully specified or indicated upon plans accompanying the proposal.

B. J. Eriksen, 5011 Meridian avenue, Seattle, Wash., item 1, \$980 feet; 2, \$23,910.

H. A. Hatfield, 411 Washington street, Bremerton, Wash., item 1, \$900 feet; 2, \$19,824.

Ford Bros., 92 Front street, Bremerton, Wash., item 2, \$13,492.40.

T. Ryan & Co., 1st and Cherry streets, Seattle, Wash., item 1, \$935.35 feet.

David Levergreen, Seattle, Wash., item 1, 900 feet; 2, \$18,000.

L. L. Lent, Bremerton, Wash., item 2, \$12,936.

The North Coast Contract Co., Portland, Ore., item 1, \$592 feet.

Fortifications for Guam.

No estimates were prepared this year by the War Department for fortifications in our insular possessions, excepting in the Hawaiian Islands and the Philippines, but attention is being given to the installation of defenses at Guam and Guantanamo. Nothing has

been recommended for Alaska, and there has been no study by the military officials for defenses for the territory for the last two years. At the suggestion of the Navy Department a survey is now being made of Guam, the Navy Department having in contemplation the establishment of a coal and oil depot there. There has been no approved project made for the defense of Guam, and the problem is yet to be taken up in detail by the War Department, which has, however, taken up the Guantanamo project and given it very careful consideration. The development of Guantanamo defenses depends largely upon the policy of Congress respecting the increase in the facilities for the naval base at that place.

Navy Coal and Fuel-Oil Stations.

The Navy Department has completed its plans for next year's expenditure of \$500,000 if Congress appropriates that amount for the development of coaling stations and fuel-oil stations for the navy. The naval general board has submitted a report to the Secretary showing in what direction and relative order of importance the money should be expended. This is as follows: 1, contingent, \$30,000; 2, San Francisco, storage, \$100,000; 3, San Diego, storage, \$20,000; 4, San Diego, coaling tower, \$15,000; 5, Puget Sound, storage, \$105,000; 6, Norfolk, storage, \$150,000; 7, Melville, storage, \$20,000; total, \$500,000.

The most important item, considering the amount involved, is that for three additional 7,000-ton fuel-oil tanks contemplated at Norfolk, increasing the total storage at that place to 26,000 tons of fuel-oil. The navy is maintaining a small supply of coal at San Diego (about 10,000 tons at this time). The department desires to increase this to 50,000 tons stored in the open. At present there are no mechanical appliances for handling coal. The installation of the tower will provide means for handling the coal rapidly and economically. The station is now provided with a suitable wharf on which the tower can be erected. Coal will be handled to and from the storage pile by small cars. At the present time the navy has no oil storage in San Francisco Bay or at Mare Island, except a small storage at the latter place for industrial purposes. The matter of a suitable site is under investigation, but it is uncertain whether a proper site can be found on land belonging to the department. The commandant of the Mare Island yard has prepared a comprehensive report on the existing commercial facilities in San Francisco Bay and recommendation for the location of a naval plant.

Navajo Indian Reservation, Bridge.

The contract for the construction of a steel trestle bridge across the San Juan River, Navajo Reservation, N. Mex., has been awarded to the El Paso Bridge and Iron Co., El Paso, Texas, at \$14,725.

San Francisco, Cal., Repairs.

The contract for repairs to ram elevator at the U. S. Mint, San Francisco, Cal., has been awarded to Otis Elevator Co., Washington, D. C., at \$570.

Coal Barges to be Built at Navy Yards. Secretary Daniels has taken an im-

portant step in the line of his policy to furnish as much work as possible at the navy yards. He has obtained estimates from each navy yard on the Atlantic and west coasts and has now authorized the construction of 22 500-ton steel coal barges, of which from two to four will be built at each of the yards. Judging from the cost of similar barges built hitherto under contract, the expense of this work will amount in the aggregate to \$440,000, it being estimated that the cost of each barge will be \$20,000. These barges will be used for coaling vessels of the fleet and will be added to the list of some thirty similar craft acquired by the Navy Department by contract. Recently the Seattle Construction and Dry Dock Company completed nine of these barges, and the Cramp Shipbuilding Company completed ten of similar design. The new steel coal barges are intended to replace the old wooden barges which have been used and which are now kept for service as occasion requires at the Norfolk and Mare Island navy yards. In the line of possible new construction at navy yards are the two 15-knot 35-foot motor boats purchased under contract by the Navy Department for experimental purposes. One of these boats has been sent to the Montana to be used as a torpedo chaser. The other has been sent to the Utah to be tried out as a commanding officer's boat. Upon the reports received will depend the adoption of this type of motor boat as a standard. In which event it is possible that similar craft will be built by the Navy Department.

Interrupted Building in the Philippines.

The instructions from the War Department to discontinue the construction at Camp Stotsenburg, in the Philippines, found several of the officers' quarters practically completed as far as the first story. In consequence the buildings were finished at this point, making them one-story buildings instead of two-story edifices. The design of the building is quite satisfactory, as the one-story bungalow type, with a porch all around the building, is the type of residence most desirable in the climate of the Philippine Islands. It is practically impossible to construct the larger buildings in the Philippines within the limits of cost fixed by Congress, but it is believed the buildings of the bungalow type—that is, of concrete frame and filled in with wood or compressed concrete blocks with tin roof properly ventilated—can be built within the limit. Designs of such buildings have been forwarded to Washington in connection with the work contemplated at Fort McKinley.

HALLS & SOCIETY BLDGS.

SAN MATEO, SAN MATEO CO., CAL.—City Hall, 2 story and base, reinforced concrete, \$40,000. Architects, Havers & Toepke, 46 Kearny street, S. F. Owners, City of San Mateo. Plans for the construction of this building have been completed and approved by the City Council. The building will house the city offices and the main fire station. Interior finish will be of pine, oak and mahogany. There will be furnace heat, a vacuum cleaning system and hot water supply. Special plumbing will be used in the fire sta-

tion. Fireproof vaults will be constructed for the City Treasurer's office. Exterior will be faced with pressed brick. Some ornamental plaster and marble will be used. The second floor will be given over to the council chamber. Plans are complete and out for figures. Bids will be opened on February 9th. Plans and specifications can be secured from the architects.

DALY CITY, SAN MATEO CO., CAL.—City Hall, 2 story and base, frame. Cost not stated. Architects, Smith & Stewart, 241 Kearny street, S. F. Owners, Daly City. The building will be arranged to contain the offices of the various city departments, station for the police and a large auditorium. Interior will be finished in pine throughout. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken. Bids will be opened on February 9th. Plans and specifications can be secured from the architects.

LOS ANGELES, CAL.—Club house, 2 story and base, brick and steel. Cost not stated. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Automobile Club of Southern California. The building will be erected on Figueroa street near Pico, covering an area of 50 by 150 feet. Interior will be arranged for social rooms, library and sleeping apartments. Interior finish will be of pine and hardwood. There will be steam heat and open fire places. Mantels will be of tile and brick. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

HOLTVILLE, IMPERIAL CO., CAL.—Lodge hall, 2 story and base, brick, \$25,000. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Holville Masonic Hall Association. The building will be 50 by 140 feet. There will be four large stores on the ground floor and twelve offices, dance hall, banquet room and lodge rooms on the second floor. Oak and pine trim and hardwood floors will be used. There will be steam heat and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the architects and also by Howard T. Jones of Holtville.

Contracts Awarded.

OAKLAND, CAL.—City Hall master clock system, \$1,029. Architects, Palmer & Hornbostel, New York. Associate Architect, G. F. Ashley, Oakland. Owners, City of Oakland. Contractors, Standard Electric Time Co., S. F. Contract price, \$1,029.

HOTELS.

SAN FRANCISCO—Hotel, 4 story and base, reinforced concrete, \$25,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Mr. Selig. The building will be erected on the south side of Eddy street between Jones and Leavenworth. The lot is located on a corner and all rooms will be outside exposures. Plans provide for about 60 rooms, all of which will have private baths. There will be steam heat, an automatic elevator, hot water supply and vacuum cleaning. Interior will be finished in pine and hardwood with some ornamental plaster in the lobby. Entrance will be

finished in marble and tile. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Hotel, 3 story and base. Class C construction, \$12,000. Architect, R. W. Miller, 110 Jessie street, S. F. Owners, Egan Bros. The building will be arranged for stores on the first floor and a number of single rooms on the upper floors. The property to be improved is located on Folsom street between 7th and 8th streets. Interior finish will be of pine throughout. There will be a hot water supply. Exterior will be faced with cement plaster. Plans are complete and work will be carried on by Day Labor under the direction of Mr. Miller.

RIVERBANK, STANISLAUS CO., CAL.—Hotel, 2 story and base, brick. Cost not stated. Architect, Henry Sherman, Mills Bldg., S. F. Owner, D. S. Grant. The building will be erected on Main street, having a frontage of 50 feet by a depth of 85 feet. There will be a number of small stores on the first floor besides the hotel lobby, office and dining room. Upper floor will contain 35 guest rooms and a number of public and private baths. Interior finish will be of pine throughout. There will be steam heat and oil burning plant. Bath rooms will have composition floors and the wainscot. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and work will be started at once. The owner will probably let a general contract.

SEATTLE, WASH.—Hotel, 12 story and base. Class A construction, \$1,000,000. Architect, William Kingsley, Empire Bldg., Seattle. Owner's name withheld. Negotiations are now under way and will be closed within a few days for a corner site embracing a half city block on which this building will be erected. The names of the interested parties and the exact location of the building is withheld for the present. Details of construction will be made public as soon as the property is secured.

PENDELTON, ORE.—Hotel addition, brick and steel, \$110,000. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Pendleton Hotel Co. The work will consist of the construction of two additional stories and extensive alterations to the present dining rooms and offices. Elevator service and a new heating system will also be installed. Exterior will be faced with pressed brick. Plans are complete and figures will be called within a week or ten days.

LOS ANGELES, CAL.—Hotel, 10 story and base, reinforced concrete, \$125,000. Architect, W. J. Saunders, International Bank Bldg., L. A. Owner, C. W. Howard. The building will be erected on the south side of Sixth street west of Olive, covering an area of 55 by 150 feet. There will be stores besides the hotel lobby on the ground floor and in the neighborhood of 198 guest rooms and private baths on the upper floors. Construction will be fireproof. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will be finished in tile. Interior finish will be of pine and hardwoods. Patent

store fronts, metal window sash and frames and hollow tile and metal lath and plaster interior partitions will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be taken shortly.

POMONA, LOS ANGELES CO., CAL.—Hotel, 3 story and base, reinforced concrete, \$175,000. Architects, Hanchard, Green & Tisdel, Van Nuys Bldg., L. A. Owner, T. W. Newman. The building will have extreme dimensions of 235 by 200 feet. First floor will contain eight stores, lobby and dining room and a theatre. Upper floors will be arranged for 150 guest rooms with about 50 per cent private baths. Construction will be fireproof. There will be steam heat, hot water, system and vacuum cleaning. Patent store fronts are specified. Exterior of the building will be faced with cement plaster. Preliminary plans have been completed.

Contracts Awarded.

SAN FRANCISCO—Hotel, 7 story and base, brick and steel, \$60,000. Engineer, W. W. Breite, Chanie Bldg., S. F. Owners, Zellerbach and Levinson. Contractor, Theo. Hoin, 1119 Hyde street, S. F. General construction. Contract price, \$60,000. Note: All sub-contracts are now being let through Mr. Hoin's office.

LIBRARIES.

COALINGA, FRESNO CO., CAL.—Library, 1 story and base, reinforced concrete and brick, \$15,000. Architects, Swartz, Zellerbach & Swartz, Rowell Bldg., Fresno. Owners, High School Library District. The building has been designed in the classic style and construction will be practically fireproof. Plans provide for a reading room, reference room, office and stack rooms. Interior finish will be of pine with maple floors. There will be steam heat, oil burning system and vacuum cleaning. Metal shelves and metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans have been completed and approved and are now out for figures. Bids will be opened on February 20th. Plans and specifications can be secured from the architects.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Electric work, Exposition buildings. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are now complete and out for figures for the installation of the electric work in the following buildings: Varied Industries, Mines, Manufactures and Transportation. Bids will be opened by the Buildings and Grounds Committee on February 5th. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

SAN FRANCISCO—Exhibit building, frame construction, \$75,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owners, Chilean government. Architect Farr has just been commissioned to prepare plans for this building. The structure will be designed after the

style of architecture used in the country, and like other buildings to be erected by the foreign governments will be of frame and plaster construction. Detail drawings are now being made. Further mention will be made of the work when bids are called.

SAN FRANCISCO — Transfer table. Cost not stated. Architect, Director of Works. Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the construction of a transfer table, which is to be constructed in the Transportation building, are complete. Bids for the work are now being taken and will be opened on February 19th. Plans and specifications and full particulars can be secured from the Director of Works. An official proposal appears in another column of this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

LOS ANGELES, CAL. — Railroad buildings, 3, 1 and 2 story, frame. Cost not stated. Architect, Engineering Department Southern Pacific Co. Flood Bldg., S. F. Owners, Southern Pacific Co. Plans for a two-story, 50 by 100 foot building for the Pullman Co., a part 1 and part 2 story building, 50 by 100 feet for the commissary department, and a 1 story dining car shed, 88 by 118 feet, are complete. These buildings will be erected on the company property adjoining the new Arcade station. Plans are out for figures and can be secured from Mr. Edwards, 324 Pacific Electric Bldg., L. A.

RESIDENCES.

SAN FRANCISCO—Residence, 3 story and base. Class C construction, \$35,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mrs. A. Eldridge. The dwelling will be erected on a lot 68-9x137-6, situated in the vicinity of Pacific avenue and Broderick street. The building will be designed in the modern French style throughout. The drawing room on the first floor will be 20x30, finished in ivory two tone color woodwork. The reception hall will be 18x30 with grand stair case leading to second story and beautifully decorated ceiling, from this hall French glass doors open into the drawing room and into the dining room and also to the library and billiard room adjoining. The dining room will be finished in French gray oak with tapestries in the panels above the dado, from the dining room French doors will lead to a large conservatory adjoining, this will be the breakfast room and convenient to these will be a large kitchen, 13x15, with butler's pantry, scullery, cooler, refrigerator, etc. The main bed room on the second floor will be 20x30, with houndoir adjoining, and bath room, 10x12, with Roman tub, 5x10, sunk into the tiled floor. In this room will also be a needle shower dental bowl, electric heaters, and solid porcelain pedestal wash basin with steel enameled medical closet sunk into the wall above. The walls and floor will be tiled. There will also be three more large bed rooms with bath rooms between and a large open air sleeping porch. Above this floor will be the nursery, and two negro rooms. There will be also a rein-

forced concrete garage to accommodate two machines. Besides the convenience of arrangement there will be steam heat, hot water circulation system, hardwood floors and vacuum cleaning plant. The brick walls on exterior will be veneered with Caen stone in French Renaissance style. It is estimated that the building will cost \$35,000 complete. Plans will be ready for figures in two weeks.

SAN FRANCISCO—Residence, 3 story and base, frame, \$3,500. Architect, V. G. Hild, 46 Kearny street, S. F. Owner, Dr. Clyde S. Payne. The dwelling will be erected on the west side of Priest, south of Washington street, and will contain seven rooms and bath. Interior finish will be largely of pine with some redwood and elm. Oak floors will be used in the living and dining rooms. There will be a large open fire place and tile mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor. All materials will be purchased through the architect.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owners, Costello and Feerick, 93 College avenue, S. F. This house will be erected on the east side of 19th avenue north of Anza, and when complete will contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in two rooms. There will be a large open fire place in the living room. Mantel will be of brick or tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,500. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, James Smith, 441 4th avenue, S. F. The dwelling has been designed for a seven-room house with bath, and will be erected on the west side of 22nd avenue south of Lake street. Interior finish will be of pine with some elm panels in the living room, dining room and reception hall. Oak floors will be used in the principal rooms. There will be a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A pressed brick veneer base will be used. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$10,000. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Father J. Hartnett. The dwelling has been designed for a parish house, and will be erected in the newly formed parish of St. Enidus in the Englewood district. The house will contain ten rooms, three baths and sleeping porch. Interior finish will be of pine and hardwood with oak floors in the principal rooms. Plans provide for furnace heat and open fire places, mantels will be of brick. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the

dwelling will be covered with cement plaster on metal lath. Working drawings are being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, E. J. Lloyd, 1057 Walker avenue, Oakland. The dwelling will be erected on Rand avenue and will contain seven rooms and bath. All interior finish will be of pine or redwood. There will be a large open fire place in the living room with brick mantel. Oak floors will be used in the dining room and living room. There will be an automatic water heater installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials will be purchased by the owner.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, none. Owners, Junk-Riddeil Co., 2247 Telegraph avenue, Berkeley. The dwelling has been designed for a seven-room house, and will be erected in North Cragmont. Interior finish will be of pine and redwood with some elm panels in the dining room. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and the owners will do the work by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$9,000. Architect, William Knowles, Hearst Bldg., S. F. Owner, Mr. A. Vernon. The dwelling will be erected on lots 4 and 5 in the Clarendon Tract, and has been designed for an eight-room dwelling with two baths, sleeping porch and a garage. Interior finish will be of pine, redwood and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Plans also provide for a vacuum cleaning system and automatic water heaters. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and bids are now being taken.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owner, John Peacock, 2512 Chester street, Oakland. The dwelling will contain seven rooms and bath. Interior finish will be largely of pine with some elm panels used in the living and dining rooms. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and work will be done by Day Labor.

SAN FRANCISCO — Residences, 4 2 story and base, frame, \$5,000 to \$7,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Trevor & Co. These dwellings will be erected on 4th avenue and each has been designed to contain seven or eight rooms,

bath and sleeping porch. Interiors will be finished in pine and hardwoods. Oak floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Bath rooms will have composition floors and tile wainscot. Tile wainscot will also be used in the kitchens. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Pressed brick veneer will be used for the bases. Plans will be completed within a few days and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$9,500. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, O. F. Fisher. The dwelling will be erected in the Country Club Heights and has been designed to contain seven rooms, bath and sleeping porch. All interior trim will be of pine or redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A hot air furnace will also be installed. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 7, 2 story and base, frame, \$1,500 each. Architect, none. Owners, Banning and Stewart, 5215 Broadway, Oakland. These dwellings will be erected in Claremont Manor, and each house has been designed for seven rooms, sleeping porch and bath. Pine and hardwood veneer will be used for interior finish. Floors in the principal rooms will be of hardwood. There will be furnace heat and open fire places. Mantels will be of brick and tile. Automatic water heaters will be installed. Bath rooms will be finished with composition floors and tile wainscot. Tile wainscot will also be used in the kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are nearly complete and the work will be done by Day Labor. All materials will be purchased by the owners.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Dr. E. L. Loring. This dwelling, which is to be erected on Bushnell Place, has been designed for an eight-room house with two baths and a sleeping porch. Interior finish will be of pine, hardwood veneer and white enamel. Oak floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

ALAMEDA, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, C. C. Adams. The dwelling will be erected in the Waterside Terrace District and

has been designed for a six-room house. Interior will be finished in pine with some elm panels in the dining room. Oak floors will be used and plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater is specified. Bath rooms and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$18,000. Architect, H. W. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner's name withheld. This dwelling will be erected in the Claremont Tract and will cover a large ground area. The design is in the Spanish style with the exterior covered with cement plaster on metal lath and roof of clay tile. Interior will be arranged for twelve rooms, several baths and sleeping porches. Pine and hardwood will be used for interior trim. Oak floors will be used in the principal rooms. Plans provide for steam heat, vacuum cleaning system, a hot water supply and open fire places. Mantels will be of tile. Tile floors and wainscot will be used in the bath rooms. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, W. V. Grove. The dwelling will be erected in Claremont and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine, redwood and some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot and composition floors will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$2,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, A. Cederborg. The dwelling will be erected in the Country Club Tract, and will contain seven rooms, bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the living room and dining room. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor under the direction of the architects.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,000. Architect, Maury I. Diggs, 2444 Bowditch street, Berkeley. Owner, George F. Drake. The dwelling will be erected on Claremont avenue near Alcatraz, and has been designed for an eight-room house with bath. Interior will be finished in pine and redwood with some white enamel. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or

brick. An automatic water heater is specified. Bath room will have composition floor and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Frederick A. Alard. This house has been mentioned here before when plans were first started. The dwelling will be erected in the Crocker Highlands Tract, and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine with some elm panels. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

SAN ANSELMO, MARIN CO., CAL.—Bungalow, 1½ story and base, frame. Cost not stated. Architect, Henry Siermud, Mills Bldg., S. F. Owner, H. N. McMillin. This dwelling has been designed for a double bungalow, and will contain two five-room dwellings with baths and sleeping porches. Interiors will be finished in pine throughout. Built-in sideboards and seats will be used. Oak floors are specified in the living and dining rooms. There will be two large open fire places with brick mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior of the house will be covered with shingles. Plans are complete and ready for figures.

PALO ALTO, SANTA CLARA CO., CAL.—Residence, 2 story and base, frame, \$15,000. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owner, Mrs. Henry Allen. The dwelling will be erected on a large lot and has been designed in the Mission style. A garage will also be erected in the rear. The house will contain about twelve rooms, several baths and sleeping porch. Interior will be finished in pine and redwood with some hardwood veneer. Oak floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and ready for figures.

SACRAMENTO, CAL.—Bungalows, 2, 1 story and base, frame, \$2,000 each. Architect, none. Owners, Fred and H. Uhl, 2 Uhl Court, Sacramento. These two houses will be erected in Uhl Court on lots 15 and 16. Each house has been designed for a five-room dwelling with bath. Interiors will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be two large fire places with tile or brick mantels. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered

with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Residence, 2 story, attic and base, brick and frame, \$50,000. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, John F. Powers. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$50,000.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$15,000. Architect, H. H. Whiteley, L. A. Owner, Evan Mosier. Contractors, Cooper, Cyle, Clopine Co., Story Bldg., L. A. Contract price, \$15,000.

SCHOOLS.

EUREKA, HUMBOLDT CO., CAL.—School, 2 story and base, reinforced concrete, \$125,000. Architect, W. H. Weeks, 73 Post street, S. F. Owners, Eureka Union High School. This work has been mentioned here a number of times before. The date for opening bids has been extended until February 12th. Plans can be secured from Architect Weeks in San Francisco.

SEATTLE, WASH.—School, 2 story addition and 2 story and base, reinforced concrete, \$150,000 and \$350,000. Architect, Edgar Blair, 901 7th avenue, Seattle. Owners, City of Seattle. School Architect Blair has completed preliminary sketches for the addition to the Lincoln School to cost \$150,000 and for the new building to be erected at the corner of 75th and 21st avenues, to be known as the Ballard School, which will cost \$350,000. The preliminary sketches have received the approval of the Board of Education, and Mr. Blair has been instructed to complete the plans. Details cannot be published at this time. The architect states that working drawings for both buildings will be ready for figures shortly after March 1st.

PORTLAND, ORE.—School, 1 story and base, reinforced concrete, \$30,000. Architect, F. A. Naramore. Address in care of Supt. of School District No. 1, Portland. Owners, School District No. 1. The building has been designed to contain four standard sized class rooms. Interior will be finished in pine. There will be steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans will be ready for figures within thirty days.

SEWERS, STREET WORK AND WATER SYSTEMS.

BERKELEY, ALAMEDA CO., CAL.—Sewer construction, \$70,000. Engineer, City Engineer Jessup, Berkeley. Owners, City of Berkeley. Plans have been approved for the construction of the University outfall sewer and bids are now being called. Plans and specifications can be secured from the City Engineer. Recently a large sewer contract was let by the city of Berkeley, and following the award of contract for the University avenue sewer, bids will be called for a third large sewer job.

SAN MATEO COUNTY AND SAN DIEGO COUNTY—Highway construction. Cost not stated. Engineer, State

Highway Commission, Form Bldg., Sacramento. Owners, State of California. Bids will be opened on February 24th for the construction of approximately four miles of highway in San Mateo County of Portland cement, concrete and asphalt surface and for approximately 1½ miles of highway in San Diego County to be constructed of Portland cement and concrete. Plans can be secured from the State Highway Commission at Sacramento. An official proposal appears in another column of this issue.

KING AND PIERCE COUNTIES, WASH.—River bank protection, \$1,250,000. Engineer, William J. Roberts, Seattle Hotel, Seattle. Owners, Pierce and King Counties. Mr. Roberts, former highway commissioner, has been selected to prepare plans and supervise the work of protecting the river banks along the Stuck and Puyallup rivers. The project is one of the largest river protection problems that has ever been undertaken in the west. Actual work will be started about March. Full particulars can be had from Mr. Roberts. A general contract will probably be let.

Contracts Awarded.

SAN FRANCISCO—Sewer construction, \$5,800. Engineers, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Contractor, R. Beanfield, Phelan Bldg., S. F. Contract price, \$5,800.

SAN FRANCISCO—Tunnel construction for storm water sewer, \$193,314. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, Edward Malley, Foxcroft Bldg., S. F. Contract price, \$193,314.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Office addition, 3 story, Class A construction, \$50,000. Architects, Charles Paff & Co., Merchants' Exchange Bldg., S. F. Owners, Andrew B. McCreery Estate. Plans have been completed for an addition of three stories to the McCreery Building on lower Pine street. The building has a frontage of 50 feet and a depth of 137½ feet. The steel frame will be carried up through the new stories as well as the elevator service, plumbing and electric work. Interior will be finished in pine, hardwood and metal trim. Metal window sash and frames are specified. Halls will have marble wainscot and tile floors. Exterior will be faced with pressed brick and terra cotta. Plans are complete and figures are now being taken for the work.

OAKLAND, CAL.—Stores and offices, 2 story and base, steel and brick. Cost not stated. Architect, William Wilde Albany Bldg., Oakland. Owner, B. M. Cianciarulo. This work has been mentioned here before. The building will be erected on the west side of Broadway north of 17th street, having a frontage of 25 feet and a depth of 125 feet. Plans have been prepared for three additional stories, which will be added later. There will be a complete steel frame, brick exterior walls, faced with pressed brick and terra cotta. Interior finish will be of pine throughout. Some marble and tile will be used. There will be metal window sash and frames and patent store fronts. Steam heat will be installed. Plans are com-

plete and figures are being taken.

OAKLAND, CAL.—Offices, 18 story and base, Class A construction. Cost not stated. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, A. L. and George Livenson et al. Architect C. W. Dickey is now in the east studying the latest of the eastern office buildings with the purpose in view of incorporating the most modern ideas in the proposed eighteen-story skyscraper which is to be erected at the southwest corner of Washington and 14th streets, Oakland. This property, directly opposite the new City Hall, has been leased for a period of fifty-two years from the Regents of the University of California. A recently formed corporation composed of A. L. and George Livenson, Carl Plaut, Henry Wieking, Harry Manheim, Alfred Kutner and C. J. Heeseman will erect the building. The structure will be of the Class A type, covering an area of 100 feet square. Construction will be started as soon as Mr. Dickey can complete working drawings.

PORTLAND, ORE.—Stores and lofts, 2 story and base, reinforced concrete. Cost not stated. Architects, Whidden & Lewis, Wilcox Bldg., Portland. Owner, Mrs. Walley. The building will be erected at the corner of First and Pine streets, and will be arranged for a restaurant on the first floor and machinery sales rooms above. The building will cover an area of 100 by 150 feet. Details of construction will be handled by J. Frank Watson, 1215 Wilcox Bldg., Portland.

LOS ANGELES, CAL.—School, 3 story and base, reinforced concrete, \$40,000. Architect, Arthur B. Benton, 114 North Spring street, L. A. Owners, Florence Crittenton Home for Girls. The building will cover an area of 60 by 100 feet. The building will contain dining room, kitchen, single rooms and wards. In all there will be accommodations for about 60 people. Interior finish will be of pine. There will be steam heat and modern plumbing. Exterior will be faced with pressed brick. Plans are being prepared.

TEMPE, ARIZ.—Industrial Arts building, 2 story and base, reinforced concrete, \$80,000. Architects, Peabody & Smart, Central Bldg., Phoenix. All bids received for this work have been rejected and plans will be revised. The lowest figure received for the general construction was \$79,453, and with the heating, electric work and plumbing the building ran over the estimates. Revised plans will be out for figures in a few weeks.

TUSTIN, ORANGE CO., CAL.—School, 2 story and base, brick, \$50,000. Architect, Frederick H. Eley, Register Bldg., L. A. Owners, Tustin School District. The building will cover an area of 90 by 72 feet, and will contain eight standard size class rooms, principal's office, teachers' rooms and an auditorium seating 800 people. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat, vacuum cleaning and program clocks. Exterior of the building will be faced with pressed brick. Plans will be ready for figures within a few weeks.

POMONA, LOS ANGELES CO., CAL.—School, 1 story and base, brick, \$25,000. Architect, Paul B. Higgs, First National Bank Bldg., Pomona. Owners, Pomona School District. The building will contain seven class rooms, offices and

an auditorium. There will be steam heat, modern school plumbing and vacuum cleaning. Interior finish will be of pine. Maple floors will be used in the class rooms. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be opened on February 24th. Bids will be taken separately for the general construction, heating and plumbing. Plans can be secured from the architect.

INGLEWOOD, LOS ANGELES CO., CAL.—School buildings, 5, 1 and 2 story, brick, \$150,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Inglewood School District. Plans for this work are complete and figures will be opened on February 26th. Separate bids will be taken for the general construction, painting, plumbing, heating, electric work and program clocks. The group will consist of four new buildings and a central heating plant. The present building will be remodeled for an administration building, the auditorium enlarged and the gymnasium converted into a study room. The Manual Arts and Household Economy buildings will each be two stories 60x100 feet. The science building will be two stories 70x120 feet, and the gymnasium will be one story, 60x120 feet, with an outside cement plunge, 26x60 feet. The buildings will be of brick construction with red pressed brick facing, and cream pressed brick trimmings.

VENICE, LOS ANGELES CO., CAL.—Polytechnic group, 4, 1 and 2 story, brick, \$150,000. Architects, C. H. Russell Co., Union League Bldg., L. A. Owners, City of Venice. Plans are nearly complete for this work and bids will be called for within the next week or ten days. The group will consist of the Administration building, Science building, Household Arts building and manual Training building. The style of architecture will be Lombardic Italian. The Administration building will be a two-story and basement structure 152x144 feet, and will contain the administrative offices, auditorium, study and choral halls, library and twelve class rooms. In the basement there will be a cafeteria, kitchen, bicycle rooms, etc. The central heating plant will be constructed in connection with and at the rear of the administration building. The science building will be a two-story L-shaped structure with no basement; extreme dimensions 140x120 feet. It will contain twelve class rooms, work rooms, offices, recitation rooms etc. The household arts building will be two stories 140x120 feet, and will contain a modern hungalow, cooking department, laundry, lecture rooms, seven class rooms and sewing and milliner departments. The mechanical arts building will be one-story 112x144 feet, with an interior court. The buildings will be connected by arcades. They will be of brick construction, with concrete foundations, exterior facing of different shades of light-colored brick.

Contracts Awarded.

SAN FRANCISCO—Stores, 1 story and base, brick and steel, \$12,000. Architect, Earl R. Scott, Humboldt Bank Bldg., S. F. Owners, Davis Street Realty Co. Contractors, Pacific Rolling Mills, structural steel Andrew Olsen, carpentry work, and A. Newmark, plumbing. Contracts for the brick

work and electric work will be let this week.

SEATTLE, WASH.—Cafe alterations, \$16,000. Architect's name not given. Owners, L. C. Smith Building. Contractors, The Junction Co., Seattle. Contract price, \$100,000.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 10:30 A. M., Thursday, February 19, 1914, for Transfer Table in Transportation Building in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO CONTRACTORS.

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS. Union Depot and Ferry House, San Francisco, January 28, 1914.

SEALED PROPOSALS or bids will be received at this office at or prior to 11 o'clock A. M., on Wednesday, February 11, 1914, for furnishing materials and constructing an addition to the north side of Pier No. 51, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications prepared and on file in the office of the Assistant State Engineer, and adopted by the Board August 6, 1913, and on file in this office to which special reference is hereby made.

The materials to be used in this work shall consist of the requisite quantities of Portland cement and Douglas fir piles (which will be turned to the contractor by the Board), sand, crushed rock, gravel, reinforcing materials, lumber, castings, structural steel, rods, bolts, spikes, car springs, asphalt paving, etc.

All materials used must be of the best of their respective kinds, and not especially specified herein. All materials used in the structure will be subjected to a rigid examination and test, and if found defective and unsuitable or not as specified, will be condemned and must be immediately removed from the work by the contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office, is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the

Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure, and such sum shall be paid into the San Francisco Harbor Improvement Fund.

The bond required to be not less than one-eighth of the total amount of the bid, with two or more sureties, to be approved by the Board of State Harbor Commissioners, and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning thereof, and to the satisfaction of the Board, and said bond shall also be effective as provided in an Act approved May 1, 1911, for the protection of materialmen, mechanics and laborers.

Bids will not be considered by the Board unless delivered to the Secretary or the Assistant Secretary at the office of the Secretary at or prior to 11 o'clock A. M., on Wednesday, February 11, 1914, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of bids.

J. H. DWYER,

THOMAS S. WILLIAMS,

J. H. McALLISTER,

Board of State Harbor Commissioners.

JEROME NEWMAN,

Assistant State Engineer.

LEO V. MERRILL, Jr.,

Secretary. (*)

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 324—Proposals for Electric Cable, Conduit and Fittings and Miscellaneous Electrical Apparatus, Steel Shapes and Plates, Steel Reinforcing Bars, Vag—Manifold Ropes, Cardboard and Paper—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m., February 6, 1914, at which time they will be opened in public, for furnishing the above mentioned articles. Plans and general information relating to this circular (No. 324) may be obtained from this office or the office of the assistant purchasing agent, 198 North Point Street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of Engineers, U. S. Army, general purchasing officer.

PROPOSALS FOR METAL SHELVING.

METAL VAULT SHELVING—Treasury Department, Office Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until February 7, 1914, for installing metal vault shelving in the U. S. public building at San Diego, Cal. Further information may be had upon application to O. WENDEROTH, supervising architect.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 10:30 A. M., Thursday, February 5, 1914, for Electric Wiring of Varied Industries Building, Mines Building, and Transportation Building in accordance with the plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which

check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract. The sureties thereon must be satisfactory to the Buildings and Grounds Commission of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids which contain technical defects in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 297 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$35.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Twenty-five Dollars to the Exposition Company.

By order of the Buildings and Grounds Commission

WILLIAM H. CROCKER,
Chairman.

**STATE OF CALIFORNIA.
DEPARTMENT OF ENGINEERING.
CALIFORNIA HIGHWAY COMMISSION**

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until 2 o'clock p. m. on **February 16, 1914**, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, portions of State Highway as follows.

San Mateo County from the south line Daly City to South San Francisco (V. M. 2-2-A), a distance of Twenty-five miles to be built of Portland cement concrete with asphalt surface.

San Diego County from Las Flores to the Western Boundary (V. M. 2-2-D), about 11.5 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids, to accept the bid deemed for the best interests of the State.

Dated: January 22, 1914.
CHARLES D. BLANEY,
NEWELL D. DARLINGTON,
CHARLES F. STERN,

AUSTIN B. FLITCHER,
Highway Engineer.
WILSON R. ELLIS,
Secretary. (*)

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 819—Proposals for Four Steel Tugboats for Handling and Docking of Vessels at the Entrance of the Panama Canal. Sealed proposals will be received at the office of the general purchasing officer Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. on **March 23, 1914**, at which time they will be opened in public for furnishing the above mentioned tugboats. Plans and general information relating to this circular (No. 819) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal., or from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; S. C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR ELEVATOR.

ELEVATOR—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until 3 p. m. **February 16, 1914**, and then opened, for an elevator plant in the United States post office at Denver, Colo., in accordance with the drawings and specifications, copies of which may be had at this office or at the office of the architects, Tracy, Swartwout & Litchfield, 244 Fifth avenue, New York, N. Y., in the discretion of the supervising architect, OSCAR WENDEROTH, Washington, D. C.

PROPOSALS FOR PUMPS.

PUMPS—Sealed proposals indorsed "Proposals for Heating System, Fire and Flushing Pumps" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 1 o'clock a. m. **February 14, 1914**, and then publicly opened for furnishing and installing on foundations provided by the government in the central power plants, United States Navy Yard, at the Naval Station, Puget Sound, Wash., two motor-driven fire pumps of 1,000 gallons per minute capacity, 400 feet head, and two steam turbine-driven heating system pumps of 1,000 gallons per minute capacity, 150 pounds per square inch gauge head. Estimated cost, \$14,000. Plans and specifications may be obtained on application to the bureau or to the commandants of the navy yards named. H. R. STANFORD, chief of bureau.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. **February 16, 1914**, for the mechanical equipment (except roof construction) (including mechanical equipment and approaches) of a two-story and basement (with a 1-story rear extension) second-class post office building, to be located on the site of the old post office building, at Berkeley, Cal. Drawings and specifications may be obtained from the custodian at Berkeley, Cal., or at this office, in the discretion of the Supervising Architect, O. WENDEROTH, Supervising Architect. (*)

PROPOSALS FOR MECHANICAL EQUIPMENT.

MECHANICAL EQUIPMENT—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. **February 16, 1914**, for the mechanical equipment (except roof construction), to be located in the United States post office at Denver, Colo. Drawings and specifications may be obtained on or after January 25, 1914, at the office of the architects, Tracy, Swartwout & Litchfield, 244 Fifth avenue, New York, N. Y., in the discretion of the supervising architect, O. WENDEROTH, Supervising Architect.

PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on **Wednesday, the 11th day of February, 1914**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The general construction of the Washington Irving School Building, to be located on Broadway, between Sanson and Montgomery streets.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public

Works, and completed with two hundred and seventy (270) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$20,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.
F. J. CHURCHILL,
Secretary.

PROPOSALS FOR HEATING AND VENTILATING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on **Wednesday, the 11th day of February, 1914**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The installation of a heating and ventilating system in the Washington Irving School Building.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed with two hundred and seventy (270) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$750.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.
F. J. CHURCHILL,
Secretary.

PROPOSALS FOR ELECTRIC WORK.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on **Wednesday, the 11th day of February, 1914**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The electric work of the Washington Irving School Building.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed with two hundred and seventy (270) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$50.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.
F. J. CHURCHILL,
Secretary.

ing at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Recreation Hall, Napa State Hospital, Napa, California."

(SIGNED) W. F. MCCLURE,
State Engineer. (*)

Plans describing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE — 3 story and base.

Class C construction, \$35,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, rs. A. Eldridge. The dwelling will be erected on a lot 68x9137-6 situated in the vicinity of Pacific avenue and Broderick street. The building will be designed in the modern French style throughout. The drawing room on the first floor will be 20x30, finished in ivory two tone color woodwork. The reception hall will be 18x30 with grand stair case leading to second story and beautiful decorated ceiling, from this hall French glass doors open into the drawing room and into the dining room and also to the library and billiard room adjoining. The dining room will be finished in French gray oak with tapestries in the panels above the dado, from the dining room French doors will lead to a large conservatory adjoining, this will be the breakfast room and convenient to these will be a large kitchen, 13x15, with butler's pantry, scullery, cooler, refrigerator, etc. The main bed room on 1st floor will be 20x30, with houndoor adjoining, and bath room, 10x12, with roman tub, 5x10, sunk into the tiled floor. In this room will also be a needle shower dental bowl, electric heaters, and solid porcelain pedestal wash basin with steel enameled medical closet sunk into the wall above. The walls and floor will be tiled. There will also be three more large bed rooms with bath rooms between and a large open air sleeping porch. Above this floor will be the nursery, and two bed rooms. There will be also a reinforced concrete garage to accommodate two machines. Besides the convenience of arrangement there will be steam heat, hot water circulation system, hardwood floors and vacuum cleaning plant. The brick walls on exterior will be veneered with Caen stone in French Renaissance style. It is estimated that the building will cost \$35,000 complete. Plans will be ready for figures in two weeks.

RESIDENCE — 2 story and base.

frame, \$3,500. San Francisco. Architect, C. O. Clauser, Phelan Bldg., S. F. Owner, James Smith, 441 4th avenue, S. F. The dwelling has been designed for a seven-room house with bath and will be erected on the west side of 22nd avenue south of Lake street. Interior finish will be of pine with some e'm panels in the living room, dining room and reception hall. Oak floors will be used in the principal rooms. There will be a large open fire place

and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Day Labor.

RESIDENCE — 2 story and base, frame, \$10,000. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Father J. Hartnett. The dwelling has been designed for a parish house, and will be erected in the newly formed parish of St. Emilius in the English district. The house will contain ten rooms, three baths and sleeping porch. Interior finish will be of pine and hardwood with oak floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Working drawings are being prepared.

RESIDENCE — 3 story and base, frame, \$3,500. San Francisco. Architect, W. G. Hind, 46 Kearny street, S. F. Owner, Dr. Clyde S. Payne. The dwelling will be erected on the west side of Priest south of Washington street, and will contain seven rooms and bath. Interior finish will be largely of pine with some redwood and elm. Oak floors will be used in the living and dining rooms. There will be a large open fire place and tile mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor. All materials will be purchased through the architect.

RESIDENCE — 2 story and base, frame, \$2,000. San Francisco. Architect, none. Owners, Costello and Fearick, 93 College avenue, S. F. This house will be erected on the east side of 19th avenue north of Anza, and when complete will contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in two rooms. There will be a large open fire place in the living room. Mantel will be of brick or tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are being purchased.

MODERN BANK AND OFFICE STRUCTURE FOR I. N. VAN NUYS
Los Angeles, Cal.

Morgan, Walls & Morgan, Architects
Los Angeles, Cal.

Robert H. Orr, Architect
Los Angeles, Cal.

RESIDENCE FOR MR. LEE C. PITZER
Pomona, Cal.

RESIDENCES—4, 2 story and base, frame, \$5,000 to \$7,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Trevor & Co. These dwellings will be erected on 4th avenue, and each has been designed to contain seven or eight rooms, bath and sleeping porch. Interiors will be finished in pine and hardwoods. Oak floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Bath rooms will have composition floors and tile wainscot. Tile wainscot will also be used in the kitchens. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Pressed brick veneer will be used for the bases. Plans will be completed with a few days and the work will be done by Day Labor.

ELECTRIC WORK — Exposition buildings. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are now complete and out for figures for the installation of the electric work in the following buildings: Varied Industries, Mines, Manufactures and Transportation. Bids will be opened by the Buildings and Grounds Committee on February 5th. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

EXHIBIT BUILDING—Frame construction, \$75,000. San Francisco. Architect, Albert Farr, Foxcroft Bldg., S. F. Owners, Chilean Government. Architect Farr has just been commissioned to prepare plans for this building. The structure will be designed after the style of architecture used in that country, and like other buildings to be erected by the foreign governments will be of frame and plaster construction. Detail drawings are now being made. Further mention will be made of the work when bids are called.

TRANSFER TABLE—Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the construction of a transfer table which is to be constructed in the Transportation building are complete. Bids for the work are now being taken and will be opened on February 19th. Plans and specifications and full particulars can be secured from the Director of Works. An official proposal appears in another column of this issue.

APARTMENT HOUSE—7 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner's name withheld. This building will be erected on Powell street near Washington and will cover a large ground area. Construction will be practically fireproof. Interior will be arranged for a large number of two, three and four room suites. Pine and hardwoods will be used in the interior finish. Plans provide for steam heat, elevator service, vacuum cleaning, a hot water supply and dumb waiters. All suites will have wall beds and private baths. Bath rooms will have composition floors and tile wainscot. Main entrance lobby and reception hall will be finished in hard-

wood with ornamental plaster. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster and pressed brick. Plans are being prepared.

APARTMENT HOUSE—2 story and base, frame, \$10,000. San Francisco. Architect, none. Owners, Mr. and Mrs. Kchby, represented by J. Prout, 2029 Turk street, S. F. The building will be erected on the south side of Fulton street west of Broderick, and has been designed to contain four modern apartments of three and four rooms each. Interior finish will be of pine and redwood. Oak floors will be used in the dining rooms. All suites will have wall beds and private bath rooms. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Each living room will have an open fire place with tile mantel. Entrance will be finished in tile and marble. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor under the direction of Mr. Prout.

APARTMENT HOUSE—2 story and base, frame, \$25,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner's name withheld. The building will be erected on Mission street and has been designed for stores on the first floor and a number of two and three room suites on the upper floors. All suites will have wall beds and private bath rooms. There will be a steam heating system and hot water supply. Interior finish will be of pine throughout. Bath rooms will have composition floors and tile wainscot. Patent store fronts are specified. Exterior of the building will be covered with rustic shiplap and cement plaster on metal lath. Plans are now being prepared.

WHARF CONSTRUCTION—Timber and pile. Cost not stated. San Francisco. Engineer, Assistant State Engineer, Perry Bldg., S. F. Owners, State of California. Plans for the construction of Pier No. 54, which will be erected on the waterfront south of the Ferry Building, have received the approval of the State Board of Control and are now out for figures. The structure will be similar to several of the new piers with timber piles and heavy timber superstructure. Plans can be secured from the Assistant State Engineer at the Ferry Building. Bids will be opened by the Harbor Commissioners on February 11th. An official proposal appears in another column of this issue.

CHURCH—2 story and base, semi-fireproof construction, \$30,000. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Emilian Parish. Rev. Father J. Hartnett. Working drawings are now being prepared for the church edifice which is to be erected in the newly created parish of St. Emilian in Englewood. The design is in the Tudor Gothic style, the building being built in the shape of a cruciform with transepts. There will be a main auditorium seating in the neighborhood of 600 people, Sunday school rooms and social hall. Interior finish will be of pine and oak with ornamental plaster. Art glass windows and a marble sanctuary will be used. Exterior of the

building will be faced with cement plaster. Bids will be called for shortly.

CHURCH—2 story and base. Class A construction, \$75,000. San Francisco. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Central Methodist Church. The building will be erected on property adjoining the present Sunday school rooms at the southwest corner of Leavenworth and O'Farrell streets. The main auditorium will seat about 1,000 people. Interior will be finished in pine and hardwood with considerable ornamental plaster. Steam heat will be installed. Art glass and marble are specified. Exterior of the building will be faced with Colusa sandstone. Plans are nearly complete.

FLATS—3 story and base, frame. Cost not stated. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on the north side of Pacific avenue near Taylor street, covering an area of 25 by 62 feet. Plans show three modern flats of five rooms each. Interior finish will be of pine with some elm panels and oak floors. Each living room will have a large open fire place with brick or tile mantel. Bath rooms will be finished in tile and will have composition floors. Automatic water heaters will be installed. Entrance to the building will be finished in marble and tile. Exterior will be covered with cement plaster on metal lath. A pressed brick veneer base is specified. Plans are complete and figures are being taken for the work.

FLATS—2, 2 story and base, frame. Cost not stated. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. These buildings will be erected on adjoining property on California street near 21st avenue, and each building will contain two flats of four rooms each and a basement garage. The rooms have been designed so as to give the largest possible amount of space and will receive sunlight from all sides. Interiors will be finished in pine and hardwoods with oak floors in the living and dining rooms. Bath rooms will have composition floors and tile wainscot. Entrances will be finished in marble and tile. Each living room will have an open fire place and tile mantel. Electric heaters and tile mantels will be used in the bed rooms. Exteriors of the buildings will be covered with rough cement plaster on metal lath. Clay tile cornices will be used. Plans are complete and figures are being taken.

GARAGE—1 story and base. Class C construction, \$10,000. San Francisco. Architect, Mathew O'Brien, Foxcroft Bldg., S. F. Owner, F. J. McHegan. The building will be erected on the south side of Pine street west of Fillmore and has been designed for a commercial garage. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. Interior will be finished in pine. Besides the storage space plans provide for a large and well equipped machine shop. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

HOTEL—4 story and base, rein-

forted concrete. \$25,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Mr. Selig. The building will be erected on the south side of Eddy street between Jones and Leavenworth. The lot is located on a corner and all rooms will be outside exposure. There will be steam heat, an automatic elevator, hot water supply and vacuum cleaning. Interior will be finished in pine and hardwood with some ornamental plaster in the lobby. Entrance will be finished in marble and tile. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—3 story and base. Class C construction. \$12,000. San Francisco. Architect, R. W. Moller, 110 Jessie street, S. F. Owners, Egan Bros. The building will be arranged for stores on the first floor and a number of single rooms on the upper floors. The property to be improved is located on Folsom street between 7th and 8th streets. Interior finish will be of pine throughout. There will be a hot water supply. Exterior will be faced with cement plaster. Plans are complete and work will be carried on by Day Labor under the direction of Mr. Moller.

OFFICE ADDITION—3 story. Class A construction. \$50,000. San Francisco. Architects, Charles Paff & Co., Merchants' Exchange Bldg., S. F. Owners, Andrew B. McCreery Estate. Plans have been completed for an addition of three stories to the McCreery Building on lower Pine street. The building has a frontage of 50 feet and a depth of 137½ feet. The steel frame will be carried up through the new stories as well as the elevator service, plumbing and electric work. Interior will be finished in pine, hardwood and metal trim. Metal window sash and frames are specified. Halls will have marble wainscot and tile floors. Exterior will be faced with pressed brick and terra cotta. Plans are complete and figures are now being taken for the work.

Contracts Awarded.

Pringle-Dunn & Co.	6,840

R. Beanfield	5,800
G. H. Murphy	7,225

CITY AND COUNTY OFFICIALS TO WHOLE STATE INSURANCE. STATE FUND MAKES COMPENSATION INSURANCE ACCESSIBLE TO ALL.

One of the purposes of the Legislature in creating the State Compensation Insurance Fund was to make industrial insurance accessible to the smallest employer in the remotest nooks and corners of the State, and with that end in view it was enacted, that—

"The Commission shall furnish schedules of rates and copies of form of policy to the Clerk and to the Treasurer of every County, City and County, and City in the State, and it shall be the duty of every public officer to whom the foregoing may be furnished to fill out Insurance Fund applications for compensation insurance in such Fund."

The Commission is preparing to provide every City and County Clerk and Treasurer with the necessary manual of rates and classifications and printed matter, in order that they may be enabled, for the convenience of the Employer seeking insurance to comply with the law.

New Jersey State Building Awarded.

Contract Awarded to W. W. Anderson of this City for \$30,940. Thirteen Sets of Bids Submitted.

(By Special Wire)

TRENTON, New Jersey, Jan. 30th.—Thirteen sets of figures were opened in Trenton by the New Jersey State Commission to the Panama-Pacific Exposition for the construction of the New Jersey State Building. OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—2 story and base, frame, \$9,000. Oakland, Cal Architect, William Knowles, Hearst Bldg., S. F. Owner, Mr. A. Vernon. The dwelling will be erected on lots 4 and 5 in the Claremont Tract, and has been designed for an eight-room dwelling with two baths, sleeping porch and a garage. Interior finish will be of pine, redwood and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Plans also provide for a vacuum cleaning system and automatic water heaters. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and bids are now being taken.

BUNGALOW—1½ story and base, frame, \$3,000. Oakland, Cal Architect, none. Owner, John Peacock, 2512 Chester street, Oakland. The dwelling will contain seven rooms and bath. Interior finish will be largely of pine with some elm panels used in the living and dining rooms. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, E. J. Lloyd, 1057 Walker avenue, Oakland. The dwelling will be erected on Rand avenue and will contain seven rooms and bath. All interior finish will be of pine or redwood. There will be a large open fire place in the living room with brick mantel. Oak floors will be used in the dining room and living room. There will be an automatic water heater installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials will be purchased by the owner.

RESIDENCE—2 story and base, frame, \$1,500. Berkeley, Alameda Co., Cal. Architect, none. Owners, Junk-Riddell Co., 2247 Telegraph avenue, Berkeley. The dwelling has been designed for a seven-room house and will be erected in North Crugmont. Interior finish will be of pine and redwood with some elm panels in the dining room. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and the owners will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architects, Elite Planners, 1814 5th avenue,

Oakland. Owner, O. F. Fisher. The dwelling will be erected in the Country Club Heights, and has been designed to contain seven rooms, bath and sleeping porch. All interior trim will be of pine or redwood. Hardwood floor will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A hot air furnace will also be installed. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

RESIDENCES—7, 2 story and base, frame, \$1,500 each. Oakland, Cal. Architect, none. Owners, Banning and Stewart, Broadway, Oakland. These dwellings will be erected in Claremont Manor, and each house has been designed for seven rooms, sleeping porch and a bath. Pine and hardwood veneer will be used for interior finish. Floors in the principal rooms will be of hardwood. There will be furnace heat and open fire places. Mantels will be of brick and tile. Automatic water heaters will be installed. Bath rooms will be finished with composition floors and tile wainscot. Tile wainscot will also be used in the kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are nearly complete and the work will be done by Day Labor. All materials will be purchased by the owners.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Dr. E. L. Loring. This dwelling, which is to be erected on Bushnell Place, has been designed for an eight-room house with two baths and a sleeping porch. Interior finish will be of pine, hardwood veneer and white enamel. Oak floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

BUNGALOW—1½ story and base, frame, \$3,000. Alameda, Alameda Co., Cal. Architects, Elite Planners, 1814 5th avenue, Oakland. Owner, C. C. Adams. The dwelling will be erected in the Waterside Terrace District, and has been designed for a six-room house. Interior will be finished in pine with some elm panels in the dining room. Oak floors will be used and plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater is specified. Bath rooms and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$18,000. Berkeley, Alameda Co., Cal. Architect, H. W. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner's name withheld. This dwelling will be erected in the Claremont Tract and will cover a large ground area. The

design is in the Spanish style with the exterior covered with cement plaster on metal lath and the roof of clay tile. Interior will be arranged for twelve rooms, several baths and sleeping porches. Pine and hardwood will be used for interior trim. Oak floors will be used in the principal rooms. Plans provide for steam heat, vacuum cleaning system, a hot water supply and open fire places. Mantels will be of tile. Tile floors and wainscot will be used in the bath rooms. Plans are now being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove 2911 Telegraph avenue, Berkeley. Owner, W. W. Grove. The dwelling will be erected in Claremont, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine, redwood and some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot and composition floor will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$3,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue. Oakland. Owner, A. Cederborg. The dwelling will be erected in the Country Club Tract, and will contain seven rooms, bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the living room and dining room. There will be open fire places and tile mantels. Bath room and kitchen will have the wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor under the direction of the architects.

RESIDENCE—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, Maury L. Biggs, 2447 Gowitch street, Berkeley. Owner, George F. Drake. The dwelling will be erected on Claremont avenue near Alcatraz, and has been designed for an eight-room house with bath. Interior will be finished in pine and redwood with some white enamel. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater is specified. Fifth room will have composition floor and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Frederick A. Allard. This house has been mentioned here before when plans were first started. The dwelling will be erected in the Crocker Highlands Tract, and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine with some elm panels. Oak floors will be used in the living

and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

FIREHOUSES—3, 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. These buildings will be erected in North Berkeley, South Berkeley and Claremont. Each station will provide space for one piece of apparatus and sleeping quarters for the men. Interior finish will be of pine throughout. Modern plumbing and electric work will be installed. Exteriors will be faced with cement plaster on metal lath. Plans will be completed shortly and figures will be called. Further mention will be made of the work at that time.

OIL REFINERIES, TANKS, PIPE LINE, OFFICE, ETC.—\$150,000. Oakland, Cal. Engineer, Engineering Department, Pacific States Oil Refineries Co., 410 Sutter street, S. F. Owners, Pacific States Refineries. Plans are now complete for rehabilitating the plant recently destroyed by fire. Architect, Walter H. Parker, Holbrook Bldg., has prepared plans for a warehouse, corrugated iron construction, 200 by 100 feet, and for an office building, one story frame construction, which will be erected at once by Day Labor. Included in the plans for the mechanical equipment are a number of large steel tanks, pipe and pipe lines, pumps, condensers and stills. Practically all work will be done by Day Labor. Full particulars can be secured from the San Francisco offices of the owners.

SEWER CONSTRUCTION—\$70,000. Berkeley, Alameda Co., Cal. Engineer, City Engineer Jessup, Berkeley. Owners, City of Berkeley. Plans have been approved for the construction of the University outfall sewer and bids are now being called. Plans and specifications can be secured from the City Engineer. Recently a large sewer contract was let by the city of Berkeley, and following the award of contract for the University avenue sewer, bids will be called for on a third large sewer job.

STORES AND OFFICES—2 story and base, steel and brick. Cost not stated. Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owner, B. M. Cianciarulo. This work has been mentioned here before. The building will be erected on the west side of Broadway north of 17th street, having a frontage of 25 feet and a depth of 125 feet. Plans have been prepared for three additional stories which will be added later. There will be a complete steel frame, brick exterior walls, faced with pressed brick and terra cotta. Interior finish will be of pine throughout. Some marble and tile will be used. There will be metal window sash and frames and patent stone fronts. Steam heat will be installed. Plans are complete and figures are being taken.

OFFICES—18 story and base. Class A construction. Cost not stated. Oak-

land, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, A. L. and George Lavenson et al. Architect C. W. Dickey is now in the East studying the latest of the Eastern office buildings with the purpose in view of incorporating the most modern ideas in the proposed eighteen-story skyscraper which is to be erected at the southwest corner of Washington and 14th streets, Oakland. This property, directly opposite the new City Hall, has been leased for a period of fifty years from the Regents of the University of California. A recently formed corporation composed of A. L. and George Lavenson, Carl Plant, Henry Wisking, Henry Manheim, Alfred Kutter and C. J. Heeseman will erect the building. The structure will be of the Class A type, covering an area of 100 feet square. Construction will be started as soon as Mr. Dickey can complete working drawings.

Contracts Awarded.

CITY HALL MASTER CLOCK SYSTEM—\$1,029. Oakland, Cal. Architects, Palmer & Hornbostel, New York, Associate Architect G. F. Ashley, Oakland. Owners, City of Oakland. Contractors, Standard Electric Time Co., S. F. Contract price, \$4,029.

SAN JOSE & SANTA CLARA CLARA VALLEY.

RESIDENCE—2 story and base, frame, \$15,000. Palo Alto, Santa Clara Co., Cal. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owner, Mrs. Henry Allen. The dwelling will be erected on a large lot and has been designed in the Mission style. A garage will also be erected in the rear. The house will contain about twelve rooms, several baths and sleeping porch. Interior will be finished in pine and redwood with some hardwood veneer. Oak floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and ready for figures.

CITY HALL—2 story and base, reinforced concrete, \$40,000. San Mateo, San Mateo Co., Cal. Architects, Havens & Toepke, 46 Kearny street, S. F. Owners, City of San Mateo. Plans for the construction of this building have been completed and approved by the City Council. The building will house the city offices and the main fire station. Interior finish will be of pine, oak and mahogany. There will be furnace heat, a vacuum cleaning system and hot water supply. Special plumbing will be used in the fire station. Fireproof vaults will be constructed for the City Treasurer's office. Exterior will be faced with pressed brick. Some ornamental plaster and marble will be used. The second floor will be given over to the council chamber. Plans are complete and out for figures. Bids will be opened on February 9th. Plans and specifications can be secured from the architects.

CITY HALL—2 story and base, frame. Cost not stated. Daly City, San Mateo Co., Cal. Architects, Smith & Stewart, 244 Kearny street, S. F. Owners, Daly City. The building will be arranged to contain the offices of the various city departments, stations for the police and a large auditorium. Interiors will be finished in pine throughout. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken. Bids will be opened on February 9th. Plans and specifications can be secured from the architects.

HIGHWAY CONSTRUCTION—Cost not stated. San Mateo County and San Diego County. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on February 24th for the construction of approximately four miles of highway in San Mateo County of Portland cement, concrete and asphalt surface, and for approximately 11½ miles of highway in San Diego County to be constructed of Portland cement and concrete. Plans can be secured from the State Highway Commission at Sacramento. An official proposal appears in another column of this issue.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, R. D. King and E. C. Taylor, Consolidated Realty Bldg., L. A. Owner, Elias Sheoudy. The building will be erected on a corner site covering an area of 50 by 130 feet. There will be three stores on the first floor and a total of 65 rooms arranged in two and three room suites on the upper floors. Interior will be finished in pine throughout. There will be steam heat, a hot

water system and vacuum cleaning. Patent store fronts and plate glass windows are specified. Bath rooms will be finished in tile and will have composition floors. Wall beds will be used in all apartments. Exterior of the building will be faced with pressed brick. Plans are being prepared and when complete the work will be done by Day Labor.

CHURCH—1 story, tower and base, brick, \$10,000. Venice, Los Angeles Co., Cal. Architects, C. H. Russell & Co., Union League Bldg., L. A. Owner's name withheld. The building will be erected on Innes street and will contain main auditorium seating 350 people, Sunday school rooms and pastor's study. A hot air system of heating will be installed. Interior finish will be of pine. A tower containing a set of chimneys will also be erected. Exterior of the building will be faced with pressed brick. Plans are being prepared.

MISSION BUILDING—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Robert H. Orr, Van Nuys Bldg., L. A. Owners, Christian Church, Department of Women's Home Missions. The building will be erected on Wall street and has been arranged for chapel, offices and class rooms on the first floor, 20 bed rooms on the second floor and six suites of three rooms each on the third floor. Interior finish and floors will be of pine. There will be steam heat and a hot water system. Exterior of the building will be faced with pressed brick. Working drawings are being completed and figures will be taken in the spring.

CLUB HOUSE—2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Automobile Club of Southern California. The building will be erected on Figueroa street near Pico, covering an area of 50 by 150 feet. Interior will be arranged for social rooms, library and sleeping apartments. Interior finish will be of pine and hardwood. There will be steam heat, and open fire places. Mantels will be of tile and brick. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

LODGE HALL—2 story and base, brick, \$25,000. Holtville, Imperial Co., Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Holtville Masonic Hall Association. The building will be 50 by 140 feet. There will be four stores on the ground floor and twelve offices, dance hall, banquet room and lodge rooms on the second floor. Oak and pine trim and hardwood floors will be used. There will be steam heat and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the architects and also by Howard T. Jones of Holtville.

HOTEL—10 story and base, reinforced concrete, \$125,000. Los Angeles, Cal. Architect, W. J. Saunders, International Bank Bldg., L. A. Owner, C. W. Howard. The building will be erected on the south side of Sixth street west of Olive, covering an area of 55 by 150 feet. There will be stores besides the hotel lobby on the ground floor, and in the neighborhood of 198

guest rooms and private baths on the upper floors. Construction will be fireproof. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will be finished in tile. Interior finish will be of pine and hardwoods. Patent store fronts, metal window sash and frames and hollow tile and metal lath and plaster interior partitions will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be taken shortly.

HOTEL—3 story and base, reinforced concrete, \$175,000. Pomona, Los Angeles Co., Cal. Architects, Blanchard, Green & Tifal, Van Nuys Bldg., L. A. Owner, T. W. Newman. The building will have extreme dimensions of 258 by 200 feet. First floor will contain eight stores, lobby and dining room and a theatre. Upper floors will be arranged for 150 guest rooms with about 50 per cent private baths. Construction will be fireproof. There will be steam heat, hot water system and vacuum cleaning. Patent store fronts are specified. Exterior of the building will be faced with cement plaster. Preliminary plans have been completed.

RAILROAD BUILDINGS—3, 1 and 2 story, frame. Cost not stated. Los Angeles, Cal. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans for a two-story 50x100 foot building for the Pullman Co., a part 1 and part 2 story building 50x100 feet for the commissary department, and a 1 story dining car shed 88x118 feet, are complete. These buildings will be erected on the company property adjoining the new Arcade station. Plans are out for figures and can be secured from Mr. Edwards, 324 Pacific Electric Bldg., L. A.

SCHOOL—3 story and base, reinforced concrete, \$40,000. Los Angeles, Cal. Architect, Arthur B. Benton, 114 North Spring street, L. A. Owners, Florence Crittenton Home for Girls. The building will cover an area of 60 by 100 feet. The building will contain dining room, kitchen, single rooms and wards. In all there will be accommodations for about 60 people. Interior finish will be of pine. There will be steam heat and modern plumbing. Exterior will be faced with pressed brick. Plans are being prepared.

INDUSTRIAL ARTS BUILDING—2 story and base, reinforced concrete, \$80,000. Tempe, Ariz. Architects, Peabody & Smart, Central Bldg., Phoenix. All bids received for this work have been rejected and plans will be revised. The lowest figure received for the general construction was \$79,053, and with the heating, electric work and plumbing the building ran over the estimates. Revised plans will be out for figures in a few weeks.

SCHOOL—2 story and base, brick, \$30,000. Tustin, Orange Co., Cal. Architect, Frederick H. Elsey, Register Bldg., L. A. Owners, Tustin School District. The building will cover an area of 90 by 72 feet and will contain eight standard size class rooms, principal's office, teachers' rooms and an auditorium seating 800 people. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat, vacuum cleaning and program clocks. Exterior of the build-

ing will be faced with pressed brick. Plans will be ready for figures within a few weeks.

SCHOOL—1 story and base, brick, \$25,000. Pomona, Los Angeles Co., Cal. Architect, Paul F. Higgs, First National Bank Bldg., Pomona. Owners, Pomona School District. The building will contain seven class rooms, offices and an auditorium. There will be steam heat, modern school plumbing and vacuum cleaning. Interior finish will be of pine. Maple floors will be used in the class rooms. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be opened on February 24th. Bids will be taken separately for the general construction, heating and plumbing. Plans can be secured from the architect.

SCHOOL BUILDINGS—5, 1 and 2 story, brick, \$150,000. Inglewood, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Inglewood School District. Plans for this work are complete and figures will be opened on February 26th. Separate bids will be taken for the general construction, painting, plumbing, heating, electric work and program clocks. The group will consist of four new buildings and a central heating plant. The present building will be remodeled for an administration building, the auditorium enlarged and the gymnasium converted into a study room. The Manual Arts and Household Economy buildings will each be two stories 60x100 feet. The science building will be two stories 70x120 feet, and the gymnasium will be one story, 60x120 feet, with an outside cement plumb, 36x60 feet. The buildings will be of brick construction with red pressed brick facing, and cream pressed brick trimmings.

POLYTECHNIC GROUP—1, 1 and 2 story, brick, \$150,000. Venice, Los Angeles Co., Cal. Architects, C. H. Russell Co., Union League Bldg., L. A. Owners, City of Venice. Plans are nearly complete for this work and bids will be called for within the next week or ten days. The group will consist of the Administration building, Science building, Household Arts building and manual Training building. The style of architecture will be Lombardic Italian. The Administration building will be a two-story and basement structure 152x144 feet, and will contain the administrative offices, auditorium, study and choral halls, library and twelve class rooms. In the basement there will be a cafeteria, kitchen, bicycle rooms, etc. The central heating plant will be constructed in connection with and at the rear of the administration building. The science building will be a two-story L-shaped structure with no basement; extreme dimensions 110x120 feet. It will contain twelve class rooms, work rooms, offices, recitation rooms, etc. The household arts building will be two stories 140x120 feet, and will contain a modern bungalow, cooking department, laundry, lecture rooms, seven class rooms and sewing and milliner departments. The mechanical arts building will be one-story 112x144 feet, with an interior court. The buildings will be connected by arcades. They will be of brick construction, with concrete foundations, exterior

facing of different shades of light-colored brick.

Contracts Awarded.

APARTMENT HOUSE—2 story and base, brick, \$20,192. Los Angeles, Cal. Architects, Buchanan & Brockway, 65 North Raymond avenue, L. A. Owner, F. De Witt Smith. Contractor, William C. Crowell, Chamber of Commerce Bldg., L. A. Contract price, \$20,192.

RESIDENCE — 2 story, attic and base, brick and frame \$50,000. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, John F. Powers. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$50,000.

RESIDENCE — 2 story and base, frame, \$15,000. Los Angeles, Cal. Architect, H. H. Whiteley, L. A. Owner, Evan Mosier. Contractors, Cooper, Pyle, Cline Co., Story Bldg., L. A. Contract price, \$15,000.

BANK—2 story and base Class A construction, \$17,600. Redondo Beach, Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Farmers' and Merchants' Bank. Contractor, Carl Leonardt, H. W. Hellman Bldg., L. A. Contract price, \$17,600.

FACTORY—1 story, brick, \$14,000. Colton, San Bernardino Co., Cal. Architect, Lyman Farwell, Story Bldg., L. A. Owners, Hydraulic Truck Co. Contractor, H. M. Holloway, Wilcox Bldg., L. A. Contract price, \$14,000.

BREWERY ADDITION — 4 story, brick and steel, \$15,000. Los Angeles, Cal. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Los Angeles Brewing Co. Contractor, Harry C. Brown, 1666 Westmoreland avenue, L. A. Contract price, \$15,000.

SEATTLE AND WASHINGTON.

HOTEL—12 story and base, Class A construction, \$1,000,000, Seattle, Wash. Architect, William Kingsley, Empire Bldg., Seattle. Owner's name withheld. Negotiations are now under way and will be closed within a few days for a corner site, embracing half a city block, on which this building will be erected. The names of the interested parties and the exact location of the building is withheld for the present. Details of construction will be made public as soon as the property is secured.

SCHOOL—2 story addition and 2 story and base, reinforced concrete, \$150,000 and \$350,000. Seattle, Wash. Architect, Edgar Blair, 501 7th avenue, Seattle. Owners City of Seattle. School Architect Blair has completed preliminary sketches for the addition to the Lincoln School to cost \$150,000 and for the new building to be erected at the corner of 75th and 21st avenues to be known as the Ballard School, which will cost \$250,000. The preliminary sketches have received the approval of the Board of Education, and Mr. Blair has been instructed to complete the plans. Details cannot be published at this time. The architect states that working drawings for both buildings will be ready for figures shortly after March 1st.

RIVER BANK PROTECTION — \$1,250,000. King and Pierce Counties, Wash. Engineer, William J. Roberts, Seattle Hotel, Seattle. Owners, Pierce and King Counties. Mr. Roberts, for-

mer highway commissioner, has been selected to prepare plans and supervise the work of protecting the river banks along the Stuck and Puyallup rivers. The project is one of the largest river protection problems that has ever been undertaken in the west. Actual work will be started about March. Full particulars can be had from Mr. Roberts. A general contract will probably be let.

APARTMENT HOUSE—4 story and base, brick and steel, \$135,000. Tacoma, Wash. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owner's name withheld. The building will be erected at the corner of 13th and C streets, covering a considerable area. There will be a total of of twenty-two suites of two to five rooms. Interior finish will be of pine and hardwood with some oak floors. Plans provide for steam heat, elevator service, a vacuum cleaning plant and hot water supply. Bath rooms will have tile wainscot and composition floors. Wall beds will be installed in all apartments. Exterior of the building will be faced with pressed brick and terra cotta. Plans will go out for figures within thirty days.

BULKHEAD AND WHARF—\$100,000. Tacoma, Wash. Engineer, City Engineer, Tacoma. Owners, City of Tacoma. Bonds in the sum of \$100,000 will be voted on at the general election in April for the construction of a bulkhead and wharf at Old Town. Preliminary plans are now being prepared by the City Engineer. Further mention will be made of the work.

BRIDGES—Steel and concrete construction, \$1,830,000. Seattle, Wash. Engineer not selected. Owners, City of Seattle. At a meeting of the City Council an ordinance was passed providing for the submission to the voters on March 3rd of a bond issue in the sum of \$1,830,000 for the construction of bridges over the Lake Washington Canal and the East Waterway.

Contracts Awarded.

GARAGE—2 story and base, brick, \$30,000. Seattle, Wash. Architect, none. Owners, Waterhouse-Sands Co., Seattle. Contractors, Sound Construction and Engineering Co., Lowman Bldg., Seattle. Contract price, \$30,000.

MAUSOLEUM — 1 story, reinforced concrete, \$750,000. Seattle, Wash. Architect, Marbury Somervell, White Bldg., Seattle. Owners, Northwest Mausoleum Co. Contractors, Cornell Bros., Savage-Scotfield Bldg., Seattle. Contract price, \$750,000.

CAFE ALTERATIONS AND ADDITIONS—\$100,000. Seattle, Wash. Architect's name not given. Owners, L. C. Smith Building. Contractors, The Junction Co., Seattle. Contract price, \$100,000.

PORTLAND AND OREGON.

HOTEL ADDITION AND ALTERATION—Brick and steel, \$140,000. Pendleton, Ore. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Pendleton Hotel Co. The work will consist of the construction of two additional stories and extensive alterations to the present dining rooms and offices. Elevator service and a new heating system will also be installed. Exterior will be faced with pressed brick. Plans are complete and figures

will be called within a week or ten days.

SCHOOL—1 story and base, reinforced concrete, \$30,000. Portland, Ore. Architect, P. A. Naramore. Address in care of Superintendent of School District No. 1, Portland. Owners, School District No. 1. The building has been designed to contain four standard sized class rooms. Interior will be finished in pine. There will be steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans will be ready for figures within thirty days.

STORES AND LOFTS—2 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, Whidden & Lewis, Wilcox Bldg., Portland. Owner, Mrs. Walley. The building will be erected at the corner of First and Pine streets, and will be arranged for a restaurant on the first floor and machinery sales rooms above. The building will cover an area of 100 by 100 feet. Details of construction will be handled by J. Frank Watson, 1215 Wilcox Bldg.

Contracts Awarded.

MOTOR CAR FACTORY—1 story and base, reinforced concrete, \$25,000. Gresham, Ore. Architect, P. Chappell Browne, Mohawk Bldg., Portland. Owners Beaver Motor Car Co., Lumvermen's Bldg., Portland. Contractor, James P. Taylor, Couch Bldg., Portland. Contract price, \$25,000. Note: This is the first unit of a large plant which is to be erected this year.

PLAN CITIES TODAY—SAVE MILLIONS TOMORROW.

That the cities of California should now plan wisely for their future growth, in order to save the wasting of countless millions hereafter in costly and yet makeshift reconstruction, is believed by the University of California, and so the University has established a new course of lectures on "City Planning," to interest its students and the public in this great world movement. Fifteen experts in various fields will come to the University to discuss the problem of how cities may plan wisely for their future.

That there will be two million people in San Francisco and two million in Los Angeles before another generation goes by, and that the other chief towns and cities of California are destined to grow in some such surprising way, is predicted by competent and conservative experts. So its is suggested by the lecturers of this course that as a matter of plain business self-protection California towns should now, while land is cheap, acquire ample areas for schools, school gardens, public playgrounds where young and old may have healthful outdoor recreation, parks, plazas, agricultural school farms, and civic centers; provide for harbor and transportation problems, plenty of room for street-car and railway facilities, factory and warehouse areas; broad traffic streets, linking different portions of a scattered community, provision for both express and local street-car service between neighboring regions, preservation of natural landscape features, etc.

It pays to do city-planning with foresight, the University holds, for such work not only adds to the comfort,

health, and convenience of the inhabitants of a town, but actually saves the community enormous sums, through preventing the excessive cost of making changes when it is too late to do things economically and well.

Civic beauty is only one side of the city planning problem—an infinitely important aspect is to protect the health, the comfort, and the well-being of the home-dwellers of future generations. Wise building restrictions need to be developed. Every community needs a city-planning commission which shall see to it that the town develops wisely instead of just "happening," which protects the beauty and the comfort of the community, and forces future needs.

This city planning course is to be given under the joint auspices of the students' League of the Republic, an organization devoted to study of civic problems, the Architectural Association, and the University Extension Division. It is expected that several hundred students will be regularly enrolled for the course and that there will be an attendance of large numbers of visitors. Among the speakers will be Professor Thomas H. Reed, on the marvelous expansion of city life in recent generations; Dr. Werner Hegemann of Berlin on problems of city-planning; John Galen Howard, Director of the School Architecture, designer of the Hearst Plan of the University and of the new civic center of San Francisco, on the art of city planning; William R. Wheeler, Manager of the Traffic Bureau of the San Francisco Merchants' Exchange, on railway facilities; City Manager M. O'Shaughnessy of San Francisco on streets and traffic, including municipal transportation; Charles Gilman Hyde, Professor of Sanitary Engineering in the University, on water and sewer systems and methods of street construction; Charles H. Cheney, the architect, on the zone system of city planning and special features in the planning of business and manufacturing districts; Dr. Jessica B. Peixotto, of the State Board of Charities and Corrections, on the garden city, the tenement, and other experiments in the housing problems; Duncan McDuffie, a planner, in the artistic development of restricted residence districts in Berkeley and in San Francisco, on wise building restrictions for residence quarters in cities and towns; George W. Dickie, Superintendent of Playgrounds in Oakland, on the outdoor and indoor recreational facilities which cities ought to provide for their citizens; J. W. Gregg, Professor of Landscape Gardening, on gardens—public and private—and city planning; and John J. Donovan, Supervising Architect for Oakland, on what a city can do in the way of planning its school houses so as to use them for vastly wider community purposes than were contemplated in the old-fashioned plan of opening them a few hours a day just for keeping school; and lock them up useless most of the time.

CALIFORNIA HIGHWAY COMMISSION BULLETIN.

A \$5,500,000 guarantee of faith in the value of the State Highway system has been furnished to the State by counties which have subscribed for highway bonds in excess of that amount in order

to assure prosecution of the highway work in advance of the opening of the 1915 expositions. The State Highway bonds bear four per cent interest, and under the law must be sold at par and accrued interest. No sales have been made in the general market since October 1912.

When the lack of a market for low rate bonds promised to continue, the Highway Commission appealed to the supervisors of counties to take advantage of an act passed by the last legislature permitting investment of county funds and re-selling of State bonds. In return for this co-operation the Highway Commission agreed to expend the sums received within the limits of the counties financing the bond sales.

About thirty counties have responded, permitting a total of \$5,719,500 of highway bond sales, with about \$1,000,000 additional informally pledged. Most of the counties have merely taken care of the shrinkage between the par value and the market demand. As the State maintains the State Highway the saving to the country in maintenance in practically every instance is as great in the first year as the depreciation loss which the county stands to make the bonds saleable. Several counties with considerable money on hand are keeping the bonds, thus bringing an interest return of 4 per cent in place of the 2 per cent which the funds have been drawing from the banks. The depreciation has averaged less than 5 per cent.

The counties in which sales of or pledges to purchase the State Highway Bonds have been definitely made are as follows, according to a list given out by the State Highway Commission: Los Angeles \$695,000; San Diego \$557,000; Alameda \$500,000; Solano \$390,000; Contra Costa \$300,000; Colusa \$290,000; San Luis Obispo \$250,000; Santa Clara \$228,000; Glenn \$218,000; Kern \$200,000; San Mateo \$200,000; Orange \$200,000; Imperial \$200,000; Fresno \$150,000; Marin \$150,000; Sacramento, \$150,000; Santa Barbara \$141,000; Tuolumne \$125,000; El Dorado \$150,000; San Bernardino \$105,000; Riverside \$100,000; Humboldt \$100,000; Stanislaus \$75,000; Santa Cruz \$75,000; Siskiyou \$50,000; Monterey \$45,000; Mendocino \$45,000; San Benito \$25,000; Shasta \$5,000.

This co-operation the Highway Commission believes will make possible the completion in time for the 1915 expositions the greater part of the coast line between San Diego and San Francisco and north to Eureka, the west Sacramento valley highway from Red Bluff to Benicia, and a considerable part of the route through the San Joaquin and Sacramento valleys between Bakersfield and Red Bluff via Fresno, Sacramento and Marysville.

NEW MINING BUREAU PUBLICATION.

In response to a demand not only from residents of California but from prospective investors and others interested in the mineral resources of the State throughout the world, the State Mining Bureau announces the publication, for free distribution, of Bulletin No. 66 containing the mining laws of California.

A working knowledge of the law

governing the location, development and acquisition of mineral land is necessary to all who are in any way connected with mining and the above bulletin is presented with the idea of following out the principle which State Mineralogist Hamilton is pursuing in all branches of the work of the mining bureau, i. e., the advancement of the mineral industry in all possible ways.

All statutes and amendments including those enacted by the State Legislature during the 1913 session are contained therein as well as the U. S. mining laws and various Court decisions relating to mining.

As an appendix are included the full text of the "Blue Sky" law and the Water Commission Act which were passed by the last legislature but are inoperative at present having first to go before the people under the referendum.

It has been deemed proper to include the "Blue Sky" law as its action if it becomes operative will have considerable effect in suppressing illegitimate mining schemes, and will on that account accomplish much toward putting the industry on a sound footing and establishing a confidence in mining which is merited in the great majority of cases, but which is often lacking because of the fact that unscrupulous persons have used the industry as a means of perpetrating frauds upon the public.

The Water Commission act which covers the regulation of the waters of California under state jurisdiction has been included because the use of water is vital to the mining industry and it is to the miner's advantage to know that their interests in the use of water may be fairly adjudicated and protected.

Those wishing a copy of this bulletin will be supplied upon addressing,

F. MCN HAMILTON,
State Mineralogist,
Ferry Building, San Francisco, Cal.

REVIVAL OF CHINA CLAY INDUSTRY.

Development of the China clay industry in the United States is expected to progress more rapidly as a result of advancing prices for English clay. The industry has had a somewhat checkered career under the influence of high customs duty, low duty and no duty.

Until the Wilson bill, eighteen years ago, put clay on the free list, the duty was \$5 per ton. American clay never was in strong demand among potters, who found fault with the carelessness in washing and preparation. But producers were advancing and attracting attention from potters when duty free clay put all of them except the Brandywine Summit company out of business.

The Payne-Aldrich bill carried a duty of \$1.25 a ton, and quarrying of the clay again took on an industrial aspect. There was brought from England last year 278,276 tons of white China clay, of an invoice value of \$1,629,105. Under the Underwood bill the clay will come in free, and already British products have announced an advance in price. They give as their reason a strike of their workmen, in progress eight weeks, which, it is asserted, will force them to increase wages. "The Ameri-

can tariff increasing British wages," is the view of a clay expert.

It is recalled that when the Wilson bill put clay on the free list the price abroad went up \$2 a ton. English clay laid down in Trenton costs the potter about \$12.50 a ton. American clay, it is stated, can be delivered at a lower cost, and as producers are conforming to the potters' idea of washing and preparation, it is predicted the producing of white China clay is destined to become an industry of some magnitude.

R. Griffen Miller, treasurer of the Newark Clay Company, while in Philadelphia recently on business of the company, said he did not regard removal of the duty as having any effect other than to figure in the diminution of the government revenue.

THE PORTLAND CEMENT INDUSTRY

According to returns received by the United States Geological Survey up to January 12, 1914, it is estimated by Ernest F. Burchard, that the quantity of Portland cement manufactured in the United States in 1913 was approximately 92,406,000 barrels, compared with 82,428,096 barrels in 1912, an increase of about 9,977,900 barrels or 12 per cent. The estimated shipments of Portland cement during 1913 were 88,852,000 barrels, compared with 85,012,556 barrels in 1912, an increase of about 3,839,400 barrels, or 4.5 per cent. On account of a large surplus of production over shipments stocks of cement at the mills apparently increased more than 45 per cent, or from 7,811,329 barrels in 1912 to 11,375,000 barrels at the close of 1913. In 1913 the relations between production and shipments were the reverse of those for 1912, when shipments exceeded production. It may be necessary to revise considerably the estimates of stocks, but it is believed that these figures for production and shipments are very close to those that will be shown by complete returns from all producers.

Although few definite statements as to selling prices are at hand it is evident that the average value per barrel was appreciably higher than in 1912. Increases of 10 to 25 cents a barrel are reported from several plants in the Central and Eastern States, but there were slight decreases reported from a few plants in the Rocky Mountain district.

Two new plants, both in Washington, were added to the list of producers during 1913.

The following table gives the estimated production, shipments and stocks for 1913 and the actual production, shipments and stocks for 1912, together with the per cent of change of California and Washington:

	Estimate	Change	
	1912.	1913.	Per Cent
Production	7,336,715	8,916,000	Inc. 21.5
Shipment	7,531,927	8,072,000	Inc. 7.2
Stock	606,989	1,511,000	Inc. 148.9

HUMORING THE ARCHITECT.

In "slinging up" the engineer in whose hands final approval of his work rests, the contractor becomes a shrewd judge of human nature. The methods of some engineers are radically different from those of others, and this has a marked bearing on the cost of construction. Nothing adds to the price

of a bid like uncertainty whether it be in the temperament of the engineers or in unknown construction problems.

In one work of construction where a number of local firms were invited to bid on a certain large building for an architect who was well known to rule in favor of his client in every instance, irrespective of the merits of the case, the successful bidder, after figuring full measure on all questions, added this item: "For humoring the architect, 10 per cent of the contract price." It is safe to presume that all other competitors placed this contingency at a higher figure. Such a man could not get a reasonable bid from any one who knew him.—Engineering Record

A LOFTY DRAWBRIDGE.

A draw bridge, which, when open, towers above the Calumet river in Chicago to the height of a twenty-story skyscraper, has been built by the Baltimore and Ohio Railroad. The length of its span, 230 feet, breaks all previous records for draw bridges of the "bascule" or tilting type. The bridge is raised and lowered in exactly the way that the wooden gates at a railroad crossing are operated by the flagman to prevent vehicles from passing the tracks when a train is approaching.

The structure contains 2,800,000 pounds of structural steel, 305,000 pounds of machinery and 1100 cubic yards of concrete, employed as a counterweight. In spite of its ponderous mass, the bridge is so delicately balanced that it can be raised and lowered as readily as a child lifts his "see-saw."

The average of four complete operations gave a raising time of 72 seconds and lowering time of 67 seconds, with the wind blowing from 5.5 to 11.5 miles per hour. When subjected to an unbalanced loading of 8860 pounds of rails, the bridge was raised in 53 seconds and lowered in 56 seconds by two motors.—Engineering Record.

MACHINERY HOUSE NEEDED IN VENEZUELA.

[Consul Thomas W. Vetter, La Guaira] Although there is much standing timber in Venezuela, some of it not accessible to roads or water transportation. A great part of the balance is in unhealthy surroundings. For these reasons the production of merchantable lumber in Venezuela is not greater. The importation of machinery for sawmills is not great, and no great increase in the demand can be looked for. Within a few days I noticed advertisements for the auction sale of a large woodworking plant with its machinery, which had been idle for a long time.

I regret that there is not in the entire country a distinctive machinery house, one which can install a plant and nurse it along into successful operation. Were such a house in existence in Caracas, with a competent and practical man in charge, the sale of machinery of various kinds could undoubtedly be increased.

I have recently received a number of inquiries from concerns wishing to sell machinery in Venezuela. I venture to offer the suggestion that several American manufacturers who desire to sell their machinery in Venezuela unite in

sending a joint representative to Caracas. A dozen or twenty different lines might be represented. The man in charge should be practical, able, and fit to oversee the installation of the plants he sells and to correct errors in their operation. He should also be able to help the proposed user of machinery to get other machines or apparatus he may need to complete his plant as he desires. He could keep in touch with the industrial development and instantly follow up anything that promised business for the firms he represented.

Were the proposed buyers confident that they would find some one in the country who had a real interest in seeing that the machinery they bought rendered good service and also could help them to that end, they would be more free to buy. For example, a prominent Venezuelan interested in manufactures here finds that his plant is not operating satisfactorily. He is going to visit the United States soon to find out how he can improve his plant and why his machines do not work well. Now, a properly organized and managed machinery house, such as I have outlined or suggested, would have seen that the factory did operate well, and the owner would have been spared the expense of a long trip to find out what was wrong. This plant is not in the woodworking line and I mention it only to emphasize the point. I also believe the machinery did not come from the United States.

Proposals.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including twelve o'clock noon, Tuesday, March 3rd, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor for the following work in the State Capitol Building at Sacramento, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California. Bids will be received:

FIRST—For the construction and erection of two new passenger elevators, with equipment for same, in the State Capitol Building. Separate bids must be submitted covering allowance for all old mechanical and electrical equipment, same to be removed without expense to the State.

SECOND—For remodeling elevator grilles in the State Capitol Building. THIRD—For the construction and erection of pneumatic door operating devices and equipment for same for two new passenger elevators in the State Capitol building.

On a bid or bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five Dollars (\$5.00) will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for elevators, grilles and pneumatic door operating devices in the State Capitol, Sacramento, California."

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE ?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Price 50 Cents

For Sale By All Druggists, or will be sent by mail postpaid by the manufacturers.

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

There is quite a good deal of discussion at present over our educational system. Dr. Burk's publication on "Lockstep Schooling" and Superintendent Hyatt's answer has provoked some newspaper notice at least and the important question of American schools is brought into print.

That there are many defects in the school system is evident. How best to remedy them is a difficult problem. And it should employ the best energy of the best minds of the country which it does not at the present time. And the chief fault of the schools is that they do not offer sufficient opportunity for men to enter the profession. Positions of any reward depend entirely upon political favor in this country. Hence it is that the politician gets whatever there is worth while in the public schools and the man who has devoted his life to the work soon finds that he is in a profession where he can only make a bare living and where he may be out of a job at any time and nothing else to turn to.

The school teaching profession in this country is occupied almost entirely by women. The schools in the city particularly are crowded. Positions are usually obtained through political influence under our system. So that merit in most cases is a second consideration.

What the schools of this country need is more opportunity for men to aspire to the profession of school teachers. Enlist the best minds of the country in the active work. Let them work out the problem that confronts them, find out the best methods of attaining the ideals to be sought. As it is now fads and fakes are prevalent. Someone starts with a royal road to censure that has about as much merit as a patent medicine fake. It gets the public attention and then is soon superseded by some other scheme.

Fundamentally the laws of the mind development are pretty well determined. The main thing is to apply the proper method for the development of each individual. No one method will do it anywhere. It depends largely upon the personal work of the teacher. Hence the great need is to improve the service by making the rewards of occupation commensurate with the ability which is sought to be engaged.

Reports state that there is quite a building boom in the town of Bethlehem, Palestine. From the town that was the birthplace of the lowly Carpenter, that became the greatest teacher of the world, the fact that it is again being built up after the lapse of 2000 years is of especial interest to

builders. How much have builders' tools changed in the interim? What advance has joinery and architecture made? What difference is there in the churches that adorn the great capitols of mediæval Europe as compared with the temple of Jerusalem where Christ drove the money changers into the street?

The modern progress of the mechanical age is invading the ancient lands that have long been sleeping and dead. It is only a question of time till modern methods will again conserve the waters of the Tigris and the Euphrates and modern cities will be built on those now crumbled into dust. Already irrigation is being spread along the lower Nile by means of pumps that use the sun's rays for power. And from the west are coming the modern inventions that will place the old lands on the plane of progress of the Western world.

As the Workmen's Compensation Act is something new in this State and is borne in a great measure by the building trades as an additional cost on the business, its provisions have been the subject of a very wide discussion. Relative to the reports that have been persistently circulated about it the Fresno Republican has this to say:

It is evident that insurance companies doing business in California are conducting a concerted campaign of misrepresentation regarding the workmen's compensation act. Reports have come, for instance, within a week, from Southern, Central and Northern California, of the most preposterous statements in regard to the requirements of the new law, and in every instance investigated, these statements have been traced back to insurance agents. Sometimes, these misrepresentations have been accompanied with direct denunciation of the law as "freak legislation," and even with suggestions that Progressive business men show their resentment against the law by registering as Republicans and opposing Governor Johnson. We even know instances where this political effort was successful—and in every case, it was by attributing to the law some provision which, in fact, it does not contain. The campaign is too widespread to be merely spontaneous, and the same misrepresentations crop up from so many different places as to make it certain that they have a common inspiration. If ten scattered men all tell the same truth, it does not follow that they have consulted and agreed to do so. But when hundreds of men, scattered too far apart for personal consultation, but all employees of the same interest, tell the same lie, it does follow that they are proceeding under common instructions.

It is, of course, impossible to know just which particular misrepresenta-

tion has been made to each reader, so as to give a specific explanation of that one, and if all the distortions of the law were denied (even if it were possible to find them all out for denial) the denial would be so voluminous that no one could read it through. But just on general principles, if you hear from an insurance agent, or from any one who gets it from an insurance agent, a statement of some provision or application of the compensation law which strikes you as unjust, you are fairly safe in assuming off-hand that there is actually no such provision in the law. Practically all the attack on the law which actually are not and never were in it.

The law is denounced as "freak," in spite of the fact that it already exists in every European nation except Turkey, and was about to be introduced even there by the Young Turk party, when it was interrupted by the Balkan war. Certainly we shall not be going dangerously fast if we catch up with the procession just one step ahead of Turkey! The law is denounced as unjust because it is said that a householder might be saddled with the life support of some tramp whom he had employed to clean the sidewalk, and who had fallen and permanently disabled himself, just or unjust, that is the law in England—but not in California. Casual employees are not included. It is said that a small farmer, with his life savings invested in a new place, might have to lose it to compensate the death or support for life some chance laborer who might happen to be injured. This is, in fact, the law in Germany—but not in California. The farmer in California is exempted, and if his employee falls and paralyzes himself for life, that employee is to make his own living and bear all the loss. But even if the farmer were included (as some day he should be) the element of risk is removed by insurance, just as it is in the case of a fire hazard. Weird tales are told about the liability of the owner of a building for damages to his lessees, customers or visitors—all of which falls outside the scope of a law for the compensation of employees only. These are only a few of the tales. If you hear others, don't believe them until you have first written to the Industrial Accident Board, or inquired of some disinterested person who knows. And don't let anybody fool you into thinking that this law, which is now a commonplace of civilized legislation all over the world, is "freak," merely because it is new in California.

The President has lifted the ban on the shipment of arms to Mexico. This Huerta claims will hasten a war of extermination in the Southern republic. He certainly has great reason to complain as he gained ascendancy by assassination of his chief and holds his power by being able to get arms while his adversaries can not.

The only question that concerns us is whether after Huerta's downfall there is anyone else strong enough to keep the peace and protect lives and property in the war ridden republic. And no doubt that has been the sole consideration of the President. However, the President has shown his capacity to deal with all questions and he is not the man to take any momen-

tous action without mature consideration. He has, no doubt, taken this action after most mature consideration being pretty sure in his own mind of the probable outcome.

The Chronicle is much concerned over the fact that the income tax is to make Americans pay the cost of government while foreigners formerly paid it, stating the old, old fallacy that the foreigner paid the price on the protective tariff. Just as if the importer did not have to add the tariff to his cost price and charge the consumer accordingly.

How anybody with intelligence enough to sit up can be made to believe such statements is hard to realize. The only difference is that income tax is direct, everybody knows what it is, and it has to be paid by those who can afford to pay taxes. In the tariff tax it was indirect and levied upon everybody who bought anything that was imported or manufactured in this country, and in many cases it fostered the building of gigantic monopolies that made rich a favored few.

Every city suffers from slack work and a period of unemployment every winter. There is little demand for unskilled labor as a rule at this season of the year and many of the trades go through a period of depression. Particularly is this true of the building trades which depend in a large measure upon favorable weather for their full employment. The result is that men are laid off and many families that have saved up a little for emergencies are brought to actual want.

This condition seems to be inevitable. It is so in some degree, particularly in some trades. But in some cases it can be remedied to a great degree.

Mr. L. D. Brandeis of Boston, who has a habit of scrutinizing bad conditions to see if they cannot be improved, has recently called attention to the achievement of a Boston shoe manufacturer, W. H. McElwain, in dealing with this problem.

Mr. McElwain died in 1908, at the age of 41, after having been in business for himself only thirteen years, but having accumulated a fortune. In 1902 the problem of irregularity of employment in the shoe business was brought to his attention. He was impressed with the economic waste and the suffering that it entailed. Most manufacturers closed their factories twice a year, and some of them had two additional slack periods.

"The irregularity had been accepted," Mr. Brandeis said, "by the trade—by manufacturers and workmen alike—as inevitable. It had been bowed to as if it were a law of Nature—a cross to be borne with resignation. But with McElwain an evil recognized was a condition to be remedied, and he set his great mind to solving the problem of irregularity of employment in his own factories. * * * Within a year irregularity of employment has ceased in the McElwain factories, and before his death every one of his many thousand employees could find work 305 days in the year."

Certainly if the evil of irregular employment is accepted as an inscrutable "law of Nature," no progress will be made in remedying it. If the con-

builders has said, "We can't construct a canal at Panama because of yellow fever there," the canal never would have been constructed.

When men once recognize the possibility of correcting an evil they have made a big advance toward getting rid of it. If the evil of irregular employment cannot be gotten rid of it can at least be mitigated in some such way as Henry Ford of Detroit has suggested for his motor car factory—by arranging that the men shall be laid off in summer when there is farm work to do, rather than in the winter.

England has undertaken to meet the problem to a degree by providing for insurance to be paid men in certain trades who are out of work through no fault of their own. As a part of the insurance fund is contributed by the employers it is expected that this will provide an incentive for employers to organize their work so far as possible to avoid seasons of unemployment.

There seems to be an indispersed sentiment in the Eastern States against California in its attitude toward Asiatic exclusion. Why this is so is hard to account for unless it be the sentiment fostered in favor of Japanese and Orientals by the Eastern press. As is usual in these cases the people who want to regulate things for us do not have to bear the burden and have no first hand knowledge of the situation. There seems to be no such a sentiment in Canada.

The experience of this country with the negro question, South Africa with the Hindoo problem and the whole world in all ages with racial difficulties teaches us that the time to meet these questions is in the beginning. The question of Asiatic exclusion is not that we are unfriendly to Japanese or any other race but that this is a white man's country and it should be retained as such.

The Railroad Commission has refused the Bell Telephone Company a rehearing on the San Jose case and the revenue derived from the Pacific States Telephone Company for the rental of instruments has been reduced from 4 1/2 per cent to 2 1/2 per cent. Therein is the milk in the cocoanut that spelled the death of the Home Telephone. For the American Telephone and Telegraph Company represents a capitalization of 766 million dollars. It controls the Western Union Telegraph and the Associated Press business. Hence it is no wonder that it desires to put out of business any competing concern that would deprive it of the vast revenue it receives from the rental of its instruments. The Home Telephone Company here is practically a thing of the past. Its plant and apparatus and its franchises were taken over in absolute violation of the terms of its franchise and its contract with the city and exactly contrary to the will of the people expressed at two different elections. Yet there is no effort to prevent it and to rehabilitate the system now would be a discouraging task. The hope for the future is government ownership of these monopolies, for when the idea of profit is taken out of the business we may expect more efficient service.

The Territory Of Alaska.

A Review and Abstract of Its Resources.

As the greater part of the public domain is included within the territorial limits of Alaska, the statistical report of the governor of the country and the bureau of the Interior Department are of interest to all citizens. The following abstract from the report of the Secretary of the Interior to the President given from the bureau of Alaska in that department shows the great resources and the present status of that country.

Alaska.

The report of the governor affords ample evidence for the statement that Alaska is about to enter upon an era of unparalleled development industrially and commercially. The gold placer fields of interior and northwestern Alaska no longer give employment to as many men as in former years, but the gold output is still large; more power dredges are being installed from year to year and alluvial gold deposits carrying smaller values are worked profitably. In the placer regions, too, considerable attention is being given to quartz prospecting and mining with encouraging results. The volume of labor employed in the placer sections has decreased because of the adoption of new methods of mining in those districts and the exhaustion of placer deposits, but elsewhere an increase is noted, the white population at the present time being estimated at 26,000. The number of white males of voting age according to the decennial census of 1910 was 25,030, or 75 per cent of all males of voting age. In 1900 the corresponding percentage was 68.4. In 1910 the total number of people in the Territory, both white, native and mixed was 64,356.

The volume of merchandise shipments, including precious metals and copper, between Alaska and the United States and between the Territory and foreign countries in the fiscal year 1913 was the largest in its history. It exceeded the total of 1912 by \$3,025,013, the grand total for the year being \$67,150,519, as against \$64,123,506 in 1912. The greatest increase noted in the shipments from Alaska was in salmon, where there was an increase of \$2,875,791. Decreases in the shipment of gold and copper are more than balanced by the increase in other items. The merchandise shipments to Alaska from the United States amounted to \$20,175,547, as against \$18,809,270 in the fiscal year 1912.

Lack of transportation facilities continues to operate against the development of the Territory, and a comprehensive system of railroads is something indispensable if the country is to be developed along enduring lines. Supplementary to the railroads, there should be largely increased appropriations by Congress for the construction and maintenance of roads and trails as feeders to the railroads and producers of additional tonnage for transportation.

Agricultural Capabilities.—The agricultural possibilities of the Territory

are beginning to be known in part and appreciated in part, and farming has now reached a stage that insures it a permanent place in Alaska's industries. The work done at the agricultural experiment stations at Sitka, Rampart and Fairbanks has amply demonstrated the wisdom of establishing these stations. The reclaiming and cultivating of land has been greatly stimulated through the agency of the Government experimental stations. There has been, however, but a small increase of farmers during the past year, due to economic conditions which are such that there is no inducement to practical farmers in the States and elsewhere to settle in Alaska and engage in farming. Lack of available markets and transportation facilities are also prime factors which operate against successful farming in Alaska. In the Tanana Valley, however, there are a few farms which find a ready market for their produce in the town of Fairbanks and other mining camps of that section. Cattle breeding is carried on at Kodiak Island experiment station where there is a herd of about 100 head of various ages. The surplus of this herd is sold to Alaska settlers at reasonable prices for breeding purposes in order to stock the country with a breed suitable to the climate. It is also planned to develop dairy qualities in this breed of cattle, so as to produce a hardy all-purpose cow, which the country needs. The dairy work has been held in abeyance temporarily because of the removal of the herd necessitated by the volcanic eruption of 1912, which covered a considerable portion of Kodiak Island with ashes and destroyed the grass. There are at this station also about 100 head of large long-wooled sheep, which have been bred in Alaska and are inured to the climate. These are being bred with a view to supplying the country with a suitable breed of sheep.

Alaska has two climatic belts, known, respectively, as the coast region and the interior. The coast region is rainy, has mild winters and cool summers. The interior region is, for the most part, dry, has severe winters and short but warm summers. The coast region is rocky and has but few valleys that are suitable for agriculture. Vegetables of hardy kinds can be grown in the coast sections, but grain growing cannot be said to be a success. Southeastern Alaska is practically only adapted to gardening, and southwestern Alaska is preeminently adapted to gardening and stock raising. The interior region differs totally from the coast belt not only in climate but in products and agricultural capacity. While the hot summers are short, about 90 to 100 days free from killing frost, the weather is warm enough to mature all the hardy grains. Spring wheat and spring rye, on the other hand, mature but seldom; hardy vegetables of all kinds are grown in the interior with equal or possibly even greater success

than in the coast country. The country including the region of the Kuskokwim and Nushagak Valleys is intermediate between the coast region and the interior. The summers are cool, like the coast belt, and the winters are not so severe as in the interior. Oats and barley can be matured in the Kuskokwim and Nushagak River valleys, but conditions are not so favorable as in the Tanana Valley in interior Alaska, and the feeding season is longer than in the coast region.

National Forests.—Fewer complaints are to be noted in the past year as to the administration of the national forest reservations, which embrace a very large percentage of the more heavily timbered areas of Alaska, due to the more liberal spirit that has been manifested in the interpretation of the regulations and the knowledge that the national forest-reservation system has become a fixed policy of the Government. The total receipts of the Tongass and Chugach National Forests for the fiscal year ending June 30, 1913, were \$52,460.55 as compared with \$53,238.41 in the previous year. The total allotment for the management of these national forests for the fiscal year 1913 was \$36,745.79. The number of areas surveyed and platted for occupancy permits during the year was 120. The number of permits granted during the year for whaling stations, canneries, salteries, cold-storage plants, mild-cured salmon stations, stores, dwelling houses, power sites, flumes, etc., was 208; the number of such permits now in force is 332. The number of homesteads surveyed and reported for listing under the act of June 11, 1906, which provides for the entry of agricultural lands within national forests was 16, and 20 mineral claims were examined and reported upon. The total number of timber sales made during the year was 267. The total amount of timber cut and sealed in the Tongass and Chugach National Forests during the fiscal year was 33,334,506 board feet, as compared with 44,647,410 board feet the previous year. Persons living on or near the national forests are permitted to take wood for domestic purposes free of charge. Timber needed by prospectors and miners in the development of their holdings is also given without payment.

Sealing.—The total fur shipments from Alaska in 1912 aggregated \$794,156.63, as compared with \$802,750 in 1911. Sealing operations in the Pribilof Islands are under the direct control of the fur-seal agents of the Bureau of Fisheries. An actual census of the herd made in 1912 showed that there were 215,940 seals of all classes in the herd; 3,764 skins were sold at auction in London in January, 1913, the proceeds of the sale being \$130,640.57.

Fisheries and Reindeer Industry.—The reindeer industry, established by the Government in 1892 has increased

to a point where there is now an annual surplus available for slaughter, but with the exception of a few herds in the immediate vicinities of the towns there is no market for the meat. The herds are increasing rapidly. At the close of the fiscal year 1912 the whole number of reindeer was 24,476, distributed among 34 herds, of which 24,068, or 62.5 per cent, were owned by natives.

The fisheries output is second only to the production of gold and other metals, and its importance to the country generally, and particularly the salmon fisheries, serves to emphasize the vital need of supplementary legislation to conserve and at the same time develop the industry to the end that the supply of available food fishes may not be depleted by mere exploiters for their personal gain. Such restrictions as appear necessary to conserve the supply of fish would seem to be an elementary requirement of proper supervision and control by the Government. The relation of gear used to the conservation of salmon fisheries that is affected by it has long been a much-debated question, and the recent extension of the use of traps in southeastern Alaska has raised another and different question—the employment of labor as affected by the stationary and movable gear, respectively. A thorough investigation of the fisheries of Alaska should be undertaken by the Government to the end that legislation may be enacted which will not only conserve the supply, but which will also deal with economic and other features of the industry. An experiment station is needed where investigations can be conducted in the utilization of fishes and other aquatic products. The rebating system as applied to the private operation of hatcheries should be immediately abolished; its operation has been unsatisfactory in nearly every particular and the Federal Government should alone operate all the hatcheries in Alaska through the Bureau of Fisheries.

In the calendar year 1912 there were employed in the several branches of the fisheries 24,263 persons, an increase of 6,311 over 1911. Of these 10,101 were whites, 7,299 Indians, and 6,863 orientals. There was a noteworthy increase in the number of whites and natives employed, they being for the most part permanent residents of the Territory. The total investment in the fisheries of Alaska in 1912 was \$37,549,740, about 90 per cent of which was invested in salmon fishing. The finished product of all varieties of fish was valued at \$18,877,468. The total production of halibut in 1912 was 17,146,743 pounds, valued at \$945,502, as against 17,315,191 pounds, valued at \$822,362, in 1911.

Aids to Navigation.—The need of more lights and other aids to navigation in the waters of Alaska, as well as surveys and resurveys is insistent. Three passenger and freight steamers were wrecked the past summer and others sustained minor injuries. A loss of 31 lives occurred when one of these steamers struck an uncharted rock in August last.

Natives and Other Inhabitants.—The number of Alaska insane under treatment on September 30, 1913, was 189, of which 165 were men and 24 women. A large percentage of the inmates are aliens, including Chinese and Japanese.

Morningside Sanitarium, near Portland, Ore., where the Alaska insane are being cared for under a contract with the Government has been inspected at proper intervals by agents of the Interior Department. Detention hospitals for the insane were constructed and occupied during the past summer at Fairbanks and Nome. These hospitals were authorized by an act of Congress approved June 25, 1910, but their construction was delayed for various reasons.

The condition of the native inhabitants continues to be fairly prosperous, this being especially true of those of southeastern and southwestern Alaska, the natives of those sections being as a whole self-reliant and usually industrious. Their worst physical enemy is the whisky peddler. Three special agents have been employed during the last fiscal year whose efforts have been directed toward the suppression of the liquor traffic among these people, and a fair amount of success has been attained. In southeastern Alaska 65 arrests were made during the fiscal year of persons charged with selling liquor to natives and in a large percentage of the cases convictions were obtained. An additional agent should be employed in the second judicial division, where there is now none. One agent is located in the first judicial division, one in the third, and one in the fourth. They are directly under the supervision of the governor's office.

Alaska during the fiscal year afforded a fair field for labor, especially in the southeastern section. In interior and northwestern Alaska a season of unparalleled drought created a smaller demand for mining and other labor. There were no strikes during the year and prices of labor in the several parts of the Territory remained practically stationary.

Taxation.—Nine of the incorporated towns which caused an assessment of property to be made and a tax to be levied this year reported a total assessed valuation of \$6,042,668. The tax rate of these towns ranges from $\frac{1}{2}$ of 1 per cent to 2 per cent, the average being 1.31. Seven in the same list of nine towns levied a tax in 1912 also, when the assessed valuation aggregated \$1,123,687 as against \$4,864,017 this year.

The receipts from the issuance of hunters' licenses, shipping permits, and THREE FEB 5 HOYT ya guide licenses are increasing annually, as more hunters are coming each year from the States and foreign countries to hunt big game. The revenue now derived from these sources is covered directly into the United States Treasury instead of into the Alaska game fund, where it manifestly belongs and where it could be used for the further protection of game. There are many inequalities in the Alaska game law which call for amendatory legislation.

Mining.—Patents have been granted to two coal-land claimants in Alaska. These patents were issued for claims carrying an inferior quality of coal. Patents have been applied for in the Bering River and Matanuska sections, but none have been granted, while many applications have been canceled. There are extensive coal measures in these regions. The importation of coal from the States and foreign countries during

the last fiscal year amounted to 102,169 tons, valued at \$492,301. The market price at which coal is sold ranges from \$10 to \$20 a ton, according to the locality in which it is sold.

The value of the mineral output for 1913 has not been authoritatively estimated, but as a whole it will probably not be as large as 1912, due to a shortage of water for mining purposes in the placer gold regions. The gold production in the calendar year 1912 was valued at \$17,145,951. The silver production, chiefly incidental to gold mining, was 315,186 fine ounces, valued at \$316,839. The total value of all mineral products in 1912 was \$22,537,821, as compared with \$20,650,000 in 1911.

Water Power.—The utilization of the water powers of Alaska for manufacturing purposes is now receiving attention. The many water-power sites found in southeastern Alaska are such as to present those essentials which must be reckoned with when hydroelectric plants are the objects to be attained. These essentials embrace a large amount of power all the year, accessibility to market, location for transportation of products, and proximity of raw materials to be used. That there is a field for large electrochemical plants in Alaska is shown from a consideration of the raw materials to be had and the demand for them when put into marketable form. These materials include timber, lime, sulphur and many others used in manufacturing of electrochemical products.

Schools.—There are now 26 schools for white children outside of incorporated towns, employing 37 teachers, with a total enrollment of 943 pupils. The act of January 27, 1905, limits the amount which may be expended in the construction of a school building to \$1,000, which is frequently found to be insufficient to cover the cost and which should be increased from \$1,000 to \$2,500, according to the size of the school. The law also provides that there shall be at least 20 white children of school age in a community outside of an incorporated town before a school shall be established, and it should be amended so as to make it possible to establish school districts in places where there are as few as 15 white children. A law passed by the Territorial legislature provides for the compulsory education of white children and those of mixed blood living a civilized life; and similar provision is made for the compulsory education of native children and children of mixed blood not living a civilized life, where such children reside within one mile of a United States public school.

Railroads.—There has been no new railroad construction in Alaska for several years past, nor will there be until the coal lands problem and other questions are permanently settled. Government construction and operation of railroads in Alaska is recommended. Private initiative is practically barred under existing conditions. Owing to the tax of \$100 per mile on railroads two lines have not been operated during the past year. The non-operation of these roads has worked a hardship on miners and prospectors, inasmuch as they are afforded for the transportation of supplies. The Federal tax on railroads should be suspended for the present by legislative

action. Wagon road and trail work the direction of the Board of Road Commissioners for Alaska. At the end of the fiscal year 1913 the total mileage of roads and trails was: Wagon roads, 862 miles; sled roads, 617 miles; trails, 2,116 miles, which latter include 253 miles of trails that are temporarily staked each winter.

Public Health.—Public health conditions generally have been good, although during the year there have been a number of epidemics, confined largely to the native population. A serious outbreak of measles was reported on the islands of Kodiak and Afognak late in October, and prompt measures for the stamping out of the disease were taken by the Federal and Territorial authorities. An act passed by the Territorial legislature provides for the registration and prevention of communicable diseases, and another act passed by the same body provides for the collection and registration of vital statistics.

Territorial Legislation.—The Territorial legislature which was established by the act of Congress approved August 24, 1912, convened for its first session on March 3rd last, the session lasting 60 days. Biennial sessions will be held hereafter.

An act passed by the Territorial legislature provides for the organization of banking corporations and the regulation of the business of banking and its supervision by a Territorial banking board. Examinations of banks, other than national banks, must be made at least once annually.

Land Laws.—Simplification of the land laws, so far as they apply to Alaska, is desirable in order to encourage the settlement of the agricultural lands and to meet other peculiar conditions found only in an isolated country. Under the act of May 17, 1884, it was provided that Indians and other persons should not be disturbed in the possession of any lands actually in their use or occupancy. Few, if any, of these claimants remain in possession of the original claims. So many years have elapsed that proof of ownership of the land is now difficult to secure, and if the rights of these persons or their descendants are to be recognized and preserved, Congress should provide some method whereby they may obtain title.

Capitol Building.—An appropriation was made by the act of 1910 for the construction of a general office building, intended to provide quarters for the post office, customhouse, governor's offices, surveyor general's offices, and a number of other offices at Juneau. An excellent site has been purchased and tests of the ground were made for the foundation during the past summer. The limit of cost of \$200,000 was not sufficient at the time it was authorized, and since that time a legislature has been established and the question of securing suitable quarters for it is a serious one. The population of Juneau is increasing rapidly, and in order to provide a suitable capitol building, with accommodations for the legislature and all of the government offices as well as rooms for the Alaska Historical Library and Museum, the cost limit should be increased to \$600,000, was continued during the year under

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO.—Apartment house, 3 story and base, frame, \$18,000. Architects, Dunn & Kerns, Monadnock Bldg., S. F. Owner, M. Simmons. The building will be erected on the north side of Clay street west of Leavenworth, covering an area of 32½ feet by 112 feet. There will be a total of 12 suites of three and four rooms. Interior will be finished in pine with some elm panels and oak floors. There will be steam heat and hot water supply. Portable vacuum cleaners will also be installed. All suites will have private baths and wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and figures will be called for at once.

SAN FRANCISCO.—Apartment house, 8 story and base, Class A construction, \$225,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mrs. A. Eldridge. The building will be erected on property recently purchased by Mrs. Eldridge on Jones street near Sutter. Construction will be of the class A type throughout, with a complete steel frame, concrete walls and floors. Interior partitions will be of metal lath and plaster. The building will have a frontage of 52 feet and a depth of 137½ feet. Interior has been arranged for a total of 92 suites of two and three rooms with a number of single rooms. All suites will have private baths and wall beds. Hardwoods, pine and redwood will be used for interior finish. Bath rooms will have tile floors and wainscot. Plans provide for steam heat, elevator service, hot water supply and vacuum cleaning. Exterior of the building will be faced with pressed brick and terra cotta. Working drawings are now being prepared.

SAN FRANCISCO.—Apartment house, 3 story and base, frame, \$25,000. Architect, W. G. Hind, 46 Kearny street, S. F. Owners, Mrs. Emery, Mrs. Chapin and Mrs. De Turberville. The building will be erected on the south side of Clay street between Jones and Leavenworth. Interior has been arranged for three suites of three rooms, three suites of two rooms and six five-room suites. All interior finish will be of pine or elm. Oak floors will be used in the larger suites. There will be wall beds, private baths and open fire places. Bath rooms will have tile wainscot and composition floors. There will be steam heat and hot water supply. Mantels will be of tile. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base and entrance will be specified. Plans are complete and segregated figures are now being taken.

SAN FRANCISCO.—Apartment house, 3 story and base, frame, \$20,000. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner, A. J. Fabre. The building will be erected on Pacific near Jones, and will be arranged for suites of four and five

rooms. Interior will be finished in pine and hardwood veneer. There will be a central heating system and hot water supply. Bath rooms will have composition floors and tile wainscot. All suites will have private baths and wall beds. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and bids are being taken.

SAN FRANCISCO.—Apartment house, 4 story and base, brick and steel, \$100,000. Architect, J. R. Miller, Lick Bldg., S. F. Owners, San Christina Investment Co. The building will be erected at the corner of 16th and Howard streets, covering an area of 175 by 85 feet. The first floor will contain a number of stores besides the entrance to the apartments. Upper floors will be arranged for a large number of two and three room suites with private baths, wall beds and other modern improvements. Interior finish will be of pine and redwood with some elm panels. There will be steam heat, elevator service and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Working drawings are nearly complete and figures will be called for shortly.

SAN FRANCISCO.—Apartment house, 3 story and base, frame, \$30,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Mary Bean. The building will be erected at the southwest corner of Fell and Stener streets and will contain a number of two and three room suites. Interior finish will be of pine and elm. Some oak floors will be used. There will be steam heat and a hot water supply. All suites will have wall beds and private bath rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO.—Apartment house, 3 story and base, frame, \$12,000. Architect, none. Owner, J. Dempnick, 1658 Washington street, S. F. The building will be erected on Clay street east of Taylor, and will have a frontage of 25 feet by a depth of 85 feet. There will be six suites, three of four rooms and three of three rooms. Interior will be finished in pine with elm panels. Oak floors will be used in the living rooms and dining rooms. Plans provide for steam heat, hot water system and portable vacuum cleaners. All apartments will have wall beds and private baths. Bath rooms will have composition floors and tile wainscot. Entrance lobby will be finished in ornamental plaster and hardwoods. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. A pressed brick basement will also be used. Plans are complete and work will be done by Day Labor. The owner is now letting subcontracts for all materials and work.

SAN FRANCISCO.—Apartment house, 3 story and base, frame, \$30,000. Ar-

chitect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on Pine street near Stockton, and will contain suites of six and seven rooms. Interiors will be finished in pine and hardwood. There will be steam heat, automatic elevator, hot water system and vacuum cleaning. Bath rooms will be finished in tile. All suites will have wall beds. Exterior of the building will be covered with rustic and cement plaster on metal lath. Figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 2 story and base, frame. Cost not stated. Architect, James W. Plachek, 1424 Spring street, Berkeley. Owner, C. M. Burkhalter. The building will be erected at the corner of Dana and Woolsey streets, and has been arranged to contain four suites of three rooms and bath each. Pine and elm panels will be used for interior finish. All suites will be equipped with wall beds. Bath rooms will have composition floors and tile wainscot. Furnace heat is specified. Marble and tile will be used in the entrance lobby. Exterior of the building will be covered with shingles. Plans are complete and figures are now being taken.

PORTLAND, ORE.—Apartment house, 3 story and base, brick, \$22,000. Architect, Charles W. Brtz, 2200 Main Bldg., Portland. Owner, Mr. Lohrmire. The building will be erected on Williams avenue having a frontage of 60 feet and a depth of 120 feet. There will be a number of stores on the first floor. Upper two floors will contain twelve suites of two and three rooms with baths. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Wall beds will be used. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 2 story and base, brick. Cost not stated. Architect, John P. Biee, Union League Bldg., L. A. Owner, J. D. Schirm. The building will be erected on East First street at the corner of Cummings, and will cover an area of 72 by 129 feet. There will be seven stores on the first floor, finished in pine and with patent store fronts and plate glass display windows. Upper floors will be subdivided into thirteen suites of two and three rooms. Interior finish will be of pine throughout. There will be private baths and wall beds. Plans provide for steam heat and a hot water supply. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and the architect is now taking figures on the work.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base. Class C construction, \$50,000. Architects, C. F. Borton & Co., Hibernian Bldg., L. A. Owner, Claude L. Ross. Contractors, C. F. Borton & Co., Hibernian Bldg., L. A. Contract price, \$50,000.

LOS ANGELES, CAL.—Apartment house and stores, 1 and 2 story and base, brick, \$36,000. Architects, Blanchard, Greene & Tifal, Van Nuys Bldg., L. A. Owner, S. H. Friedlander. Con-

tractor, A. E. Harshman, Black Bldg., L. A. Contract price, \$36,000.

BANKS.

GREAT FALLS, MONT.—Bank and offices, 5 story and base. Class A construction, \$250,000. Architect, Henry Hall Johnson, Henry Bldg., Seattle. Owners, R. S. and L. M. Ford, Great Falls. The building will be erected on a corner and will cover a large ground area. Construction will be class A throughout with a complete steel frame, reinforced concrete walls and floors. Interior partitions will be of hollow tile and metal lath and plaster. The entire first floor will be occupied by the bank. Upper floors will be arranged for modern offices. Interior finish will be of pine and hardwoods. Marble and tile and ornamental iron and bronze will be used. There will be steam heat, elevator service, hot water supply and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken. Bank equipment and vaults will be let separately.

BRIDGES AND DAMS.

WEST SACRAMENTO, CAL.—Concrete piers, \$1,000,000. Engineer, Engineering Department of the West Sacramento Co., West Sacramento. Owners, West Sacramento Co. An announcement has been made by the company that actual construction on a number of reinforced concrete piers will be started early in the spring. These piers will be erected on the waterfront opposite the city of Sacramento, and will extend from the Southern Pacific tracks a distance of two miles down the river. Construction will be fireproof throughout. Several of the structures will carry wharf sheds, also of concrete construction. Competitive bids will be asked.

SAN FRANCISCO—Tunnel work. Cost not stated. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. The State Board of Harbor Commissioners have announced the completion of plans and specifications for the proposed tunnel which is to carry the Belt Line Railroad under Fort Mason. There will be approximately 1,500 feet of tunnel construction and about 1,400 feet of trestle from Fishermen's Cove to the east portal of the tunnel. Bids will be asked for in the course of a week or ten days. Plans can be secured from the Assistant State Engineer, Ferry Bldg.

SAN MATEO CO., CAL.—Bridge, reinforced concrete construction. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Plans for a reinforced concrete bridge which is to be erected on the La Honda and San Gregoria road have been completed and are now out for figures. Bids will be opened by the Board of Supervisors on March 2nd. Plans and specifications can be secured from the County Surveyor at Redwood City. An official proposal appears in another column of this issue.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Wharf, creosoted pile and timber, \$150,000. Engineer, H. J. Brunner, Sheldon Bldg., S. F. Owners, City of

Santa Cruz. Bids opened for this work show Messmer-Rice Co. of Los Angeles low as follows: (a) \$142,213, (b) \$55,813. Bidders' checks of the Sound Construction and Engineering Co. and of W. W. Concannon & Co. have also been retained. A complete list of the bids received will be found under San Jose and the Santa Clara Valley in this issue.

CHURCHES.

OAKLAND, CAL.—Church, 2 story and base, frame. Cost not stated. Architect, William H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, St. Peter's Parish. Plans are complete for the construction of a Mission style church which is to be erected on Layton avenue near Broadway. The building will contain a main auditorium, Sunday school rooms and pastor's study. Interior finish will be of pine and redwood. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on February 16th, and plans can be secured from either the architect or from W. J. Loveland, 403 First National Bank Bldg., San Francisco.

PORTLAND, ORE.—Church, 2 story and base, brick, \$50,000. Architect, George Foote Dunham, Lumbermen's Bldg., Portland. Owners, First Christian Science Church of Portland. The building will be erected at the corner of East Sixth street and Holliday avenue, and will cover a large ground area. Construction will be semi-fireproof. Interior will be arranged for a large main auditorium and a smaller auditorium with Sunday school rooms. Pine and hardwood will be used for finish. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are being completed and figures will be called for shortly. A contract for the excavating and foundation work has already been awarded.

LOS ANGELES, CAL.—Church, campanile and rectory, reinforced concrete construction, \$200,000. Architect, John T. Comes, Washington Bldg., Pittsburgh. Pa. Owners, St. Vincent's Parish, Father J. S. Glass in charge. The buildings will be erected on Figueroa street and West Adams. The design is a combination of the Spanish and Gothic Romanesque. Plans provide for a campanile 235 feet high, a main church edifice 100 by 235 feet and 85 feet in height, and a rectory containing library, parlors and library. Construction will be of reinforced concrete and steel and will be fireproof. Exterior of the building will be faced with gray tapestry brick with art stone trimming. Interior of the church will be finished in pine with ornamental plaster and art glass windows. There will be a central heating system. The rectory will not be erected at the present time. Preliminary plans have received approval and working drawings are now under way.

COURT HOUSES.

UKIAH, MENDOCINO CO., CAL.—Court house additions, 1 and 2 story and base, brick, \$30,000. Architect, John Davis Hatch, Humboldt Bank

Bldg., S. F. Owners, Mendocino County. It is proposed to extend the wings on the north, south and west, and to add a second story to the first two wings mentioned. The county clerk's office will be extended to embrace the office at present occupied by the school superintendent. The latter will be removed to the room occupied by the supervisors and another room to be added on the west when the wing is extended. The auditor will occupy the corresponding offices on the south side of that wing. The tax collector's office will occupy its present quarters and in addition will include a part of the present assessor's office, the remainder of which will be taken up by the treasurer. The treasurer and tax collector will have access to each other's offices through a door, which will be a great convenience. The displaced assessor will have the part of the southern wing adjoining the tax collector's office. Underneath the wings will be a large basement. In the north basement will be the furnace room and in the south will be fireproof chambers in which will be stored the county records. The recorder's building will be joined to these fireproof chambers by a tunnel to which access will be gained from the hall of records by a stairway. The present front of the building will be torn away and a handsome porch in modern style of architecture will be constructed of concrete. The entire building will be given a concrete finish over the bricks after the style of the city hall and the opera house. Upstairs the district attorney's offices will remain the same as at present. The judge's chambers will be made smaller and the part taken used to enlarge the law library. A lady's waiting room and a consulting room and lavatories will be placed where the present jury room and the law library are and the present wood room will be made into a jury room. The courtroom will remain the same as at present. The stairways as they now exist will be done away with and there will be a straight flight to the upper floor from the lower corridor. The larger part of the upper story of the south wing will be devoted to a room for the board of supervisors and two private rooms for conferences. The entire building will be refinished throughout and modern electric fixtures, modern hardware, etc., will be installed.

FACTORIES & WAREHOUSES.

SAN FRANCISCO — Warehouse, 2 story and base, Class C construction, \$10,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, E. H. Cary. The building will be erected on the north side of Brannan street between Third and Fourth streets, and will cover an area of 60 by 80 feet. There will be a cement floor on the ground floor. Interior finish will be of pine throughout. Metal window sash and frames are specified. Exterior of the building will be faced with stock brick. Plans are complete and figures are being taken.

SAN FRANCISCO — Warehouse, 5 story and base, reinforced concrete, \$200,000. Architect, K. A. Applegarth, Call Bldg., S. F. Owner's name withheld. The building will be erected in

the southern part of the city adjacent to spur track facilities. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Pine trim will be used. There will be elevator service, automatic sprinklers and metal window sash and frames. Exterior of the building will be faced with cement plaster. Working drawings are now being prepared.

PORTLAND, ORE.—Stahle, 2 story and base, brick and steel. Cost not stated. Architect, P. Chapell Browne, Mohawk Bldg., Portland. Owners, Holbrook Estate. The building will be erected at the corner of 16th and Raleigh streets, covering an area of 100 feet square. The first floor will contain a large number of stalls, wagon room and repair shop. Upper floor will be used for the storage of hay and grain. Included in the work will be galvanized iron chutes, plumbing and electric work. Exterior of the building will be faced with stock brick. Plans are complete and bids will be called for at once.

FLATS.

OAKLAND, CAL.—Flats, 2 story and base, frame, \$5,000. Architect, John Carson, Bacon Bldg., Oakland. Owner, A. Friedman. The building will be erected on north 11st street and has been designed to contain four modern flats of five rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters are specified. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

SACRAMENTO, CAL.—Flats, 2 story and base, frame, \$3,500. Architect, none. Owner, Manuel Brown, 408 T street, Sacramento. The building has been designed to contain two modern flats of five rooms each, and will be erected on T street near 3rd avenue. Interior finish will be of pine and red wood with some oak floors. Each living room will have an open fire place with tile or brick mantel. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and ship-lap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

GARAGES.

SAN FRANCISCO — Garage, 1 story reinforced concrete. Cost not stated. Architect, Charles F. Whittlesey, 555 Clayton street, S. F. Owner's name withheld. The building will be erected on Geary street near Fourth avenue. Walls, floor and roof will be of reinforced concrete. Interior will be finished in pine. There will be special gasoline storage tanks and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are being prepared.

FRESNO, FRESNO CO., CAL.—Garage, 1 story and base, reinforced concrete. Cost not stated. Architect, W. F. Bowen, Fresno. Owners, Stephens and Bean. The building will be erected

at the corner of Tuolumne and H streets, covering a considerable ground area. Besides the storage rooms there will be a body shop and machine rooms. Interior finish will be of pine throughout. A cement floor will be used. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL. — Garage, 1 story and base, brick. Cost not stated. Architect, Fred Biren, Van Nuys Bldg., L. A. Owner, Mr. Bennett. The building will be erected on South Los Angeles street, covering an area of 48 by 145 feet. Floor will be of concrete. Interior finish will be of pine. A machine shop will occupy a portion of the building. Plans provide for metal window sash and frames and special gasoline storage tanks. Exterior of the building will be faced with enamel brick. Plans are complete and figures are now being taken.

GOVERNMENT WORK AND SUPPLIES.

San Diego, Cal., Boiler and Pump.

The contract for installing a high-pressure steamer boiler and boiler-feed pump at the U. S. quarantine station, San Diego, Cal., has been awarded to California Hydraulic Engineering and Supply Co., at \$956.

Naval Torpedo Station for the West Coast.

An erroneous impression prevails among members of the House Naval Committee regarding the availability of land on the west coast to be used as the site for a torpedo repair and test station. Some time ago an allotment of funds was made for the acquisition of territory of suitable location and requisite area for this purpose, and, as usual under such circumstances, the Navy Department encountered difficulty in obtaining possession of the tract without being charged what was regarded by the naval authorities as an excessive price. During one of the hearings before the House Naval Committee recently it was announced that the department had found it impossible to acquire the land selected by Secretary Daniels on the Keyport peninsula, Port Orchard bay, when he was in that part of the country last July, because "land sharks" anticipating the governmental purchase and increased the price to a prohibitive degree. This is far from being the actual situation, as the committee will be informed when Secretary Daniels appears before it. Condemnation proceedings have been concluded this month and papers were forwarded by the U. S. district attorney to the Navy Department last week. It is expected that the property will be delivered to the Navy Department during the next week or two. The property condemned consists of about 55 acres of land and about four miles of tide lands on the west shore of Port Orchard bay, between Keyport and Brownsville.

HALLS & SOCIETY BLDGS.

SAN FRANCISCO—City Hall heating and ventilating. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. The lowest figure received for the heating and ventilating of the new City Hall was from F. P. Walsh for \$17,965. No contract has been awarded. A complete list of the figures received will be found under the heading of San Francisco in this issue.

OAKLAND, CAL.—Auditorium, 2 story and base. Class A construction. Cost not stated. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans have been completed and approved for the preparation of the site, concrete work, granite work and setting for the municipal auditorium. Bids are now being advertised and will be opened on February 26th. Plans and specifications can be secured from the architect. The work will be carried on under the superintendence of Architect Walter Mathews.

SACRAMENTO, CAL.—Elevator work, etc., State Capitol. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners, State of California. Plans have been completed and are now out for figures for the installation of two new elevators, alteration to the grill work and furnishing of pneumatic door operating devices at the State Capitol Building. Bids will be opened on March 3rd. Plans and specifications can be secured from the State Department of Engineering. An official proposal ap-

pears in another column of this issue.

HOLLYWOOD, LOS ANGELES CO., CAL.—Club house, 2 story and base, frame, \$20,000. Architect, Arthur R. Kelly, Story Bldg., L. A. Owners, Hollywood Women's Club. Only a portion of the building will be erected at this time. This will contain reception room, dressing room, kitchen, dining room and assembly hall which will seat 400 people. Later it is planned to construct an auditorium. Interior finish will be of pine and hardwood. A central heating system will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

HOSPITALS

ELDRIDGE, SONOMA CO., CAL.—Nursery building, 1 story and base, frame and concrete. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners, State of California. Plans have been revised for the building known as the Nursery Building for Males, and new bids are now being called. These figures will be opened on February 26th. Plans and specifications can be secured from the State Department of Engineering, Capitol Bldg., Sacramento. An official proposal appears in another column of this issue.

YOUNTVILLE, NAPA CO., CAL.—Dairy barn, frame construction. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners, State of California. A new dairy barn of frame and concrete construction will be erected at the Veterans' Home at Yountville. Plans have been completed and have received the approval of the State Board of Control and bids are now being taken. Figures will be opened in Sacramento on February 27th. Plans and specifications can be secured from the State Department of Engineering, Capitol Bldg., Sacramento. An official proposal appears in another column of this issue.

HOTELS.

SAN FRANCISCO—Hotel, 14 story and base. Class A construction, \$450,000. Architect, G. A. Applegarth, Call Bldg., S. F. Owners, Clift Estate. This work has been mentioned here a number of times before. The excavating, foundation work and steel are now complete. The architect is taking segregated figures for all other parts of the work. The structure is of the Class A type throughout and when complete will take its place as one of the foremost hotels on the Pacific Coast. Covering an entire Fifty Vara lot only few hotels in the west have a greater number of rooms. Interior is to be handsomely finished in hardwood, metal and ornamental plaster. Marble, tile and Caen stone will be used extensively.

SAN FRANCISCO—Hotel alterations, 3 story and base. Class C construction. Cost not stated. Architects, Welsh & Carey, Merchants' National Bank Bldg., S. F. Owner, A. Paladini. The building located at the corner of Pine and Leidesdorff streets, and for the passed two years used as stores and lofts, is to be altered into a rooming house. The first floor will be arranged for an entrance besides the

stores. Upper two floors will contain about 50 guest rooms and several baths. The work will include new interior partitions, plastering, electric work, painting, plumbing and mill work. Plans are now being prepared.

PETALUMA, SONOMA CO., CAL.—Hotel and stores, 4 story and base, brick and steel. Cost not stated. Architect, Brainerd Jones, Petaluma. Owners, Petaluma Development Co. The building will be erected on a corner site and will be arranged for stores on the first floor besides the hotel office, dining room and lobby. Upper floors will contain in the neighborhood of 70 guest rooms, a number of public and private baths. Interior finish will be of pine and redwood. Some ornamental plaster will be used in the lobby. There will be steam heat, a hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Plans are complete and figures will be called for at once.

PASADENA, LOS ANGELES CO., CAL.—Hotel addition, 3 story and base, frame. Cost not stated. Architects, Greene & Greene, Boston Bldg., Pasadena. Owners, Vista del Arroyo Hotel Co., F. M. Fowler, Mgr. The new portion of the hotel will be erected on property adjoining the present building at 125 South Grand avenue, and will contain in addition to the lobby, parlors, reception hall and dining rooms about 75 guest rooms with private baths. Interior finish will be of pine and hardwood with some ornamental plaster. There will be steam heat and hot water supply. Exterior of the building will be faced with cement plaster on metal lath. Bath rooms will have tile wainscot and composition floors. Plans are now being prepared.

HOLLYWOOD, LOS ANGELES CO., CAL.—Hotel, 5 story and base. Class B construction, \$75,000. Architect, Leonard L. Jones, 1 W. Hellman Bldg., L. A. Owner, C. N. Clinch. The building will be erected at the northwest corner of Whitney and Hollywood avenues and will be known as the Foothill Hotel. The structure will cover an area of 65 by 90 feet. There will be three stories besides the hotel lobby and offices on the first floor. A grill, barber shop and billiard hall will occupy the basement. Upper floors will contain in the neighborhood of 70 guest rooms and 10 baths. There will be steam heat, elevator service, hot water supply and vacuum cleaning. Bath rooms will be finished in tile and will have composition floors. There will be patent store fronts and metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are nearly complete. Bids will be taken by the owner.

LA CANADA, LOS ANGELES CO., CAL.—Hotel, 3 story and base, brick. Cost not stated. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner's name withheld. The building will have a frontage of 490 feet, the main section being 144 by 60 feet with two lateral wings extending in the rear. There will be a large lobby and office, parlors, dining room and kitchen on the first floor. Upper floors will con-

tain about 150 guest rooms with private baths. Hardwood and pine trim will be used. There will be steam heat, hot and cold running water, vacuum cleaning and metal window sash and frames. All bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

GEORGETOWN, WASH.—Hotel, 2 story and base, brick, \$30,000. Architect, Charles H. Bebb, Denny Bldg., Seattle. Owners, Horton Estate. The building will cover an area of 114 by 140 feet. There will be a number of stores besides the hotel lobby and entrance on the first floor. Upper floor will contain 50 guest rooms, and public and private baths. Plans provide for steam heat, hot and cold running water. Interior finish will be of pine throughout. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are nearly complete and contracts will be let in about ten days.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, Charles Gordon, Investment Bldg., L. A. Owner, Verne Carter. The building will be erected on Hill street between 11th and 12th streets, and has been designed to contain about 75 rooms, 10 per cent of which will have private baths. There will be steam heat, elevator service, metal window sash and frames and a hot water supply. Interior finish will be of pine and hardwood. Some ornamental plaster will be used. Marble and tile will be used in the lobby. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

POMONA, LOS ANGELES CO., CAL.—Hotel, 3 story and base, reinforced concrete. Cost not stated. Architects, Blanchard, Greene & Tifal, Van Nuys Bldg., L. A. Owners, T. W. Newman and associates. The building will be erected at the corner of Palomares and Garey streets, and will cover an area of 200 by 258 feet. The first floor will contain eight stores, hotel lobby, parlors, sample rooms, dining room and dance hall. Upper floor will contain 110 guest rooms and 50 baths. One wing of the building will be arranged for a theatre seating 1,200 people. Plans provide for two elevators, steam heat, vacuum cleaning, metal window sash and frames and a hot water supply. Interior finish will be of pine and hardwoods. Exterior of the building will be faced with pressed brick. Plans will be ready for figures about the end of February.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick, \$76,000. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owner, Verne Carter. Contractors, Dutro-Wren Construction Co., Van Nuys Bldg., L. A. Contract price, \$76,000.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Car barn addition, 1 story and basement, reinforced concrete, \$60,000. Architect, Architectural Department, Temporary City

Hall, S. F. Owners, City and County of San Francisco. Plans are complete and out for figures for the one-story addition to the Municipal car barns at First avenue and Presidio. The addition will cover a large ground area and will be similar in construction and design to the present building. Reinforced concrete walls and floor will be used. Roof will be of clay tile. Interior finish will be of pine. Special electric installations are to be made. Exterior of the building will be faced with cement plaster. Plans can be secured from the Department of Architecture. Bids will be opened by the Board of Public Works on February 18th. An official proposal appears in another column of this issue.

Contracts Awarded.

PORTLAND, ORE.—Railroad office, 3 story and base, reinforced concrete, \$25,000. Engineer, Mr. Boschke, care O.-W. R. and N. Co., Portland, Owners, Oregon-Washington Railroad and Navigation Co. Contractors, Moore Bros., 406 East 37th street, Portland. Contract price, \$25,000.

RESIDENCES.

SAN FRANCISCO—Residence, 3 story and base, frame, \$15,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Mathew A. Little, 1347 4th avenue, S. F. The dwelling will be erected on the south side of Washington street east of Spruce, and has been designed for a ten-room house with baths and sleeping porch. Interior finish will be of pine, redwood and red gum. There will be a central heating system, probably warm air heat and open fire places. Oak floors will be used in the principal rooms. Mantels will be of brick and tile. Bath rooms will have tile floors and wainscot and will be equipped with showers. A vacuum cleaning system will be installed and automatic water heaters. Exterior of the dwelling will be covered with cement plaster on metal lath, rustic and a veneer base. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Ornamental stone work. Cost not stated. Architect, G. A. Applegarth, Cal Bldg., S. F. Owner, A. B. Spreckels. Architect Applegarth is now completing plans for the ornamental stone work for the garden walls and garage for the \$350,000 residence of Mr. Spreckels at the northwest corner of Washington and Octavia streets. Bids will be called for on this work at once.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Costello and Deerick, 93 College avenue, S. F. This house has been designed for a six-room dwelling and will be erected on the east side of 19th avenue north of Anza. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be a large open fire place in the living room with a tile mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$7,000. Architect,

none. Owner, Frank Pegel, 366 10th avenue, S. F. The dwelling, designed for an eight-room house with baths and sleeping porch, will be erected on the northwest corner of Geary and Jordan avenue. Interior will be finished in pine and hardwood veneer with oak floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Plans provide for automatic water heater and vacuum cleaning system. Bath rooms will have composition floors and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,500. Architect, none. Owners, Banning and Stewart, 5215 Broadway, Oakland. The dwelling has been designed for an eight-room house with bath and sleeping porch and will be erected on the west side of Belgrave north of Florence. Interior finish will be of pine and redwood with some white enamel. Oak floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owners, F. R. Peake Co., 2127 University avenue, Berkeley. The dwelling will contain seven rooms, sleeping porch and a bath. All interior finish will be of pine or redwood. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, Leo L. Nichols, Macdonough Bldg., Oakland. The dwelling has been designed for a seven-room house and will be erected on Walker avenue near Weldon. Interior will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. The wainscot will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$3,000. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, M. C. Vaughn. The dwelling will be erected in the Fourth Avenue Terrace, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Oak floors will be used in the principal rooms.

Bath room and kitchen will have tile wainscot. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. The work will be done by Day Labor under the direction of the architects.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Dr. E. L. Loring. The house will be erected in Bushnell Place and will contain eight rooms and baths. A garage will also be erected on the lot. Interior finish will be of pine and hardwood veneer with oak floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms will be finished in tile and tile wainscot will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, M. C. Vaughn. The house will be erected in the Fourth Avenue Terrace Tract, and will contain seven rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials will be purchased through the office of the architects.

SACRAMENTO, CAL.—Residences, 1 and 2 story, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: Ernest G. Ball, Ohio avenue, Sacramento, 2, 1 story frame bungalows, \$1,800 and \$2,400; Wright and Kimbrough, 817 J street, Sacramento, 8, 1 story frame bungalows, \$2,700 each.

SACRAMENTO, CAL.—Residence, 2 story and base, brick, \$35,000. Architects, Woollett & Woollett, Newhall Bldg., S. F. Owner, James Mull. This house will contain in the neighborhood of 12 rooms, several baths and sleeping porch. Interior will be handsomely finished in pine and hardwoods with some white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Plans include vacuum cleaning and automatic water heater. Bath rooms will have tile floors and wainscot. Exterior of the dwelling will be faced with pressed brick. Plans are being prepared.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalows, 1 story, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: W. H. Haskins, San Luis Obispo, 6 room bungalow, \$3,000; Frank Pascoe, 333 North 14th street, 5 room bungalow, \$1,800; J. T. Walsb, 196 North 3rd

street, 5 room bungalow, \$2,100; F. E. Tuttle, 8 Acacia Tract, 5 room bungalow, \$1,550, and Mrs. Morris Jensen, 275 North 8th, residence alterations, \$1,900.

SAN FRANCISCO—Residences, 1, 2 story and base, frame, \$4,000 each. Architect, A. W. Smith, 1010 Broadway, Oakland. Owners, Pockman & Co., 37th avenue and Geary street, S. F. These houses will be erected in what is known as Lincoln Manor. Each of the dwellings will contain seven rooms and bath. Interiors will be finished in pine, oak, mahogany and gum. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Owners will purchase all materials.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on the west side of 10th avenue north of Fulton, and has been designed for a six-room house with bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be a large open fire place in the living room with a tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater is specified. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

The dwelling will be erected at the northwest corner of Grand avenue and Cottage street and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$2,500. Architects, The Elite Planners, 1844 5th avenue, Oakland. Owner, W. C. Keeler. The house will contain six rooms and bath, and will be erected on Melrose avenue. Interior will be finished in pine and redwood with oak floors in the principal rooms. There will be an open fire place in the living room with a tile mantel. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$2,000. Architects, The Elite Planners, 1844 5th avenue, Oakland. Owner, J. B. Phippen. The dwelling will be erected on Cambridge

street in Broadmoor Manor, and has been designed to contain five rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in two of the rooms. There will be a large open fire place in the living room. Mantel will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

SACRAMENTO, CAL.—Bungalows, 2, 1 story and base, frame, \$2,200 and \$1,500. Architect, none. Owners, L. A. Averill, 21 Cluness avenue, and J. E. Lundervile, 1912 30th street. These two houses will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with cement plaster on metal lath. Plans for each are in the hands of the respective owners who will do the work by Day Labor.

LOS ANGELES, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owner, W. H. Brophy. The dwelling will be erected on Wilshire Boulevard, and has been designed for a fourteen-room house with four baths and sleeping porches. A two-story frame garage with sleeping rooms and bath in the second story will also be erected on the grounds. Interior finish of the residence will be of pine, white cedar, birch and white enamel. Oak floors will be used in the principal rooms. Plans provide for furnace heat, open fire places, vacuum cleaning and automatic water heaters. Mantels will be of tile and brick. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the dwelling will be covered with cement plaster and half timber above the second floor line, and the brick veneer below. Plans are nearly ready for figures.

SAN FRANCISCO—Residence, 1½ story and base, frame, \$3,000. Architect none. Owner, Andrew Lyon, 182 Liberty street, S. F. The dwelling, which has been designed for a six-room house, will be erected on the west side of Belvedere south of 17th street. Interior finish will be of pine and redwood with some hardwood veneer in the living room and dining room. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and a brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 1½ story and base, frame, \$3,100. Architect, O. E. Evans, 2367 Mission street, S. F. Owners, William and Hilda Beguhl, 422 Lisbon street, S. F. The dwelling has been designed for a six-room house and will be erected on Lisbon street west of Persia. Interior finish will be pine and redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the

living room with a brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RICHMOND, CONTRA COSTA CO., CAL.—Residences, 6, 1 and 2 story, frame, \$1,800 to \$3,500. Architect, none. Owners, California Home Builders, Richmond. These houses have been designed to contain from five to seven rooms, and will be erected in a new tract recently opened in the city of Richmond. Interiors will be finished in pine and redwood. Oak floors will be used in the principal rooms. Furnace heat will be specified in the larger houses. All of the dwellings will have open fire places and tile or brick mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters are specified. Exteriors will be covered with rustic, shiplap, shingles and cement plaster on metal lath. Plans are in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

FRESNO, FRESNO CO., CAL.—Residences, 5, 1 and 2 story, frame. Cost not stated. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, W. G. Cochran. These houses will contain from six to eight rooms with baths and sleeping porches. Interior finish will be of pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. The larger dwellings will have furnace heat. Open fire places will be specified in the living rooms of all dwellings. Mantels will be of tile and brick. Tile wainscot and composition floors will be used in the bath rooms. Automatic water heaters are also specified. Exteriors will be covered with rustic, shiplap and cement plaster on metal lath. Plans are being prepared.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$15,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, Arthur W. Goodfellow. The dwelling will be erected on Ventura avenue and will contain ten rooms, three baths and sleeping porch. Interior finish will be of pine, oak, mahogany and white enamel. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Automatic water heaters are specified. Bath rooms will have composition floors, tile wainscot and showers. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being completed.

LOS ANGELES, CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Elsen & Son, Wilcox Bldg., L. A. Owner, E. H. Kennard. The dwelling will be erected on Virgil avenue, and has been designed for a sixteen room house with two baths and sleeping porch. A garage will also be erected on the property. Interior of the dwelling will be finished in pine, redwood and hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters, vacuum cleaning and a hot water supply will be installed. Exterior of the house and garage will be covered

with cement plaster on metal lath. Plans are now complete and figures will be taken at once.

Contracts Awarded.

SEATTLE, WASH.—Residence, 2½ story and base, brick, \$20,000. Architect, J. S. Cote, Haight Bldg., Seattle. Owner's name withheld. Contractor, A. E. Berry. Contract price, \$20,000.

APARTMENT HOUSE—3 story and base. Class C construction, \$50,000. Los Angeles, Cal. Architects, C. F. Borton & Co., Hibernian Bldg., L. A. Owner, Claude L. Ross. Contractors, C. F. Borton & Co., Hibernian Bldg., L. A. Contract price, \$50,000.

BEVERLY HILLS, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Dr. Norman Bridge. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price not stated. Note: The dwelling will contain 12 rooms and four baths.

SCHOOLS.

GRIDLEY, BUTTE CO., CAL.—School, 1 story and base, reinforced concrete, \$22,000. Architects, Smith & Stewart, 214 Kearny St., S. F. Owners, Gridley School District. The building has been designed in the Mission style and will cover an area of 142 by 90 feet. Construction will be of the semi-fireproof type. There will be six class rooms and a large assembly hall. Interior finish will be of pine with maple floors in the class rooms. Plans provide for a plenum system of heating with oil burning equipment. Exterior of the building will be faced with cement plaster. Plans are now nearly complete and figures will be taken in the course of three weeks. Further mention will be made of the work.

SACRAMENTO, CAL.—School, 2 story and base, brick, \$180,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, Sacramento School District. The building will occupy an entire city block and will contain 18 class rooms, assembly hall and teachers' rooms. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat, vacuum cleaning system and program clocks. Besides the class rooms plans provide for manual training and domestic science rooms, play rooms and toilets. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken. Bids will be opened on February 27th.

MONTEREY, MONTEREY CO., CAL.—School, 1 story and base, concrete and frame, \$25,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Monterey School District. The building will contain seven class rooms, assembly hall, principal's office and teachers' rooms. Interior finish will be of pine with some maple floors. There will be a central heating system, probably warm air and oil burning furnaces. Program clocks and vacuum cleaning are also specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on February 20th. Plans can be secured from the architect in this city.

PALMS, LOS ANGELES CO., CAL.—

School, 1 story and base, brick. Cost not stated. Architects, Dennis & Hewitt, Fay Bldg., L. A. Owners, Palms School District. The lowest bid for the general construction of this building was presented by Huntsberger-Reed Co., but arrived twenty minutes late and was contested. All bids for the general construction were rejected and new figures will be advertised. Bids for the heating and ventilating, plumbing and electric work were taken under advisement.

Contracts Awarded.

GLENDORA, LOS ANGELES CO., CAL.—School, 1 story and base, brick, \$24,558. Architects, Allison & Allison, Hibernal Bldg., L. A. Owners, Glendora School District. Contractors, Crowell & Sutton, 744 San Pedro street, L. A. plumbing. Contract price not stated. Munger & Munger, Pasadena, heating and ventilating. Contract price not stated.

ROSE CITY, ORE.—School, 3 story and base, brick and tile, \$20,280. Architect, Joseph Jacobberger, Board of Trade Bldg., Portland. Owners, Sisters of the Holy Child. Contractor, John Almetor, East 12th street and Ash, Portland. Contract price, \$20,280.

SEWERS, STREET WORK AND WATER SYSTEMS.

FIVE COUNTIES, CALIFORNIA.—State Highway work. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids were opened on February 2nd by the State Highway Commission for the construction of highways in five different counties. A complete list of these figures will be found under the heading of San Francisco in this issue. Only the total amount of the bids submitted are given and parties interested in unit prices and materials furnished by the state can secure official records by calling at this office where such data is on file.

KINGSBURG, FRESNO CO., CAL.—Sewer system. Cost not stated. Engineer, Frank A. Lathrop, Los Angeles. Owners, City of Kingsburg. Bids opened for this work show C. D. Vincent low at \$17,926.54. Bids were taken for the work as a whole, for any or all material f. o. b. Kingsburg, and for the labor. A complete list of the bids as opened will be found under the heading of Fresno, Modesto, Stanislaus and Central California in this issue.

Contracts Awarded.

SAN RAFAEL, MARIN CO., CAL.—Electroliners. Cost not stated. Engineer's name not given. Owners, City of San Rafael. Contractor, Pacific Fire Extirminator Co. S. F. Contract price for 97 electroliners \$14,165.

STORES.

SAN FRANCISCO.—Stores and lofts, 2 story and base, brick, \$3,000. Architects, O'Brien Bros., Clunie Bldg., S. E. Owner, C. Demetrak. The building will be erected on Commercial street east of Drumm, and will have a frontage of 25 feet by a depth of 60 feet. Three of the walls are now standing. Interior finish will be of pine. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans

are complete and in the hands of the owner who will do the work by Day Labor.

LOS ANGELES, CAL.—Stores and lofts, 7 story and base. Class A construction. Cost not stated. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, John Kahn. The building will be erected on the east side of Broadway south of 9th street, and will cover an area of 40 by 85 feet. Walls, floors and roof will be of reinforced concrete. Interior partitions will be of metal lath and plaster. There will be one elevator, metal window sash and frames and fireproof doors. An automatic sprinkler system is specified. Stores on the first floor will have copper fronts and plate glass windows. Interior will be finished in pine throughout. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for within a week or ten days.

LOS ANGELES, CAL.—Stores and offices, 11 story and base. Class A construction. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, Edwin T. Earl. The building will be erected in the heart of Los Angeles' business district, but the exact location is withheld for the time being. No details of construction have been made public. Further mention of the work will be made later.

FRESNO, FRESNO CO., CAL.—Store alterations, 1 story and base, brick, \$5,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, James Porteous. The present building will undergo extensive alterations. The work will consist of new copper store fronts, plate glass windows, interior trim, plumbing, electric work and mill work. Plans are complete and figures are now being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Stores and theatre, 1 story and base, brick, \$18,000. Architect, A. Lawrence Valk, Stinson Bldg., L. A. Owner, B. S. Tustig, Contractor, The Broadway Construction Co., Security Bldg., L. A. Contract price, \$18,000.

THEATRES.

Contracts Awarded.

PORTLAND, ORE.—Theatre, 2 story and base, brick and steel. Cost not stated. Architect, none. Owners, The Blodgett Co., Ltd., Contractors, Hurley-Mason Co., Board of Trade Bldg., Portland. Contract price not stated.

MODESTO, STANISLAUS CO., CAL.—Theatre, 3 story and base, brick, \$50,000. Architect's name not given. Owner, W. B. Martin, Contractor, A. L. Halverson, Modesto. Contract price, \$50,000.

SEALED PROPOSALS.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 11th day of February, 1914, for doing the following work, to wit:

The furnishing and installing of pumps, motors and automatic control device at the Commercial street sewerage pumping station.

Said work must be done in accordance with the plans and specifications

thereof on file in the office of the Board of Public Works, to which reference is hereby made, and delivery must be commenced within fifteen (15) calendar days and completed within sixty (60) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at \$500.00.

All proposals offered shall be accompanied by a check certified by a responsible bank payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all proposals. By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

NOTICE TO ARCHITECTS.

For the benefit of architects inquiring concerning plans for a new brick school building to be erected in Chico School District, the Board of Education of the City of Chico, in said School District, hereby invite architects to submit designs for a school building that shall furnish the last mentioned rooms and accommodations as a minimum requirement. The Board of Education shall judge and select or reject the plans. It is especially understood that no premium or award shall be offered for any rejected plan. The accepted plan shall become the design and plan from which the building shall be erected.

Plans for the proposed new Oakdale grammar school building shall be made to the scale of 1/4 inch to one foot, and shall consist of the following drawings:

Foundation plan.

Basement story plan.

Main floor plan.

Second story plan.

Roof plan, and a longitudinal and a transverse section, four elevations, front, rear and both sides. The proposed building to be combined elementary and grammar school for approximately 400 pupils, half boys and half girls. The building shall be two stories and basement in height—not fewer than eight class rooms size 24x32x about 14 feet with rest rooms, each class room with built-in bookcase, not smaller than 12 cu. ft. inside. One office. One library well provided with shelving. One auditorium of seating capacity not less than 600. Two basement rooms for manual training. Two basement rooms for domestic arts. Kitchen to be plumbed for water and gas. Entrances, halls, office, and auditorium to be wired for electricity. Basement to contain heating plant for auditorium, and a room for bicycles. No toilet system other than for teachers use need be installed. Small lavatory and drinking fountain to be on each floor.

Plans shall be completely and accurately figured with all necessary dimensions and spacings, and thickness of walls in each story shall be indicated. Specifications shall be complete, and shall accurately describe all materials and labor required in the construction and finishing of the building. Each architect who submits plans shall furnish the secretary of the Board of Education TWO complete sets of plans and specifications as above enumerated, on or before the 9th day of March, 1914, and one of the sets furnished by the successful architect shall be kept as a public record of the date of and following the selection by the Board of Education of such plans and specifications for the construction of a public building. The successful architect will be required to finally furnish four full sets of plans and specifications, and four full sets of blue-print detail drawings. Full-size detail drawings for all mill work, stair work, and other parts of the proposed structure shall be furnished and delivered to the board by the successful architect within three weeks from the date of the official adoption of the plans for the building.

In case the successful architect becomes the superintendent of construction of the building, the Board will allow as an entire compensation 6 per cent of the contractor's price of the building exclusive of furnishing and fixtures. In case the architect does not become the superintendent of construction, then the compensation of 6 per cent shall be divided between the architect and building superintendent in accordance with the respective rules for architect fees. The entire compensation of the successful architect is to be dependent upon the cost of the building, without change of plans or specifications from original filed copies,—the total cost shown by regular bids from reliable contractors, to not exceed the sum of \$30,000. In case the board fails to bid a bid from a reliable contractor to erect the proposed building for \$30,000 or less, then the architect furnishing the plan, etc., shall forfeit its claim to any compensation whatever for his plans and specifications, etc.

The Board of Education expressly reserves the right to reject any or all plans, also to require such minor changes as may be found necessary before the final adoption of any plan.

CHAS. H. CHAMBERLIN,
Secretary Board of Education,
City Hall, Chico, Cal. (*)

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 825—Proposals for Sand Blast Equipment, Galvanized Sheet Steel, Steel Cable, Chains, Bolts, Plate Washers, Sheet Brass, Sheet Copper, Bronze Bars, Brass Tubing, Copper Cubic In. PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 18th day of February, 1914, for doing the following work including the furnishing of the necessary labor and materials therefor, to wit:

For constructing an extension to Geary Street Car Barn.

Sealed proposals will be made. Said work must be done in accordance with the plans and specifications

thereof on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within one hundred and ninety (190) calendar days from the date of the contract to be made and entered into therefor. Performance of contract for faithful performance of contract has been fixed at \$35,000.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any or all proposals. By order of the Board of Public Works,
F. J. CHURCHILL,
Secretary.

PROPOSALS FOR CONSTRUCTING

REINFORCED CONCRETE BRIDGE.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 12 o'clock, noon, today, March 2, 1914, for constructing a reinforced concrete bridge on the La Honda-San Gregorio road across creek separating the San Mateo and Redwood districts, per plans and specifications prepared by the County Surveyor and adopted by the Board of Supervisors on Monday, February 2, 1914. Plans and specifications are now on file in the office of the Clerk of said Board, where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank, in the sum equal to at least 10 per cent of bid, made payable to the undersigned Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the chairman of the Board of Supervisors of said county in an amount not exceeding the sum of ten per cent, or to enter into a written contract with said county in accordance with said plans and specifications, and the bid thereon.

All bids from contractors must specify the time for the completion of said work, to be completed in place, per cubic yard to be used in the determining the value of extra work, if required.

The right is reserved to reject any and all bids,
JOS. H. NASH,
County Clerk.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that sealed bids will be received by the Board of Trustees of the Del Paso Heights School District at the office of the County Superintendent of Schools, Court House, Sacramento, until the 20th day of February, 1914, for furnishing all material and labor for the construction of a combination fence to be built around the school grounds of the named school district. Plans may be obtained at the office of the County Superintendent of Schools. Bids must be accompanied by a check for ten per cent of amount of bid. Board reserves the right to reject any or all bids.
B. F. LATHROP,
Clerk, Board of Trustees, Del Paso Heights School District.

NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Thursday, February 19, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work for the construction and erection of a building known as the

Nursery Building for Males at the Sonoma State Home, Eldridge, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a bidder's bond, or certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five Dollars (\$5.00) will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for elevators, cranes and hoists and operating devices in the State Capitol, Sacramento, California."

[SIGNED] W. F. MCCLURE,
State Engineer. (*)

NOTICE TO CONTRACTORS.

BIDS are invited for the construction of a two-story frame (plastered exterior) building to be erected on Linton Avenue near Broadway (Rockridge) Oakland, Cal., with plans and specifications on file in office of W. R. Ratcliff, Jr., Architect, First National Bank Bldg., Berkeley, Cal. also W. J. Leveand, 403 First National Bank Bldg., San Francisco.

Right reserved to reject any or all bids. Bids to be opened February 10th at 12 o'clock, noon.
Vestry St. Peter's Parish, Oakland. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 1004 A. M. Thursday, February 19, 1914, for Transfer Table in Transportation Building in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal. The accepted check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

STATE OF CALIFORNIA. DEPARTMENT OF ENGINEERING. CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 15 Forum Bldg., Sacramento, Cal., until 2 o'clock P. M. on February 24th, 1914, at which time they will be publicly opened and read for construction in accordance with

the specifications therefor, to which special reference is made, portions of State highway as follows:

San Mateo County from the south line of City to South San Francisco (IV-S. M-2-A), about 4 miles in length, to be built of Portland cement concrete with asphalt surface.

San Diego County from Las Flores to the Western Boundary (VII-S. D-2-D), about 11.5 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The specifications of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal. Full directions as to bidding quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

Dated: January 22, 1914.

CHARLES E. BENEY,
NEWELL D. DARLINGTON,
CHARLES F. STERN,
California Highway Commission.

AUSTIN B. PLACER,
Highway Engineer.
WILSON R. ELLIS,
Secretary. (*)

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 819—Proposals for Four Steel Tugboats for Handling and Docking of Vessels at the Entrances of the Panama Canal—Sealed proposals will be received at the office of the general purchasing officer, Panamanian Canal Commission, Washington, D. C., until 12 o'clock, noon, February 23, 1914, at which time they will be opened in public for furnishing the above mentioned tugboats. Blanks and general information relating to this circular (No. 819) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal., or from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR PUMPS.

PUMPS—Sealed proposals indorsed "Proposals for Heating System, Fire and Flushing Pumps" will be received at the Bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., February 14, 1914, and then and there publicly opened, for furnishing and installing on foundations provided by the government in the central power plants, United States navy yards, Mare Island, Cal., and Puget Sound, Wash., two motor-driven fire pumps of 1,000 gallons per minute capacity, 400 feet head, and two steam turbine-driven heating system pumps of 1,000 gallons per minute capacity, 150 pounds per square inch gauge head. Estimated cost, \$14,000. Plans and specifications can be obtained on application to the bureau or to the commandants of the navy yards named, H. R. STANFORD, chief of bureau.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Tuesday, February 24, 1914, and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of a building known as the Recreation Hall at the Napa State Hospital, Napa, California, in accordance with plans and specifications

therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications of the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Recreation Hall, Napa State Hospital, Napa, California."

[SIGNED] W. F. MCCLURE,
State Engineer. (*)

PROPOSALS FOR MECHANICAL EQUIPMENT.

MECHANICAL EQUIPMENT—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 2 P. M., February 16, 1914, for the mechanical equipment (except roof drainage and elevators), of the United States post office at Denver, Colo. Drawings and specifications may be obtained on or after January 5, 1914, at this office or at the office of the architects, Tracy, Swartwout & Lathfield, 244 Fifth Avenue, New York, N. Y., in the discretion of the supervising architect, O. WENDEROTH, supervising architect.

PROPOSALS FOR ELEVATOR.

ELEVATOR—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until 3 P. M., February 16, 1914, and then opened, for an elevator plant in the United States post office at Denver, Colo., in accordance with the drawings and specifications, copies of which may be had at this office or at the office of the architects, Tracy, Swartwout & Lathfield, 244 Fifth Avenue, New York, N. Y., in the discretion of the supervising architect, O. WENDEROTH, Washington, D. C.

PROPOSALS FOR BRICK WORK.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 11th day of February, 1914, until 10 o'clock, for the furnishing of the necessary labor and materials therefor, to wit:

The brick work of the Washington Irving School Building.

Progressive payments will be made. The work may be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be completed within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within sixty (60) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$3,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than the amount of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect. All proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.
F. J. CHURCHILL,
Secretary.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE—3 story and base, frame, \$15,000. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Matthew A. Little, 1347 4th avenue, S. F. The dwelling will be erected on the south side of Washington street east of Spruce, and has been designed for a ten-room house with baths and sleeping porch. Interior finish will be of pine, redwood and red gum. There will be a central heating system, probably warm air heat and open fire places. Oak floors will be used in the principal rooms. Mantels will be of brick and tile. Bath rooms will have tile floors and wainscot and will be equipped with showers. A vacuum cleaning system will be installed and automatic water heaters. Exterior of the dwelling will be covered with cement plaster on metal lath, rustic and a veneer brick base. Plans are complete and the work will be done by Day Labor.

ORNAMENTAL STONE WORK—Cost not stated. San Francisco. Architect, G. A. Applegarth, Call Bldg., S. F. Owner, A. B. Spreckels. Architect Applegarth is now completing plans for the ornamental stone work for the garden walls and a garage for the \$250,000 residence of Mr. Spreckels at the northwest corner of Washington and Octavia streets. Bids will be called for on this work at once.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Costello and Deerick, 93 College avenue, S. F. This house has been designed for a six-room dwelling and will be erected on the east side of 19th avenue north of Anza. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be a large open fire place in the living room with a tile mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$7,000. San Francisco. Architect, none. Owner, Frank Pegel, 366 14th avenue, S. F. The dwelling, designed for an eight-room house with baths and sleeping porch, will be erected at the northwest corner of Geary and Jordan avenue. Interior will be finished in pine and hardwood veneer with oak floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Plans provide for automatic water heater and a vacuum cleaning system. Bath rooms will have composition floors and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—3 story and

base, frame, \$18,000. San Francisco. Architects, Dunn & Kerns, Monadnock Bldg., S. F. Owner, M. Simmons. The building will be erected on the north side of Clay street west of Leavenworth, covering an area of 3½ feet by 112 feet. There will be a total of 12 suites of three and four rooms. Interior will be finished in pine with some elm panels and oak floors. There will be steam heat and a hot water supply. Portable vacuum cleaners will also be installed. All suites will have private baths and wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and figures will be called for at once.

APARTMENT HOUSE—3 story and base, Class A construction, \$225,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mrs. A. Eldridge. The building will be erected on property recently purchased by Mrs. Eldridge on Jones street near Sutter. Construction will be of the class A type throughout with a complete steel frame, concrete walls and floors. Interior partitions will be of metal lath and plaster. The building will have a frontage of 52 feet and a depth of 137½ feet. Interior has been arranged for a total of 92 suites of two and three rooms with a number of single rooms. All suites will have private baths and wall beds. Hardwoods, pine and redwood will be used for interior finish. Bath rooms will have tile floors and wainscot. Plans provide for steam heat, elevator service, hot water supply and vacuum cleaning. Exterior of the building will be faced with pressed brick and terra cotta. Working drawings are now being prepared.

APARTMENT HOUSE—3 story and base, frame, \$25,000. San Francisco. Architect, W. G. Hind, 46 Kearny street, S. F. Owners, Mrs. Emery, Mrs. Chapin and Mrs. De Turberville. The building will be erected on the south side of Clay street between Jones and Leavenworth. Interior has been arranged for three suites of three rooms, three suites of two rooms and six five-room suites. All interior finish will be of pine or elm. Oak floors will be used in the larger suites. There will be wall beds, private baths and open fire places. Bath rooms will have tile wainscot and composition floors. There will be steam heat and hot water supply. Mantels will be of tile. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base and entrance will be specified. Plans are complete and segregated figures are now being taken.

APARTMENT HOUSE—3 story and base, frame, \$20,000. San Francisco. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner, The Building will be erected on Pacific near Jones, and will be arranged for suites of four and five rooms. Interior will be finished in pine and hardwood veneer. There will be a central heating system and hot water

supply. Bath rooms will have composition floors and tile wainscot. All suites will have private baths and wall beds. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and bids are being taken.

APARTMENT HOUSE—4 story and base, brick and steel, \$100,000. San Francisco. Architect, J. R. Miller, Lick Bldg., S. F. Owners, San Christina Investment Co. The building will be erected at the corner of 16th and Howard streets, covering an area of 175 by 85 feet. The first floor will contain a number of stores besides the entrance to the apartments. Upper floors will be arranged for a large number of two and three room suites with private baths, wall beds and other modern improvements. Interior finish will be of pine and redwood with some elm panels. There will be steam heat, elevator service and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Working drawings are nearly complete and figures will be called for shortly.

APARTMENT HOUSE—3 story and base, frame, \$30,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Mary Bean. The building will be erected at the southwest corner of Fell and Steiner streets, and will contain a number of two and three room suites. Interior finish will be of pine and elm. Some oak floors will be used. There will be steam heat and a hot water supply. All suites will have wall beds and private bath rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architect, none. Owner, J. Dempiak, 1658 Washington street, S. F. The building will be erected on Clay street east of Taylor, and will have a frontage of 25 feet by a depth of 85 feet. There will be six suites, three of four rooms and three of three rooms. Interior will be finished in pine with elm panels. Oak floors will be used in the living rooms and dining rooms. Plans provide for steam heat, hot water system and portable vacuum cleaners. All apartments will have wall beds and private baths. Bath rooms will have composition floors and tile wainscot. Entrance lobby will be finished in ornamental plaster and hardwoods. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. A pressed brick basement will also be used. Plans are complete and work will be done by Day Labor. The owner is now letting subcontracts for all materials and work.

APARTMENT HOUSE—3 story and base, frame, \$30,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on Pine street near Stockton, and will contain suites of six and seven rooms. Interiors will be finished in pine and hardwood. There will be steam heat, automatic elevator, hot water system and vacuum cleaning. Bath rooms will be finished in tile. All suites will have

wall beds. Exterior of the building will be covered with rustic and cement plaster on metal lath. Figures are now being taken.

TUNNEL WORK—Cost not stated. San Francisco, Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. The State Board of Harbor Commissioners have announced the completion of plans and specifications for the proposed tunnel which is to carry the Belt Line Railroad under Port Mason. There will be approximately 1,500 feet of tunnel construction and about 1,400 feet of trestle from Fishermen's Cove to the east portal of the tunnel. Bids will be asked for in the course of a week or ten days. Plans can be secured from the Assistant State Engineer, Ferry Bldg.

WAREHOUSE—2 story and base. Class C construction. \$10,000. San Francisco, Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, E. H. Cary. The building will be erected on the north side of Brannan street between Third and Fourth streets, and will cover an area of 60 by 80 feet. There will be a cement floor on the ground floor. Interior finish will be of pine throughout. Metal window sash and frames are specified. Exterior of the building will be faced with stock brick. Plans are complete and figures are being taken.

WAREHOUSE—5 story and base, reinforced concrete, \$200,000. San Francisco, Architect, G. A. Applegarth, Call Bldg., S. F. Owner's name withheld. The building will be erected in the southern part of the city adjacent to spur track facilities. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Pine trim will be used. There will be elevator service, automatic sprinklers and metal window sash and frames. Exterior of the building will be faced with cement plaster. Working drawings are now being prepared.

GARAGE—1 story, reinforced concrete. Cost not stated. San Francisco, Architect, Charles F. Whittlessey, 555 Clayton street, S. F. Owner's name withheld. The building will be erected on Geary street near Fourth avenue. Walls, floor and roof will be of reinforced concrete. Interior will be finished in pine. There will be special gasoline storage tanks and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are being prepared.

CITY HALL HEATING AND VENTILATING—Cost not stated. San Francisco, Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. The lowest figure received for the heating and ventilating of the new City Hall was from F. P. Walsh for \$47,965. No contract has been awarded. A complete list of the figures received will be found under the heading of San Francisco in this issue.

HOTEL—14 story and base. Class A construction, \$450,000. San Francisco, Architect, G. A. Applegarth, Call Bldg., S. F. Owners, Clift Estate. This work has been mentioned here a number of times before. The excavation, foundation work and steel are now complete. The architect is taking segregated figures for all other parts of the work.

The structure is of the Class A type throughout, and when complete will take its place as one of the foremost hotels on the Pacific Coast. Covering an entire Fifty Vara lot only few hotels in the west have a greater number of rooms. Interior is to be handsomely finished in hardwood, metal and ornamental plaster. Marble, tile and Chen stone will be used extensively.

HOTEL ALTERATIONS—3 story and base. Class C construction. Cost not stated. San Francisco, Architects, Welsh & Carey, Merchants' National Bank Bldg., S. F. Owner, A. Paladini. The building located at the corner of Pine and Leidesdorff streets, and for the past two years used as stores and lofts, is to be altered into a rooming house. The first floor will be arranged for an entrance besides the stores. Upper two floors will contain about 50 guest rooms and several baths. The work will include new interior partitions, plastering, electric work, painting, plumbing and mill work. Plans are now being prepared.

CAR BARN ADDITION—1 story and basement, reinforced concrete, \$60,000. San Francisco, Architect, Architectural Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and out for figures for the one-story addition to the Municipal car barns at First avenue and Presidio. The addition will cover a large ground area and will be similar in construction and design to the present building. Reinforced concrete walls and floor will be used. Roof will be of clay tile. Interior finish will be of pine. Special electric installations are to be made. Exterior of the building will be faced with cement plaster. Plans can be secured from the Department of Architecture. Bids will be opened by the Board of Public Works on February 18th. An official proposal appears in another column of this issue.

RESIDENCES—4, 2 story and base, frame, \$1,000 each. San Francisco, Architect, A. W. Smith, 1010 Broadway, Oakland. Owners, Fockman & Co., 37th avenue and Geary street, S. F. These houses will be erected in what is known as Lincoln Manor. Each of the dwellings will contain seven rooms and bath. Interiors will be finished in pine, oak, mahogany and gum. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Owners will purchase all materials.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco, Architect, none. Owner, F. Nelson, 20 Presidio Terrace, S. F. The dwelling will be erected on the west side of 10th avenue north of Fulton, and has been designed for a six-room house with bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be a large open fire place in the living room with a tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater is specified. Exterior of the house will be covered with rustic and cement plaster on metal lath.

Plans are complete and work will be done by Day Labor.

RESIDENCE—1½ story and base, frame, \$3,000. San Francisco, Architect, none. Owner, Andrew Lyon, 182 Liberty street, S. F. The dwelling, which has been designed for a six-room house will be erected on the west side of Belvedere south of 17th street. Interior finish will be of pine and redwood with some hardwood veneer in the living room and dining room. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and a brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—1½ story and base, frame, \$3,100. San Francisco, Architect, O. E. Evans, 2367 Mission street, S. F. Owners, William and Hilda Beuhel, 422 Lisbon street, S. F. The dwelling has been designed for a six-room house and will be erected on Lisbon street west of Persia. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room with a brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

STORES AND LOFTS—2 story and base, brick, \$3,000. San Francisco, Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, C. Demetrek. The building will be erected on Commercial street east of Drumm, and will have a frontage of 25 feet by a depth of 60 feet. Three of the walls are now standing. Interior finish will be of pine. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor.

STATE HIGHWAY WORK—Cost not stated. Five Counties, California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids were opened on February 2nd by the State Highway Commission for the construction of highways in five different counties. A complete list of the figures will be found under the heading of San Francisco in this issue. Only the total amount of the bids submitted are given and parties interested in unit prices and materials furnished by the state can secure official records by calling at this office where such data is on file.

BUILDING TOTALS FOR JANUARY.

Report Shows Over Seven Million Spent in Building Construction.

Figures compiled by the Bureau of Building Inspection of the Board of Public Works show that \$7,349,816 have been invested in building construction for the month of January. This amount

Architects W. B. Faville, Edgar A. Mathews and Tobias Bearwald Presented with Tokens of Appreciation.

At the regular monthly meeting of the San Francisco Architectural Club, held in the club rooms, 126 Post street, last Wednesday evening, Architect W. B. Faville, Architect Edgar A. Mathews and Architect Tobias Bearwald were each presented, with a handsomely carved pair of book stands as a token of the Club's appreciation of their services rendered during the last Annual Architectural Club Exhibit.

The presentation was made by President George Greenwood. Mr. Mathews and Mr. Bearwald expressed themselves as being in hearty accord with the spirit of the Club's Annual Exhibit and offered any further aid which they might give in the next exhibit. Mr. Faville, who was unable to attend, replied by letter in the same spirit.

Routine business consisting of reading the minutes of the regular business meeting and the Directors' meeting followed. About forty members were in attendance.

Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, Leo L. Nichols, Macdonough Bldg., Oakland. The dwelling has been designed for a seven room house and will be erected on Walker avenue near Weldon. Interior will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Tile wainscot will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are com-

plete and work will be done by Day Labor.

BUNGALOW — 1 story and base, frame, \$3,000. Oakland, Cal. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, M. C. Vaughn. The dwelling will be erected in the Fourth Avenue Terrace Tract and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Oak floors will be used in the principal rooms. Bath room and kitchen will have tile wainscot. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. The work will be done by Day Labor under the direction of the architects.

RESIDENCE — 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Dr. E. L. Loring. The house will be erected in Bushnell Place and will contain eight rooms and baths. A garage will also be erected on the lot. Interior finish will be of pine and hardwood veneer with oak floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms will be finished in tile and tile wainscot will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$4,000. Oakland, Cal. Archi-

tecs, Hutchinson Bros., 470 13th street, Oakland. Owner, M. C. Vaughn. The house will be erected in the Fourth Avenue Terrace Tract and will contain seven rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials will be purchased through the office of the architects.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, James M. Plachek, 1424 Spring street, Berkeley. Owner, C. M. Burkhalter. The building will be erected at the corner of Dana and Woolsey streets, and has been arranged to contain four suites of three rooms and bath each. Pine and elm panels will be used for interior finish. All suites will be equipped with wall beds. Bath rooms will have composition floors and tile wainscot. Furnace heat is specified. Marble and tile will be used in the entrance lobby. Exterior of the building will be covered with shingles. Plans are complete and figures are now being taken.

CHURCH—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, William H. Ratcliffe, Jr., First National Bank Bldg., Berkeley. Owners, St. Peter's Parish. Plans are complete for the construction of a Mission style church which is to be erected on Lawton avenue near Broadway. The building will contain a main auditorium, Sunday school rooms and a pastor's study. Interior finish will be of pine and redwood. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on February 16th, and plans can be secured from either the architect or from W. J. Loveland, 402 First National Bank Bldg., San Francisco.

FLATS—2 story and base, frame, \$5,000. Oakland, Cal. Architect, John Carson, Bacon Bldg., Oakland. Owner, A. Friedman. The building will be erected on the north side of 1st street and has been designed to contain four modern flats of five rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters are specified. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

AUDITORIUM—2 story and base. Class A construction. Cost not stated. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans have been completed and approved for the preparation of the site, concrete work, granite work and setting for the municipal auditorium. Bids are now being advertised and will be opened on February 26th. Plans and specifications can be secured from the architect. The work will be carried on

under the superintendence of Architect Walter Mathews.

RESIDENCE — 2 story and base, frame, \$4,000. Oakland, Cal. Architect, none. Owner, F. T. Malley, 3001 Grove street, Oakland. The dwelling will be erected at the northwest corner of Grand avenue and Cottage street and has been designed for an eight room house with bath and sleeping porch. Exterior finish will be of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOW—1½ story and base, frame, \$2,500. Oakland, Cal. Architects, The Elite Planners, 1844 5th avenue, Oakland. Owner, W. C. Keeler. The house will contain six rooms and bath, and will be erected on Melrose avenue. Interior will be finished in pine and redwood with oak floors in the principal rooms. There will be an open fire place in the living room with a tile mantel. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BUNGALOW — 1 story and base frame, \$2,000. Oakland, Cal. Architects, The Elite Planners, 1844 5th avenue, Oakland. Owner, J. B. Piper. The dwelling will be erected on Cambridge street in Broadmoor Manor, and has been designed to contain five rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in two of the rooms. There will be a large open fire place in the living room. Mantel will be of tile. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

HOTEL AND STORES—4 story and base, brick and steel. Cost not stated. Petaluma, Sonoma Co., Cal. Architect, Brainerd Jones, Petaluma. Owners, Petaluma Development Co. The building will be erected on a corner site and will be arranged for stores on the first floor, besides the hotel office, dining room and lobby. Upper floors will contain in the neighborhood of 70 guest rooms, a number of public and private baths. Interior finish will be of pine and redwood. Some ornamental plaster will be used in the lobby. There will be steam heat, a hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Plans are complete and figures will be called for at once.

NURSERY BUILDING—1 story and base, frame and concrete. Cost not stated. Eldridge, Sonoma Co., Cal. Architect, State Department of Engineering, Sacramento. Owners, State of California. Plans have been revised for the building known as the Nursery Building for Malea, and new bids are now being called. These figures will be opened on February 26th. Plans and specifications can be secured from the State Department of Engineering, Capitol Bldg., Sacramento. An official proposal appears in another column of this issue.

DAIRY BARN—Frame construction. Cost not stated. Yountville, Napa Co., Cal. Architect, State Department of Engineering, Sacramento. Owners, State of California. A new dairy barn of frame and concrete construction will be erected at the Veterans' Home at Yountville. Plans have been completed and have received the approval of the State Board of Control and bids are now being taken. Figures will be opened in Sacramento on February 27th. Plans and specifications can be secured from the State Department of Engineering, Capitol Bldg., Sacramento. An official proposal appears in another column of this issue.

RESIDENCES—6, 1 and 2 story, frame, \$1,800 to \$3,500. Richmond, Contra Costa Co., Cal. Architect, none. Owners, California Home Builders, Richmond. These houses have been designed to contain from five to seven rooms, and will be erected in a new tract recently opened in the city of Richmond. Interiors will be finished in pine and redwood. Oak floors will be used in the principal rooms. Furnace heat will be specified in the larger houses. All of the dwellings will have open fire places and tile or brick mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters are specified. Exteriors will be covered with rustic, shiplap, shingles and cement plaster on metal lath. Plans are in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

FRESNO, MODESTO, STANIS- LAUS AND CENTRAL CALIFORNIA.

GARAGE—1 story and base, rein-
forced concrete. Cost not stated.
Fresno, Fresno Co., Cal. Architect, W.
F. Bowen, Fresno. Owners, Stephens
and Bean. The building will be erect-
ed at the corner of Tuolumne and H
streets, covering a considerable ground

area. Besides the storage rooms there
will be a body shop and machine
rooms. Interior finish will be of pine
throughout. A cement floor will be
used. Metal window sash and frames
are specified. Exterior of the build-
ing will be faced with cement plaster.
Plans are complete and figures are be-
ing taken.

RESIDENCES—5, 1 and 2 story,
frame. Cost not stated. Fresno, Fres-
no Co., Cal. Architect, Eugene Mathew-
son, Forsyth Bldg., Fresno. Owner,
W. G. Cochrane. These houses will
contain from six to eight rooms with
baths and sleeping porches. Interior
finish will be of pine, redwood and
hardwood veneer. Oak floors will be
used in the principal rooms. The
larger dwellings will have furnace
heat. Open fire places will be speci-
fied in the living rooms of all dwell-
ings. Mantels will be of tile and
brick. Tile wainscot and composition
floors will be used in the bath rooms.
Automatic water heaters are also speci-
fied. Exteriors will be covered with
rustic, shiplap and cement plaster on
metal lath. Plans are being prepared.

RESIDENCE — 2-story and base,
frame, \$15,000. Fresno, Fresno Co.,
Cal. Architect, Eugene Mathewson,
Forsyth Bldg., Fresno. Owner, Ar-
thur W. Goodfellow. The dwelling will
be erected on Ventura avenue, and will
contain ten rooms, three baths and
sleeping porch. Interior finish will be
of pine, oak, mahogany and white
enamel. Oak floors will be used in the
principal rooms. There will be fur-
nace heat and open fire places. Man-
tels will be of tile. Automatic water
heaters are specified. Bath rooms will
have composition floors, tile wainscot
and showers. Exterior of the dwelling
will be covered with cement plaster on
metal lath. Plans are now being com-
pleted.

STORE ALTERATIONS—1 story and
base, brick, \$5,000. Fresno, Fresno Co.,
Cal. Architect, Eugene Mathewson,
Forsyth Bldg., Fresno. Owner, James
Fortheons. The present building will
undergo extensive alterations. This
work will consist of new copper store
fronts, plate glass windows, interior
trim, plumbing, electric work and mill
work. Plans are complete and figures
are now being taken.

Contracts Awarded.

Doyle Bros.	21,218.15
Chamber & Heafy	21,317.30

SCHEDULE "B"

H. C. Muddox	\$4743.61½
Merritt Hydraulic Co.	778.75
H. R. Boynton (Bid on outfall pressure pipe)	

SCHEDULE "C"

Hall & Hunt (Labor)	\$7607.22½
---------------------	------------

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

RESIDENCES—1 and 2 story, frame. Cost not stated. Sacramento, Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: Ernest G. Ball, Ohio avenue, Sacramento, 2 1 story frame bungalows, \$1,800 and \$2,400; Wright and Kimbrough, 817 J street, Sacramento, 8 1 story frame bungalows, \$2,700 each.

RESIDENCE—2 story and base, frame, brick, \$25,000. Sacramento, Cal. Architects, Woollett & Woollett, Newhall Bldg., S. F. Owner, James Mull. This house will contain in the neighborhood of twelve rooms, several baths and sleeping porch. Interior will be handsomely finished in pine and hardwoods with some white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Plans include vacuum cleaning and automatic water heater. Bath rooms will have tile floors and wainscot. Exterior of the dwelling will be faced with pressed brick. Plans are being prepared.

CONCRETE PIERS—\$1,000,000. West Sacramento, Cal. Engineer, Engineering Department of the West Sacramento Co., West Sacramento. Owners, West Sacramento Co. An announcement has been made by the company that actual construction on a number of reinforced concrete piers will be started early in the spring. These piers will be erected on the waterfront opposite the city of Sacramento, and will extend from the Southern Pacific tracks a distance of two miles down the river. Construction will be

fireproof throughout. Several of the structures will carry wharf sheds, also of concrete construction. Competitive bids will be asked.

FLATS—2 story and base, frame, \$3,500. Sacramento, Cal. Architect, none. Owner, Manuel Brown, 408 T street, Sacramento. The building has been designed to contain two modern flats of five rooms each and will be erected on T street near 3rd avenue. Interior finish will be of pine and redwood with some oak floors. Each living room will have an open fire place with tile or brick mantel. Bath rooms will have the wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

ELEVATOR WORK, ETC.—State Capitol. Cost not stated. Sacramento, Cal. Architect, State Department of Engineering, Sacramento. Owners, State of California. Plans have been completed and are now out for figures for the installation of two new elevators, alterations to the grill work and furnishing of pneumatic door opening devices at the State Capitol building. Bids will be opened on March 3rd. Plans and specifications can be secured from the State Department of Engineering. An official proposal appears in another column of this issue.

BUNGALOWS—2 1 story and base, frame, \$2,200 and \$1,500. Sacramento, Cal. Architect, none. Owners, L. A. Averill, 21 Clunes avenue and J. E. Lunderville, 1912 30th street. These two houses will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior will be covered with cement plaster on metal lath. Plans for each are in the hands of the respective owners who will do the work by Day Labor.

COURT HOUSE ADDITIONS—1 and 2 story and base, brick, \$30,000. Ukiah, Mendocino Co., Cal. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owners, Mendocino County. It is proposed to extend the wings on the north, south and west, and to add a second story to the first two wings mentioned. The county clerk's office will be extended to embrace the office at present occupied by the school superintendent. The latter will be removed to the room occupied by the supervisors and another room to be added on the west when the wing is extended. The auditor will occupy the corresponding office on the south side of that wing. The tax collector's office will occupy its present quarters and in addition will include a part of the present assessor's office, the remainder of which will be taken by the treasurer. The treasurer and tax collector will have access to each other's offices through a door which will be a great convenience. The displaced assessor will have the part of the southern wing adjoining the tax collector's office. Underneath the wings will be a large basement. In the north basement will be the furnace room and in the south will be fireproof chambers in which will be stored the county records. The recorder's building will

be joined to these fireproof chambers by a tunnel to which access will be gained from the hall of records by a stairway. The present front of the building will be torn away and a handsome porch in a modern style of architecture will be constructed of concrete. The entire building will be given a concrete finish over the bricks after the style of the city hall and the opera house. Upstairs the district attorney's offices will remain the same as at present. The judge's chambers will be made smaller and the part taken used to enlarge the law library. A lady's waiting room and a consulting room and lavatories will be placed where the present jury room and the law library are and the present wood room will be made into a jury room. The courtroom will remain the same as at present. The stairways as they now exist will be done away with and there will be a straight flight to the upper floor from the lower corridor. The larger part of the upper story of the south wing will be devoted to a room for the board of supervisors and two private rooms for conferences. The entire building will be refinished throughout and modern electric fixtures, modern hardware, etc., will be installed.

SCHOOL—1 story and base, reinforced concrete, \$22,000. Gridley, Butte Co., Cal. Architects, Smith & Stewart, 244 Kearny street, S. F. Owners, Gridley School District. The building has been designed in the Mission style and will cover an area of 142 by 90 feet. Construction will be of the semi-fireproof type. There will be six class rooms and a large assembly hall. Interior finish will be of pine with maple floors in the class rooms. Plans provide for plenum system of heating with oil burning equipment. Exterior of the building will be faced with cement plaster. Plans are now nearly complete and figures will be taken in the course of three weeks. Further mention will be made of the work.

SCHOOL—2 story and base, brick, \$180,000. Sacramento, Cal. Architects, Shea & Loquist, Bankers' Investment Bldg., S. F. Owners, Sacramento School District. The building will occupy an entire city block and will contain 18 class rooms, assembly hall and teachers' rooms. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat, vacuum cleaning system and program clocks. Besides the class rooms plans provide for manual training and domestic science rooms, play rooms and toilets. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken. Bids will be opened on February 27th.

SEWER SYSTEM—Cost not stated. Kingsburg, Fresno Co., Cal. Engineer, Frank A. Lathrop, Los Angeles. Owners, City of Kingsburg. Bids opened for this work show C. D. Vincent low at \$17,996.54. Bids were taken for the work as a whole, for any or all material f. o. b. Kingsburg, and for the labor. A complete list of the bids as opened will be found under the heading of Fresno, Modesto, Stanislaus and Central California in this issue.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, John F. Blee, Union League Bldg., L. A. Owner, J. D. Schirm. The building will be erected on East First street at the corner of Cummings, and will cover an area of 72 by 129 feet. There will be seven stores on the first floor, finished in pine and with patent store fronts and plate glass display windows. Upper floors will be subdivided into thirteen suites of two and three rooms. Interior finish will be of pine throughout. There will be private baths and wall beds. Plans provide for steam heat and a hot water supply. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and the architect is now taking figures on the work.

CHURCH, CAMPANILE AND RECTORY—Reinforced concrete construction, \$200,000. Los Angeles, Cal. Architect, John T. Comes, Washington Bldg., Pittsburgh, Pa. Owners, St. Vincent's Parish, Father J. S. Glass in charge. The buildings will be erected on Figueroa street and West Adams. The design is a combination of the Spanish and Gothic Romanesque. Plans provide for a campanile 235 feet high, a main church edifice 100 by 225 feet and 85 feet in height, and a rectory containing lyceum, parlors and library. Construction will be of reinforced concrete and steel and will be fireproof. Exterior of the building will be faced with a grey tapestry brick with art stone trimming. Interior of the church will be finished in pine with ornamental plaster and art glass windows. There will be a central heating system. The rectory will not be erected at the present time. Preliminary plans have received approval and working drawings are now under way.

HOTEL, ADDITION—3 story and base, frame. Cost not stated. Pasadena, Los Angeles Co., Cal. Architects, Greene & Greene, Boston Bldg., Pasadena. Owners, Vista del Arroyo Hotel Co., F. M. Fowler, Mgr. The new portion of the hotel will be erected on property adjoining the present building at 125 South Grand avenue, and will contain in addition to the lobby, parlors, reception hall and dining rooms about 75 guest rooms with private baths. Interior finish will be of pine and hardwoods with some ornamental plaster. There will be steam heat and hot water supply. Exterior of the building will be faced with cement plaster on metal lath. Bath rooms will have tile wainscot and composition floors. Plans are now being prepared.

HOTEL—5 story and base. Class B construction, \$75,000. Hollywood, Los Angeles Co., Cal. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, C. L. Clinch. The building will be erected at the northwest corner of Whitney and Hollywood avenues, and will be known as the Foothill Hotel. The structure will cover an area of 65 by 90 feet. There will be three stores besides the hotel lobby and offices on the first floor. A grill, barber shop and billiard hall will occupy the basement. Upper floors will contain in the neighborhood of 70 guest rooms and ten baths. There will be steam heat, elevator service, hot water supply and vacuum cleaning. Bath rooms will be finished in tile and will have composition floors. There will be patent store fronts and metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are nearly complete. Bids will be taken by the owner.

HOTEL—3 story and base, brick. Cost not stated. La Canada, Los Angeles Co., Cal. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner's name withheld. The building will have a frontage of 400 feet, the main section being 144 by 60 feet with two lateral wings extending in the rear. There will be a large lobby and office, parlors, dining room and kitchen on the first floor. Upper floors will contain about 150 guest rooms with private baths. Hardwood and pine trim will be used. There will be steam heat, hot and cold running water, vacuum cleaning and metal window sash and frames. All bath

rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owner, W. H. Brophy. The dwelling will be erected on Wilshire Boulevard, and has been designed for a fourteen-room house with four baths and sleeping porches. A two-story frame garage with sleeping rooms and bath in the second story will also be erected on the grounds. Interior finish of the residence will be of pine, white cedar, birch and white enamel. Oak floors will be used in the principal rooms. Plans provide for furnace heat, open fire places, vacuum cleaning and automatic water heaters. Mantels will be of tile and brick. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the dwelling will be covered with cement plaster and half timber above the second floor line and the brick veneer below. Plans are nearly ready for figures.

STORES AND OFFICES—11 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, Edwin T. Earl. The building will be erected in the heart of Los Angeles' business district, but the exact location is withheld for the time being. No details of construction have been made public. Further mention of the work will be made later.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Fred Biren, Van Nuys Bldg., L. A. Owner, Mr. Bennett. The building will be erected on South Los Angeles street, covering an area of 48 by 145 feet. Floor will be of concrete. Interior finish will be of pine. A machine shop will occupy a portion of the building. Plans provide for metal window sash and frames and special gasoline storage tanks. Exterior of the building will be faced with enamel brick. Plans are complete and figures are now being taken.

CLUB HOUSE—2 story and base, frame, \$20,000. Hollywood, Los Angeles Co., Cal. Architect, Arthur R. Kelly, Story Bldg., L. A. Owners, Hollywood Women's Club. Only a portion of the building will be erected at this time. This will contain reception room, dressing rooms, kitchen, dining room and an assembly hall which will seat 400 people. Later it is planned to construct a large auditorium. Interior finish will be of pine and hardwood. A central heating system will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

HOTEL—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owner, Verne Carter. The building will be erected on Hill street between 11th and 12th streets and has been designed to contain about 75 rooms, 80 per cent of which will have private baths. There will be steam heat, elevator service, metal window sash and frames and a hot water supply. Interior finish will be of pine and hardwood. Some ornamental plaster will be used in the

lobby. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

HOTEL—3 story and base, reinforced concrete. Cost not stated. Pomona, Los Angeles Co., Cal. Architects, Blanchard, Greene & Tifal, Van Nuys Bldg., L. A. Owners, T. W. Newman and associates. The building will be erected at the corner of Palomares and Garey streets and will cover an area of 200 by 258 feet. The first floor will contain eight stores, hotel lobby, parlors, sample room, dining room and dance hall. Upper floor will contain 110 guest rooms and 50 baths. One wing of the building will be arranged for a theatre seating 1,200 people. Plans provide for two elevators, steam heat, vacuum cleaning, metal window sash and frames and a hot water supply. Interior finish will be of pine and hardwoods. Exterior of the building will be faced with pressed brick. Plans will be ready for figures about the end of February.

RESIDENCE—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architects, Elsen & Son, Wilcox Bldg., L. A. Owner, E. H. Kennard. The dwelling will be erected on Virgil avenue and has been designed for a sixteen-room house with two baths and sleeping porch. A garage will also be erected on the property. Interior of the dwelling will be finished in pine, redwood and hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters, vacuum cleaning and a hot water supply will be installed. Exterior of the house and garage will be covered with cement plaster on metal lath. Plans are now complete and figures will be taken at once.

SCHOOL—1 story and base, brick. Cost not stated. Palms, Los Angeles Co., Cal. Architects, Dennis & Hewitt, Fay Bldg., L. A. Owners, Palms School District. The lowest bid for the general construction of this building was presented by Hunsberger-Reed Co., but arrived twenty minutes late and was contested. All bids for the general construction were rejected and new figures will be advertised. Bids for the heating and ventilating, plumbing and electric work were taken under advisement.

STORES AND LOFTS—7 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, John Kahn. The building will be erected on the east side of Broadway south of 9th street, and will cover an area of 40 by 85 feet. Walls, floors and roof will be of reinforced concrete. Interior partitions will be of metal lath and plaster. There will be one elevator, metal window sash and frames and fireproof doors. An automatic sprinkler system is specified. Stores on the first floor will have copper fronts and plate glass windows. Interior will be finished in pine throughout. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for within a week or ten days.

Contracts Awarded.

PORTLAND AND OREGON.

APARTMENT HOUSE—3 story and base, brick, \$22,000. Portland, Ore. Architect, Charles W. Ertz, Northwest Bldg., Portland. Owner, Mr. Lohmlre. The building will be erected on Williams avenue, having a frontage of 60 feet and a depth of 120 feet. There will be a number of stores on the first floor. Upper two floors will contain twelve suites of two and three rooms with baths. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Wall beds will be used. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

CHURCH—2 story and base, brick, \$59,000. Portland, Ore. Architect, George Foote Dunham, Lumbermen's Bldg., Portland. Owners, First Christian Science Church of Portland. The building will be erected at the corner of East Sixth street and Holaday avenue and will cover a large ground area. Construction will be semi-fireproof. Interior will be arranged for a large auditorium and a smaller auditorium with Sunday school rooms. Pine and hardwood will be used for finish. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are being completed and figures will be called for shortly. A contract for the excavating and foundation work has already been awarded.

STABLE—2 story and base, brick and steel. Cost not stated. Portland, Ore. Architect, P. Chapell Browne, Mohawk

Bldg., Portland. Owners, Holbrook Estate. The building will be erected at the corner of 16th and Raleigh streets, covering an area of 100 feet square. The first floor will contain a large number of stalls, wagon room and repair shop. Upper floor will be used for the storage of hay and grain. Included in the work will be galvanized iron chutes, plumbing and electric work. Exterior of the building will be faced with stock brick. Plans are complete and bids will be called for at once.

Contracts Awarded.

RAILROAD OFFICE—3 story and base, reinforced concrete, \$25,000. Portland, Ore. Engineer, Mr. Boschke, care of O. W. R. and N. Co., Portland, Owners, Oregon-Washington Railroad and Navigation Co. Contractors, Moore Bros., 406 East 37th street, Portland. Contract price, \$25,000.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

The one Perfect Preparation for Bringing
that Delicate Beauty to the Skin so desired
by the Ladies and admired by the Gentle-
men. Fine for the face after shaving.
At all Druggists 25c.

Manufactured By

Clover-Leaf Pharmacy, Inc.

Cloverdale

California

It is worth more to you
than the cost of your first
order, to know about

"TOXEMENT"

Try it in your concrete,
Try it in your cement mortar.

J. E. Dwan & Company

Tel. Franklin 1673 445-447 Turk St., S. F.

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT
Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires

Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London

The Ritz, London

The Hyde Park, London

The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hostelrys with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

Frank Neidick

Carpenter and Builder
Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd
San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

The New York Association for improving the condition of the poor has published figures showing that families of five under its care involve a daily outlay of \$2.96½ or \$1082.25 per year. It is interesting to learn that five people can live and pay rent in the City of New York on that amount. It would be also interesting to know whether the average head of a family of five is able to earn \$1082 per year. However, if the family can live on less than \$3 per day it must be by rigid economy. Living is a comparative expression and depends entirely upon the standard of comparison.

President Wilson was elected with a less number of the popular vote than Bryan received in 1908. Yet he has proved himself eminently fitted for the high office that he holds and has won the confidence and respect of all people whose opinions are worth while. At a period of reform he has grasped the complex situation with masterly comprehension and has formulated a program that is remarkable in its unity. Industrial conditions have been such that artificial restrictions have been placed on the life of the community and special privileges have been granted to a few. To remove these restrictions and privileges the Wilson program has been classified under the following heads:

Fundamental Purpose—To remove the artificial restrictions to business that have grown up with the rapid industrial development of the last century.

First Restriction—The protective tariff has unduly favored a few industries at the expense of all the others, therefore it is revised downward.

Second Restriction—Defects in the old National Bank Act tended to concentrate money in New York, encourage speculation at the expense of current business and to produce periodical stringencies, when it was difficult to get the funds necessary for legitimate business uses. These defects have been corrected in the new banking law.

Third Restriction—Big business has used its power to capture undue advantages for itself, which tend to produce monopoly and to stifle competition. These evils are to be corrected by laws prohibiting interlocking directorates and unfair methods of doing business.

Fourth Restriction—Inflation of securities of railroads has imposed a burden on business. The issue of securities must be approved by the Interstate Commerce Commission.

Fifth Restriction—Farmers have not been able to borrow money on as favorable terms as other business men and

the extra cost has been borne by the consumers of farm products. This burden is to be lifted by the proposed Farm Credits Bill.

Sixth Restriction—The country's development has been hampered by inefficient governmental conditions, one of which has been the control of election machinery by unscrupulous politicians. This is to be remedied by a National Primary Law and its natural developments.

This is a logical and comprehensive way to deal with the question. It is all interrelated and has one purpose to effect and that is the new freedom. Furthermore the President has gone about it in such a way that he has not antagonized any interest but has gained the confidence of all.

What with the new bond issues and the large improvements that are to be made the coming year things generally indicate better times. The Southern Pacific will expend 55 million dollars to prepare for the 1915 travel. Other corporations are likewise contemplating big outlays. As these things can not long be delayed the prospects are encouraging. The Annual financial review of the world that is issued by the London Times takes an exceedingly optimistic view. Commenting on the American situation it says:

"In the United States the outlook has brightened considerably in the last few weeks. In the words of our correspondent, the past year has witnessed the conversion of the country from a system of extreme to one of moderate protection, while the banking and monetary systems have been reformed. Though such legislation is bound to be unsettling, it has been carried out smoothly. Much is to be attributed to the personal influence of the President, and there are indications that he will approach the trust question in a conservative manner, and the result should be a renewal of confidence in American securities. As in other countries, an enormous shrinkage in securities has been experienced as a result of severe liquidation from abroad. Railway securities have also been affected by the increased cost of handling business due to extra wages and taxes. The high cost of living continues, and, though the index number shows a drop from a year ago, food prices are, on the whole, higher. The year has been a 'record' one as far as foreign commerce is concerned, the exports being greater than those of last year, though the imports are reduced. These, for the first four months of the fiscal year, show a marked falling off, in spite of the lowered tariff, though the increase of those classes of foodstuffs, such as meat and corn, on which the duty was reduced or removed were noticeable.

Harvests were good and the total value of agricultural products creates a new high 'record.'

Technical and scientific magazines are devoting a good deal of space to the 1915 Exposition. Notably among the things spoken of with high approval are the groups of statuary and the color schemes to be adopted. Illustrations of the great symbolical groups have been printed in the best magazines and have done much to arouse interest in the great show. The grounds with their lighting effects have also been the subject of much favorable comment. The setting of the fair will certainly be something to be remembered by the visitors and when the great color scheme blends with the distant hills and the sea and sky there will be a beauty and a harmony in the setting that has not been heretofore seen. These facts are seen by our visitors and the correspondents who are writing for the Eastern magazines. The grounds will soon take definite form and shape. And each day will see the unfolding of the plan that is to make the exposition a thing of marvelous beauty.

An earthquake of considerable magnitude has been felt in New York, extending as far west as the Mississippi and as far north as southern Canada. In fact, it has occurred in what is known as the oldest stratified rocks on the continent and in fact affected the oldest known stratified rocks in the world along the St. Lawrence river. This district has long been known to be practically immune from earthquakes as there have been no material changes in its structure for ages. Here on the Pacific coast where there is a mountain range of recent formation we naturally expect a few shakes now and then. Such things are incident to a country of recent geological birth. But in the oldest rocks the changes are less frequent. And the record of this shows that such phenomena are liable to occur any where in the world. In fact that the earth is now as it always has been, changes are sometimes accompanied by earthquake shocks that run along the faults and slips in the solid rock of the earth's strata.

Along with the report of the earthquake in the East comes the report of the finding of the fossil bones of a prehistoric man in asphalt beds of southern California. So that for the time being public attention is directed to a past geological age. The earthquake occurred in what is known as the Devonian shales of New York. The bones of the supposed human being antedate any record of man on this continent. So that both phenomena add materially to the sum of human knowledge. If the find is that as reported it will be a new basis for investigation into the antiquity of man.

Women's dresses are too much even for the king of Belgium. A press report states that Court dresses have been barred in Brussels by the monarch for the reason that women appeared in gymnasium gowns "with chests exposed and showing, not only two-thirds of the spinal column, but also the knees." When the successor of Leopold bars the fashions they must have reached the limits of extremes.

The Scientific American has issued a number dealing with a review of safety devices for machinery and the protection of the public and the workman. In view of the fact that employers' liability acts in this country are of the most recent enactment and have been the subject of much comment it is interesting to note what has been done in other countries as well as our own. Speaking of this fact the Scientific American gives the followings statistics:

From a chart which was exhibited by the Prudential Insurance Company of America at the recent International Exposition of Safety and Sanitation, it would follow that there are 25,000 fatal industrial accidents per annum in the United States, and some 300,000 injuries. The mere possibility of being able to state in statistics the approximate number of our industrial casualties is a step in advance; for as late as 1908 it was impossible to estimate with any accuracy at all what was the toll we paid in crushed limbs and snuffed-out lives. Now at least we know how vast is the problem to be solved, how much needless suffering we inflict and how much we lose in dollars and cents, because we have hitherto failed to realize the necessity of guarding men as well as machines.

It has been estimated that it costs about \$300 to train a skilled workman to perform a new task, and that ultimately he represents an investment of about \$2,000 to his employer. Considering the subject of accident prevention from this cold-blooded standpoint, our business policy has not been all too wise.

Now that there is an awakening of employers to the duty which they must exercise, now that employers' liability statutes have done away with the antiquated common law conception of negligence, we may watch for a very marked improvement in deaths and injuries.

Since the enactment of employers' liability laws making recovery sure in the case of accident and taxing the business with the cost of these matters the expense attendant upon failure to provide necessary appliances has been increased many fold. Hence it follows that these laws will result in safeguarding all machinery and appliances for workmen. In the end accidents will decrease and insurance will be reduced and the end desired will be effected, that of preventing of maiming and destroying human life.

The Chronicle speaks of the address of Uncle Joe Cannon on Lincoln's Birthday as that of a great patriot and says he speaks his full mind as to the present administration. It is certainly interesting to note who claim to be followers of Lincoln. The great President of 1861 has become immortalized in history because of the genius of his great common sense and his profound sympathy with the common people. Uncle Joe Cannon, who has been in public life ever since the war, is certainly a great example. He more than any other present public man has been responsible for the departure of his party from the principles that Lincoln promulgated. And certainly now that measures are being adopted to bring back the government by the people back to the people, he certainly has a consummate amount of gall to

criticize the people who have instituted reform, in a speech commemorating the birthday of the great commoner, Abraham Lincoln.

Cannon has the same old story of smashing prosperity and the full dinner pail. On that same old cry every advantage that Special Privilege has ever received has been obtained. Protect the trusts and then they will hand you out a biscuit at the back door if they feel like it. The resources of the country should be administered by the self appointed Lords of finance and unless they are given all the privileges they desire they will withdraw their money and then the country will go sliding down a greased plank to the demnition bow-wows.

It is interesting to imagine what attitude Lincoln himself would take on present day problems. It is a safe bet that he would be as far away from Uncle Joe as is President Wilson and that the ex-speaker's cry of smashing prosperity would be smashed by some homely story or illustration that would leave him wondering what had happened.

Contrasted to the speech of Uncle Joe Cannon in Illinois is that of Governor Hiram W. Johnson at Los Angeles on the same day. Quoting extensively from the public utterances of the great commoner at the formation of the Republican party he draws an exact parallel with the conditions that confront the new Progressive party today. In felicitous phrase and eloquent argument he shows how Lincoln stood for the common people and the right, how he had the courage and the foresight to step out at the head of a new party that stood for right principles and to cast aside a party name when it no longer meant any thing to the people. The two speeches are as far apart as the poles and represent the two ideas in American politics today.

FOREST NOTES.

The legislature of Virginia and South Carolina are considering advanced forestry legislation.

Incense cedar is proving valuable for piling on the Pacific coast where marine borers are particularly troublesome.

The paper used by the government printing office each year required approximately 125 million pounds of rag pulp and 490 million pounds of wood pulp.

F. A. Elliott, state forester of Oregon, says that co-operative fire patrol associations among lumbermen for prevention of forest fires have proved their worth.

Of 606 fires last year on the national forests of Arizona, New Mexico, and Oklahoma, more than one-half were caused by lightning. Campers set about one-tenth, and railroads one-twentieth.

Roadside signs, each containing a single catchy sentence in large type, are proving effective in warning against fires on western forests. They give the essentials and tell the importance of protection against forest fires.

"TODAY AND YESTERDAY."

The Profession of Architecture as Viewed by an Ardent Craftsman.

By W. Marbury Somervell, A.A.I.*

*Architect, of Somervell & Putnam, London Building, Vancouver, B. C.

In order to definitely determine the status of the architect of today, be he of whatever nationality, it is necessary to run over briefly a history of the profession of Architecture, and, if fault be found with the position of the practitioner at the present time, perhaps an analysis of what has gone before may be of use in finding a solution out of the difficulties of the present.

The Architect, as we first see him in history definitely defined, seems to have been so closely allied with the painter and sculptor that he appears to have been almost a composite sort of person. It may be that given the simplicity of existence which obtained up to the Middle Ages, many of the Architects of today would be equally as proficient in all things aesthetic, for, certainly, our art requires the highest development of the faculties of both painter and sculptor.

The age following the downfall of the Roman Empire, and leading up to the rise of the Gothic period, was essentially the age of craftsmen, and we see the Architect, sometimes a monk, again a mason, but always a worker evolving new ideas, and striving with the best there was in him to express his inspiration in the materials at hand.

Later on, with the Renaissance, came a wonderful revival of spirit or interest in things beautiful, which produced the great architect-painter-sculptor group of Michael Angelo, Raphael, Bramante and others. These men, of wonderful talents, became pre-eminent in their arts spontaneously, but their rise was no doubt due in a measure to the fact that the Renaissance affected the whole of the people, and a discriminating public assisted materially in giving them recognition. In these times, with the complexities of life thrust upon us by advanced civilization, the inspiration which created the Art of these men is denied most of us, but, in them, it shines forth in all their efforts.

In the Seventeenth Century Architecture, as a profession, at first comes under our notice. At this time, aside from the specialists in Architecture, there arose a class of dilettant men of means and antecedents, whose minds were bent on all the serious questions of the day; whose education was deemed incomplete unless they had acquired some smatterings of our art, and some of these men developed talent of no small order. It was this phenomenon which gives us the architectural ruminations of Sir Francis Bacon, which gave Sir John Evelyn so much material for that delightful picture of 17th Century life contained in his diary. Thomas Jefferson, the founder of Democracy in the United States, is an exponent of this class, familiar to all of us who have traveled in Virginia. Gentleman, farmer, statesman and scholar, he designed several very noteworthy buildings in his time. The University of Virginia, the State Capitol at Richmond, Virginia, and his home, "Monticello," will equal many,

and exceed many more residences built in this day of ambition and opportunity.

Infro James, Sir Christopher Wren and the other great lights of English Architecture, belong to this period, and were fortunate in being able to maintain their good works and position through a cultured patronage, and the appreciation of a grateful public.

The latter part of the 18th and the early part of the 19th centuries mark what may be called the dark age of Architecture. This might be ascribed to many causes, but probably was the effect of a general unrest in the rearrangement of our entire civilization along industrial lines—to the various chisms which divided the ranks of the profession, and to the reaction from a phase of civilization in which men had been led, to one where they were beginning to think for themselves.

However this may be, the profession of Architecture developed into a school of pedantry, of narrow views on style; and the introduction and use of new and unfamiliar materials added confusion to what was already an amorphous professional situation. The education of the Architect, too, at this time did not tend to bring out what was best in men, and when a large building was to be built, the information at hand regarding practical materials, to say nothing of the question of design, was most meagre. Verily, he who in this period undertook an important commission, was a brave man, and all honor should be shown him, who at this time, produced results more than commonplace. I remember very well hearing my old patron, James Remick in New York, say that when he undertook St. Patrick's Cathedral of that city, in the 40's, there were only two books to be gotten on Gothic Architecture in the city, and these books with what he had absorbed by a few years' travel in Europe, furnished all the data which he had at his command when he designed the Cathedral. The result may be open to many criticisms now, but, still, the building is, considering its date, one of the most effective churches in America. If it be lacking in proper detail, compared with the prototypes which inspired its design, it nevertheless shows what few buildings show in these times, a vast amount of conscientious work and study.

The profession of Architecture at this time was taken up, both here and abroad, by men of means, and only those who possessed real talents, who loved their work, rose to the top; the others maintained only a nominal practice.

During the 60's, both in England and the United States, the development of the use of new materials, the consolidation of industries, with the consequent production of wealth, created a new demand for buildings, along new lines. Universal education, and the feeling of democracy had been bringing to men of all classes, an ambition never before witnessed en masse in the

history of the world. Professions which had been practiced only as a genteel pastime, or an outlet for cultured dilettantism, now became peopled with earnest, hard working men, and Architecture was the first to feel the stimulus given by its infusion of new blood. Courses of study in the universities became better organized, foreign travel was encouraged and a revival of interest in things aesthetic extended over the whole world.

For the first time in history Architects were not afraid nor felt ashamed to stand forth boldly to say: "I have been consecrated to a great profession, and am willing to contribute what I know to the world in return for what recompense it will allow me. If my brother professional men, the physician, the lawyer and the clergyman, can accept a living for their work why should I be too modest to accept a competence as my return?"

Since this spirit first had its birth, great changes for the betterment of mankind have taken place. Cities have been called upon to rearrange their plans—congestion of traffic had to be relieved—hygienic buildings had to be evolved to meet the demands of a more mature understanding of nature's laws. In each case, the Architect has met the situation and found the solution as it applied to his art, boldly and directly. Yet, what today is his recognition by the public, which has so benefitted for centuries from his unselfish zeal and poorly repaid efforts?

Among Architects, and cultured laymen alike, it has long been a subject of regret that architecture, of all the arts, is the least appreciated. There is no profession which requires of a man so much talent and so laborious apprenticeship; none which requires so costly and conscientious training. No lawyer or physician is called upon to handle affairs more important to the public welfare than is the Architect—yet, in view of what he does, none is so poorly paid or esteemed as he is.

I found a newspaper clipping from one of the great daily papers not long ago which dealt to some length with the oblivion on the part of the public to the profession of Architecture and its lack of recognition of our efforts. It is a reassuring sign that a prominent New York newspaper should give such a matter more than passing thought, to say nothing of its having actually found space to say something in our behalf.

There can be no doubt that a reason must exist for first, the manufacturers have not arrived at a point of the apathy of the public. There must be something to be said on their side, or surely this subject would not come up for discussion. When we consider that the public are poorly informed as to our work and efforts—when we realize that we are looked upon as only a necessary evil in most cases,—when we think of the many poorly trained and inadequately equipped

men who are practising in the name of art,—is there any wonder that we are often misunderstood? The worst feature, too, is that like other callings, the best suffer always on account of the shortcomings of the worst—and the whole is often judged by the standard maintained by the lowest of our calling.

To overcome their prejudices we must first of all educate the public as to our importance to them and to the civilization of the times. We must be businesslike in meeting our obligations, and we must always bear in mind that we are, in a manner, the custodians of large amounts of money. On our decision and our conscientiousness in administering this trust depend great losses or gains to our clients; and if we be careless or ignorant fail to render honest and impartial service, we will not alone suffer in our own reputations, but will bring into discredit all of our brother practitioners.

In all things we must guard against losing sight of the fact that no matter how businesslike and practical we choose to be, we are essentially artists. Our profession is an old and honored one. We must not, in the feverish haste of modern methods, allow our lamp to be dimmed, difficult as it is to keep alight. To him who has enthusiasm, the work, the study, the care in cherishing the highest professional ideals should be a joy, and one needing no further reward. If the world crown us with laurels or shower good fortune upon us for our efforts, let us accept them with a dignity and modesty worthy of our profession; and if we pass out unknown or unrecognized let it be at any rate in the knowledge that we have performed our task to the best of our ability. Our example, too, is not without some responsibility. Who knows what budding "Phidias" may be inspired to consecrated effort by witnessing our struggles for higher ideals? We not alone have the task of keeping our lamp alight, but we are burdened with the responsibility of seeing that it is passed on to worthy hands in the next generation.

The ancient Greeks, you will remember, had a game, the *Lampadephoria*, where runners took torches lighted at the altars of Prometheus, Athena and Hephaestus and passed them from hand to hand until the winning post was reached.

Thus it is for us to so train ourselves that when the torch passes into the hands of the coming generation it may be fanned into more vigorous life and shine again with all the splendor and brilliancy of the great ages of Architecture. — From *The Architect, Builder and Engineer*.

Two hundred and six conventions now have been formally booked to meet in San Francisco in 1915 during the progress of the Panama-Pacific International Exposition. The last convention to be secured by James A. Barr, manager of the Bureau of Conventions and Societies of the Exposition, is that of the National Conference on Weights and Measures, which is composed of State weights and measures inspectors, city inspectors of weights and measures, manufacturers of weighing and measuring apparatus and federal officials.

PUBLIC UTILITY COMMISSIONS AND PUBLIC SERVICE CORPORATIONS.

A Review of the Better Business Relationship Between Public Utilities and Their Customers Resulting from Commission Control.

By W. D. Seatt.

The public service business as a whole can be considered a comparatively recent development. Until within the last few years the executives and stockholders of public service corporations regarded inquiries concerning their business by individuals or government authorities an infringement of their personal or charter rights. This spirit, when evinced by individuals or smaller corporations, could not, in itself, be regarded as harmful to the general public. In a measure, no doubt, the attitude of the larger public service corporations was an outgrowth of the sentiment of the individual which dislikes public criticism of private matters, which feels that his business, is his business, and if through accommodating a greater number of patrons his business nets him a better rate of return, then, the methods which he uses are his methods and are not subject to regulation by others.

With the increased volume of business under one control which follows the consolidation of small industries into larger ones, and the fact that a great many of the so-called public-service corporations of today are of necessity in the nature of a monopoly, considerable injustice might result to a large number of people should the judgment or sentiment of these corporations not be based on a broad minded and liberal policy.

The very fact that the complexity of the business does not permit of all of the customers being taken into the confidence of the corporation, and does not permit of the various operating steps of the corporation being fully and carefully explained, has resulted in many misunderstandings and much dissatisfaction.

A large corporation must of necessity deal in averages. It is particularly difficult to convince an individual customer, who has a complaint, that it is only reasonable that mistakes and errors will occur. If this customer is treated as an average case and is shown that his complaints are known, that he represents but an average unit out of the total number of units, a natural sense of dissatisfaction results. He must be treated as an individual.

Laying aside all matters of finance and questions of deliberate dishonesty, restate promises of promoters and the sale of service for less than actual cost, the customers of public service corporations have, in many instances, come to distrust the officials and employees of corporations. This misunderstanding has often resulted through the fact that the particular employee, who met and answered the complaints of the particular customer, did not occupy a position which enabled him to have all the facts at hand for explaining the ways and means of the company's policy.

With subdivision of authority and

minute specialization it becomes difficult to educate a sufficient number of employees, whose general knowledge of their particular business is broad enough to enable them to discuss intelligently the business policy and methods of their particular company. In many instances even the men who occupied the larger executive positions were in doubt as to just why a certain charge for service was a reasonable charge or why a certain line of policy was best for all of the customers. The principal difficulty existed through their inability to present their side of the case from their customer's point of view.

When rate investigations were first started with common carriers a phrase was used in connection with the matter of establishing rates which called forth considerable adverse comment. "All the Traffic Will Bear," was the term which brought down upon a great many railroad officials very severe criticism. If, at the inception of such investigations the larger executives had been able to explain that this phrase did not mean all of the possible revenue to be extracted from any given set of customers, irrespective of its effect on the prosperity of the community in general or the common carrier in particular, a large amount of unjust criticism would never have been made.

There is none but will concede, that, in order to exist, and in order to secure the necessary capital for future extensions, any utility must receive sufficient revenue to enable it to satisfactorily carry on its business and earn a return upon its investment which will satisfy the investors who placed their money in the business and expect security and income.

If the phrase "All the Traffic would Bear," was translated to mean not greedy extortion by overcharges, but the minimum rate which would insure a reasonable return upon the investment and at the same time put the extension of the company's business to its greatest possible limit for the benefit of the whole community no such odium as now exists would be attached to it.

When some customer brings up a particular rate for a particular class of service and the public service corporation is not able to show definitely and exactly that the rate or charge is based on service costs, the customer or individual naturally begins to suspect that other statements made by any representative of any corporation are subject to investigation.

The general dissatisfaction among the customers of large corporations has brought into existence various regulating bodies. These regulating bodies investigate the condition of the corporation, both from the question of rates charged to customers and from the question of financial responsibility to investors. The customer and investor have more confidence in a statement made by a third or disinterested party; has come to learn that rulings as handed down by the various commissions are not the matter of snap shot judgment, but are judgments rendered after due deliberation and the presentation insofar as possible, of all facts bearing on any particular case. Various regulating bodies maintain inspectors or representatives, who ex-

plain the physical operations necessary to serve the customers of any utility. Operating difficulties are explained and made clear not by a supposedly biased employee, but by someone whose position inspires confidence.

The right minded public service corporation cannot help but feel that through this representation it has the best advocate before the people that, up to the present time, has been considered. Without public confidence, no matter how hard its officials and employees may try to render adequate service, their difficulties will be constantly increased. They may render the best possible service at a reasonable charge but due to the fact that they are not able to give that personal touch to all of their business relations, which exist in small companies, they will never gain the complete good will of all their patrons.

The bright light which has been thrown on a number of corporation practices, the publicity given by investigations of public service commissions and the presentation of the real facts, has been of much assistance towards helping solve many of the unsolved problems for enterprises which are endeavoring to give a satisfactory service to the public.

It took some time at first to overcome the spirit of the individual who resented outside investigation and to establish the fact that a public utility should be managed for the public good. If the various regulating bodies may achieve but this one thing—the return of the confidence of the general public, their efforts and the expense entailed will be worth while.

The publicity given all public service matters cannot but help but bring about a higher standard of business honesty and promote a spirit of fairness to all.

There has been a general awakening on the part of public service corporations that their motto can never be "The Public Be Damned," but "The Public Be Served."—Paper read before a joint meeting of the Portland section A. I. E. E. and N. E. E. L. A.

EXPOSITION NEWS NOTES.

President Charles C. Moore has received official notice from the Department of State in Washington, D. C., confirming the prior unofficial announcement that the Republic of Venezuela will participate officially in the exposition.

The Missouri commissioners to the exposition, who visited San Francisco a few days ago in the interest of their state's participation, were surprised at the rapid progress of the exposition builders both in actual building construction and in the perfection of all other plans. They were elated with the site of the Missouri pavilion, bordering San Francisco Bay, and declared that the construction of their state's building would be commenced as soon as possible.

Bids for the construction of Festival Hall, which is to be one of the most magnificent buildings of the Panama-Pacific International Exposition, were opened February 2nd, 1914. The construction will be rushed.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$14,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on a lot 23 by 120½ feet situated on the south side of Filbert street between Hyde and Leavenworth streets. Plans provide for six apartments arranged in suites of four rooms each. Interior finish will be of pine with some oak floors and elm panels. There will be steam heat, portable vacuum cleaners and a hot water supply. Bath rooms will be finished in tile and will have composition floors. All suites will have wall beds. Entrance will be finished in marble and tile. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are nearly complete and figures will be called for within a week or ten days.

SAN FRANCISCO—Apartment house, 4 story and base, reinforced concrete, \$25,000. Architects, Rousseau & Rousseau, Monocedon Bldg., S. F. Owner, Mr. A. C. Selig. The building will be erected on the south side of Eddy street between Jones and Leavenworth Sts. Several suites besides the main entrance and lobby will occupy the first floor. Upper floors will be arranged for two and three room suites with wall beds and private bath rooms. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the living rooms. There will be steam heat, an automatic elevator, hot water supply and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house alterations, frame construction, \$8,000. Architect, none. Owner, Charles Katz, 2440 Dolores street, S. F. This work will consist of rearranging the present three story frame store and apartment house located on Mission street south of 17th into a modern building. Upper floors will be subdivided into 18 suites. The work will include new partitions, plastering, mill work, carpentry, plumbing, electric work, painting and wall beds. Fire escapes, patent store fronts and plate glass windows will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Apartment house alterations, frame construction, \$7,000. Architect, J. B. Randall, 1337 Palm street, S. F. Owners, J. M. and E. M. Branscombe. The work will include both interior and exterior alteration. There will be new plumbing, painting, plastering, mill and carpentry work and electric wiring. Patent store fronts and wall beds are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$70,000. Architects, Webb & O'Neil, Lankershim Bldg., L. A. Owner, A. S. O'Neil. The building will be erected on Figueroa street near 4th, covering an area of 46 by 120 feet. The building will contain a total of 120 rooms arranged in two and three room suites. Interior will be finished in pine and hardwood with marble and ornamental plaster in the lobby. There will be steam heat, a hot water supply, vacuum cleaning system and electric elevator. All suites will have private bath rooms and wall beds. Bath rooms will have tile wainscot and composition floors. Metal window sash and frames are specified. Exterior of the building will be faced with glazed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Architectural Designing Co., Grosse Bldg., L. A. Owner's name withheld. The building has been designed to contain thirty suites of two and three rooms with baths, and will be erected near St. James Park, covering an area of 60 by 105 feet. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. Plans provide for steam heat, wall and disappearing beds and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$40,000. Architects, Western Architectural and Building Co., Coulter Bldg., L. A. Owner, Mr. Newton. The building will be erected on South Bonnie Brae street, and will be arranged for 68 rooms, divided into two and three room suites. Interior will be finished in pine with some elm panels. Oak floors will be used in the halls and living rooms. There will be steam heat, a hot water supply and vacuum cleaning. All suites will have wall beds and private bath rooms. The wainscot and composition floors will be used in the baths. Tile and marble will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are complete and work will be carried on by Day Labor under the direction of the architects.

SEATTLE, WASH.—Apartment house, 4 story and base, brick and steel, \$45,000. Architect, W. H. Miller, Arcade Bldg., Seattle. Owner, F. F. Adams. The building will be erected on Marston street and will have a frontage of 60 feet by a depth of 120 feet. Only preliminary sketches have been prepared, but these show in the neighborhood of thirty suites of two, three and four rooms. Interior finish will be of pine and hardwood with oak floors. There will be steam heat, elevator service and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

PORTLAND, ORE.—Apartment house, story and base, brick and steel. Cost not stated. Architects, Claussen & Claussen, Macleay Bldg., Portland. Owner, Mrs. C. Brown. The building will be erected at the corner of 15th and Lowndale streets, and will cover a large ground area. Each of the upper floors will be divided into nine suites of from two to four rooms and bath. Provision has also been made for three small suites in the basement. Interior will be finished in pine and hardwood. There will be elevator service, dumbwaiters, vacuum cleaning system, hot water supply and steam heat. All suites will have private bath rooms and wall or disappearing beds. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are being prepared.

PORTLAND, ORE.—Apartment house, 3 story and base, brick, \$35,000. Architects, Claussen & Claussen, Macleay Bldg., Portland. Owner, I. Holzman. The building will be erected at the corner of 21st and Overton streets, covering a ground area of 50 by 100 feet. Interior will be arranged for a large number of two and three room suites, all of which will have private bath rooms and wall beds. Pine and hardwood veneer will be used for interior finish. Some oak floors will be specified. Plans provide for steam heat, a hot water supply and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

SEATTLE, WASH.—Apartment house, 6 story and base, reinforced concrete, \$75,000. Architect, none. Owner, W. D. Perkins, Contractor, David Dow, 21st avenue and Spruce street, Seattle. Contract price, \$75,000.

BATH HOUSES.

SAN RAFAEL, MARIN CO., CAL.—Bath house, 1 story, reinforced concrete, \$25,000. Architect, Thomas O'Connor, 104 D street San Rafael. Owners, City of San Rafael. Bids were opened by the Trustees of San Rafael on Monday evening, February 9th, for the construction of the reinforced concrete bath house. Bonds in the amount of \$25,000 were recently voted, but as the lowest bid received was in excess of \$25,000 no contract was awarded. Checks of the three lowest bidders were held and definite action will be taken at the next meeting. A complete list of these figures will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

BRIDGES AND DAMS.

SAN MATEO COUNTY, CAL.—Bridges, reinforced concrete. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Plans have been completed and approved for two small reinforced concrete bridges which are to be erected in San Mateo County. One bridge will be erected in Woodside on the Redwood and La Honda Road and the

other on the La Honda and San Gregorio Road. Plans and specifications can be secured by addressing the County Clerk. Bids will be opened on March 2nd at 10 a. m. Official proposals appear in another column of this issue.

VANCOUVER, B. C. Bridge, steel and concrete, \$200,000. Engineer's name not given. Owners, City of Vancouver. Plans and specifications are now ready for contractors to figure on the proposed Second Narrows bridge, which calls for a structure provided with a single line of steam track, two lines of electric track, two lines of roadway, a footway, together with the necessary approaches thereto, as well as the machinery for the opening span of the bridge and other incidental work. Plans are now out for figures and can be secured from the City Clerk.

KELLOGG, ORE.—Bridge, steel and concrete, \$35,000. Engineer, County Surveyor, Roseburg. Owners, Douglas County. The bridge is to span the Umpqua River at Dimmick Ferry. The main span will be of steel construction and the approaches and retaining walls of reinforced concrete. Provision has been made for a twenty-foot roadway and two four-foot walks. Plans are now being prepared and figures will be called for shortly. Complete particulars can be secured from the County Surveyor at Roseburg.

WENATCHEE, WASH.—Bridge, steel and reinforced concrete, \$30,000. Engineer, County Surveyor, Wenatchee. Owners, Chelan County. Plans and specifications have been adopted by the County Commissioners for a steel and reinforced concrete bridge, and bids will be called for about March 1st. The engineer's estimate shows that about 100 tons of structural steel and 2,500 cubic yards of concrete will be required. Full particulars can be secured from the County Surveyor at Wenatchee.

VENTURA AND SANTA BARBARA COUNTIES, CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, William H. Thomas, L. A. Owners, Ventura and Santa Barbara Counties. Plans have been completed and have received the approval of both Boards of Supervisors for a three hinged reinforced concrete bridge which is to be erected over Rincon Creek on the State Highway. Plans can be secured from the engineer. Bids are now being taken and will be opened on March 2 at 2 p. m.

REEDLEY, FRESNO CO., CAL.—Bridge, wood construction. Cost not stated. Engineer, County Surveyor, Fresno. Owners, Fresno County. The County Surveyor has been instructed to prepare plans for a pile and wooden bridge which is to be constructed over the lower Kings River near Reedley. Bids will be called for as soon as plans can be completed. The old bridge was washed away during the recent heavy storms and trade with the upper country is being badly handicapped.

Contracts Awarded.

SAN FRANCISCO.—Pier alterations, \$14,720. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Bids opened at the last meeting of the State Board of Harbor Commissioners for widening pier No. 54 show Healy-Thibbitts Construction Co., S. F., low at \$14,720. They were awarded the work. A complete

list of bids opened will be found under the heading of San Francisco in this issue.

CHURCHES.

LA GRANDE, ORE.—Church, 1 story and base, brick and concrete, \$60,000. Architects, Houghtaling & Dungan, Henry Bldg., Portland. Owners, Church of Our Lady of the Valley. The church will be of the Gothic style, 45x120. Exterior finish will be of pressed brick trimmed with terra cotta or cut stone. Basement will contain janitor's quarters, heating plant and storage rooms. Main auditorium will have a seating capacity of 550. Altar and communion rail will be of onyx. There will be a choir loft which will have a large pipe organ. Bids will be called for about May 1st, all work to be bid under separate contract. The parish house will be a two-story brick and will contain twelve rooms. All modern conveniences will be installed.

FACTORIES & WAREHOUSES.

SACRAMENTO, CAL.—Packing plant, 2 to 4 story and base, reinforced concrete, \$200,000. Architect, James Seidler, Sacramento. Owners, Swanston Meat Packing Co. The architect has completed the plans for the new packing plant which is to be erected on the Swanston Meat Packing Co. on the property recently purchased by them in the Haggin Grant. Construction will be of steel and concrete. The structure will be 320 feet long and 60 feet wide. Equipment and building will represent an investment of \$200,000. On the main floor will be installed the \$25,000 worth of machinery necessary to operate the plant. There will also be a large casing room for the preparation of the meats, and at one end will be a large cold storage room. The second and third floors will be devoted principally to the killing of the cattle. The knocking pens and other devices for killing are all equipped with drains. Above all the killing pens will be a platform for an inspector of the meat. The platform will be so located as to allow the inspector to oversee the killing in all pens. If he is doubtful as to the appearance of any of the animals, they will be kept over night in a separate room and thoroughly examined again in the morning. The fourth floor will be devoted to ice making. Between eight and ten tons daily will be manufactured for the company's use. A large chute from the top floor will convey the ice directly into the interior of the refrigerator cars on the railroad tracks below.

LONG BEACH, LOS ANGELES CO., CAL.—Cold storage plant, 1 and 2 story, brick. Cost not stated. Architects, C. M. Gay & Son, 335 Towne avenue, L. A. Owners, Home Ice and Cold Storage Co. The building will cover a considerable ground area and will house the ice making equipment and cold storage departments in separate sections of the building. Equipment will call for compressors, engine, two boilers, pumping and refrigerating equipment. Interior will be finished in pine. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SEATTLE, WASH.—Steam plant, 2 story and base, reinforced concrete, \$50,000. Architect, City Architect, Seattle. Owners, City of Seattle. The building will cover an area of 83 by 93 feet and will be of fireproof construction throughout. Metal window sash and frames and cement floor is specified. Contracts for the machinery have already been awarded to C. C. Moore & Co. and Allis-Chalmers Co. at a cost of approximately \$190,000. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

VANCOUVER, B. C.—Ship yards, etc., \$100,000. Architect, N. A. Leech, 615 Pender street, West Vancouver. Owners, English Syndicate represented by Kenneth E. Burnett, J. D. Burdis and J. D. McGee. The plant will be erected on a site on the north arm of the Fraser River near Sea Island. An option has been secured on the site, but only preliminary plans for the plant have been prepared. Further mention will be made of this work.

FIRE HOUSES.

BAKERSFIELD, KERN CO., CAL.—County jail, 2 story, base and mezzanine floor. Class A construction, \$150,000. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, Kern County. The Board of Supervisors recently selected the designs of Architect Clark for the new County Jail and awarded the second prize to Thomas B. Wiseman of Bakersfield, \$250, and third prize to J. W. Dolliver of San Francisco, \$125. The building will be classic in design, of reinforced concrete construction faced with terra cotta. Floors and roof slabs will also be of reinforced concrete. Interior partitions will be of hollow tile and metal lath and plaster. The structure will cover an area of 112 by 100 feet. Basement will contain mechanical room, engineer's quarters, fumigation and bath rooms, armory, storage space and garage. The sheriff's office, general office, three deputy's offices, jailor's rooms and two tiers of steel cells will occupy the first floor. Second floor will be arranged for wash room, dining rooms and kitchen and quarters for the female prisoners. Interior finish will be largely of metal and hardwood. A hospital and cells for inebriates are also provided for in the plans. There will be a steam heating system, vacuum cleaning and hot water supply. Plans are complete and out for figures. Bids close March 6th.

GOVERNMENT WORK AND SUPPLIES.

Removing Rock

Bids for removing Centisima rock near entrance to San Francisco Bay were received by Thomas H. Rees, Lieutenant Colonel of engineers, U. S. army, San Francisco, Cal., as follows: Standard American Dredging Co., Merchants' Exchange, San Francisco, Cal., \$61,500.

Regulating Device.

Abstract of bids for material for balanced-valve regulating device for Salt River project, under advertisement 267:

Advance Machine Co., Los Angeles, Cal., \$120; 30 days, Los Angeles.

Maine Machine Works, Los Angeles, Cal., \$132.50; 15 days, 2 per cent 10 days, Los Angeles.
Fulton Machine Works, Los Angeles, Cal., \$195; 20 days, Los Angeles.
Llewellyn Iron Works, Los Angeles, Cal., \$198; 21 days, Los Angeles.

Cable, Reclamation Service.

Abstract of bids for 1,500 feet triple-conductor cable for Rio Grande project, opened at Los Angeles, Cal., under advertisement No. 266:

General Electric Co., Los Angeles, Cal., \$369; at Engle, N. Mex., 8 weeks.
Pierson-Roeding & Co., Los Angeles, Cal., \$275; at New York, N. Y., 20 days; reels, \$10.

Standard Underground Cable Co., Los Angeles, Cal., \$380.25; Perth Amboy, N. J., 4 to 5 weeks; reels, \$15.
City of Los Angeles, Los Angeles, Cal., \$435; at Los Angeles, 1 day.

U. S. Steel Products Co., Los Angeles, Cal., \$495; at Worcester, Mass., 22 working days; reels, \$10.

Army Work Authorized.

The quartermaster general has approved the following projects: Bids for same will be opened by the officers indicated and to whom only inquiry should be made. The work will be placed on the market at the earliest possible moment.

Fort Worden, Wash., construction of one four-set officers' quarters and two double sets non-commissioned officers' quarters. Under the constructing quartermaster of the post.

Magazine Building, Mare Island.

An advertisement appears elsewhere in this issue calling for bids to be opened March 7 at the bureau of yards and docks, Navy Department, for the construction of a magazine building at the navy yard, Mare Island. The building shall be one story in height and consist of reinforced concrete piers, girders, and subfloor, on which rests the brick walls, wooden sleepers, and tongue and groove flooring; steel trusses and purlins carrying wood sheathing and built-up asbestos roofing, lighting aeriels and conductors; ventilators, windows and doors; fireproof outer doors and shutters; copper gutters and down spouts and a wooden platform. The general dimensions of the building shall be 52 feet 2 inches wide by 102 feet 5 inches long over outside of brick walls and about 15 feet 9 inches from grade to eaves line.

Cement, Reclamation Service.

Abstract of bids for 250,000 barrels of Portland cement received by the United States Reclamation Service, Denver, Colo., on January 15, 1914:

Ash Grove Lime and Portland Cement Co., at Chanute, Kans., 85c per bbl, net.

Atlas Portland Cement Co., at Hannibal, Mo., 96c.

Colorado Portland Cement Co., at Portland, Colo., \$1.

Dewey Portland Cement Co., at Dewey, Okla., 82c.

Henry Cowell Lime and Cement Co., at Bay Point, Cal., \$1.40.

Inland Portland Cement Co., at Metairie Falls, Wash., \$98.

International Portland Cement Co., at Irvin, Wash., \$1.40.

Iola Portland Cement Co., at Iola, Kans., 89c.

Lehigh Portland Cement Co., at Mason City, Iowa, \$1.

Ogden Portland Cement Co., at Bakers, Utah, \$1.33.

Pacific Portland Cement Co., Con., at Toleno, Cal., \$1.40.

Santa Cruz Portland Cement Co., at Davenport, Cal., \$1.40.

Portland Cement Co. of Utah, at Salt Lake, Utah, \$1.28.

Southwestern Portland Cement Co., at El Paso, Tex., \$1.50.

Standard Portland Cement Corp., at Napa Junction, Cal., \$1.40.

Superior Portland Cement Co., at Concrete, Wash., \$1.50.

Three Forks Portland Cement Co., at Trident, Mont., \$1.20.

Union Portland Cement Co., at Devil's Slide, Utah, \$1.33.

United States Portland Cement Co., at Concrete, Colo., 96c.

Universal Portland Cement Co., at South Chicago, Ill., or Buffington, Ind., \$1.06 in sacks, and \$1.04 in bulk.

Western States Portland Cement Co., at Independence, Kans., 95c.

Steel Bars, Boise Project.

The following bids were opened by the Reclamation Service, Boise, Idaho, under specification No. 253, for furnishing steel reinforcing bars for the Boise project, Idaho:

Bid 1. Paul J. Kalman Co., Pioneer Building, St. Paul, Minn.

2. Jones & Lockland Steel Co., 440 W. Lake street, Chicago, Ill.

3. Al H. Hoffman, Wilmo Supply Co., Seattle, Wash.

4. Inland Steel Co., First National Bank Building, Chicago, Ill.

Item 1. 8,500 pieces $\frac{3}{4}$ -in plain steel bars, approximate weight 490,000 lbs—

Bid 1. 1.32c; 2. 1.15c; 3. 1.2c; 4. 1.25c.

Unit, including freight to Boise—Bid 1. 2.015c; 2. 1.97c; 3. 2.0762c; 4. 1.935c.

Total including freight—Bid 1. \$9,873.50; 2. \$9,653; 3. \$10,173.72; 4. \$9,481.50.

Shipping point—Bid 1. Chicago; 2. Pittsburgh; 3. Towanda; 4. Indian Harbor, Ind.

Time first car—Bid 1. 8 days; 2. 30 days; 4. 10 days.

Second car to follow—Bid 1. 7 days; 2. 60 days; 4. 25 days.

Item 2. Alternative for same material—Bid 1. 1.23c; 2. 1.3c; 3. 1.2c; 4. 1.3c.

Unit, including freight—Bid 1. 2.015c; 2. 2.02c; 3. 2.076c; 4. 1.935c.

Total—Bid 1. \$9,873.50; 2. \$9,898; 3. \$10,173.72; 4. \$9,726.50.

Shipping point—Same as for item 1.

Time first car—Same as for item 1.

Time second car—Same as for item 1.

Canal Requisitions.

The Isthmian Canal Commission will soon call for bids for the purchase of the following supplies and material:

1 14-in Venturi meter, complete, with all accessories.

1 12-in Venturi meter, complete, with all accessories.

A quantity of metal cases and shelving for permanent storehouse.

10 sets creosoted switch ties, sawed for standard No. 10 turnout, as per specifications.

50 sets creosoted switch ties, sawed for standard No. 7 turnout, as per specifications.

50 vanadium steel driving springs locomotives.

A quantity of frames, sash, casements, doors, and screens for same,

covering a total of 912 openings, required for four substations in accordance with specifications and drawings.

Ornamental bronze work for administration building, consisting of ornamental bronze and elevator fronts, etc.

A number of cast bronze letters for main entrance and two directory boards at main entrance of administration building.

Approved Projects.

The following bills have passed both houses of Congress and will be approved by the President:

H. R. 11316, authorizing the construction of a bridge and approaches thereto on the Columbia River at or near Vancouver, Wash., by the Missouri, Kansas & Texas R. R. Co.

Additional Pier at Cristobal Terminal.

At a meeting of the board of directors of the Panama Railroad Company, held in New York City on December 22, the construction of an additional pier in the dock system at the Cristobal terminal was authorized at a cost of approximately \$1,100,000. This pier will be of about the same size as pier No. 8 and, although there will probably be some modifications as to details, the plans, in general, will conform to those for piers Nos. 8 and 9, now nearing completion. Borings on the site of the proposed pier, which will be separated only by the width of the slip from pier No. 8, directly south, have been begun. Mr. T. B. Monniche, formerly designing engineer in the department of construction and engineering, in charge of the details for the emergency dam, was transferred, effective December 31, 1913, to the Panama Railroad and will have charge of the design of the new pier.

The matter of abandoning the old Colon docks of the railroad company on or about January 1, 1919, came up at the directors' meeting on December 22, but in view of the fact that it will be 12 months or more before dock No. 7 can be completed, definite action was postponed until a later date.

—HALLS & SOCIETY BLDGS—

OAKLAND, CAL.—Auditorium, 1 and 2 story and base. Class A construction. Cost not stated. Supervising Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The following firms have applied for plans and specifications for the work on the Oakland Municipal Auditorium. Bids are to be opened on February 26th. Lewis A. Hicks Co., Foster-Vogt Co., Williams Bros. & Henderson, Sound Construction and Engineering Co., Van Sant-Houghton, Clinton Fireproofing Co., F. Rolandi, Newsom, Wold & Kohn, L. A. Norris Co., and McLaren & Petersen.

LOS ANGELES, CAL.—Lodge hall and stores, 3 story and base, brick. Cost not stated. Architect, J. T. Zeller, Currier Bldg., L. A. Owners, Lyran Swedish Lodge, Charles E. Strolsche, 2346 Wall street, chairman. The building will be erected at the corner of 18th and Flower streets, covering an area of 52 feet by 154 feet. There will be six stores on the first floor besides the entrance to the upper floors. Aud-

itorium, hall room, kitchens and dining room will occupy the second floor. The third floor will be arranged for lodge rooms. Interior finish will be of pine and hardwood with maple floor in the ball room. There will be steam heat and a vacuum cleaning system, patent store fronts and marble wall-scooting. Exterior of the building will be faced with pressed brick. Plans are being prepared.

ASTORIA, ORE.—Association building, 2 story and base, brick, \$25,000. Architects, McNaughton & Raymond, Title and Trust Bldg., Portland. Owners, Young Men's Christian Association. Only preliminary plans for this building have been prepared, and the architects state that construction will not be started until sometime in July. Further mention will be made of the work. Details of construction are not yet settled.

LA GRANDE, ORE. — Association building, 3 story and base, brick, \$28,000. Architect, Milton H. Block, La Grande. Owners, Young Men's Christian Association. The building will cover a considerable ground area, the main floor containing entrance, business offices, class rooms and auditorium. Second floor will be arranged for the gymnasium and special rooms. Seventeen sleeping rooms will occupy the third floor. Basement will contain a plunge 16 by 40 feet, locker rooms, heating system and social hall. Interior will be finished in pine. There will be steam heat and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

DALY CITY, SAN MATEO CO., CAL.—City hall, 2 story and base, \$5,970. Architects, Smith & Stewart, 244 Kearny street, S. F. Owners, Daly City. Contractor, G. J. Dorrington, 300 Willington street, Daly City. Contract price, \$5,970.

HOSPITALS

PORTLAND, ORE.—Hospital, 5 story and base, reinforced concrete, \$45,000. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, The Emanuel Lutheran Hospital, 209 16th street. The building will be erected on property bounded by Commercial, Graham and 45th streets, covering an area of 45 by 100 feet. The building is to be the first unit of a large group which will cover an area of 358 by 270 feet. The present structure will contain private rooms, wards, operating rooms, maternity wards and nurses' rooms. Construction will be fireproof with reinforced concrete walls and floors. Interior finish will be of pine and hardwoods. There will be steam heat, elevator service and metal window sash and frames. Exterior of the building will be faced with light gray pressed brick. Plans are being prepared.

ROSEBURG, ORE. — Infirmary, 2 story and base, brick. Cost not stated. Architect, F. C. Flagler, Roseburg. Owners, City of Roseburg. The building will cover an area of 56 by 60 feet. First floor will be arranged for general office, dining room, kitchen, women's ward and two sick wards. Upper floor will contain the children's ward and

library. Interior finish will be of pine and hardwood. There will be steam heat. Exterior of the building will be faced with pressed brick. Plans have been completed and received the approval of the City Council. Bids will be called for at once.

HOTELS.

OAKLAND, CAL.—Hotel, 7 story and base. Class B construction, \$110,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, F. W. Elger. The building will be erected on the north side of 16th street between San Pablo and Telegraph avenues, covering an area of 150 by 100 feet. There will be a complete steel frame, brick and concrete walls and wood floors. Interior has been arranged for 170 guest rooms, a large percentage of which will have private baths. Interior finish will be of pine and hardwood. Metal window sash and frames are specified. Plans provide for steam heat, elevator service, a hot water system and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Marble and tile and ornamental plaster will be used in the entrance and lobby. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

FRESNO, FRESNO CO., CAL.—Hotel and stores, 3 story and base, brick and steel. Cost not stated. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, Paul Mayer. The building will be erected at the corner of Kern and H streets and will cover a considerable ground area. There will be a number of stores on the first floor besides the hotel entrance and lobby. Upper floors have been arranged for a total of 150 rooms and several baths. Interior will be finished in pine throughout. Patent store fronts, steam heat and a hot water system are specified. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BRAWLEY, IMPERIAL CO., CAL.—Hotel, 4 story and base, brick, \$100,000. Architect, L. Roebig, American Bank Bldg., L. A. Owner, C. A. Johnson. Only preliminary plans for this work have been prepared and it is impossible to publish details of construction at this time. As soon as further plans are made more information will be given.

LOS ANGELES, CAL.—Hotel, 4 story and base, Class C construction. Cost not stated. Architects, Walker & Vawter, Hibernal Bldg., L. A. Owner, D. F. Hill. The building will be erected at the northwest corner of 8th and Wall streets, having a frontage on one street of 70 feet and 120 feet on the other. First floor will contain four stores and the hotel lobby. Upper floors will be arranged for a total of 110 guest rooms and 40 baths. Interior finish will be of pine and redwood. Plans provide for steam heat, elevator service, hot water supply and vacuum cleaning. There will be metal window sash and frames and metal lath and plaster partitions. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Marble and tile will be used in the stores and

lobby. Plans are being prepared. Bids will be called for shortly.

LOS ANGELES, CAL.—Hotel, 3 story and base. Class C construction, \$60,000. Architect, Leonard L. Jones, H. W. Hellman Bldg., L. A. Owner, Louis Nordlinger and W. W. Paden. The building will be erected on Flower street between 3rd and 4th streets, covering an area of 80 by 150 feet. Entire building will be occupied by the hotel. Plans provide for a total of 120 guest rooms and 60 baths. Interior will be finished in pine and hardwood. There will be steam heat, hot water supply and vacuum cleaning system. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are now practically complete and figures will be called for at once.

LOS ANGELES, CAL.—Hotel, 3 story and base. Class C construction, \$45,000. Architects, Mayberry & Parker Electric Bldg., L. A. Owner, Mrs. Squires. The building will be erected on Wilde street near Central avenue, covering an area of 110 by 125 feet. There will be a total of 135 guest rooms with private and public baths. Plans provide for steam heat, a hot water supply and vacuum cleaning. There will be metal window sash and frames. Interior will be finished in pine. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Bids will be taken from contractors who can finance the project either wholly or in part. Working drawings have been completed.

SAN FRANCISCO—Hotel, 6 story and base. Class B construction. Cost not stated. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Hyman Estate. The building will be erected at the southwest corner of Eddy and Taylor streets and will cover a full Fifty Vara lot. There will be several stories besides the hotel lobby and entrance on the first floor. Upper floors will contain in the neighborhood of 200 guest rooms, a large percentage of which will have private baths. There will be a complete steel frame and exterior walls of brick faced with pressed brick. Interior finish will be of pine and hardwood. Metal lath and plaster interior partitions and metal window sash and frames are specified. Plans provide for steam heat, elevator service, vacuum cleaning, hot water system and special electric work. Ornamental plaster will also be used. Bath rooms will have tile wainscot and composition floors. Plans are complete and figures are being taken.

OAKLAND, CAL.—Hotel, 2 story and base, frame. Cost not stated. Architect, none. Owner, Ben O. Johnson, 2014 East 30th street, Oakland. The building will be erected on the west side of San Pablo avenue north of 27th street. There will be one store on the first floor and a number of single rooms and baths on the second floor. Interior finish will be of pine and redwood. There will be a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SACRAMENTO, CAL.—Hotel addition, 6 story and base. Class B construction.

Cost not stated. Architect, E. C. Hemmings, Sacramento. Owner, Mrs. Nettie Evans, owner of the Land Hotel. The Land Hotel on K street is to have a new addition of six stories erected in the rear of the present building. Only preliminary sketches have been prepared and details of construction have not been made public. Further mention will be made of the work as the plans progress.

SEATTLE, WASH.—Hotel, 5 story and base, frame. Cost not stated. Architect, John Graham, Lyon Bldg., Seattle. Owner, P. J. Murphy. The building will be erected on 6th avenue, between Main and Jackson streets, and will cover an area of 60 by 120 feet. There will be a total of 135 rooms and a number of public baths. Interior will be finished in pine. There will be steam heat and a hot water system. Bath rooms will have composition floors. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 12 story and base. Class A construction, \$300,000. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owner, Verne L. Carter. Contractors, Dutro-Wren Construction Co., Van Nays Bldg., L. A. Contract price, \$300,000.

LIBRARIES.

PALO ALTO, SANTA CLARA CO., CAL.—Library, 2 story and base. Class A construction. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Leland Stanford, Jr., University. Architects, Bakewell & Brown are working on preliminary plans for the new library building which is to be erected at Palo Alto for the Leland Stanford University. The library is to form the central building of the proposed new quadrangle and will be located midway between Encina Hall and the present quadrangle. Construction will be of the Class A type throughout, the design being similar to that of the present library building. Librarian George T. Clark of Stanford University has outlined to the architects the requirements of the building and these plans show a two-story structure with the main reading room occupying the second floor. The system planned will be what is known as a general library as opposed to the departmental system now in use at the University.

COALINGA, FRESNO CO., CAL.—Library, 2 story and base, reinforced concrete, \$20,000. Architects, Swartz, Hotchkins & Swartz, Rowell Bldg., Fresno. Owners, Coalinga Union High School Library District. The building will be designed in the classic style and will be of semi-fireproof construction. Interior will provide two reading rooms, stack rooms, librarian's office and storage room. Pine and hardwood trim and maple floors will be used. There will be a central heating system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be opened on February 25th. Plans and specifications can be secured from the architects.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, Henry W. Jansen, 536 27th avenue, S. F. Owner, Frank Lapham, 520 15th avenue.
